Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-138. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 171

VI. OTHER BUSINESS:

DISCUSSION REGARDING NEGOTIATIONS OF THE WATER AGREEMENT

RESOLUTION NO. 05-139 – RESOLUTION OF THE CITY OF ASHEVILLE, NORTH CAROLINA, REGARDING TERMINATION OF THE WATER AGREEMENT WITH BUNCOMBE COUNTY

Considerable discussion surrounded Councilman Newman's proposal if there is not an agreement reached between the City and the County. He addressed some of the following concerns: (1) concern customers who live outside the City feel there may be some sudden and dramatic changes to their water bills if there is no agreement is reached and the City resumes full management and governance of the water system; (2) concern about different rates for customers inside and outside Asheville; and (3) concern the current water customers might be required to annex into Asheville as a condition of continuing to receive water service. He suggested that if there is no agreement reached between the City and County that the City Council would agree for a period of at least 12 months to not institute any rate deferential between customers inside the City and outside the City of Asheville. In addition, the City would make it a policy that existing water customers outside the City of Asheville would never be annexed into the City of Asheville as a condition of continuing to receive water service. These proposals would allow us some additional time to continue to talk to the County Commissioners to see if there are some ways that we can reach agreement about water policies into the future. The final element of the proposal, would be that even if we don't reach an agreement this week that we would communicate our willingness to impose these restrictions on ourselves to provide reassurance to all parties and that we would request that we establish a regular time for open public meetings with our County Commissioners to continue to seek a final mutually acceptable resolution to the water issues in our community. If, however, the State of North Carolina passes either of the two anti-Asheville bills, this agreement would be null and void because the City would be forced at that point to defend the interests of the people of Asheville through appropriate legal measures.

Mayor Worley said that it never has been the City's intent or policy and is not and will not be our policy that existing water customers outside the City of Asheville would have to be annexed into the City of Asheville as a condition of continuing to receive water service.

Councilman Dunn explained why he did not want to box ourselves into a 12 months of not instituting any rate deferential between customers inside the City and outside the City of Asheville.

Vice-Mayor Mumpower explained why would be able to support the resolution for a shorter period of time.

Councilman Newman explained why he is proposing the 12-month period of refraining from implementing any rate deferential, which is basically to give opportunities for public negotiations between the City and the County.

Councilman Newman moved to adopt Resolution No. 05-139 as follows: WHEREAS, the Water Agreement between Asheville and Buncombe County will expire at midnight on June 30, 2005; and WHEREAS, there are pending in the North Carolina General Assembly two local acts affecting Asheville known as Sullivan Act II and Sullivan Act III; and WHEREAS, Asheville and Buncombe County have been negotiating over the issues surrounding the termination of the Water Agreement, which negotiation has been severely hampered by the pending legislation; and WHEREAS, there have been misunderstandings about the intent of the City of Asheville with regard to continued water service for water customers of the City of Asheville system living outside the corporate limits of Asheville; and WHEREAS, there is a desire on the part of the Asheville City Council to have regular, periodic meetings with the Buncombe County Commissioners to seek a resolution of the issues surrounding the termination of the Water Agreement; NOW, THEREFORE BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF

ASHEVILLE THAT: (1) The City of Asheville does hereby agree not to charge or attempt to charge a rate differential to water customers of the City of Asheville system living outside the corporate limits of Asheville at any time prior to July 1, 2006, provided that the pending legislation known as Sullivan Act II and Sullivan Act III is not enacted into law; (2) The City of Asheville further reaffirms that it has never been its intent, is not its intent and will not be its policy in the future to require any existing customer of the Asheville water system residing outside the corporate limits of Asheville to annex into the City of Asheville as a condition of continuing to receive water; and (3) The Asheville City Council further requests that the Buncombe County Commissioners establish a regular, periodic open meeting schedule with the Asheville City Council for the purpose of seeking a resolution to the issues surrounding the termination of the Water Agreement. This motion was seconded by Councilwoman Bellamy.

Ms. Leslee Kulba felt the City should not cave into Buncombe County. She didn't see where the County is negotiating with the City and the City should re-think another strategy.

Councilwoman Jones felt that it is clear that the citizens care about the water issue and they don't want it to be resolved at all costs. She spoke about the City's commitment and willingness to continue this meeting until later this evening to work on the water agreement.

The motion made by Councilman Newman and seconded by Councilwoman Bellamy carried on a 4-3 vote, with Mayor Worley, Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 172

MISCELLANEOUS

Vice-Mayor Mumpower thanked Capital Fitness which donated fitness equipment to the Fire Department.

Vice-Mayor Mumpower spoke about the success of the For Our Kids event in Pisgah View Apartments.

Vice-Mayor Mumpower also applauded Jean McCloud for her work in litter clean-up.

CLAIMS

The following claims were received by the City of Asheville during the period of May 27-June 9, 2005: Lori Becker (Streets), David Freeland (Police), Duraline Imaging (Fire) and 29 Haywood Street (Parks & Recreation).

The following claims were received by the City during the period of June 10-23, 2005: Christopher Hollifield (Police), Dan Zavoras (Water), Carol Haack (Parking Garage), Abraham Adams (Police) and Franklin Fountain (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

CONTINUATION OF REGULAR MEETING

At 9:30 p.m., Mayor Worley continued the regular meeting until Thursday, June 30, 2005, at 4:00 p.m., in the Council Chamber of the City Hall Building.

Continuation of Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Phyllis Corns

Absent: Vice-Mayor R. Carl Mumpower

At 4:00 p.m., Mayor Worley reconvened the regular meeting.

Mayor Worley said that City Council has worked very hard with the Buncombe County Commissioners over the last year to negotiate an appropriate resolution to the water agreement. Council has been absolutely dedicated to advocating for the best interests of the City residents that we serve. He recapped the reasoning and history of the termination process of the water agreement. He then reported on his and City Attorney Oast's meeting with the General Assembly yesterday before the Senate Committee on Local Government that was considering the Sullivan II and III bills. We found that one of the bills had been substantially altered from what we had previously seen. The altered bill made is very clear that water could not be used in any manner or method to promote growth of the City's boundaries. It also said there would be no transfers of any funds from the Water Fund to the General Fund. Actually, City Council wanted the revenue from the assets of the water system to go back into the water system to meet the needed maintenance requirements. We have consistently talked about doing that, but we talked about doing a phasing in period of five years. We approved our budget on June 28 including those funds ($1 Million) and now find that the legislature took that away from us. He explained the terms of the resolution Council passed Tuesday night to the Local Government Committee. He asked the Committee to defer action on the bills, leave them in place, and if we can't come to an agreement, then the legislature would be free to take whatever action they deem most appropriate with respect to the bills. He stressed there was no need to rush through them right now. The Committee, the Senate, and the House, however, quickly approved both bills.

City Manager Jackson said that we have a very well thought out transition plan and have been communicating closely with the County for a smooth transition. Interim Water Resources Director David Hanks spoke on how the water system transfer will occur and Parks and Recreation Director Irby Brinson spoke on how the recreation facilities transition will occur.

City Manager Jackson spoke about the transition of the maintenance of water lines in the County. With the agreement termination those become a County maintenance responsibility. It is his preference for all the operation and maintenance of the water system to be a City responsibility and it would be a better-managed system if all the operation and maintenance of that system would be done in one place. The question is what would be the fair compensation to the City for managing and operating those assets, which are no longer a City responsibility. Those discussions between him and the County Manager will continue.

City Manager Jackson said that we basically have a $1.1 to $1.2 Million budget question. Through City staff, he is developing a series of cost-cutting alternatives that he will bring back to Council in 60-90 days. They would like to have the time to evaluate not only the impact of this legislative change and the timing of it, but also to re-evaluate our revenue generation options and get direction from Council on potential operating impact reductions, etc. In an interim period, he suggested Council implement the budget as approved by Council on June 28, with the exception that we implement what we can administratively, without impacting services or making any policy changes, such as, postpone hirings, postpone acquisition of equipment, entering into contracts

that are not time-sensitive or mission critical. We will challenge ourselves to close this gap administratively while we develop a very comprehensive budget amendment package that Council might consider. Council has the ability today to proceed under the budget document that Council approved on June 28 and to weigh your alternatives for potential amendments in the future. That is made possible because the City, under Council's leadership, has established a significant Fund Balance.

It was the consensus of Council to have the City Manager bring back a proposed budget balancing plan in 60-90 days.

Each Council member briefly commented on their perspective of the water agreement negotiations.

Mayor Worley responded to various questions from the media.

Closed Session

At 4:58 p.m., Councilman Newman moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Gannett Pacific Corporation d/b/a Asheville Citizen-Times Publishing Company, an Hawaii Corporation; Chesapeake Television, INC., d/b/a WLOS-TV, a Maryland Corporation; City of Asheville; and County of Buncombe, and to discuss potential litigation The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 6:10 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:10 p.m.

Magdalen Burleson
CITY CLERK

Charles D. Worley
MAYOR

Tuesday – July 12, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JULY 11-18, 2005, AS "SWEET ADELINES INTERNATIONAL WEEK"

Mayor Worley read the proclamation proclaiming July 11-18, 2005, as "Sweet Adelines International Week" in the City of Asheville. He presented the proclamation to Ms. Lee Hines, Chair of the local chapter Song O' Sky. The local chapter also gave City Council a short performance.

II. CONSENT AGENDA:

Due to a conflict of interest, Councilwoman Bellamy asked that Consent Agenda items "D" and "E" be removed for individual votes.

A. RESOLUTION NO. 05-140 - RESOLUTION ADOPTING "TRIPLE H DRIVE" AS A NEW STREET NAME LOCATED OFF SAND HILL ROAD

Summary: The consideration of a resolution adopting Triple H Drive as the name for the new street located off Sand Hill Road.

The owners of property located off of Sand Hill Road have requested a new street name of "Triple H Drive." Staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any new street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. A street name was necessary to facilitate specific street name and numbers for new structures. It would be impractical, and due to the existing street numbers, impossible to address the new structure from Sand Hill Road without causing emergency response delays.

Pros:

- The street will be utilized to access twelve (12) new homes.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Cons:

- There are no negative affects of for assignment of Triple H Drive to this new road.

This action complies with the City's Strategic Operating Plan as it validates levels of emergency services provided for our citizens. This is found in the Critical Services and Infrastructure, Goal 3 – Strong City and County Partnerships, Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; and Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends adoption of the resolution establishing Triple H Drive as the name for the new street located off Sand Hill Road.

RESOLUTION BOOK NO. 29 – PAGE 174

B. RESOLUTION NO. 05- 141 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. STATE RURAL ECONOMIC DEVELOPMENT CENTER TO PREPARE REDEVELOPMENT PLANS FOR THREE AREAS ALONG THE SWANNANOA AND FRENCH BROAD RIVERS

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Rural Economic Development Center to prepare redevelopment plans for three areas along the Swannanoa and French Broad Rivers, and approval of the accompanying budget amendment, in the amount of $40,000.

In response to last fall's flooding, the General Assembly provided grant funding through the Rural Economic Development Center for communities that suffered flood damage. This funding includes planning monies (the subject of this report) as well as future implementation monies of up to $700,000 per redevelopment area.

The City of Asheville applied for funding for three areas along the Swannanoa and French Broad Rivers. One area, the Biltmore Village area, was specifically earmarked in the legislative allocation. The other two areas – East Swannanoa and French Broad – were pursued by staff and determined eligible for funding by the Rural Center. We have received a total of $40,000 for planning in the three areas.

Staff has been analyzing these areas in anticipation of market-driven and flood-related redevelopment and these funds will enable us to enhance our research. We will have a draft product for Council consideration by the end of July in accordance with the provisions of the grant agreement.

Pros:

- Allows us to develop an enhanced redevelopment plan for each of these areas.
- Provides a potential source of plan implementation funding.

Cons:

- None noted.

City staff recommends City Council adopt the resolution authorizing the City to enter into the redevelopment planning grant agreement with the Rural Economic Development Center, and approval of the accompanying budget amendment.

C. **ORDINANCE NO. 3258 - BUDGET AMENDMENT TO ACCEPT GRANT FROM THE N.C. STATE RURAL ECONOMIC DEVELOPMENT CENTER TO PREPARE REDEVELOPMENT PLANS FOR THREE AREAS ALONG THE SWANNANOA AND FRENCH BROAD RIVERS**

Summary: See Consent Agenda Item "B" above.

ORDINANCE BOOK NO. 22 – PAGE 185

D. **RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE CLINGMAN AVENUE/HAYWOOD ROAD CORRIDOR STREETSCAPE AND GREENWAY – PHASE II**

This item was removed from the Consent Agenda for an individual vote.

E. **BUDGET AMENDMENT FOR AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE CLINGMAN AVENUE/HAYWOOD ROAD CORRIDOR STREETSCAPE AND GREENWAY – PHASE II**

This item was removed from the Consent Agenda for an individual vote.

F. **RESOLUTION NO. 05-142 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A TEMPORARY SERVICES AGREEMENT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT INC.**

Summary: The consideration of a resolution authorizing the City Manager to enter into a Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. (F.I.R.S.T.) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation and Street Divisions), and the Civic Center. This agreement is a collective contract for all City Departments.

F.I.R.S.T. is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville has utilized F.I.R.S.T staff for the past two years with excellent results.

Benefits to contracting with F.I.R.S.T. Inc. include:

- Reduced costs in recruiting, hiring, and benefits for full-time workers.
- There is a savings realized in management costs.
- The City is guaranteed all F.I.R.S.T. personnel requested enabling operations to be fully productive at all times.

A negative aspect of using F.I.R.S.T. Inc. is that the City of Asheville must negotiate an annual contract for this service.

City staff recommends approval of the Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. for temporary workers.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Dunn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 05-143 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE CLINGMAN AVENUE/HAYWOOD ROAD CORRIDOR STREETSCAPE AND GREENWAY – PHASE II

Councilman Newman moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with North Carolina Department of Transportation (NCDOT) for an Enhancement Grant for the Clingman Avenue/Haywood Road Corridor Streetscape and Greenway, Phase 2, and the accompanying budget amendment, in the amount of $235,120.

In June 2004, the City of Asheville partnered with various organizations to make application to NCDOT for a TEA-21 Enhancement Grant for various projects. The grants can only be awarded to a local government. NCDOT awarded the grant in the amount of $235,120 for the Clingman Avenue/Haywood Road Corridor Streetscape and Greenway, Phase 2. Mountain Housing Opportunities is responsible for the 20% match for the grant.
The is the second phase of the project which includes enhancements on Clingman Avenue and the development of a parallel greenway through Clingman Forest as well as major pedestrian improvements to Clingman Avenue and Haywood Road.

Pros:

- Mountain Housing Opportunities will receive $235,120 with a 20% match to make improvements to the West-End Clingman area.

Cons: There are not negative considerations of this project.

City staff recommends City Council authorize the City Manager to sign a municipal agreement with NCDOT for an Enhancement Grant for the Clingman Avenue/Haywood Road Corridor Streetscape and Greenway, Phase 2, and the accompanying budget amendment for enhancement agreement with NCDOT for the TEA 21 Enhancement Grant.

Councilman Newman moved for the adoption of Resolution No. 05-143. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 177

ORDINANCE NO. 3259 - BUDGET AMENDMENT FOR AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE CLINGMAN AVENUE/HAYWOOD ROAD CORRIDOR STREETSCAPE AND GREENWAY – PHASE II

Councilman Newman moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

Summary: See Resolution No. 05-143 above.

Councilman Newman moved for the adoption of Ordinance No. 3259. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 187

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON TUNNEL ROAD, KNOWN AS THE FOUR SEASONS PLAZA, IN ORDER TO CHANCE ACCESS AND INCREASE THE PARKING AREA

ORDINANCE NO. 3260 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON TUNNEL ROAD, KNOWN AS THE FOUR SEASONS PLAZA, IN ORDER TO CHANCE ACCESS AND INCREASE THE PARKING AREA

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:28 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of the issuance of a conditional use permit for property located on Tunnel Road, known as the Four Seasons Plaza, in order to change access and increase the parking area.

Regarding the City Council's Strategic Operating Plan, the proposed project would improve sidewalk connectivity and set aside open space. In addition, it has the potential to provide services within a short distance of neighboring residential areas. This revision to the concept plan also would preserve the residence on the southwest parcel, further increasing its compliance with the Strategic Operating Plan.

This review concerns a proposed project, which was approved for a conditional use rezoning earlier this year. The project requires a second review because the master plan has been modified slightly and now involves another parcel on which an easement has been

obtained. Additional modifications to the plan do not substantially change the character of the proposed development, and are summarized below.

The subject properties (owned by Mediterranean Property Management, LLC) are being considered for a retail and office development with associated parking, located on 1.94 acres on the south side of Tunnel Road (Attachment to City Exhibit 3 – Location Map). The area on which the proposed project would be built consists of five parcels within the City of Asheville's corporate limits. All parcels are zoned HB or HB-CUZ (Attachment to City Exhibit 3 – Aerial Map). The applicants have obtained an easement on the parcel added to the concept plan, and the area in that easement will be used for shared access to parking. The project has a total building area of 22,000 square feet, placing it within the acceptable structure size standards and exempting it from open space requirements. Sidewalks are shown as required by Sec. 7-11-6 of the Unified Development Ordinance (UDO).

The major modifications from the previous plan are the following (Attachments to City Exhibit 3 – Rendering and Site Plan):

- The proposed building has been shifted closer to the street, moving it farther from the residential areas to the south, and allowing for the preservation of the single family residence in the southwest lot.
- The parking areas have been rearranged to allow for another ingress/egress (involving the aforementioned easement). Note also that the existing driveway to the northwest will now serve only the house (in the previous submission it had been an exit for the whole project).

At their May 16, 2005, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the Conditional Use Rezoning and concept plan proposal and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission, stipulating the following project conditions summarized as follows. Please note that the plans accompanying this report have been revised since the TRC meeting to address a number of the conditions mentioned in the TRC staff report:

1. Streams on or near property must be shown and labeled.
2. Calculations for parking spaces must be included.
3. Setbacks and encroachments must be shown and labeled.
4. Detailed information for landscape design (including required street trees and buffers) must be included.
5. The street address listed on the plans for the project should be corrected.
6. Clarification of the use for the existing residence must be provided.
7. Sidewalk and grass strip will be required along Tunnel Road, and Sidewalk or fee-in-lieu-of will be required along Swannanoa River Road.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina

Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

Though some grading and site disturbance will be required, the proposed project's design will mostly preserve the existing topographic relationships. Provided the applicant employs proper erosion control measures and the proposed landscaping and mitigation, the nearby streams should not be adversely affected.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The proposed use would provide an upgrade from the existing commercial development along the southern side of Tunnel Road, providing a likely improvement in value for neighboring commercial property. The orientation of the project towards Tunnel Road, as well as its position at a different vertical level than the adjacent residential lots would minimize any effect it would have on those properties' values.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The existing Sonic restaurant to the west and retail complex to the northeast are uses of a similar scale, bulk, and coverage to the proposed development. The residential areas to the south and west are of a different character, but the topography mentioned above arguably puts the two uses in somewhat different plane. Required landscaped buffering will further separate the differing uses. The proposed project would mostly represent a modernization of commercial terrain with a perceptible, though less significant, expansion into the area of the property currently used only for residential purposes.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the Asheville City Council in 2000. The Commercial Area Redevelopment policies encourage projects such as this one that will add street trees and improve pedestrian access. The proposed project will also preserve open space beyond what is required, complying with another of the plan's goals. In addition, the project has the potential to provide services within a short distance of neighboring residential areas. The revisions submitted for this permit preserve a single family residence, increasing its compliance with the plan compared to the previous version.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The project's location on Tunnel Road and near Swannanoa River Road ensures access to major transportation facilities and other services. Transit routes 13 and 28 serve the area. In addition, technical review from other departments has not revealed any problems for serving the development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. The proposed entrances and exits are similar to those currently in place.

Pros

- Upgrade of existing commercial area
- Furthering of Plan 2025 goals as mentioned above
- Potential to provide services convenient to neighboring residents

Cons

- Commercial presence will be more visible to adjacent residential areas than is currently the case.

Staff recommends approval of the revised Conditional Use Permit concept plan subject to the conditions mentioned above.

Mayor Worley closed the public hearing at 5:34 p.m.

Upon inquiry of Councilwoman Bellamy about buffering between the new building and the existing residence on the property, Mr. Esselstyn said that the existing house is owned by the applicant and buffering is used to separate properties.

Ms. Linda Melissotis, owner of the property, said that a family member will be living in the existing house and they will keep as much of the existing vegetation as possible.

Using an earlier site plan (City Exhibit 4), Mr. Esselstyn reviewed the buffering requirements of this property with the adjoining properties.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3260, granting a conditional use permit adopting the proposed Master Plan for property located on Tunnel Road, known as the Four Seasons Plaza, subject to the following conditions: (1) Streams on or near property must be shown and labeled; (2) Calculations for parking spaces must be included; (3) Setbacks and encroachments must be shown and labeled; (4) Detailed information for landscape design (including required street trees and buffers) must be included; (5) The street address listed on the plans for the project should be corrected; (6) Clarification of the use for the existing residence must be provided; and (7) Sidewalk and grass strip will be required along Tunnel Road, and Sidewalk or fee-in-lieu-of will be required along Swannanoa River Road. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 189

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 891 PATTON AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/ CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED EMPLOYEE PARKING LOT

Mr. Dennis Ponder, representing Harry's Cadillac, said that yesterday they learned that there was community opposition (a valid protest petition) and requested this public hearing be continued until July 26, 2005, in order to meet with the community to discuss the plans.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

Mr. Nathan Merchant, resident on Hazel Mill Road, spoke against the continuance. He said this issue has been going on since last fall and nothing with the project has changed.

Mr. Clifton Means, resident on Hazel Mill Road, spoke against the continuance as the neighborhood has been in attendance at every meeting and they already understand the project.

Mr. Ponder said that at the earlier meetings he didn't have some of the renderings. He said that he feels that it will be beneficial to the neighborhood to see what the final produce will actually look like.

Upon inquiry of Councilman Newman, Mr. Ponder said that the neighborhood meeting will not only be to review the information, but there may be modifications to the plans to address the neighborhood concerns.

After a brief discussion, Vice-Mayor Mumpower moved to continue the public hearing until July 26, 2005. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Councilman Newman voting "no."

C. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR PROCEDURES AND STANDARDS FOR SUBDIVISIONS**

ORDINANCE NO. 3261 - ORDINANCE CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR PROCEDURES AND STANDARDS FOR SUBDIVISIONS

Mayor Worley opened the public hearing at 5:41 p.m.

Urban Planner Julia Coburn said that this is the consideration of an amendment to the Unified Development Ordinance for the purpose of amending the procedures and standards for subdivisions. This public hearing was advertised on July 1 and 8, 2005.

City staff is proposing this wording amendment concerning the procedures and standards for subdivisions to accomplish three things:

- To clarify the procedures and standards to which "exempt subdivisions" must adhere.
- To codify a staff interpretation concerning access to small (four or fewer lot) subdivisions.
- To place access standards in both the subdivision (by reference) and general development standards of the UDO so that there is no question that all subdivided properties (exempt or nonexempt) must comply with these standards in order to obtain development permits.

The UDO sets forth regulations in Article XV for the division of land within its jurisdiction. In accordance with the N. C. Gen. Stat. sec. 160A-376, certain divisions of land are set forth in Article XV as "exempt subdivisions" and therefore, are not subject to the regulations authorized by the State and contained in Article XV of the UDO.

While the City has long had established procedures for handling these "exempt subdivisions" it was determined that these practices needed to be codified for the benefit of all reading this section of the ordinance. The proposed amendment sets out the statutorily

determined situations that constitute an exemption (7-15-1(b)(1)) and also specifies (7-15-1(b)(2) that consecutive "exempt land divisions" of the same tract or parcel, created as a means of circumventing the subdivision standards, will not be permitted if occurring within five (5) years of each other. These two sections are substantively unchanged from the current UDO, except for the clarifying addition of the five (5) year time limitation. The proposed amendment goes on to require that a certification of exemption be received prior to the recordation of an exempt subdivision in order for staff to confirm the exempt status of the proposed division of land. The most important clarification found in this amendment is contained in proposed Section (7-15-1(b)(4)) that outlines the effect of a certification of exemption. This proposed provision clarifies that while an "exempt subdivision" may be recorded without review and without compliance with the City's subdivision regulations, a building or zoning permit will only be issued for subdivided property if that property meets the standards for development set forth in the UDO. In practice, although it will not be required, staff plans to encourage those proposing an exempt subdivision to bring in a plat which can be reviewed both for the certification of exemption and for compliance with all City regulations.

This amendment also adds wording to Article XV (Subdivisions), by reference, and Article XI (Development and Design Standards) to codify a staff interpretation concerning small (four lots or fewer) subdivisions. This interpretation/proposed amendment states that where there is a division of land into not more than four (4) lots for development for single-family purposes, such subdivisions need not comply with the requirement that all residential lots abut a public street or private street developed to City standards. As an alternative, such subdivisions must provide for a recorded minimum twenty (20) foot right-of-way off of a city- or state-maintained road. Such rights-of-way shall contain a private drive meeting construction specifications concerning materials, the need for a turnaround, and the slope of the road. The ability to create these small subdivisions is limited, in the amendment, to those not coming from a parcel in the same ownership. Additionally, the amendment sets forth a spacing requirement to reduce the proliferation (in a single area) of these exceptions to the subdivision regulations.

The final element of this proposed amendment involves moving the access requirements (both commercial and noncommercial) currently found in the subdivision regulations (Article XV) to the City's general development standards (Article XI) with reference in the subdivision regulations. This amendment serves to clear up any confusion as to whether or not exempt subdivisions must comply with the access requirements of the UDO.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment clarifies and codifies the City's practices with respect to exempt subdivisions and adds a requirement for certification of exemption.
- The amendment sets forth an allowance for small single-family subdivisions to have access off a private drive meeting certain standards. Adding such a provision can facilitate infill development.
- The amendment clarifies that all lots, whether in exempt or nonexempt subdivisions, must meet the City's access standards.

Cons-

- Certifying exemption may be viewed as an unnecessary exercise for those subdividing properties.
- Private drives may be seen as insufficient access to developed properties.

The Planning and Zoning Commission recommended approval of this code amendment on February 2, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Mayor Worley closed the public hearing at 5:49 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3261. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 194

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE CREATING A NEW LIGHT INDUSTRIAL DISTRICT

ORDINANCE NO. 3262 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE CREATING A NEW LIGHT INDUSTRIAL DISTRICT

Mayor Worley opened the public hearing at 5:51 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to create a Light Industrial District. This public hearing was advertised on July 1 and 8, 2005.

This code amendment is intended to implement several infill development, community compatibility, and economic development goals and strategies of the Asheville City Development Plan 2025 through the creation of a new zoning district that allows for limited industrial development.

The amendment fills a gap between higher intensity industrial zoning districts and heavy commercial districts.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros –

- Several goals and strategies of the 2025 Plan will be implemented.
- A wider range of land uses would be available to property owners.

Con – None noted.

The Planning and Zoning Commission recommended approval of this amendment on April 6, 2005, by a vote of 6-0. City staff also recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 5:53 p.m.

Mr. Shuford responded to Councilman Newman's question about properties that would desire this zoning designation.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3262. This motion was seconded by Councilman Davis and carried unanimously.

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING OPEN SPACE STANDARDS REVISIONS

Mayor Worley opened the public hearing at 5:57 p.m.

Planning and Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance to revise the open space standards to ensure a more uniform application of the standards and to provide for a fee-in-lieu option. This public hearing was advertised on July 1 and 8, 2005.

This code amendment is intended to implement goals, objectives and tasks of the City Council's Strategic Operating Plan related to the Natural and Built Environment. The Strategic Operating Plan proposes enhanced recreational facilities, especially greenways, as well as a fee-in-lieu program.

The UDO currently contains requirements for open space provision for property being developed or redeveloped for residential and for tourist accommodation purposes. These requirements note the connection between development and loss of open space, and include measures to compensate for this loss. In practice, however, the current requirements are not especially effective in providing meaningful compensatory open space and may, in some cases, actually be at odds with City smart growth policies that promote a more urban development pattern.

The proposed ordinance provides a more balanced approach to open space provision by better relating it to the use proposed for the property, the associated zoning district or districts, and any related park, greenway and open space plans and policies. Additionally, there is greater flexibility created by providing for fee-in-lieu of open space.

The amendment has been routed to the Downtown Commission, CAN, CREIA, and CIBO for review and comment.

Pros –

- Several goals and strategies of the Strategic Operating Plan will be implemented.
- The amendment will provide for a more effective provision of meaningful open space.
- There is greater developer flexibility.

Con –

- The amendment applies to a wider range of land uses and therefore may be considered more restrictive than current requirements (possibly a pro).

Planning and Zoning members opposed to the amendment noted concerns that included a failure to see the benefit of requiring open space as a regulation in general, concern about the effect on smaller developments, and opposition to the fee-in-lieu concept.

The Planning and Zoning Commission recommended approval of this code amendment on June 1, 2005, by a vote of 4-3. City staff recommends approval of the proposed code amendment, as well.

Mr. Shuford said that City Council's Strategic Operating Plan calls for enhanced recreational facilities, especially greenways, as well as an open space fee-in-lieu program. City

staff has development an ordinance intended to help implement these Strategic Operating Plan objectives, as well as some of the goals and strategies of the 2025 Plan.

The ordinance applies open space requirements to a broader range of land uses, including smaller non-residential projects, and smaller residential developments. In most circumstances, it allows a developer to opt to pay a fee in-lieu of open space instead of providing the open space. It caps the amount of open space required at 10% for residential and 5% for non-residential and mixed use development; this eliminates the "penalty" that affects denser or more intensive developments in the current ordinance. It requires the City to expend open space fee dollars in areas reasonably proximate to where they are collected. It broadens the types of areas that can be used for open space. In the event that "excess" land area is required to implement the Greenway Master Plan, density or intensity bonuses are available. He then reviewed a table, which provided a very abbreviated comparison between current and proposed requirements in residential, non-residential and mixed use zoning districts.

Mayor Worley closed the public hearing at 6:20 p.m.

After discussion and responses from Mr. Shuford, it was the consensus of City Council to instruct Mr. Shuford to bring this matter back to a future worksession at which time he will respond to the issues raised, some being, but are not limited to: (1) additional information concerning the threshold concept, including the relative extent of the impact based on past development trends; (2) density/intensity incentive for cases where extra area for greenways was needed; and (3) the creation of some incentives for development that exceed the required open space other than the incentives proposed for excess greenway space; and (4) additional information on the fee-in-lieu of option.

Councilman Dunn moved to lay this matter on the table until such time as City staff brings it back to Council. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

IV. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3245 - ORDINANCE TO REZONE 1451 SWEETEN CREEK ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Worley announced that the public hearing on this matter was held on June 28, 2005. Because of the number of votes received, a second reading was required.

Councilman Dunn moved for the final adoption Ordinance No. 3245. This motion was seconded by Councilman Davis and carried on a 4-3 vote, with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

ORDINANCE BOOK NO. 22 – PAGE 133

V. NEW BUSINESS:

A. REQUEST FROM MOUNTAIN AREA INFORMATION NETWORK FOR WAIVER OF LICENSE FEE FOR ANTENNA SPACE

Grant Specialist Laurie Saxton said that this is the consideration of a request from Mountain Area Information Network (MAIN) for a grant to offset the license fee for the installation

of two antennas on one of the City's towers at White Fawn Reservoir, along with space in the equipment building at no cost.

MAIN's mission is to help bridge the "digital divide" by providing affordable Internet access to underserved citizens and communities. MAIN currently provides high-speed Internet access in Madison, Yancey and Mitchell Counties, in addition to Buncombe County. Their goal is to build a "managed" community wireless network to compete with broadband access. MAIN has two existing wireless antennas covering parts of west and north Asheville, and the proposed White Fawn antennas would cover northeast to southwest Asheville. MAIN has requested a grant to offset the license fee ($9,600) for the installation of the two White Fawn antennas.

The City typically charges other organizations, including nonprofit organizations, for this service. As in other cases where a nonprofit has asked for the waiver of a fee, City staff analyzed MAIN's request as if it were an Outside Agency Grant request. The analysis was made by staff from both the Information Technology (IT) and Budget departments.

New or revised information:

- The request is for a minimum of $9,600 initially for four spaces on the tower, based on MAIN's list of equipment. (The initial estimate was $12,000 for five spaces.) There is a 4% annual increase in the fee.
- If Council approves MAIN's request, staff estimates that 1 to 7 open spots will remain at the White Fawn tower site. Tower capacity depends upon the height, weight and direction of antennas.
- The City's IT Director has made an assessment of MAIN's technology maturity and concluded that MAIN uses appropriate technology and software for their services.
- MAIN has now submitted the requested financial information; their current ratio and unrestricted net assets ratio are in line with other organizations receiving outside agency funding, although MAIN was projecting a small deficit at the end of Fiscal Year 2004/05.

MAIN's mission and community network appear to support the City of Asheville's mission in the area of economic and community development. There is potential for MAIN to provide the City with no-cost Internet access in some community centers. If Council wishes to pursue this, it would have to be tested; computer procurement and maintenance would have to be addressed as well. If successfully implemented, this program could save the City $5,160 per year.

Pros

- MAIN's service provides economic value especially to low income citizens, nonprofits, and micro-enterprises.
- MAIN has broad support from the community.
- Allowing MAIN access to the tower could be helpful in keeping broadband prices competitive in our area.
- Potential savings of approximately $5,000 per year if wireless Internet access can be provided to five community centers.

Cons

- The opportunity cost of the grant ($9,600 minimum per year), foregoing the potential revenue from renting the space to another customer.
- Other nonprofits currently pay for space on the tower and might request the same treatment.
- MAIN has not demonstrated the extent to which it serves people with low incomes; however, the possibility of providing Internet access to community centers would increase this service.

City staff recommends the City of Asheville make the grant award to MAIN to offset the license fee for space on the City's tower.

Mr. Bill Fishburne, Ms. Leslee Kulba and Mr. Fred English spoke in opposition of the City waving the license fee.

Mr. Wally Bowen, Executive Director of MAIN, spoke in support of and responded to various questions/comments from Council regarding his request for Council to waive the $9,600 license fee. He spoke about the customers that MAIN serves and the grant they are seeking with City schools for some laptops for low income and at-risk students. He shared some thoughts on why the community should support his proposal.

Considerable discussion surrounded many issues, some being, but are not limited to: how the application was reviewed and if granted, how would it be reviewed in the future; does the community benefit, and if so, how; is Council setting a precedence by waving fees for a non-profit to use public infrastructure; how much does the Housing Authority pay a month to rent space on the tower; and are requests for antenna space frequent.

Councilwoman Jones moved to waive the $9,600 for the first year license fee for MAIN to install two antennas on White Fawn Reservoir. This motion was seconded by Councilman Newman.

Council members expressed their reasoning for supporting or not supporting the waiver of the license fee.

The motion made by Councilwoman Jones and seconded by Councilman Newman failed on a 3-4 vote, with Mayor Worley, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Davis, and Councilman Dunn voting "no."

At 7:47 p.m., Mayor Worley announced a short recess.

B. ORDINANCE NO. 3263 - BUDGET AMENDMENT TO REFLECT NECESSARY REVISIONS TO FISCAL YEAR 2005-06 BUDGETED REVENUES AND EXPENDITURE RESULTING FROM THE TERMINATION OF THE WATER AGREEMENT

Budget Director Ben Durant said that this is the consideration of a budget amendment to reflect necessary revisions to Fiscal Year 2005-06 budgeted revenues and expenditure resulting from the termination the Water Agreement between the City of Asheville and Buncombe County.

On July 1, 2005, the Water Agreement between the City and County terminated. As a result of this termination, the City's General Fund lost $1,761,896 in tax equity reimbursement revenue (i.e. law enforcement reimbursement; recreation reimbursement; civic center subsidy) formerly received from the County.

Additionally, the operations of McCormick Field, Recreation Park, Nature Center and the Municipal Golf Course were transferred back to the City of Asheville. The Golf Course will operate as an Enterprise Fund. Total expenditures for the operation of these facilities are $2,129,379. Total revenue estimated to be generated from these facilities is $1,425,218, for a total net cost to the City's General Fund of $704,161. The specific net cost for each facility is as follows:

Golf Course	$ 73,714
McCormick	$ 44,469
Nature Center	$ 481,323
Recreation Park	$ 79,655
Administrative	$ 25,000
Total	$704,161

Based on lost general fund revenue of $1,761,896 and additional net general fund expenditures of $704,161, the total general fund impact to the City is $2,466,057. The City proposes to cover this impact by appropriating additional revenue and reallocating expenditures in the following manner:

Land Sale Revenue	$1,200,000
Fund Balance	$ 507,132
Reduce Parking Subsidy	$ 500,000
Reduce Contingency	$ 258,925

Staff would like to stress that this amendment is an immediate fix to the budget gap that was created as a result of terminating the Water Agreement. Approximately $1.7 million worth of new revenue appropriated with this amendment (i.e. land sale proceeds and fund balance) reflects the use of one-time revenue that will not necessarily be available in subsequent years. As such, longer-term solutions will need to be developed over the course of the current fiscal year that can be adopted as part of the Fiscal Year 2006-07 budget development process.

Additionally, the General Assembly, through adoption of Sullivan Acts I & II, prohibited the City from transferring funds from the Water Fund to the General Fund to support general city operations. This will cost the City's general fund an additional $1.15 million, which is currently not covered as part of this amendment. In the next 60-90 days, however, staff will work together as a team to develop structural changes to the budget to cover this $1.15 million gap and will present them to Council for review and deliberation. In the meantime, we have implemented various administrative cost savings measures that should keep the budget in balance.

City staff requests City Council approve the budget amendment to cover the $1.76 million revenue loss and net costs of 704,161 for the operation McCormick Field, Recreation Park, Nature Center and Municipal Golf Course.

Council members spoke about the annual operating budget passed and touched upon the negotiations regarding the water agreement.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3263. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 206

C. ORDINANCE NO. 3264 - ORDINANCE CONTINUING AND READOPTING POLICIES AND ORDINANCES APPLICABLE TO OPERATION OF THE WATER SYSTEM

City Attorney Oast said that this is the consideration of adoption of an ordinance continuing and readopting policies and ordinances applicable to operation of the water system

Since the Water Agreement terminated with no re-negotiated agreement in place, it is necessary to adopt by ordinance regulations and policies for the operation of the system by the City.

The ordinance simply continues in effect the policies and ordinances already in place, while conforming them to reflect the fact that the Water Agreement has terminated, and that certain facilities have reverted to the County and the Districts (as provided for in the Agreement). As the City proceeds with operation and administration of the water system, further amendments to the policies may be brought forward. The ordinance also ratifies any action taken by City employees in operating the system in the interim between June 30 and adoption of the ordinance.

The water rates adopted in connection with the annual budget are also continued in effect. They may likewise be modified during the course of the year.

Considerations: The water system is operated as a public enterprise; rules and regulations must be adopted by ordinance.

- The water policies are those that were previously in place, so the transition should be seamless.
- This also conforms with the requirements of the local acts that were adopted on June 29.
- Amendments or changes to the policies may be made by ordinance any time during the course of the year.

City staff recommends City Council adopt the ordinance continuing and readopting policies and ordinances applicable to operation of the water system

Councilwoman Bellamy said this is a good opportunity to show the citizens how well we can manage our water system.

Councilwoman Jones felt it was important that the citizens of Asheville realize they are subsidizing the excellent work that will be happening outside the City limits.

City Manager Jackson said that he will be bringing back to Council where the additional resources will be going into the capital plan. In addition, Council will see shortly a very detailed analysis of the cost of providing the water services. He said that in the near future Council will be seeing very sound business practices and a real upgrade in the management of the operation.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3264. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 210

D. RESOLUTION NO. 05-144 - RESOLUTION APPOINTING MEMBERS TO THE CITIZENS-POLICE ADVISORY COMMITTEE

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Citizens/Police Advisory Committee.

The terms of Tim Flora (North area), John Burchfield (Central area), Jimmy Hungerford (West area) and Betty Budd (South area), as members of the Citizens/Police Advisory Committee, will expire on June 30, 2005.

In addition, John Robinson has resigned, thus leaving a vacancy in the East area until June 30, 2005.

At City Council's worksession on June 21, 2005, the City Council instructed the City Clerk to prepare the proper paperwork to reappoint Tim Flora (North area) and John Burchfield (Central area), as members of the Citizens/Police Advisory Committee, to each serve an additional three-year term respectively, terms to expire June 30, 2008, or until their successors have been appointed.

Also at Council's June 21, 2005, worksession, the City Clerk was instructed to arrange interviews for Davidson Jones, Donald Swaby and Mary Ann LaMantia.

Also at Council's June 21, 2005, worksession, the City Clerk was instructed to re-advertise for the West Asheville area position.

After each Council member spoke in support of the candidates interviewed, it was the consensus of City Council to appoint Davidson Jones (East area) and Mary Ann LaMantia (South area) as members to the Citizens/Police Advisory Committee to each serve a three year term respectively, terms to expire June 30, 2008, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 178

E. RESOLUTION NO. 05-145 - RESOLUTION APPOINTING MEMBERS TO THE CRIMESTOPPERS BOARD OF DIRECTORS

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Asheville-Buncombe Crime Stoppers Board of Directors.

The terms of Councilman Dunn, Bill McGuire and Leslie Hennessee, as members to the Asheville-Buncombe Crime Stoppers Board of Directors, will expire on June 30, 2005.

At the City Council worksession on June 21, 2005, the City Council instructed the City Clerk to prepare the proper paperwork to (1) appoint Councilwoman Bellamy to serve a three year term, term to expire June 30, 2008, or until her term on City Council ends; and (2) reappoint Bill McGuire to serve an additional three-year term, term to expire June 30, 2008, or until his successor has been appointed.

Also at Council's June 21, 2005, worksession, the City Clerk was instructed to arrange interviews for Bill Kelley and Nancy Ray Durham.

After each Council member spoke in support of the candidates interviewed, it was the consensus of City Council to appoint Nancy Ray Durham, as a member of the Crimestoppers Board of Directors to serve a three-year term, term to expire June 30, 2008, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 179

F. RESOLUTION NO. 05-146 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Recreation Board.

The terms of Eleanor Campbell, Chuck Cloninger, Charles Bullman and Jim Drummond, as members on the Recreation Board, expire on June 30, 2005.

At City Council's worksession on June 21, 2005, the City Council instructed the City Clerk to prepare the proper paperwork to reappoint Eleanor Campbell and Jim Drummond to each serve an additional three-year term respectively, terms to expire June 30, 2008, or until their successors have been appointed.

Also at Council's June 21, 2005, worksession, the City Clerk was instructed to arrange interviews for Matthew Davis, Susan Birkholz, Geoffrey Ferland and Andrew Gall. Mr. Davis was unable to attend the interview and Mr. Gall was not interested at this time.

After each Council member spoke in support of the candidates interviewed, it was the consensus of City Council to appoint Geoffrey Ferland and Matthew Davis, as members to the Recreation Board to each serve a three-year term respectively, terms to expire June 30, 2008, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 180

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of June 24-July 7, 2005: Mildred Burns (Sanitation), Jennifer Williams (Streets), Johnathan Ramsey (Streets) and John Randolph (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English announced he was happy to be well enough to continue attending City Council meetings.

Mr. Gene Hamilton, representing Asheville Citizens for Quality Government, reiterated the important matters City Council has had to deal with over the past three months and felt they dealt with them successfully. He urged City Council to consider the adopting a comprehensive quality plan to assure quality government and improve the quality of life for all.

Mr. Ron Harris, representing the Mountainbrook Homeowners Association, spoke about the new Wildes development and solutions to the new traffic hazards. He feels that it is essential that there be a roadway from this new development directly onto Chunns Cove Road. When the development is finished, there will be approximately 80 more cars as well as service vehicles using Mountainbrook Road, with only one way in and one way out. He asked Council to require the developer, Bruce Alexander, to build a second road access to facilitate the flow of traffic and enhance safety in the neighborhood. He presented City Council with a petition containing approximately 45 signatures and a map showing alternative roads from the new development. He said that according to the Planning Department and the City Traffic Engineer, it is normally a requirement for new developments to have two road accesses. City Engineer Cathy Ball met with him and said that in order to meet the Fire Department requirements the developer reduced the number of homes from 40 to 30, and now the second road access is not required. They feel that

one way in and one way out is a serious safety issue. He read a letter from Denise Hickman, Facility Director of a 65-bed assisted living facility located at 67 Mountainbrook Road, which spoke about the need for safety of their residents who walk on that road. The City's Traffic Engineer admitted that the City may choose to make the second road access, currently planned to be a walking path, a permanent road if needed in the future. He stressed that when construction is finished, it will be too late. He urged Council to make this road a reality now to prevent problems in the future. He presented two possible solutions. One, they suggested an access avenue through the business park immediately south of the Wildes development. This would require the City to use the power of eminent domain. They suggest the City contact the owner of the business park (Mr. Coleman) and asking him to allow the Wildes development access through this business park. Secondly, they suggested that the proposed walking path be converted into the main entry road to the Wildes directly onto Chunns Cove Road. The Association requests that the City make this road a condition of approval of the final plat. They would also request that Council place this matter on a future agenda as soon as possible. In addition, he requested a copy of the meeting minutes where the single-access road was approved.

Mr. Cogburn, attorney representing Mr. Alexander, said that an engineering study was performed in September which indicated that building a permanent road on the rock slope was not a good idea to do. Mr. Alexander also originally thought there was going to be ingress and egress through the Coleman property that had been reserved, but it had not been reserved. Therefore, Mr. Alexander complied with the single-access roadway by reducing his development from 40 to 30 units. He urged City Council to allow Mr. Alexander to continue with his project.

Upon inquiry of Mayor Worley, City Attorney Oast said that pursuant to the ordinance, the appeal for preliminary plat stops at the Planning & Zoning Commission. He said that under the law, the developer meets the technical requirements. It was his opinion that City Council does not have the ability to get involved in subdivision questions.

City Manager Jackson said that he would provide Council and the residents in the area with the Fire Chief's response to these concerns about safety and the assurance of service capability. In addition, he said that the Fire Chief will communicate with Council of how they have evaluated this project, including what their response times are and whether or not this development meets the adequacy test.

Mr. Alexander explained that there is no right-of-way through Mr. Coleman's property and he isn't interested in granting any right-of-way.

City Council explained that there doesn't appear there is anything more City Council can do about this. Council's rules set up specific standards for what development decisions get brought to this Council where we are the deciding body on it. Development decisions below those standards are not within Council's purview to review.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:03 p.m.

Magdalen Bouleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 19, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Joseph C. Dunn

CONSENT AGENDA:

Animal Control Ordinance Technical Changes

Summary: The consideration of an ordinance making minor amendments to the Animal Control Ordinance to insure that the civil penalties will be applicable to violations of Article II and Article III of the ordinance.

On May 24, 2005, City Council passed a revised animal control ordinance. Upon further review of Sec. 3-20, staff questioned whether the civil penalties in Sec. 3-20 could be applied to violations of Article II (Restraint of Animals) and Article III (Livestock and exotic pets) of the ordinance. Based on the wording in Sec. 3-20, it appeared that civil penalties could only be issued for violations of Article I (i.e. animal care, animal licenses etc). It is staff's opinion that the civil penalties should be applicable to the entire ordinance and recommends changing the wording in Sec. 3-20 from "Article" to "Chapter."

Pros:

- Insures that City staff can issue civil penalties for violation of every article of the Animal Control Ordinance.
- Resolves any ambiguity regarding the applicability of civil penalties to violations of Article II and Article III of the ordinance.

Cons: None noted.

City staff recommends approval of the ordinance making minor amendments to the Animal Control Ordinance to insure that the civil penalties will be applicable to violations of Article II and Article III of the ordinance.

Agreement with the Asheville Humane Society

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City for Fiscal Year 2005-06.

For the past few years, Buncombe County has required the City to pay for animal shelter services through the Asheville Humane Society, who has contracted with the County to run the animal shelter. On June 28, 2005, the City approved the budget for Fiscal Year 2004-05 and in that budget approved $121,000 to pay for shelter services. The City and the Humane Society need to enter into an agreement for the shelter services for the term of July 1, 2005, through June 30, 2006.

Advantages to the contract: The City will not have to pay for the construction and operation of its own animal shelter to take care of its animal sheltering needs and the Humane Society will be responsible for the care of all animals brought to the shelter.

Disadvantages to the contract: The City has to pay out of its general fund for shelter services where Buncombe County provides the same services to all other non-incorporated county residents at no additional cost except through county taxes.

City staff recommends the adoption of the resolution for animal shelter services for the term of July 1, 2005, through June 30, 2006.

License Agreement with Arch Wireless Operating Company Inc.

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent to execute a License Agreement with Arch Wireless Operating Company, Inc. (Arch) for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge overlooking downtown to the north, Mission Hospital to the west and Kenilworth to the south. The circular concrete rim of an in-ground water tank that has been completely filled is the only trace of its former use. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

Arch Wireless Operating Company, Inc. has operated an antenna and related equipment at the site since December 1993. The antenna is located on the tower known as the "BellSouthTower" which is the tower to the west. The proposed License Agreement will enable Arch to continue operating an antenna at that site; however, there is a provision which allows the Licensor to terminate the agreement upon 180 days notice or the Licensee to terminate the agreement with 60 days notice. The term of the License Agreement will be 3 years with no renewal periods. Arch will pay a License Fee of $350 per month ($4,200 annual) the first year with a 4% annual increase thereafter. In addition to the License Fee, Arch will pay a Utility Fee of $150.00 per annum.

The positive aspects of the transaction are:

1. The license will generate revenue
2. The license fee represents fair market value.
3. The transaction will retain a fee tenant rather than having a vacant space.
4. It will facilitate Arch being able to continue providing a valuable service to its customer

There are no negative aspects to the transaction

Planning Department staff recommends adoption of the resolution directing the City Clerk to publish a Notice of Intent to execute a License Agreement with Arch Wireless Operating Company, Inc. for an antenna at 36 Reservoir Road.

Field Services Coordinator Ed Vess responded to questions from Councilwoman Jones about the difference between this license agreement and the license agreement that MAIN requested earlier this month.

Advertise offer to purchase property on Bartlett Street

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Bartlett Street in the East Riverside community.

A bid has been received from Ray Quate in the amount of $2,500 for the purchase of a small parcel of land on of Bartlett Street in the East Riverside community.

The land on Bartlett Street is a rectangular shaped parcel comprising 0.062 acre± (approximately 21' x 127'). It is gently sloping from east to west with the grade of Bartlett Street. It is unimproved and covered with grass The subject parcel is a cut-out from a 5.73 acre property acquired from the Housing Authority which is now a part of Murray Hill Park. The lot is not large enough to build on as a separate parcel. Based on an opinion letter dated May 11, 2005, by L. Ted Prosser, the value of the cut-out parcel is $2,500. The bid from Ray Quate, owner of the adjacent parcel is in the amount of $2,500. Mr. Ouate is renovating the building on the adjoining parcel with historic consideration to provide three (3) main floor artist's studios and five (5) second floor apartments with inside parking. He purchased a 0.13 acre parcel from the City to provide access to the second floor parking in November, 2004. He plans to assemble the subject parcel with his property to provide improved access to the parking and a better buffer.

The proposed renovations are consistent with the Strategic Plan policies of encouraging a strong small business environment and increasing the supply of affordable housing.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A small parcel will be assembled with an adjoining parcel to provide a more efficient land use.
5. The sale of this lot to Mr. Quate will facilitate the re-development by providing improved access.

Planning & Development staff along with Parks & Recreation staff recommend adoption of the resolution which will initiate the sale of the property through the upset bid process.

Contract for Traffic Calming in Redwood Forest

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Dee Williams and Company, Inc. in the amount of $65,000 to install traffic calming in the Redwood Forest neighborhood.

As part of the approval of the Riverbend Development on Swannanoa River Road, the developer was required to pay for traffic mitigation in adjacent neighborhoods. Staff determined that the neighborhood impacted most by the development was Redwood Forest. Staff has been working with the neighborhood to develop a plan.

Staff and the neighborhood (in accordance with the Traffic Calming Policy) completed the plan. Staff requested bids for the project. We only received one bid from Dee Williams and Company, Inc. The original bid exceed the funds for the project. We have negotiated with Dee Williams to reduce the cost of the project to $65,000.

This contract will not include improvements to the intersection of Swannanoa River Road and Beechwood Road. We have not received an approved encroachment from the N.C. Dept. of Transportation. We are still working with them to obtain this approval. The cost for

improvements at this location is estimated at $5,000 to $7,000. This work will be performed by the City Public Works Department.

Considerations

- This does not allow us to do traffic calming in any other neighborhood's unless additional money is appropriated.
- The contractor is a Certified Minority Business.
- The money for this project is currently budgeted.
- We are able to complete the project as design with this contract.

Staff requests that City Council authorize the City Manager to sign a contract with Dee Williams and Company, Inc. in the amount of $65,000 to install traffic calming in the Redwood Forest neighborhood.

City Engineer Cathy Ball responded to various questions from Council regarding the traffic calming in Redwood Forest.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

SIDEWALK USE ORDINANCE AMENDMENT

City Development Director Sasha Vrtunski said that this is the consideration of an ordinance revising the sidewalk ordinance to be applicable to other commercial areas of the City besides the Central Business District and Biltmore Village.

Currently, the sidewalk ordinance, Article V of Chapter 16, applies only to the Central Business District and the Biltmore Village area. Staff has received a request for an outdoor dining permit in the arts district off of Clingman Avenue. Because this area is neither in the Central Business District nor Biltmore Village, staff is prevented from issuing a permit. This is an example of an area that would benefit from businesses spilling out onto the sidewalk making the area more pedestrian oriented. Expanding the scope of the ordinance will allow staff to issue permits to businesses that are located adjacent to a sidewalk and would like to spill out onto the sidewalk.

In addition, staff is anticipating requests from other areas of the City, such as the Haywood Road Corridor, the Head of Montford or Charlotte Street. Widening the scope of the ordinance will allow these businesses to place outdoor dining or retail on the sidewalk. It will also allow for pushcarts to be located in commercial areas as well. All of the same requirements will remain in effect which will ensure that there is sufficient room on the sidewalk for pedestrians.

The proposed changes to the ordinance will allow permits to be issued for outdoor dining and retail in places where there is an appropriate place on the sidewalk for these uses. The outdoor dining or retail area must be either in front of or adjacent to the business.

Advantages:

- Wording amendment will allow staff to issue permits in new areas that are appropriate for outdoor dining, retail and pushcarts. Some businesses will be able to expand their service area where the sidewalk width allows.
- Outdoor seating and retail is seen as a way to make streets more pedestrian friendly and inviting to customers. This expansion of the ordinance may increase the number of areas in the city with this character.

Disadvantages: None noted.

City staff recommends the adoption of the ordinance revising the sidewalk ordinance to be applicable to other commercial areas of the City besides the Central Business District and Biltmore Village.

Upon inquiry of Councilwoman Jones about the possibility of having access to the Unified Development Ordinance during Council meetings, Planning & Zoning Director Scott Shuford explained how they are in the process of providing that resource to Council and that they will be coordinating that when the City's new webpage comes online.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on the appropriate City Council agendas. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Umbrella Signs

Urban Planner Julia Coburn said that this is the consideration of an amendment to the Unified Development Ordinance for the purpose of adding provisions for umbrella signs.

The current sign regulations of the City of Asheville do not address umbrella signs. Umbrella signs are those signs printed on umbrellas that are commonly used at outdoor eating and drinking establishments and often advertise products sold on the premises. This amendment provides for such signage.

This ordinance amendment defines umbrella signs as those signs printed or painted on an umbrella. This amendment goes on to classify umbrella signs as a type of sign exempt from permit requirements. This means that an umbrella sign is permitted without having to actually obtain a permit for the signage so long as the applicable regulations are met.

The regulations stipulated in this amendment for umbrella signs include that such signs not be illuminated, that they be located at a lawfully permitted outdoor dining/drinking establishment, that they not be suspended from the umbrellas, and that the signage be limited to 25% of the surface area of the umbrella cloth.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment sets forth regulations for a type of signage not currently addressed in the UDO and which has been raised as an issue for enforcement staff.
- The amendment permits umbrella signs without permit (subject to specific requirements) which will not add to the permitting burden for staff.

Cons-

- The amendment allows this type of signage (with restrictions) that may be considered to add to sign clutter.

The Planning and Zoning Commission recommended approval of this code amendment on February 2, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Definition of Adult Establishments

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of changing the definition of "adult establishments.

The UDO regulates "adult establishments" as conditional uses. In defining "adult establishments" the current ordinance simply refers to the definition contained in the North Carolina General Statutes.

The definition of "adult establishment" found in the North Carolina General Statutes does not specifically address retail operations that deal specifically with "sexually oriented devices" although that term is defined in the statutes. N.C. Gen Stat. sec. 14-202-11 gives local governments power to regulate "adult establishments or other sexually oriented business to the extent consistent with the constitutional protection afforded free speech." "Sexually oriented devices" are defined in the statutes as "without limitation any artificial or simulated specified anatomical area or other device or paraphernalia that is designed principally for specified sexual activities but shall not mean any contraceptive device."

Due to recent inquiries concerning operations that retail "sexually oriented devices," the Planning and Development Department and the City Attorney's Office recommend the addition of operations where the principal retail business is in such items to the definition of "adult establishment."

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment clarifies an issue that has recently been brought to staff's attention as to whether or not retail operations dealing primarily in "sexually oriented devices" are "adult establishments."

Cons-

- The amendment could be viewed by some as unnecessary over regulation of adult establishments.

The Planning and Zoning Commission recommended approval of this code amendment on March 2, 2005, by a unanimous vote of 6-0. Staff recommends approval as well.

Establishment of New Live-Work Unit Requirements

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance ("UDO") to establish new live-work unit requirements and to allow such uses in various zoning districts.

This code amendment is intended to accommodate a mixed residential/ commercial use of property known as live-work. A live-work unit can be defined as a building or space within a building that is used jointly for commercial and residential purposes where the residential use of the space is secondary or accessory to the primary use as a place of work. Since a live-work unit as defined above is predominately commercial in nature, it should be regarded as the equivalent of 0.5 residential unit for the purpose of applying density requirements.

The parking requirements for a live-work unit should be based on the square footage of the nonresidential use plus one space for the residential use. The minimum parking for the nonresidential space of a live-work unit should be the same as for other retail and office uses (a minimum of one space per each 350 square feet and a maximum of one space per each 250 square feet).

Live-work units should be allowed in any zoning district that allows a mix of commercial and residential uses (i.e., virtually all zoning districts that are not exclusively residential).

Pros

- Provides an added option for entrepreneurship development.
- Accommodates an increasingly popular form of land use that can reduce trip generation by mixing uses.

Con

- None noted.

On July 6, 2005, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Clarification of Council Direction on Open Space Standards

Planning & Development Director Scott Shuford said that City staff is seeking Council direction concerning the proposed open space ordinance.

At City Council's regular meeting on July 12, 2005, the proposed open space ordinance was postponed to allow for worksession discussion of various issues. In order to best structure that future worksession discussion, City Council clarified issues regarding the open space 'cap" concept; the fee-in-lieu concept, including information on how the decisions will be made on where to use of fee-in-lieu of money; the threshold concept, including the relative extent of the impact based on past development trends; the creation of some incentives for development that exceed the required open space other than the incentives proposed for excess greenway space; and the request that the proposed open space ordinance and the ridge top, steep slope and environmentally-sensitive regulations be brought back at the same worksession.

RIVER REDEVELOPMENT PLAN

Planning & Development Director Scott Shuford said that this is the consideration of a resolution adopting the River Redevelopment Plan funded by the NC Rural Economic Development Center and authorizing staff to forward the Plan to the Rural Center for consideration.

In response to the Fall 2004 floods, the NC Legislature authorized redevelopment planning and implementation monies. In late April, the City of Asheville was awarded a $20,000 grant from the NC Rural Economic Development Center to prepare a redevelopment plan for Biltmore Village. We were also invited to submit other planning grant applications and were successful in obtaining an additional $20,000 grant to study two other areas. Council recently approved these grants.

Pursuant to these grants, City staff has prepared the redevelopment plan. Due to the timeframe associated with the Rural Center grants, the plan was developed with only limited public input. It consequently has many areas that will require additional public involvement prior to any implementation actions taking place. However, the plan does follow the adopted Wilma Dykeman Riverway Master Plan in scope and design, examining a mixed-use development pattern and suggesting economic revitalization of the City's urban riverfront, greenway

implementation, construction of the Wilma Dykeman Riverway, and use of environmentally-sensitive construction methods. It also offers implementation funding from the Rural Center for items not able to be funded using traditional means and opens the possibility of receipt of much more significant funding from the Rural Center for the designated projects.

The following three areas were identified for redevelopment planning:

- Biltmore Village Redevelopment Area – This includes the Biltmore Village local historic district and a large area to the east, including the Koon Development located at Glendale Avenue and Thompson Street.
- East Swannanoa River Redevelopment Area – This area includes property located on Swannanoa River Road across from the Sayles Wal-Mart.
- French Broad River Redevelopment Area – This area is located south of the Smoky Park Bridges southward to the Norfolk Southern RR property.

In the plan, staff proposes to proceed with a variety of tasks; key items are summarized below:

- Conduct public input sessions about the appropriate development pattern(s) and associated financial incentives for the three redevelopment areas and bring these ideas forward for Council consideration.
- Develop, with public comment, best management practices for environmentally-sensitive design for inclusion in the Standards and Specifications Manual.
- Continue to pursue grant and other funding options for implementation of the Wilma Dykeman Riverway Plan and begin implementing the Riverway project by allocating the federal earmark funding to studying the corridor in the three redevelopment areas.
- Pursue improvements to Biltmore Village called for in the plan, including traffic safety and aesthetic improvements and funding for an architectural "flood proofing" program for vulnerable historic buildings to ensure their continued economic vitality.
- Bring forward ideas for constructing public parking in Biltmore Village after reviewing these ideas with the public and with Biltmore Village property owners.
- Purchase floodway properties in the East Swannanoa River redevelopment area from willing sellers.
- Demolish an unsafe structure in the Biltmore Village area.
- Design and construct the riverside greenway in the French Broad River redevelopment area.
- Seek consultant services about the use of project development financing in the French Broad River redevelopment area.

He said that the key components of the Plan include (1) identifies projects for Rural Center implementation funding for each area; (2) proposes the use of federal earmark funding to study Riverway improvements in each area; (3) lays out public involvement program for identifying (a) desired land use and zoning pattern for area redevelopment; and (b) financial incentives needed to implement desired pattern of redevelopment; (4) proposes creation of best management practices for environmentally sensitive development; (5) proposes hiring consultant to identify opportunities and mechanism to use project development financing to jump-start river redevelopment; and (6) proposes active implementation efforts for the parking, traffic circulation, and aesthetic improvements called for in the Biltmore Village Development Plan.

If the Rural Center Board approves the Plan, the City will become eligible for grant funding of up to $700,000 per area.

City staff recommends City Council adopt the River Redevelopment Plan funded by the NC Rural Economic Development Center and authorize staff to forward the Plan to the Rural Center for

consideration. The next steps will be to (1) implement Rural Center projects; (2) identify desired development pattern and financial incentives; (3) create development and design standards; (4) proceed with riverway construction design; and (5) pursue implementation of other plans.

Throughout Mr. Shuford's presentation, he responded to various questions/comments from Council.

Vice-Mayor Mumpower said that he didn't have a clear vision of our ability to create a sustainable reality that doesn't become elitist in Asheville. Mr. Shuford said that he would be happy to come back at a future worksession and update them on some model projects that have been developed for at least five years.

City Manager Jackson said that since there is some City Council interest in looking at the strategies that other communities have used to try to mitigate the potential impacts of displacing people who have grown up and own property in these neighborhoods and would like to stay while they are redeveloped, staff will look at best practices elsewhere on how other communities have either failed or succeeded in addressing that issue.

Councilman Newman felt that the vision is attractive, but he would like more information on the trade-offs, in terms of redevelopment potential vs. the environmental impact that that will cause.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

At 4:33 p.m., Mayor Worley announced a short recess.

NEW DAY CENTER PRESENTATION

Ms. Helen Beck, Director of the Workforce Development Board, explained that Nurturing Encourages Winners – Dedicated to All Youth Center (NEW DAY) is a community-based program currently operating under the auspices of Partners Unlimited Inc., a 501 (c) (3) non-profit organization established in October 1997. They share in common the desire to help young people build a strong foundation for success in life by providing them with the information and support they need to bridge the gap between themselves, their families and society. Together, NEW DAY Center and Partners Unlimited form a unique organization in that they work with youth, their families and the community to build strong communication links and the basic bonds of trust.

Particular concerns of NEW DAY Center include: (1) efficacy of our public schools in addressing social justice issues; (2) obstacles to teacher-driven, student focused education due to the current emphasis on school accountability; (3) the inefficient and often lack of direct involvement of communities, parents, and other supporters in the mainstream of the education process; and (4) the unbalanced focus of attention on primary education often to the neglect and even detriment of secondary schools and students; particularly the cursory attention given to high school dropout, retention, and graduation rates, including such primary indicators as chronic absenteeism, school suspensions, and the lack of many students' ability to maintain academic credit levels commensurate to their cohort graduation year commonly referred to "the ninth grade parking lot."

With our program site in the Reid Center, we are based in a community that is disproportionately victim to the concerns listed above. The community is dominated by low-income public housing developments. With access to Partners Unlimited Inc.'s 15-passenger van, NEW DAY Center can also serve students throughout Buncombe County. Additionally, we expect to have access to vehicles/transportation through the Asheville City Schools and the A-B Technical Community College.

The NEW DAY Center program will serve as a model of success and innovation. She encouraged City Council support.

Ms. Pat Griffin further explained that they wish to expand the Partners Unlimited program that is currently operating out of the Reid Center. She said that even though at this time they are only seeking Council support, they are in need of financial support as well. They need to purchase the site licenses for 12 computers at $1,500 a site license.

Vice-Mayor Mumpower felt this program was worthwhile and suggested they see how much money they can raise themselves and perhaps City Council may be able to match that amount. He felt it was important that they demonstrate some fund-raising initiative.

Mr. Jim Drummond responded to various questions from Councilwoman Bellamy regarding the space at the Reid Center, when the program is slated to begin, whether their services are for City and County students, and transportation.

Upon inquiry of Councilwoman Jones, Ms. Griffin explained that NEW DAY Center is a similar model to the Caring for Children effort, however, they serve a different population.

It was the consensus of Council to support the NEW DAY Center program. Regarding financial assistance, it was recommended that they go through the City's normal outside agency review process.

Councilwoman Jones agreed that the normal outside agency funding process is a good idea to follow, however, she hoped that Council will be flexible when there is a pressing community need that comes in that is not in line with the normal process.

DETAILED TRAFFIC ANALYSIS OF I-26 CONNECTOR (I-240)

City Traffic Engineer Anthony Butzek said that this is a summary of results of a CORSIM traffic simulation analysis that was performed for the future I-26 Connector project. The analysis was commissioned by the N.C. Dept. of Transportation ("NCDOT") at the request of City Council, and compares traffic operations under scenarios of a six-lane cross-section or an eight-lane cross-section, with each supplemented by two auxiliary lanes for entering and exiting traffic.

The NCDOT is planning improvements to I-240 between I-40 and Broadway in conjunction with its future designation as I-26. This project, Transportation Improvement Program (TIP) project I-2513, is currently scheduled to begin construction in 2012. An eight-lane cross-section plus two auxiliary lanes is proposed for the project. Numerous community and technical groups have suggested that fewer lanes may be adequate for this project and would significantly reduce the social and construction costs for this project.

The NCDOT commissioned this study at the formal request of the Asheville City Council. A detailed analysis was performed by NCDOT's consultant, StanTec, with the CORSIM model, and City staff was provided with numerous opportunities to review and provide input to the development of the model. As a result of this close cooperation between NCDOT's consultant and City staff, staff is confident in the results of the model. Additionally, NCDOT elected to do the full study, including a calibration, in order to complete the most accurate study possible. You will recall that the City requested them to do a basic CORSIM analysis; they took this a step further for better results.

The model was originally developed for the two time periods of most concern: the morning and afternoon rush hours, known as the AM and PM peak hours. Due to budget constraints, and the fact that the differential in travel times between the six and eight-lane

alternatives were minimal for the AM peak hour, the model was on completed for the PM peak hour.

As shown in the excerpt from the NCDOT study, the average total travel time for the corridor during the PM peak hour was:

- Northbound traffic: 366.4 seconds (6 min. 6 sec.) with 6 lanes; 356.8-s (5 min. 57 sec.) with 8 lanes.
- Southbound traffic: 398.9 seconds (6 min. 39 sec.) with 6 lanes; 381.5-s (6 min. 22 sec.) with 8 lanes.

In looking at the specific locations where the travel times differ, in the northbound direction, it is fairly consistent throughout the corridor. In the southbound direction, 10 of the 17 seconds of relative delay for the six-lane section come from the section between I-240 and Broadway. This section was modeled as 4-lanes and 6-lanes in the respective alternatives. It is apparent that continuing the 6-lane configuration may be appropriate here for both alternatives, thereby reducing the difference in travel time from about 17 seconds to about 7 seconds. City staff recommends that this be done whichever alternative is constructed.

In summary, the difference in average afternoon rush hour travel time between the two alternatives is a 9.6-second increase (2.7%) per car for northbound, and a 17.4-second increase (4.6%) per car for southbound, although maintaining the 6-lane alternative throughout I-26 (in lieu of reducing to 4-lanes for a small portion) reduces this to 7.0-seconds (1.8%) per car. There appears to be very little difference in real traffic operation between the two alternatives, and no congestion in either. The slightly improved travel time for the eight-lane section comes from the greater likelihood of fast drivers to find an open lane.

Levels of Service (LOS) were not determined form the study but can be projected.

He than showed Council a traffic model showing traffic operations under both scenarios for the year 2035.

Mr. Butzek said that this study analyzed the traffic to a much higher level of detail than previous analyses. The first analysis done was simply based on reference tables. That was very generalized and tends to under-estimate capacity. The next analysis still didn't provide a full level of detail, in that for example it did not consider the effect of the auxiliary lanes. This model, however, goes beyond that and comes up with a very accurate analysis of the condition.

There was considerable discussion surrounding the 8-lane vs. 6-lane cross-sections and whether the NC DOT would consider changing their 8-lane recommendation to 6-lanes, given that this NC DOT state-of-the-art analysis shows that in the year 2030 a 6-lane facility shows no congestion. In addition, Council questioned why NC DOT won't even study the relative merits of a 6-lane facility, based on this current analysis.

Councilwoman Jones favored 6-lanes, however, she felt that whether or not the project is 6 or 8 lanes, the community wants the project to move forward faster.

Vice-Mayor Mumpower wondered if we are being realistic in thinking that we may be able to impact NC DOT's decision.

Upon inquiry of Councilwoman Jones, Mr. Adam Cooper with the Asheville Area Chamber of Commerce said that in brief, the Chamber supports a Connector designed and constructed with a sufficient number of lanes - sufficient to meet level of service requirements for an interstate highway, and that we support inclusion of aesthetic components appropriate to the

existing beauty of our area. In addition, he said that he would communicate Councilwoman Jones' comments to the Chamber's leadership, being that that she hoped that the Chamber would advocate for the speed of the project and be interested in the facts and what those facts would mean on our community in so many different ways.

As a result of the discussion, it was the consensus of City Council to have the Mayor invite NC DOT Board members to meet with City Council in order to respond to Council's questions/concerns. Council strongly recommended the meeting occur as soon as possible. Councilwoman Bellamy also felt that we should invite our legislators and the County Commissioners to this meeting as well.

NORTH FORK RESERVOIR SPILLWAY OPERATIONS

City Engineer Cathy Ball said that this is an update to review the current guidelines concerning emergency spillway operations at the North Fork Reservoir and to seek direction for further evaluation.

An emergency operation plan and monitoring guide for the Burnette Dam (North Fork) was prepared for the Regional Water Authority in July 1995 by Law Engineering in an effort to insure the integrity of the earthen dam in the case of severe rain events.

This plan provides guidelines for when the spillway flood gates should be opened and is based upon the anticipated precipitation during a 24-hour period. For example, this study states that the gates should be opened 18 feet if rainfall in the reservoir area exceeds six inches during a 24-hour period.

Staff believes that an updated comprehensive study of emergency operations at North Fork, to include hydrological data from the two September, 2004 storm events, is necessary in order to appropriately analyze downstream impacts of emergency spillway operations. The estimated cost of this study may exceed $150,000; however, Water Resources has identified funding from within this fiscal year budget to cover this anticipated cost.

City staff recommends moving forward to pursue a Request for Proposals process, to involve key stakeholders from the community, in an effort to complete an updated comprehensive study as discussed above.

Ms. Ball said that since the hurricanes of September, 2004, the City has been working with the community to evaluate and address flooding. These efforts include: (1) receiving a grant from the National Weather Service; (2) receiving a grant from the Rural Center; (3) adopted a Stormwater Enterprise Fund; (4) serving on the Swannanoa Watershed Planning Task Force, headed by RiverLink to develop strategies to address flooding in the Swannanoa River Basin; (5) applied for a Clean Water Trust Fund Grant to develop flooding mitigation in the Dingle Creek Watershed; and (6) recommended a new study be completed of the North Fork Reservoir.

Regarding the National Weather Service Grant, we (1) applied for a $170,630 grant to purchase, install and maintain additional rainfall gages, high water monitoring stations, and develop an action plan for various flooding events in February 2005; (2) received $57,000 for equipment in May 2005; and (3) working with Warren Wilson College to develop a plan to install and maintain equipment.

Regarding the Rural Center Grant, we (1) received $40,000 to develop a River Redevelopment Plan; (2) anticipate receiving $700,000 to implement the plan in the Biltmore Village area, of which $375,000 will be allocated to an architectural analysis and implementation program to assist Biltmore Village property owners with the flood-proofing of their historic

structures; and (3) additional funds may be available for other redevelopment areas described in the Plan.

With the Stormwater Enterprise Fund, (1) stakeholders recommended Council adopt a Stormwater Enterprise fund as a dedicated funding source to address a federal mandate as well as flooding issues; (2) Council adopted an ordinance establishing a Stormwater Enterprise Fund in December of 2004; (3) Council adopted budget and fees as part of the Fiscal Year 2006 Operating budget; and (4) budget includes $200,000 for developing Maser Plans in the Biltmore Village area and Dingle Creek.

She said that several staff members serve on the Swannanoa Watershed Planning Task Force to identify flooding issues in the Swannanoa River Basin.

Regarding the Clean Water Trust Fund, (1) in June 2005, submitted a grant to the Clean Water Trust Fund for over $500,000 to address flooding issues in the Dingle Creek area. City's match would be $100,000 from Stormwater Enterprise Fund for the Stormwater Master Plan for Dingle Creek; and (2) grant will be awarded in November or December of 2005.

With regard to the North Fork Reservoir, (1) 1995 Law Engineering Plan addressed how to maintain the structural integrity of the dam; (2) staff has determined that an additional engineering study is necessary to evaluate the following: Emergency Action Plan, Operation and Monitoring Plan, and Flood Operation Plan, including guidelines for operating the dam before and during flooding events, to include impacts on downstream flooding; and (3) the cost of the study is estimated at $200,000.

She said that staff's recommendations are (1) to develop a Request for Proposals to evaluate the Reservoir as described previously; and (2) work with an advisory committee (consisting of a sub-group of the Swannanoa Watershed Planning Task Force to include representatives from the following agencies: RiverLink, Buncombe County, Town of Black Mountain, City of Asheville, Biltmore Village, and professional representatives, i.e., engineers, architects, etc.) to review the Request for Proposals in order to make sure that the study will address the technical and operational issues of the dam and downstream impacts.

Upon inquiry of Councilwoman Jones, Ms. Ball said that staff would like to come back to Council in late September to award a contract and hopefully have plan in place by next hurricane season.

Upon inquiry of Vice-Mayor Mumpower, Ms. Ball said that the existing protocols we are operating under are from the 1995 Law Engineering study. The 1995 study addresses both Bee Tree and North Fork. The study is very good from the standpoint that it made the recommendation it was asked to do in that the study developed the protocol with the only goal of protecting the dam. She explained further that the dam was not designed to be a flood control dam. It was designed to be a water source. No one studied how to make the dam work with the downstream flow in the event of flooding. That is the study they are asking for now. Again, she feels confident that the City did what was right during that time, based on the information we had from the 1995 study.

Mayor Worley said that the study will determine how we fill the goal of protecting the dam and to what extent we can also use the dam to have an impact on downstream flooding, and to the extent possible, mitigating that.

Upon inquiry of Vice-Mayor Mumpower, Interim Water Resources Director David Hanks said that we started this process last October. He explained that we brought in experts from the most renowned engineering firm in the county that deals with this kind of damage in dams and we

have been having dialogue and meetings with them on site to get their guidance as to where we need to go. We have also been collecting the data from last September to have some kind of model to proceed with to help when we go out with the formal Request for Proposals. We were at a point about 1.5 months ago to go forward to Council, but at the time we didn't have the funds to move forward, so we now have it in this year's budget.

City Manager Jackson said that it is staff's recommendation that while this study is on-going that you continue to see this facility operated according to the same standards that were in place last year. The professional staff would not recommend continuing to operate under the 1995 Law Engineering study if it did not have merits and application. To the credit of the staff, they were working on this and they are open and receptive to this kind of credible re-evaluation and broadening of the scope of the study. We will learn things in 2006 that were not available to the City in 1995. The scope has been widened and it will answer the important questions that have been raised, but the 1995 study still provides a basic framework to safely operate and maintain the facility. We will also step up communications with residents and property owners in this area because we want them to be aware of what we are doing and how this Council is being responsive and the staff is planning for the future as well.

It was the consensus of Council to instruct City staff to move forward to pursue a Request for Proposals process.

BOARDS AND COMMISSIONS:

It was the consensus of Council to instruct the City Clerk to arrange interviews for Craig Young and Robert Burns for a vacancy on the Citizens/Police Advisory Committee.

It was the consensus of Council to instruct the City Clerk to arrange interviews for Susan Chambers Overstrom, Meg Winnecour and Bill Fishburne for a vacancy on the Public Art Board.

MISCELLANEOUS

Councilwoman Jones suggested that the Corporate Academy name be changed to perhaps the Citizens Academy or the Asheville Academy.

CLOSED SESSION

At 6:31 p.m., Councilwoman Bellamy moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To consider the qualifications, competence, performance, character, fitness, conditions of appointment or initial employment of an individual prospective public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Councilman Davis and carried unanimously.

At 8:55 p.m., Vice-Mayor Mumpower moved to come out of closed session. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:55 p.m.

Magdalen Bourleson
CITY CLERK

Charles L. Worley
MAYOR

Tuesday – July 26, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Davis led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION PROCLAIMING JULY 26, 2005, AS "RASHAD MCCANTS DAY"

Mayor Worley read the proclamation proclaiming July 26, 2005, as "Rashad McCants Day" in the City of Asheville. He was pleased to present the proclamation to Mr. McCants.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETINGS HELD ON JUNE 28, 2005; JULY 12, 2005; AND THE WORKSESSION HELD ON JULY 19, 2005

B. ORDINANCE NO. 3265 - ORDINANCE AMENDING CHAPTER 3 (ANIMALS AND FOWLS) OF THE CODE OF ORDINANCE TO INSURE THAT THE CIVIL PENALTIES WILL BE APPLICABLE TO VIOLATIONS OF ARTICLE II AND III OF THE ORDINANCE

Summary: The consideration of an ordinance making minor amendments to the Animal Control Ordinance to insure that the civil penalties will be applicable to violations of Article II and Article III of the ordinance.

On May 24, 2005, City Council passed a revised animal control ordinance. Upon further review of Sec. 3-20, staff questioned whether the civil penalties in Sec. 3-20 could be applied to violations of Article II (Restraint of Animals) and Article III (Livestock and exotic pets) of the ordinance. Based on the wording in Sec. 3-20, it appeared that civil penalties could only be issued for violations of Article I (i.e. animal care, animal licenses etc). It is staff's opinion that the civil penalties should be applicable to the entire ordinance and recommends changing the wording in Sec. 3-20 from "Article" to "Chapter."

Pros:

- Insures that City staff can issue civil penalties for violation of every article of the Animal Control Ordinance.

- Resolves any ambiguity regarding the applicability of civil penalties to violations of Article II and Article III of the ordinance.

Cons: None noted.

City staff recommends approval of the ordinance making minor amendments to the Animal Control Ordinance to insure that the civil penalties will be applicable to violations of Article II and Article III of the ordinance.

ORDINANCE BOOK NO. 22 - PAGE 212

C. RESOLUTION NO. 05-147 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES WITHIN THE CORPORATE LIMITS OF THE CITY FOR FISCAL YEAR 2005-06

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City for Fiscal Year 2005-06.

For the past few years, Buncombe County has required the City to pay for animal shelter services through the Asheville Humane Society, who has contracted with the County to run the animal shelter. On June 28, 2005, the City approved the budget for Fiscal Year 2004-05 and in that budget approved $121,000 to pay for shelter services. The City and the Humane Society need to enter into an agreement for the shelter services for the term of July 1, 2005, through June 30, 2006.

Advantages to the contract: The City will not have to pay for the construction and operation of its own animal shelter to take care of its animal sheltering needs and the Humane Society will be responsible for the care of all animals brought to the shelter.

Disadvantages to the contract: The City has to pay out of its general fund for shelter services where Buncombe County provides the same services to all other non-incorporated county residents at no additional cost except through county taxes.

City staff recommends the adoption of the resolution for animal shelter services for the term of July 1, 2005, through June 30, 2006.

RESOLUTION BOOK NO. 29 – PAGE 181

D. RESOLUTION NO. 05-148 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT TO EXECUTE A LICENSE AGREEMENT WITH ARCH WIRELESS OPERATING COMPANY, INC. FOR AN ANTENNA AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent to execute a License Agreement with Arch Wireless Operating Company, Inc. (Arch) for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge overlooking downtown to the north, Mission Hospital to the west and Kenilworth to the south. The circular concrete rim of an in-ground water tank that has been completely filled is the only trace of its former use. Two telecommunication

towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

Arch Wireless Operating Company, Inc. has operated an antenna and related equipment at the site since December 1993. The antenna is located on the tower known as the "BellSouthTower" which is the tower to the west. The proposed License Agreement will enable Arch to continue operating an antenna at that site; however, there is a provision which allows the Licensor to terminate the agreement upon 180 days notice or the Licensee to terminate the agreement with 60 days notice. The term of the License Agreement will be 3 years with no renewal periods. Arch will pay a License Fee of $350 per month ($4,200 annual) the first year with a 4% annual increase thereafter. In addition to the License Fee, Arch will pay a Utility Fee of $150.00 per annum.

The positive aspects of the transaction are:

1. The license will generate revenue
2. The license fee represents fair market value.
3. The transaction will retain a fee tenant rather than having a vacant space.
4. It will facilitate Arch being able to continue providing a valuable service to its customer

There are no negative aspects to the transaction

Planning Department staff recommends adoption of the resolution directing the City Clerk to publish a Notice of Intent to execute a License Agreement with Arch Wireless Operating Company, Inc. for an antenna at 36 Reservoir Road.

RESOLUTION BOOK NO. 29 – PAGE 182

E. RESOLUTION NO. 05-149 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON BARTLETT STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Bartlett Street in the East Riverside community.

A bid has been received from Ray Quate in the amount of $2,500 for the purchase of a small parcel of land on of Bartlett Street in the East Riverside community.

The land on Bartlett Street is a rectangular shaped parcel comprising 0.062 acre± (approximately 21' x 127'). It is gently sloping from east to west with the grade of Bartlett Street. It is unimproved and covered with grass. The subject parcel is a cut-out from a 5.73 acre property acquired from the Housing Authority which is now a part of Murray Hill Park. The lot is not large enough to build on as a separate parcel. Based on an opinion letter dated May 11, 2005, by L. Ted Prosser, the value of the cut-out parcel is $2,500. The bid from Ray Quate, owner of the adjacent parcel is in the amount of $2,500. Mr. Ouate is renovating the building on the adjoining parcel with historic consideration to provide three (3) main floor artist's studios and five (5) second floor apartments with inside parking. He purchased a 0.13 acre parcel from the City to provide access to the second floor parking in November, 2004. He plans to assemble the subject parcel with his property to provide improved access to the parking and a better buffer.

The proposed renovations are consistent with the Strategic Plan policies of encouraging a strong small business environment and increasing the supply of affordable housing.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A small parcel will be assembled with an adjoining parcel to provide a more efficient land use.
5. The sale of this lot to Mr. Quate will facilitate the re-development by providing improved access.

Planning & Development staff along with Parks & Recreation staff recommend adoption of the resolution which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 29 – PAGE 183

F. RESOLUTION NO. 05-150 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH DEE WILLIAMS & CO. INC. TO INSTALL TRAFFIC CALMING IN THE REDWOOD FOREST NEIGHBORHOOD

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Dee Williams and Company, Inc. in the amount of $65,000 to install traffic calming in the Redwood Forest neighborhood.

As part of the approval of the Riverbend Development on Swannanoa River Road, the developer was required to pay for traffic mitigation in adjacent neighborhoods. Staff determined that the neighborhood impacted most by the development was Redwood Forest. Staff has been working with the neighborhood to develop a plan.

Staff and the neighborhood (in accordance with the Traffic Calming Policy) completed the plan. Staff requested bids for the project. We only received one bid from Dee Williams and Company, Inc. The original bid exceed the funds for the project. We have negotiated with Dee Williams to reduce the cost of the project to $65,000.

This contract will not include improvements to the intersection of Swannanoa River Road and Beechwood Road. We have not received an approved encroachment from the N.C. Dept. of Transportation. We are still working with them to obtain this approval. The cost for improvements at this location is estimated at $5,000 to $7,000. This work will be performed by the City Public Works Department.

Considerations

- This does not allow us to do traffic calming in any other neighborhood's unless additional money is appropriated.
- The contractor is a Certified Minority Business.
- The money for this project is currently budgeted.
- We are able to complete the project as design with this contract.

Staff requests that City Council authorize the City Manager to sign a contract with Dee Williams and Company, Inc. in the amount of $65,000 to install traffic calming in the Redwood Forest neighborhood.

G. ORDINANCE NO. 3266 - ORDINANCE REVISING THE SIDEWALK ORDINANCE TO BE APPLICABLE TO OTHER COMMERCIAL AREAS OF THE CITY IN ADDITION TO THE CENTRAL BUSINESS DISTRICT AND BILTMORE VILLAGE

Summary: The consideration of an ordinance revising the sidewalk ordinance to be applicable to other commercial areas of the City in addition to the Central Business District and Biltmore Village.

Currently, the sidewalk ordinance, Article V of Chapter 16, applies only to the Central Business District and the Biltmore Village area. Staff has received a request for an outdoor dining permit in the arts district off of Clingman Avenue. Because this area is neither in the Central Business District nor Biltmore Village, staff is prevented from issuing a permit. This is an example of an area that would benefit from businesses spilling out onto the sidewalk making the area more pedestrian oriented. Expanding the scope of the ordinance will allow staff to issue permits to businesses that are located adjacent to a sidewalk and would like to spill out onto the sidewalk.

In addition, staff is anticipating requests from other areas of the City, such as the Haywood Road Corridor, the Head of Montford or Charlotte Street. Widening the scope of the ordinance will allow these businesses to place outdoor dining or retail on the sidewalk. It will also allow for pushcarts to be located in commercial areas as well. All of the same requirements will remain in effect which will ensure that there is sufficient room on the sidewalk for pedestrians.

The proposed changes to the ordinance will allow permits to be issued for outdoor dining and retail in places where there is an appropriate place on the sidewalk for these uses. The outdoor dining or retail area must be either in front of or adjacent to the business.

Advantages:

- Wording amendment will allow staff to issue permits in new areas that are appropriate for outdoor dining, retail and pushcarts. Some businesses will be able to expand their service area where the sidewalk width allows.
- Outdoor seating and retail is seen as a way to make streets more pedestrian friendly and inviting to customers. This expansion of the ordinance may increase the number of areas in the city with this character.

Disadvantages:

- None noted.

City staff recommends the adoption of the ordinance revising the sidewalk ordinance to be applicable to other commercial areas of the City in addition to the Central Business District and Biltmore Village.

ORDINANCE BOOK NO. 22 – PAGE 213

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT THE CORNER OF COLLEGE STREET AND WOODFIN, KNOWN AS THE COLLEGE STREET OFFICE BUILDING**

ORDINANCE NO. 3267- ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT THE CORNER OF COLLEGE STREET AND WOODFIN, KNOWN AS THE COLLEGE STREET OFFICE BUILDING

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:15 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for property located at the corner of College Street and Woodfin, known as the College Street Office Building.

This project located in the downtown Central Business District is proposed to be 10 stories tall and contain 130,000 square feet (Attachments to City Exhibit 3 – Location Map and Aerial Map). The building will provide new office space for Buncombe County totaling 50,000 square feet (Attachments to City Exhibit 3 – Building Elevations). The remainder of the building will be leased to the private sector. A bank will occupy the first two floors and will provide a covered teller window along the west façade of the building. Two or three retail uses will occupy the ground floor of the building and one is expected to be a restaurant (Attachment to City Exhibit 3 – Site Plan).

On the site plan the building is placed close to College Street and provides a setback from Oak Street. To better accommodate Technical Review Committee comments regarding site access, the plan has been modified in the current layout. The building has shifted to the west resulting in a 50-foot wide public space at the Oak Street corner. This space will allow an outdoor dining area for a possible restaurant and will provide ample sidewalk space along all street frontages. On College Street the new office building will share a driveway with a parking area for the Health Department. Site access concerns have been addressed with these modifications. Street trees along Oak Street may be retained with the current layout which will be beneficial. The location and scale of this building on the main east side corridor of downtown makes this a gateway building for downtown. This proposal along with the City of Asheville recently completed

College Street Gateway Boulevard project match closely with the goal noted in the City of Asheville Strategic Operating Plan to encourage new downtown development with improved gateways and corridors.

A question about parking space came up during the Planning and Zoning Commission meeting. Off-street parking is not a requirement for projects in the Central Business District and therefore should not be a factor in the approval of the project. However the developer's agent reported that Buncombe County officials and the developer have agreed to build a parking garage on County property along Woodfin Street on the north side of the Health Department.

The CBD zoning is developed to reinforce the downtown as the urban center of Asheville and Western NC, encouraging private and public investment which will preserve the CBD as the primary retail, office, hotel, institutional, cultural and entertainment center of our community. A high priority is placed on design, integrating new uses into and with existing architecture in a respectful and cohesive manner. There are no building size limits and no height limits. There are also no requirements for off-street parking requirements in the CBD.

The building was reviewed by the Downtown Commission as part of the Design Review for new construction. With minor modifications, the Commission unanimously approved the design.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The project will meet City and State safety requirements and be subject to the state building code.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project is located on an infill lot that is currently a parking lot. No conflict was noted regarding any site features there.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The project represents a substantial investment by the private sector. Nearby property values are expected to increase because of this public private project.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The downtown area is an appropriate location for a building of the scale proposed for this parcel. In the vicinity of the site are several structures of similar scale including the Buncombe County Courthouse, City Hall and the Buncombe County Detention Facility.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The plans adopted by the City Council support redevelopment and reinvestment at infill locations in a high-density mixed-use pattern. The project will become a gateway building along the east side of the downtown area.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   Adequate infrastructure appears to be in place to support the development. Transportation facilities appear to be adequate and a Traffic Study will determine if any improvements are required for area roadways.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The site plan has been modified to facilitate the safe and orderly flow of traffic through the site. City staff has reviewed these changes and this should be sufficient to minimize any traffic hazards.

Additional Conditional Use Findings related to Government Uses in the Central Business District. In accordance with UDO Section 7-19-2-13, these additional standards must also be met:

1. The proposed location for the use or building will not unduly or unreasonably restrict the availability of key land for private development.

   Although the land is owned by Buncombe County the property is being offered back for private development through a long-term lease. Over half the building will be made available to the private sector.

2. No alternative location for the building or use exists within areas previously developed for government buildings and/or uses.

   The governmental uses will total about 50,000 square feet of a 130,000 square foot building. The government facilities are in close proximity to other Buncombe offices and uses and offer practical efficiencies in proximity to these sites.

3. If a new structure is proposed in the areas covered by the design review guidelines, the ability of the structure's design to comply with the downtown design review guidelines for new construction shall be a factor in the review of the request.

   New structures in these areas must substantially comply with the design guidelines as determined by the Asheville City Council. The project was reviewed by the Downtown Commission for compliance with the Design Review Guidelines. With minor modifications, the plan was thought by the Commission to be in compliance with the design guidelines.

Pros

- A significant gateway corner into the downtown area is being redeveloped.
- The proposed building represents a major private redevelopment in the downtown area.
- The mixed-use proposal is supported by many of the plans adopted by the community

Cons

- Beyond the concern over parking which has already been addressed, no items of concern have been noted regarding the proposed project.

At their June 1, 2005, meeting the Planning and Zoning Commission voted (7-0) to recommend approval of the conditional use permit based on the CUP findings and with the conditions outlined in the TRC report and the following conditions added at the TRC meeting: (1) A letter from Buncombe County stating who is responsible for inspections and permitting must be provided (Fire & Building Safety Departments); (2) One of the two existing driveways must be closed with cross access provided between the two lots (Fire & Engineering Departments); and (3) The dimensions of the leased area need to be identified and subdivided from the larger parcel (Planning Department).

Ms. Patsy Brison, attorney representing the developer and applicant, asked that the application and any supporting documents be made a part of the record (Applicant Exhibit 1), including the traffic impact analysis (Applicant Exhibit 2), and the Downtown Commission minutes of May 13, 2005 (Applicant Exhibit 3). Ms. Brison then reviewed the seven conditional use permit standards as well as the additional findings related to governmental uses.

Mr. Gerald Green, representing the developer, spoke in support of the permit. He explained there is no conflict with the roundabout on the corner. He explained how the project meets the City's goals, including it is a mixed-use building and will be subject to property taxes. The project has been reviewed by the TRC, the Downtown Commission and the Planning and Zoning Commission with only some minor modifications that have been or will be met as the development moves forward. Although the UDO does not require off-street parking for projects within the Central Business District, the tenants of the building do require off-street parking. As part of the lease for this property, Buncombe County is committed to providing a parking deck with approximately 750 parking spaces dedicated to this building. The construction period for the building is about three times longer than the construction period for a parking deck, so even though the deck has not been brought before Council yet, they don't see any problem with meeting the end date when the deck comes on line. Again, off-street parking is not a requirement for projects in the Central Business District and therefore should not be a factor in the approval of this project.

Mr. Brad Burns spoke in opposition to the project. After the Grove Park Inn development public hearing, he felt that city government should have reviewed the process of citizen appointees, revised their standards and set guidelines. If they had, then this project would not be before Council. Urban parks should be designed within or just outside the buildings. The exceptional heights of the buildings in the Central Business District are exceptions and no more should be allowed. We need to establish office hubs outside the Central Business District and traffic hubs from which others can bus shuttle back and forth. The bottlenecking of traffic and pedestrian safety on College Street should prohibit future development.

After rebuttal, Mayor Worley closed the public hearing at 5:39 p.m.

Upon inquiry of Councilman Dunn, Mr. Green said that the building will be built by a private developer and will be privately owned. He explained that the County will lease space in the building.

In response to Vice-Mayor Mumpower, Mr. Green said that he hoped that construction would be approximately 18 months with construction to begin in spring of 2006.

Mr. Green responded to various questions/comments from Council, some being, but are not limited to: what is the impact on the surrounding area; and where will the sidewalks be located (Applicant Exhibit 4 – Earlier Site Plan).

In response to Councilwoman Bellamy, Mr. Green said that the building design doesn't conform to a lot of buildings in the community because they wanted to construct something that honors the buildings downtown and builds on the architectural buildings in Asheville.

Mr. Glines responded to Councilman Davis' concern about drive-throughs in the Central Business District.

There was considerable discussion about why the parking deck plan is not being presented concurrently with this project plan. Mr. Green explained that the parking deck is not part of this development project. It will be reviewed by the City as a separate project. City Attorney Oast said that the fact that there is a contractual arrangement between Buncombe County and the developer to provide parking is useful information but is not relevant to Council's consideration of this project. Councilwoman Jones and Councilman Newman felt that if there is a process that doesn't allow us to look to the future and take the project and the parking deck into account, then we need to look to see if there are procedural inadequacies in our current process. They didn't want to be backed into a corner to approve a project based on a previous decision. Planning & Development said that this project does meet all requirements we have for a building in the Central Business District. They are not required to have parking for a building of this type, but they do it for their own marketing purposes, but again, not to comply with any of the City's codes.

In response to Councilwoman Jones, Mr. Green explained the public notice procedures they have used for this project, in addition, he showed a June 13, 2005, article in the Asheville Citizen-Times in which the project was discussed (Applicant Exhibit 5).

Councilman Dunn moved for the adoption of Ordinance No. 3267, granting a conditional use permit for property located at the corner of College Street and Woodfin, known as the College Street Office Building, subject to the following conditions: (1) A letter from Buncombe County stating who is responsible for inspections and permitting must be provided; (2) One of the two existing driveways must be closed with cross access provided between the two lots; and (3) The dimensions of the leased area need to be identified and subdivided from the larger parcel. This motion was seconded by Councilman Davis and carried unanimously.

In response to Councilwoman Jones' concern, Mr. Shuford said that staff will come back to Council at a future worksession to share a range of issues that were identified from a design standpoint by the Urban Design Associates as they looked at Pack Square and the surrounding properties and what are some of the key issues are that need to be addressed in terms of the infill development along College Street. That way, Council will have a framework, not a master plan because we don't control the property, so we can give you a clear idea of what to look for as additional projects come along in that area of town, and what are the critical design elements that need to be taken into account.

ORDINANCE BOOK NO. 22 - PAGE 215

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 200 TECHNOLOGY DRIVE FROM CENTRAL BUSINESS DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THREE PROPOSED OFFICE BUILDINGS

ORDINANCE NO. 3268 - ORDINANCE REZONING PROPERTY LOCATED AT 200 TECHNOLOGY DRIVE FROM CENTRAL BUSINESS DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3269 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 200 TECHNOLOGY DRIVE FOR THREE PROPOSED OFFICE BUILDINGS

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:19 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of a request to rezone property located at 200 Technology Drive from: Central Business District to Commercial Industrial District/Conditional Use, and a request to issue a conditional use permit for three proposed office buildings.

The applicant, Biltmore Farms, Inc., seeks a Conditional Use Rezoning (CUZ) based on a concept plan showing an office development with associated parking on 19.3 acres on Technology Drive in the Biltmore Park community (Attachments to City Exhibit 3 – Location Map and Aerial Map). The site for the proposed project is a portion of a 145-acre lot in the City of Asheville's extraterritorial jurisdiction area (ETJ). This portion of the parcel is currently zoned Central Business District (CBD). The applicant seeks to rezone the portion to Commercial Industrial (CI). (Offices are a permitted use in the CI district) (City Exhibit 4).

The project has a total building area of 225,000 square feet. The number of parking spaces shown is sufficient for project (Attachments to City Exhibit 3 – Master Plan and Master Plan with phasing).

The applicant has agreed that the subdivision of the property will a condition for approval of the rezoning.

At their May 16, 2005, meeting, the Technical Review Committee (TRC) reviewed the Conditional Use Rezoning and concept plan proposal and made a positive recommendation that

the project be forwarded to the Planning and Zoning Commission, stipulating the following project conditions summarized as follows. The applicant agreed at the meeting to comply with these conditions. Please note that the plans accompanying this report have been revised since the TRC meeting to address most of the conditions mentioned in the TRC staff report:

1. The CI zoning district requires a 35-foot front setback, in which parking is not permitted. Design will have to be altered to remove parking from within 35 feet of the northeast edge of the lot (Attachment to City Exhibit 3 – Landscape Plan).
2. As this high impact use will be adjacent to a low impact use to the northeast, a type "A" vegetated buffer will be required along the shared boundary.
3. If any of the entrance drive to the project will become part of Technology Drive for City maintenance, street trees must be indicated.
4. Project will require provision of an urban level of public safety service.
5. Parking spaces to be City Standard (18'X9') and drive aisles to be standard 24' width.
6. Bike rack will be required for the project. The bike spaces shall be 5% of total vehicle spaces.
7. Striped pedestrian crosswalks will be required at all proposed pedestrian crossings.

At their June 1, 2005, meeting, the Planning and Zoning Commission reviewed the Conditional Use Rezoning and concept plan proposal and approved the application by a 7-0 vote, with the stipulation that all TRC conditions be met.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   Though some grading and site disturbance will be required, the proposed project's design will mostly preserve the existing topographic relationships. Provided the applicant employs proper erosion control measures and the proposed landscaping and mitigation, the nearby streams should not be adversely affected.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   Staff does not expect that the proposed use would have anything more than a minimal impact on property values.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The proposed project would be in harmony with these characteristics of the area—the office park design is similar to the neighboring properties which are developed.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the Asheville City Council in 2000. While this project is more suburban in character than the new urbanist designs promoted in the Comprehensive Plan, it is located near an interstate highway "node," as the plan recommends for large office developments. In addition, the proposal includes significant area reserved for open space, and the developers have stated an intention (though not a final design) to include walking trails to the nearby services of the Biltmore Park Town Square, both goals of the Comprehensive Plan and the Strategic Operating Plan.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The project's location off a parkway feeding into Long Shoals Road close to I-26 ensures access to major transportation facilities and other services. In addition, technical review from other departments has not revealed any problems for serving the development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. The proposed entrances and exits are similar to those currently in place.

Pros

- Project would include substantial open space, and developer has stated intention to provide walking trails, both amenities that are unusual for an office park.
- Project corresponds well to the closest neighboring developments.

Cons

- Design of project resembles suburban style of office park development.

Staff recommends approval of the rezoning request from CBD to CI with approval of the associated Conditional Use Permit and detailed site plan.

Mr. Thomas Jones, applicant, spoke in support of the project. He felt Biltmore Park needs this type of office space and the project works with the existing topography.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:28 p.m.

Vice-Mayor Mumpower moved to approve the conditional use rezoning for property located at 200 Technology Drive from Central Business District to Commercial Industrial District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3269 to issue a conditional use permit for property located at 200 Technology Drive for three proposed office buildings, subject to all the TRC conditions being met. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 223

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 4, 6 AND 7 ROBERTS ROAD, KNOWN AS FUN DEPOT, FOR A PROPOSED EXPANSION OF THE EXISTING OFFICE BUILDING AND RECREATIONAL FACILITY AND CONSTRUCTION OF A NEW OFFICE BUILDING

ORDINANCE NO. 3270 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT THE 4, 6 AND 7 ROBERTS ROAD, KNOWN AS FUN DEPOT, FOR A PROPOSED EXPANSION OF THE EXISTING OFFICE BUILDING AND RECREATIONAL FACILITY AND CONSTRUCTION OF A NEW OFFICE BUILDING

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:32 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Julia Cogburn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Cogburn said that this is the consideration of the issuance of a conditional use permit for property located at 4, 6 and 7 Roberts Road, known as Fun Depot, for a proposed expansion of the existing office building and recreation facility and construction of a new office building.

The project site is located at the corner of Sweeten Creek and Roberts Road just south of the intersection of Sweeten Creek with I-40 (Attachment to City Exhibit 3 – Location Map). Access to all parcels involved in this development is off of Roberts Road. The total project site (presently three lots) is currently listed for tax purposes as 6.32 acres and is zoned CI (Commercial Industrial) (City Exhibit 4 – Aerial Map). Commercial Industrial zoning allows for office buildings and for both indoor and outdoor recreational facilities. The three separate site proposals are being considered as a singular development under a provision in the City's Unified Development Ordinance (UDO) that requires development proposals located within 1500 feet, developed by one entity, to be treated as one development for review purposes. The concept

plan shows these lots being combined for development purposes and the project has been reviewed as if it were all one lot.

The applicant, Day and Elizabeth LLC and Asheville Fun Depot LLC, is proposing an expansion of the existing Asheville Fun Depot recreational facility on the property located at 7 Roberts Road (PIN 96571036577) (City Exhibit 5 – Site Plan). This expansion will add 22,020 square feet to the existing structure, creating a total of 58,700 square feet of enclosed recreational use. The applicant is also proposing the development of a new multi-level outdoor go-cart track and a pedestrian bridge and stairwell to take patrons of Fun Depot from the facility down to the lower parking at the Day Associates Office Building.

At 6 Roberts Street, the site of the existing Day Associates Office Building, the applicant is proposing an interior expansion (creation of a second floor) of 3,284 square feet of office space. The applicant currently has a Level I application for this expansion and for the go-cart track under review.

A new office building, Depot Crossing at Sweeten Creek, is proposed for the western most lot. The proposal is for a 39,000 square foot building, three stories in height. Approximately one-third (1/3) of this property is in the floodway for Sweeten Creek. It is proposed that the creek be culverted and filled over to allow this development to take place.

The City's Technical Review Committee (TRC) met on April 18, 2005, to review this development proposal. At that meeting, as there were still some legal issues to be addressed, the committee tabled this proposal to their May 2nd meeting. At their meeting on May 2nd the TRC voted to approve the project with the conditions outlined in the TRC report. Additionally, it was stipulated that the lease agreement with Norfolk Southern would need to be received prior to hearing before the Planning and Zoning Commission and that any proposal on additional buffering would have to be presented to and informally accepted by the Tree Commission.

City Council must take formal action on this matter and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed use has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code, and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The applicant is working with the topographic features of the site in locating the structures. The applicant will have to obtain a no-rise certificate for work done in the floodway and a LOMR if construction changes the location of the floodway or floodplain.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The project consists primarily of expansions to existing operations and the construction of a new office building that is in keeping with the uses in the area. These improvements should increase the property values and encourage additional investment in the surrounding area. Required landscaping and buffers will shield the project from less intensive uses.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The proposed development is surrounded by major highways (I-40, Hwy 25-A), railroad tracks, an office complex, and a major equipment sales and service operation. The scale and character of the development is in keeping with all that surrounds it.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

This development supports the *Asheville City Development Plan 2025* objectives concerning infill development and the adaptive reuse of properties through flexible development standards. It also implements the strategy of permitting more intense commercial and office developments in locations where there exist adequate public facilities.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's Technical Review Committee, which found that adequate services and facilities are available for the proposed development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The subject site is located adjacent to an interstate interchange and on a major artery in the community. Traffic associated with the development will have ample resources for access to the site. All other services are readily available to the development.

Pros

- The proposed development consists mostly of expansions to two existing facilities, appropriate to the location. The additional development is in keeping with the area.
- The project supports the City's comprehensive plan as indicated in this report and is adequately served by needed infrastructure.
- The developer has utilized shared parking and flexible development standards to reduce the number of parking spaces provided.

Cons

- The project site has difficult topographic and flood challenges for the developer. Proposed retaining walls and creek culverts will have to meet all applicable regulations.

The Asheville Planning and Zoning Commission reviewed this application at their meeting on July 6, 2005, and voted unanimously (7-0) to recommend approval to you subject to the conditions outlined by the Technical Review Committee including the need to resolve all the legal

issues concerning the use of the Norfolk Southern property. Based on the seven findings, staff also recommends approval of the conditional use permit with the aforementioned conditions.

Mr. Mike Connor, representing the applicant, spoke in support of the project.

After rebuttal, Mayor Worley closed the public hearing at 6:38 p.m.

Vice-Mayor Mumpower moved to approve the conditional use permit adopting the proposed master plan for the proposed expansion of an existing office building and recreational facility and construction of a new office building located at 4,6, and 7 Roberts Road subject to the conditions outlined by the TRC including the need to resolve all the legal issues concerning the use of the Norfolk Southern property. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 228

D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 891 PATTON AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/ CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED EMPLOYEE PARKING LOT

Mayor Worley said that on July 26, 2005, a letter was sent to Ms. Kim Hamel in the Planning Department from Pat Grimes, from Harry's Cadillac, and Pastor Randy Bray, from Temple Baptist Church, stating that "As you may know, we held a neighborhood meeting this past week. Several of our neighbors are opposed to our rezoning request. We asked for options at that meeting and received none. After discussion the matter at length with our attorney, we believe that it is prudent to withdraw our application at this time to allow us additional time to re-consider our planning options. Hopefully, if we re-submit in the near future, our new proposal will receive more favorable neighborhood support and perhaps support from your department."

E. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED ON OAK PARK ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO ESTABLISH TWO DUPLEXES AND SIX SINGLE-FAMILY UNITS

On July 26, 2005, City Clerk Burleson received a letter Mr. Gerald Green, Principal of GreenPlan Inc., as follows: I am requesting that the public hearing for the Skyview Park Conditional Use Rezoning scheduled for July 26, 2005, be continued until August 9, 2005. This continuance will provide time for us to address some of the concerns identified by neighboring property owners. We will be revising the site plans to address some of the concerns that have been identified and we will continue to meet with neighboring property owners to identify their concerns regarding the project."

Mr. Bill Chase, resident on Oak Park Road, was not so much opposed to the continuance request, but that residents have made accommodations to be present for this public hearing.

Mr. Green said that the continuance will allow the developer to spend more time trying to address the concerns of the property owners.

City Attorney Oast said that a valid protest petition has been filed and it would not need to be re-filed.

Vice-Mayor Mumpower moved to continue this public hearing until August 9, 2005. This motion was seconded by Councilman Newman and carried unanimously.

F. PUBLIC HEARING TO CONSIDER REZONING VARIOUS LOTS IN SECTIONS B, C AND F OF THE BREVARD ROAD REZONING STUDY

ORDINANCE NO. 3271 - ORDINANCE TO REZONE VARIOUS LOTS IN SECTIONS B, C AND F OF THE BREVARD ROAD REZONING STUDY

Mayor Worley opened the public hearing at 6:41 p.m.

Urban Planner Shannon Tuch said that this is the consideration of an ordinance to rezone various lots in Sections B, C and F of the Brevard Road Rezoning Study. This public hearing was advertised on July 15 and 22, 2005.

In the summer of 2003 the N.C. Dept. of Transportation (DOT) publicly revealed final plans to widen two sections of Brevard Road from the existing 2 lanes to a more accommodating 4-5 lanes. The first section was from just south of Oakview (near Interstate 26) to Pine Road (near the Toyota/Saturn Car Dealership). The second stretch begins just south of Stradley Mountain Road all the way to the NC Arboretum and Blue Ridge Parkway entrances. The intervening stretch already contained anywhere from 4 to 6 lanes to accommodate the Biltmore Square Mall and other large businesses and retail centers.

There were a number of reasons stated by DOT for the widening including anticipated increases in traffic volumes, which are expected to almost double by 2025, and a need for increased safety. However, the strongest reason for the widening was simply that 191 (Brevard Rd.) was part of an "intrastate" road system and it was part of the DOT's larger plan to widen all intrastate roads.

As a result of the road widening plans, the Planning and Development office was flooded with requests from property owners along the corridor, wanting to rezone their properties to allow for a higher use. As a result, a number of requests were initiated and approved at various points along the corridor. The amount of interest in rezoning along the corridor prompted staff to re-examine the existing land-use patterns in conjunction with the goals and strategies of the Asheville City Development Plan 2025 (ACDP). The study revealed six pocket areas that were felt to be better served by a different zoning classification. Those six sections are described as:

- Section A – 10 lots, RS-8. Staff proposed to rezone these properties to RM-16
- Section B – 1 lot, CI. Staff proposed to rezone this single property to OFFICE
- Section C – 14 lots, HB. Staff proposed to rezone these properties to CB-II
- Section D – 54 lots, RS-8. Staff proposed to rezone these properties to RM-16.
- Section E – 2 lots, OB. Staff proposed to rezone these properties to HB.
- Section F – 3 lots, CI. Staff proposed to rezone these properties to RB.

Although staff felt, based on the study, that a different zoning classification was warranted for these areas, it was of paramount importance that property owner interest and input was garnered for these proposed changes. In an effort to effectively communicate with these property owners, a separate informational meeting was held on March 16, 2005, where each individual property owner was invited to attend and participate in a discussion about the rezoning petition. The meeting was well attended and property owners from Sections A and D uniformly spoke against the zoning change and expressed a preference to retain the RS-8 designation.

The ACDP 2025 describes the need to encourage transit supportive density along major corridors, however, it also describes as a purpose of the plan to propose a land use pattern, transportation network and a system of city services and infrastructure that reflects the community's desires and wishes concerning future growth of the city. Having heard the community's desires and the recommendation from the Planning & Zoning Commission, staff made the decision to drop sections A and D from the study. In addition, as a result of these two sections dropping out, it was felt that Section E should also be removed from the study since its proposed change was contingent on rezoning the residential areas to a higher density. The other three sections (Section B, Section C, and Section F) were retained and are part of the current petition.

On June 1, 2005, the Planning & Zoning Commission reviewed the rezoning study and requests and unanimously approved the recommendation to rezone Sections B and F. A moderate amount of discussion revolved around the proposed rezoning of Section C where public comment was received both in favor and in opposition of the zoning change. The primary concern was over a single wholesale business that would be rendered non-conforming in use if rezoned to CB-II. The individual property owner, although notified of the informational meeting and public hearing, was not in attendance and had not expressed interest in the potential zoning change. The Planning & Zoning Commission postponed voting on a recommendation for Section C and asked staff to try to contact the property owner directly to better discern a position or preference for the zoning change. After some time and effort, staff did make contact with the property manager and owner who both expressed concern over a change to CB-II. Although the business did not have any immediate plans for expansion, they did not want to limit their ability if they felt it necessary to expand in the future. As an alternative, staff proposed rezoning the majority of Section C to CB-II while rezoning the wholesale florist property and an adjacent vacant lot to the west (owned by Anderson Dental Laboratories) to CI. The CI zoning would allow the use to remain conforming, would retain the same setback requirements, and better matched existing land use and zoning patterns. Both the property owner and manager did support this alternative. On July 6, 2005 the Asheville Planning & Zoning Commission reviewed the revised recommendation and unanimously approved rezoning 12 lots to CB-II and 2 lots to CI.

In summary, staff now recommends the following rezoning actions:

Section B (one lot) from CI to OFFICE to better address the existing pattern of growth and redevelopment and to more accurately reflect the existing office use. The property currently supports a chiropractor's office and two additional structures that appear to be residential structures but may be used as additional office space. The purpose of the CI zoning designation is to provide for a wide range of commercial and industrial uses; common CI uses include, light manufacturing, wholesale, warehousing, service uses, and retail. The purpose of the OFFICE zoning is to reserve areas for the development of small scale office uses adjacent to residential uses and/or to serve as a transition between residential and commercial areas. This property will fill in the transition office zone between the existing residential area to the north and the existing commercial area to the south.

Section C (12 lots) from HB to CB-II to encourage a Smart Growth Development pattern adjacent to residential areas and to preserve and enhance the character of the Gateway Boulevard. The purpose of the HB zoning designation is to address the needs of commercial development along major thoroughfares where automobile use is prevalent and a wide range of commercial uses is permitted. Due to the dominance of the automobile, a primary objective within this district is to preserve the traffic capacity of the thoroughfare; common HB uses include shopping centers, big box retail, and grocery stores. The purpose of the CB-II zoning designation is to provide business and service uses to medium/high density residential areas located along minor and major thoroughfares. CB-II development should provide for adequate and safe vehicular access while being sensitive to a significant pedestrian population; common CB-II uses include medical

offices/clinics, restaurants, banks, and mixed-use developments. The properties are relatively small for the underlying HB zoning making typical large scale re-development more difficult. In addition, all existing uses are smaller businesses that currently conform in use and structure size.

Section C (2 lots) from HB to CI to better address an existing wholesale business. Originally, staff looked at rezoning all 14 lots in Section C to CB-II but discovered that the existing wholesale florist was the only existing business that would be rendered non-conforming in use. This was a concern due to an existing restriction that does not allow the expansion of non-conforming uses. It was recognized that the existing business would be better served by either the current HB zoning or, as an alternative, a rezoning to CI. To prevent the isolation of a single vacant lot, the property immediately west of the wholesale business is also proposed to be rezoned to CI.

Section F (3 lots) from CI to RB to better reflect the existing development patterns and preserve the character of this portion of Brevard Road described as a "Regional Commercial Corridor". The purpose of the CI zoning designation is to provide for a wide range of commercial and industrial uses; common CI uses include, light manufacturing, wholesale, warehousing, service uses, retail, and large office centers. The purpose of the RB zoning designation is to provide areas of large scale commercial and retail operations. These centers should be concentrated around the intersections of high traffic volume thoroughfares and arterial roads and should be easily accessible by the automobile while providing for shared parking opportunities and pedestrian connections; common RB uses include big-box retail, restaurants, lodging facilities, and shopping malls. The subject properties are adjacent to the Biltmore Square Mall (zoned RB) which already acts as a destination shopping center. In addition, the three lots currently support uses consistent with the RB zoning designation (K-Mart, misc. strip retail, and Ryan's Steakhouse).

Pros

- Proposed zoning changes will more accurately reflect existing land use patterns.
- Redevelopment will better preserve the character of Brevard Road as a Gateway Boulevard.
- Proposed zoning will better preserve the character of the existing residential areas.
- Existing uses remain conforming.

Cons

- Renders some existing parking lots to be non-conforming.

City staff recommends City Council approve the zoning map amendment identified as (1) Section B (1 lot) from CI to OFFICE; (2) Section C (12 lots) from HB to CB-II; (3) Section C (2 lots) from HB to CI; and (4) Section F (3 lots) from CI to RB.

Mayor Worley closed the public hearing at 6:54 p.m.

There was discussion about Councilman Davis' concern that the Highway Business District may be more favorable in the future as the road widens and the city continues to grow.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3271. This motion was seconded by Councilwoman Bellamy and carried on a 6-1 vote with Vice-Mayor Mumpower voting "no".

At 7:18 p.m., Mayor Worley called a short recess.

G. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH NEW LIVE-WORK UNIT REQUIREMENTS AND TO ALLOW SUCH USES IN VARIOUS ZONING DISTRICTS

ORDINANCE NO. 3272 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH NEW LIVE-WORK UNIT REQUIREMENTS AND TO ALLOW SUCH USES IN VARIOUS ZONING DISTRICTS

Mayor Worley opened the public hearing at 7:36 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance ("UDO") to establish new live-work unit requirements and to allow such uses in various zoning districts. This public hearing was advertised on July 15 and 22, 2005.

This code amendment is intended to accommodate a mixed residential/ commercial use of property known as live-work. A live-work unit can be defined as a building or space within a building that is used jointly for commercial and residential purposes where the residential use of the space is secondary or accessory to the primary use as a place of work. Since a live-work unit as defined above is predominately commercial in nature, it should be regarded as the equivalent of 0.5 residential unit for the purpose of applying density requirements.

The parking requirements for a live-work unit should be based on the square footage of the nonresidential use plus one space for the residential use. The minimum parking for the nonresidential space of a live-work unit should be the same as for other retail and office uses (a minimum of one space per each 350 square feet and a maximum of one space per each 250 square feet).

Live-work units should be allowed in any zoning district that allows a mix of commercial and residential uses (i.e., virtually all zoning districts that are not exclusively residential).

Pros

- Provides an added option for entrepreneurship development.
- Accommodates an increasingly popular form of land use that can reduce trip generation by mixing uses.

Con

- None noted.

On July 6, 2005, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Upon inquiry of Mr. Matthew Hebb, Mr. Shuford said that any concerns regarding sanitation will be addressed through other mechanisms, not the Unified Development Ordinance.

Mayor Worley closed the public hearing at 7:39 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3272. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 239

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION SUPPORTING THE CONVERSION OF THE DOWNTOWN ONE-WAY PAIR OF COLLEGE STREET AND PATTON AVENUE

Councilwoman Bellamy asked that if this matter could be postponed in order to give the community an opportunity to become familiar with the recent changes that have occurred on College Street. Planning & Development Director Scott Shuford said that with the construction of the Pack Square Renaissance Project, that will cause a portion east of Biltmore Avenue to be converted this year. The part west of Biltmore Avenue will be on a timeline that will be at least 1-3 years because of the phasing of traffic signals. He felt there will be an ample period of time for people to get used to the College Street and Pack Square Renaissance changes. Alternately, it may be possible for Council to provide staff with a timeframe for implementation.

Traffic Engineer Anthony Butzek said that one of the reasons they are bringing this to Council is there is a significant amount of work that would have to be done by staff including pursuing some funding, particularly from the State, in moving us forward. As far as implementation, it depends somewhat on the available funding. Once we have an adopted plan from Council for the conversion, staff will be pursuing funding from the N.C. Dept. of Transportation (NC DOT) for modifications to the traffic signals and we can't pursue that funding until we have an approved plan from Council.

Mr. Shuford said that this is the consideration of a resolution supporting the conversion of the downtown one-way pair of College Street and Patton Avenue back to two-way operation so that staff may pursue State funding for implementation.

Staff has been studying the benefits of converting College Street and Patton Avenue back to two-way operation for several years. Discussion of this conversion was initiated with the Pritchard Park project and has continued with the Pack Square Renaissance project, although neither of these projects requires conversion for their operation.

There are several benefits with conversion to two-way operation:

- It supports the conversion of the main east-west traffic access through downtown (east of Pritchard Park) from Patton Avenue to College Street.
- It improves accessibility and exposure of businesses along these roads, thereby supporting the overall business climate in downtown.
- It improves the level-of-service (LOS) for eastbound traffic while maintaining the LOS for westbound traffic.
- It improves pedestrian safety on two critical east-west streets in downtown.
- The proposed design offers opportunities for enhanced sidewalk café operations on downtown sidewalks, allowing greater business use of public space.
- It improves the linkage between two important downtown parks – Pritchard Park and Pack Square.

- It provides additional parking on the eastern end of the corridor while maintaining current parking levels on the western end.
- It allows adjustments to loading zones to improve business access, although some businesses may be slightly farther away from loading zones than is currently the case.
- It promotes multiple use of loading zones (loading during the day, parking at night).

The Downtown Commission considered the conversion issue at its July 8, 2005, meeting and unanimously recommended that Council proceed with the conversion. Communities that have made similar conversions are pleased with the results. The following table lists several communities studied in the late 1990s by a traffic engineering periodical, including the results experienced.

Characteristics of Projects Converting Downtown Streets from One-Way to Two-Way Operation

City	Pop.	Year	Type of Conversion	Average ADT	Results
Anniston, AL	26,400	1997	Convert major downtown streets back to two-way.	10-15,000	Vacancy dropped, very positive for business development
Dubuque, IA	60,000	1998	Convert one-way loop around pedestrian mall to improve access, reduce confusion.	6,000	Very positive, better business access, customer friendly.
Gardner, MA	22,000	1993	Convert one-way loop around to two-way on three downtown streets.	40,000	Conversion immediately enhanced business development, reduced vacancy.
Green Bay, WI	97,000	1997	Convert main downtown gateways to two-way.	5,000	Improved business access.
Hickory, NC	36,000	1999	Converting paired one-way traffic system to two-way flow.	5,000	Good results, calmed traffic, improved business access and development, new investment.
North Little Rock, AR	61,000	1999	Converting to two-way after 16 years.	13,000	Announced two-way flow attracted property investment and new businesses.

Source: *The Urban Transportation Monitor*, May 12, 2000.

Mr. Butzek said that a traffic study commissioned by the City in 2001 concluded that the conversion to two-way traffic is feasible and would not significantly degrade traffic operations. Levels of service remained generally similar to conditions under one-way operation with the full implementation of the conversion, including several minor geometric improvements. This study, conducted by Kimley-Horn and Associates, analyzed traffic conditions in the downtown area, recommended improvements for two-way operation, and estimated costs for conversion.

The conversion from one-way to two-way would be done to support the economic vitality of downtown and increase pedestrian safety. It is generally felt that one-way streets have the ability to move more traffic, while two-way streets are more conducive to economic vitality. Two-way streets also avoid the confusion to motorists that one-way streets create, allowing for more direct routes of travel. This is especially important in Asheville as downtown is a tourist destination. Two-way streets would result in slower traffic movement, and slightly increased

congestion. The idea that congested downtown streets keep people away is generally obsolete, with current wisdom dictating that slower traffic is representative of economic vitality. As noted above, many cities are converting their one-way streets back to two-way, as traffic conditions permit.

Generally, downtown merchants have expressed support for two-way streets. A survey of ground-level businesses indicates support for the conversion. Out of the thirty-three businesses and/or property owners surveyed, sixteen support the change, eight felt that they might support the plan and ten were against the plan. The businesses that indicated a lack support were concerned primarily about loading zones and parking spaces that serve their business. As the result of this feedback, staff has ensured that the same amount of loading and parking is available as is currently.

College Street and Patton Avenue are currently proposed to be converted to two-way east of Biltmore Avenue/Broadway to facilitate traffic movement consistent with the Pack Square Plan. In order to pursue conversion of the remainder to the west (to Coxe Avenue), and to request State funding to perform necessary replacement of the signals on Biltmore Avenue/Broadway at Patton Avenue and College Street, staff requests approval of the conversion by City Council.

The following table provides a summary of City staff modeling of the PM peak-hour operational differences at various intersections showing expected levels of service (LOS). By direction of travel, the converted roadways show an improvement in the level-of-service (LOS) for eastbound traffic while maintaining the LOS for westbound traffic.

Intersection	One-way LOS	Two-way LOS
College & Spruce	B	B
College & Market	A	A
College & Broadway	B	B
College & Lexington	B	B
College & Haywood	B	B
Patton & Coxe	C	C
Patton & Haywood	A	A
Patton & Lexington	B	B
Patton & Biltmore	C	C
Patton & Market	B	*

Concerns regarding the effect of the conversion to 2-way traffic on traffic flow, parking availability, and loading zones, were raised consistently as input was taken for this project. Staff has analyzed each in detail and studied ways to improve operations for each as part of the development of this plan.

Traffic Flow:
Traffic operations are not expected to be degraded by the conversion to 2-way, and will be improved for some traffic. The conversion to 2-way relieves the existing bottleneck at Pack Square, the intersection of Biltmore, Broadway, and Patton. Drivers traveling eastbound through downtown, or north or southbound along Biltmore/Broadway, will see improved travel times compared to existing conditions. Drivers traveling westbound through downtown will see comparable travel times compared to existing conditions. Some rush-hour congestion will occur, as it does under the current configuration.

Loading Zones:
This was raised as a significant concern by businesses and the Downtown Commission. A number of marked loading zones exist on College and Patton, in addition to a number of informal loading zones. Informal loading zones typically occur in "dead space", non-critical and unmarked pavement between travel lanes, along curbs, or in excess vehicle travel lanes. Loss of loading zones on College Street will occur, given that College Street would be a 3-lane street, thus removing most parking and loading. Staff reviewed and documented these marked and informal loading locations in an effort to replace the space with a reasonable provision of marked loading zones.

The number of marked loading zones on College and Patton, and within a short distance along side streets, will increase from 11 loading zones totaling 265 linear feet (plus informal zones) to 17 zones totaling 706 linear feet (removing most informal zones). The increased length reasonably offsets the loss of informal loading space. These 17 proposed zones could revert to 36 parking spaces after-hours and on weekends.

Parking:
Loss of parking along College Street was raised as a significant concern, given that College Street would be a 3-lane street, thus removing most parking and loading. Staff worked to provide added parking on side streets as possible to offset these losses. Gains in the Pritchard Park, Biltmore Avenue, and Pack Square areas more than offset this loss of parking, although in different locations than the lost parking. Overall, the number of parking spaces would increase by 11 spaces downtown, with a net gain on the central and east parts of the corridor, and a net loss (5 spaces) on the west side of downtown. Additionally, 36 additional spaces are gained after-hours and on weekends in the marked loading zones.

The conversion requires modification to or replacement of eight traffic signals (six City and two State) along the corridor, and allows for removal of three others (Haywood & Battery Park, Patton & Haywood, Patton & Market). These replacements comprise most of the costs associated with the conversion. Replacement of all eight signals with decorative poles is estimated to cost $1.05 million. Modification to the City's six signals could serve two-way traffic on a temporary basis at an estimated cost of $100,000. Geometric modifications to the streets for two-way traffic are estimated at $125,000, about half of which will be done as part of Pack Square.

Staff proposes that Council allocate approximately $250,000 per year over the next four budget years in order to facilitate the necessary geometric modifications and replacement of traffic signals.

Pros

- Expected economic benefits for downtown, including improved accessibility and enhanced opportunities for use of public space for sidewalk cafes
- Reduced traffic speeds downtown with improved pedestrian safety
- Greater consistency with Pack Square plans
- Supported by many downtown merchants
- Supported by the Downtown Commission

Cons

- Cost
- Reduced traffic speeds downtown (con for impatient drivers)
- Concerns from some downtown office buildings

This project meets several of Council's strategic goals and objectives: Planning Goal #2, Objective A, Task 2: Leverage outside funding to achieve multiple transportation goals where

possible. Planning Goal #2, Objective B, Task 1: Determine opportunities for managing traffic demand through changes to commuting patterns and transportation modes, land use patterns, signalization improvements, etc.

Staff recommends approval of the two-way plan and authorizing staff to pursue State funding and phased implementation of the two-way conversion as budgets permit.

Mr. Butzek said that they have not been able to reach a solution with the property owner of the BB&T building. An alternative to those two loading zone spaces, staff is proposing to add two new loading zones in the front of the BB&T building. Unfortunately that does cause an inconvenience for that operation.

Mr. Fred English and Mr. Peter Dawes spoke against the conversion. They were both concerned from the public safety standpoint.

Mr. William Wilcox, representing Tower Associates Inc., owners and managers of the BB&T Building, opposed the 2-waying of the street section between the intersections of Broadway Avenue/College Street and Lexington Avenue/College Street. He presented City Council with a copy of an e-mail outlining his concerns dated July 25, 2005, to Mr. Anthony Butzek and Ms. Sasha Vrtunski. One of his main concerns is the elimination of the existing loading docks on the north side of their building. He explained the problems with re-locating those loading zones to the front of their building,

Throughout the discussion about the conversation, Mr. Butzek responded to various questions/comments from Council.

City Manager Jackson said that he will report back to Council with a public safety response and with a financial analysis laying out in detail what the costs will be and what the funding alternatives are. In terms of the community preference and the policy considerations, he will leave that to the Council.

In summary, Councilman Dunn moved to postpone this matter until the City Manager has had the opportunity to do further analyses. This motion was seconded by Councilwoman Bellamy and carried unanimously.

B. RESOLUTION NO. 05-151 - RESOLUTION ADOPTING THE RIVER REDEVELOPMENT PLAN

Planning & Development Director Scott Shuford said that this is the consideration of a resolution adopting the River Redevelopment Plan funded by the NC Rural Economic Development Center and authorizing staff to forward the Plan to the Rural Center for consideration.

In response to the Fall 2004 floods, the NC Legislature authorized redevelopment planning and implementation monies. In late April, the City of Asheville was awarded a $20,000 grant from the NC Rural Economic Development Center to prepare a redevelopment plan for Biltmore Village. We were also invited to submit other planning grant applications and were successful in obtaining an additional $20,000 grant to study two other areas. Council recently approved these grants.

Pursuant to these grants, City staff has prepared a redevelopment plan. Due to the timeframe associated with the Rural Center grants, the plan was developed with only limited public input. It consequently has many areas that will require additional public involvement prior to any implementation actions taking place. However, the plan does follow the adopted Wilma

Dykeman Riverway Master Plan in scope and design, examining a mixed-use development pattern and suggesting economic revitalization of the City's urban riverfront, greenway implementation, construction of the Wilma Dykeman Riverway, and use of environmentally-sensitive construction methods. It also offers implementation funding from the Rural Center for items not able to be funded using traditional means and opens the possibility of receipt of much more significant funding from the Rural Center for the designated projects.

The following three areas were identified for redevelopment planning:

- **Biltmore Village Redevelopment Area** – This includes the Biltmore Village local historic district and a large area to the east, including the Koon Development located at Glendale Avenue and Thompson Street.
- **East Swannanoa River Redevelopment Area** – This area includes property located on Swannanoa River Road across from the Sayles Wal-Mart.
- **French Broad River Redevelopment Area** – This area is located south of the Smoky Park Bridges southward to the Norfolk Southern RR property.

In the plan, staff proposes to proceed with a variety of tasks; key items are summarized below:

- Conduct public input sessions about the appropriate development pattern(s) and associated financial incentives for the three redevelopment areas and bring these ideas forward for Council consideration.
- Develop, with public comment, best management practices for environmentally-sensitive design for inclusion in the Standards and Specifications Manual.
- Continue to pursue grant and other funding options for implementation of the Wilma Dykeman Riverway Plan and begin implementing the Riverway project by allocating the federal earmark funding to studying the corridor in the three redevelopment areas.
- Pursue improvements to Biltmore Village called for in the plan, including traffic safety and aesthetic improvements and funding for an architectural "flood proofing" program for vulnerable historic buildings to ensure their continued economic vitality.
- Bring forward ideas for constructing public parking in Biltmore Village after reviewing these ideas with the public and with Biltmore Village property owners.
- Purchase floodway properties in the East Swannanoa River redevelopment area from willing sellers.
- Demolish an unsafe structure in the Biltmore Village area.
- Design and construct the riverside greenway in the French Broad River redevelopment area.
- Seek consultant services about the use of project development financing in the French Broad River redevelopment area.

He said that the key components of the Plan include (1) identifies projects for Rural Center implementation funding for each area; (2) proposes the use of federal earmark funding to study Riverway improvements in each area; (3) lays out public involvement program for identifying (a) desired land use and zoning pattern for area redevelopment; and (b) financial incentives needed to implement desired pattern of redevelopment; (4) proposes creation of best management practices for environmentally sensitive development; (5) proposes hiring consultant to identify opportunities and mechanism to use project development financing to jump-start river redevelopment; and (6) proposes active implementation efforts for the parking, traffic circulation, and aesthetic improvements called for in the Biltmore Village Development Plan.

If the Rural Center Board approves the Plan, the City will become eligible for grant funding of up to $700,000 per area.

City staff recommends City Council adopt the River Redevelopment Plan funded by the NC Rural Economic Development Center and authorize staff to forward the Plan to the Rural Center for consideration.

Throughout his presentation, Mr. Shuford responded to various questions/comments from Council.

Mr. Jim Auggins, a business owner in the Biltmore Village area, was disappointed with the Plan in that there is no linkage between this Plan and the Army Corp of Engineers reconnaissance studies that have been funded, which are to present options for flood control and reducing flooding. Another major concern is that development in the Swannanoa River Watershed is going to increase future flooding in Biltmore Village and along the Watershed. He doesn't believe that the City has put in place tools to use to evaluate the impact of land use on the degree of flooding.

In response to Vice-Mayor Mumpower, Mr. Shuford said he would add language in the Plan to indicate that the City will be pursuing information, of the nature of the Army Corp of Engineers reconnaissance studies, as we go forward.

Upon inquiry of Vice-Mayor Mumpower about the county land use impact on flooding, Mr. Shuford said it is difficult for us to calculate what might happen in an area where there are no zoning standards. At Vice-Mayor Mumpower's suggestion, Mr. Shuford said that he would include language in the Plan that suggests, within the limits of our abilities, to look upstream and seek efforts to collaborate with people that do have that control.

In response to Councilman Newman, Mr. Shuford explained what specific projects we are committing to and at what cost.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-151, with the language suggested by Vice-Mayor Mumpower. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

Vice-Mayor Mumpower said that there is some real potential for abuse. You don't hear about riverfront development for the poor. He understands that we will have opportunities to guide things to make sure this doesn't become a sanctuary for the rich and privileged.

RESOLUTION BOOK NO. 29 – PAGE 185

C. RESOLUTION NO. 05-152 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Vice-Mayor Mumpower said that the term of Jimmy Hungerford (West area), as a member of the Citizens/Police Advisory Committee, expired on June 30, 2005.

At Council's June 21, 2005, worksession, the City Clerk was instructed to re-advertise for the West Asheville area position.

At the July 19, 2005, City Council worksession, it was the consensus of City Council to arrange interviews for Craig Young and Robert Burns.

After each Council member spoke in support of the candidates interviewed, Craig Young was appointed as the west Asheville representative on the Citizens/Police Advisory Committee, to serve a three-year term, term to expire June 30, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 186

D. RESOLUTION NO. 05-153 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

Vice-Mayor Mumpower said that Betty Clark has resigned from the Public Art Board, thus leaving a vacancy until December 31, 2005.

At the July 19, 2005, City Council worksession, it was the consensus of City Council to arrange interviews for Susan Chambers Overstrom, Meg Winnecour and Bill Fishburne.

After each Council member spoke in support of the candidates interviewed, Bill Fishburne was appointed to the Public Art Board to serve the unexpired term of Ms. Clark, term to expire December 31, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 187

VI. OTHER BUSINESS:

RESOLUTION NO. 05-154 – RESOLUTION REGARDING THE CITY'S POSITION ON EMINENT DOMAIN

At the suggestion of Councilman Dunn, Mayor Worley read the following resolution: "Be it resolved, that the Asheville City Council has no intention of utilizing eminent domain to take private property for any purpose other than a bona fide public purpose and, under no circumstance would private property be taken by eminent domain and utilized for the benefit of private development such as was allowed in the United States Supreme Court in the New London, Connecticut, case. Further, that the Asheville City Council encourages our local delegation to the North Carolina General Assembly to work to ensure that there is no legislation that would permit any government entity in North Carolina to use eminent domain in the manner approved by the United States Supreme Court in the New London, Connecticut, case.

Vice-Mayor Mumpower moved to adopt Resolution No. 05-154. This motion was seconded by Councilman Dunn and carried unanimously.

Ms. Leesa Kulba and Mr. Fred English both spoke in support of adoption of the resolution.

RESOLUTION BOOK NO. 29 – PAGE 188

CLAIMS

The following claims were received by the City of Asheville during the period of July 8-14, 2005: Patsy Medford (Transit Services), Greg Goodman (Streets), Adrian Pachico (Streets) and James Cutshall (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Mumpower was pleased to present Council with the first For Our Kids Program T-shirt, which will be designed in the future by children from public housing developments.

An intern at the WNC Alliance presented Council with 100 letters from downtown and west Asheville businesses supporting moving forward with the minimum number of lanes on the I-26 Connector, not to exceed six travel lanes. They strongly oppose the N.C. Dept. of Transportation's proposal to build an unnecessarily large eight-lane Connector, which would have negative impacts on Asheville's business community and quality of life.

Mr. Fred English spoke in opposition of the City spending money for an updated comprehensive study of emergency operations at North Fork. He felt that information is available through the Army Corp of Engineers.

Mr. Gene Hamilton, founder of Asheville Citizens for Quality Government, urged City Council to include their priority objectives in Council's goals. Those objectives are (1) improving the quality of education received by every student in Asheville; (2) increasing the minimum wage through a "just and living wage" ordinance to $8.50 per hour, with annual incremental increases each year to $10.00 per hour in 2008; and (3) improving the quality of public transportation for all the citizens of Asheville.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 9, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Dunn led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Mayor Worley announced Consent Agenda Item "G" will be removed from consideration at this time.

Councilwoman Jones asked that Consent Agenda Item "C" be removed from the Consent Agenda for discussion.

Councilwoman Bellamy asked that Consent Agenda Items "E" and "F" be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 26, 2005

B. ORDINANCE NO. 3273 - BUDGET AMENDMENT TO ACCEPT GRANT MONEY FROM THE U.S. DEPT. OF HOMELAND SECURITY

Summary: The consideration of a budget amendment, in the amount of $141,244, to receive grant money from the U.S. Dept. of Homeland Security (DHS), sub-granted through the Federal Emergency Management Agency's (FEMA) FY 04 Assistance to Firefighter's Grant Program, for procurement of portable radios, portable computers, and portable repeaters to be used in emergency response and more efficient use of resources.

The City of Asheville Fire and Rescue Department with endorsement of the Asheville City Council in March, 2004 requested $98,910 from the U.S. Dept. of Homeland Security to fund computers and walkie-talkies that will be used daily by firefighters and are used on virtually every emergency that occurs with the city. The portable repeaters will be used often. Computer's are used through the city's existing Geographical Information Systems (GIS) database t provide street, water line, hydrant, building, pre-incident plans, aerial photography, resource listings and other information to firefighters on a daily basis when responding to and managing emergencies. Additional walkie-talkies would allow each firefighter "seat" to have a portable radio. Currently, only the fire officer and fire engineer on each apparatus have portable radios. This would improve firefighter safety. The two vehicle repeaters would allow firefighters to better communicate in dense or "heavy" buildings, such as hospitals, the malls, etc.

Staff desires to accept the grant in the amount of $141,244, with 70%, or $98,871 Federal dollars coupled with 30%, or $42,373, of local (city) dollars.

Pros:

- The computer equipment would allow the Asheville Fire and Rescue Department to take advantage of the information and technology that is available to us and allow us to apply it virtually every day.
- The portable radios would increase firefighter safety on emergency scenes
- The portable repeaters would allow firefighters to communicate in locations where the current system is very limited such as the hospital, mall and other "heavy" buildings.
- 70% of the funding would come from the Federal Government.

Cons:

- The City of Asheville's share of the matching grant.
- In order to maintain the same level of service, computer equipment and radio equipment would have to be replaced by the city when the service life is met. Life expectancy would be approximately five (5) years.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends City Council approve the budget amendment to receive grant money from the U.S. Department of Homeland Security.

ORDINANCE BOOK NO. 22 – PAGE 241

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH ARCH WIRELESS OPERATING COMPANY, INC., FOR AN ANTENNA AT 36 RESERVOIR ROAD

This item was removed from the Consent Agenda for discussion.

D. RESOLUTION NO. 05-155 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY ON BARTLETT STREET TO RAY QUATE

Summary: The consideration of a resolution authorizing the Mayor to convey property on Bartlett Street to Ray Quate in the amount of $2,500.

On July 26, 2005, City Council directed the City Clerk to advertise for upset bids on property on Bartlett Street. The advertisement ran in the Asheville Citizen-Times on July 29, 2005, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Ray Quate in the amount of $2,500 was not upset and the sale to Ray Quate should be approved.

The land on Bartlett Street is a rectangular shaped parcel comprising 0.062 acre± (approximately 21' x 127'). It is gently sloping from east to west with the grade of Bartlett Street. It is unimproved and covered with grass. The subject parcel is a cut-out from a 5.73 acre property acquired from the Housing Authority which is now a part of Murray Hill Park. The lot is

not large enough to build on as a separate parcel. Based on an opinion letter dated May 11, 2005, by L. Ted Prosser, the value of the cut-out parcel is $2,500. The bid from Ray Quate, owner of the adjacent parcel is in the amount of $2,500. Mr. Quate is renovating the building on the adjoining parcel with historic consideration to provide three (3) main floor artist's studios and five (5) second floor apartments with inside parking. He purchased a 0.13 acre parcel from the City to provide access to the second floor parking in November of 2004. He plans to assemble the subject parcel with his property to provide improved access to the parking and a better buffer.

The proposed renovations are consistent with the Strategic Plan policies of encouraging a strong small business environment and increasing the supply of affordable housing.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- A small parcel will be assembled with an adjoining parcel to provide a more efficient land use.
- The sale of this lot to Mr. Quate will facilitate the re-development by providing improved access.

There are no negative aspects of the transaction.

City staff recommends the Mayor be authorized to convey property on Bartlett Street to Ray Quate.

RESOLUTION BOOK NO. 29 – PAGE 189

E. RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A FUNDING AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE PROVISION OF TRANSIT SERVICES TO THE TOWN OF WEAVERVILLE

This item was removed from the Consent Agenda for discussion.

F. BUDGET AMENDMENT TO REFLECT INCREASED FUNDING FROM THE N.C. DEPT. OF TRANSPORTATION AND THE TOWN OF WEAVERVILLE FOR OPERATION OF A NEW ROUTE TO WEAVERVILLE

This item was removed from the Consent Agenda for discussion.

G. RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF EXCESS RIGHT-OF-WAY ON CROCKETT AVENUE FOR A RIGHT-OF-WAY EASEMENT AND UTILITY EASEMENT ON CROCKETT AVE

This item was removed from consideration at this time.

H. RESOLUTION NO. 05-156 - RESOLUTION APPROVING FREEDOM LANE AS A NEW STREET NAME

Summary: The consideration of a resolution approving Freedom Lane as the name for a new street located off Liberty Street.

Staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any new street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. A street name was necessary to facilitate specific street name and numbers for new structures. It would be impractical, and due to the existing street numbers, impossible to address the new structures from Liberty Street without causing emergency response delays.

Pro:

- The street will be utilized to access four new residential units.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Con:

- There are no negative affects of for assignment of Freedom Lane to this new street.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

Staff recommends adoption of the resolution accepting Freedom Lane as new street name.

RESOLUTION BOOK NO. 29 – PAGE 190

I. RESOLUTION NO. 05-157 - RESOLUTION APPROVING ALEX BREEZE WAY AS A NEW STREET NAME

Summary: The consideration of a resolution approving Alex Breeze Way as the name for a new street located off Deaverpark Drive.

Staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any new street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. A street name was necessary to facilitate specific street name and numbers for new structures. It would be impractical, and due to the existing street numbers, impossible to address the new structures from Deaverpark Drive without causing emergency response delays.

Pro:

- The street will be utilized to access three new residential units.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Con:

- There are no negative affects of for assignment of Alex Breeze Way to this new street.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

Staff recommends adoption of the resolution accepting Alex Breeze Way as new street name.

RESOLUTION BOOK NO. 29 – PAGE 191

J. RESOLUTION NO. 05-158 - RESOLUTION APPROVING EDBAR STREET AS A NEW STREET NAME

Summary: The consideration of a resolution approving Edbar Street as the name for a new street located off Sweeten Creek Road.

Staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any new street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. A street name was necessary to facilitate specific street name and numbers for new structures. It would be impractical, and due to the existing street numbers, impossible to address the new structures from Sweeten Creek Road without causing emergency response delays.

Pro:

- The street will be utilized to access existing and new businesses.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Con:

- There are no negative affects of for assignment of Edbar Street to this new street.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

Staff recommends adoption of the resolution accepting Edbar Street as new street name.

RESOLUTION BOOK NO. 29 – PAGE 192

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Dunn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 05-159 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH ARCH WIRELESS OPERATING COMPANY, INC., FOR AN ANTENNA AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Arch Wireless Operating Company, Inc. (Arch) for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge overlooking downtown to the north, Mission Hospital to the west and Kenilworth to the south. The circular concrete rim of an in-ground water tank that has been completely filled is the only trace of its former use. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

Arch has operated an antenna and related equipment at the site since December 1993. The antenna is located on the tower known as the "BellSouthTower" which is the tower to the west. The proposed License Agreement will enable Arch to continue operating an antenna at that site; however, there is a provision which allows the Licensor to terminate the agreement upon 180 days notice or the Licensee to terminate the agreement with 60 days notice. The term of the License Agreement will be 3 years with no renewal periods. Arch will pay a License Fee of $350 per month ($4,200 annual) the first year with a 4% annual increase thereafter. In addition to the License Fee Arch will pay a Utility Fee of $150.00 per annum.

The Notice of Intent to enter into a License Agreement with Arch was published on July 29, 2005, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested,

The positive aspects of the transaction are:

1. The license will generate revenue
2. The license fee represents fair market value.
3. The transaction will retain a fee tenant rather than having a vacant space.
4. It will facilitate Arch being able to continue providing a valuable service to its customer

There are no negative aspects to the transaction

City staff recommends City Council authorize the City Manager to execute a License Agreement with Arch Wireless Operating Company, Inc. for an antenna at 36 Reservoir Road.

Upon inquiry of Councilwoman Jones, Field Services Director Ed Vess said that Arch had four antennas, however, they removed all of them except for one. This is the rate for one antenna.

Councilman Jones moved for the adoption of Resolution No. 05-159. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 193

E. RESOLUTION NO. 05-160 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A FUNDING AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE PROVISION OF TRANSIT SERVICES TO THE TOWN OF WEAVERVILLE

Summary: The consideration of a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation (NC DOT) for the provision of transit services to the Town of Weaverville, and an associated budget amendment, in the amount of $108,839.

The Asheville Transit System has received funding for the operation of a route to Weaverville. The route will operate five times per day (out and back) six days per week, with the last run retiring around 7:30 p.m. The State and the Town of Weaverville have funded the entire amount of the operating costs less fare box revenue. The Town of Weaverville has budgeted $10,000 to this route. There are no City funds in this operation, and the City is specifically exempted from funding any of these operations in the contract from the NC DOT for these routes. The route will run from the downtown transit center up Merrimon to UNC-Asheville, then to Weaverville, Rose's Shopping Center, Sonopress, and back through Weaverville to the downtown transit center via Merrimon Avenue. Using the Black Mountain operations as a guide, it is reasonable to project ridership after three years to be in the range of 15,000 trips annually with the potential for up to 25,000 trips at full maturity (5 years), with 2,700 vehicle trips removed from roads after three years.

Conformance to City Development Plan 2025:

- Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region.
    - Strategy 4: Expand inter-city service to Hendersonville, Black Mountain, Weaverville, Mars Hill, and Sylva.

Conformance to Strategic Plan:

- Strategic Plan Section on Planning, Goal 2, Objective B, by creating a partnership between the state, the Town of Weaverville and the Asheville Transit System to mitigate congestion.

The benefit to the City of Asheville is:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville
- Increased accessibility to jobs in Weaverville (Sonopress being the largest employer in Weaverville), and access to jobs in Asheville by those living along the route

Costs to the City of Asheville:

- None

City staff recommends City Council endorse a resolution authorizing the Mayor to enter into a funding agreement with the NC DOT for the provision of transit services to the Town of Weaverville, and the associated budget amendment.

In response to Councilwoman Bellamy, Transit Services Director Bruce Black explained benefits and promotion of this new bus rote.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-160. This motion was seconded by Councilman Davis and carried unanimously.

F. **ORDINANCE NO. 3274 - BUDGET AMENDMENT TO REFLECT INCREASED FUNDING FROM THE N.C. DEPT. OF TRANSPORTATION AND THE TOWN OF WEAVERVILLE FOR OPERATION OF A NEW ROUTE TO WEAVERVILLE**

Summary: See Resolution No. 05-160 above.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-160. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 243

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED ON OAK PARK ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO ESTABLISH TWO DUPLEXES AND SIX SINGLE-FAMILY UNITS**

This public hearing was continued from the July 26, 2005, City Council meeting in order to allow the developer time to address some of the concerns identified by neighboring property owners.

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:15 p.m.

All Council members disclosed that they have visited the site and/or have received correspondence relating to this project and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located on Oak Park Road from RS-4 Residential Single-Family Medium Density District and RS-2 Residential Single-Family Low Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use, and a request to issue a conditional use permit to establish two duplexes and six single-family units.

The project area is located in the Asheville city limits with frontage on both Oak Park Road and on Sky View Place in North Asheville (Attachments to City Exhibit 3 – Location Map and Aerial Map). The subject properties (2 lots) are the result of a lot recombination with additional property gained through a quit claim processed in 2004. The subject properties total approximately 1.46 acres, of which approximately .72 acres is zoned RS-2 and .74 acres is zoned RS-4.

The site currently supports a non-conforming garage that will be removed to make way for new construction consisting of the addition of 2 duplex buildings and 5 single family structures for a total of 9 units (Attachment to City Exhibit 3 – Site Plan). Four of the 5 single family structures will be located on subdivided lots accessed off of Sky View Place, with the remaining 1 single family units and 2 duplex units all being located on a larger single lot where all 5 units will share a 10 space parking lot (+ 2 garage spaces) accessed off of Oak Park Road. The duplex units will be 2 stories and approximately 1980 square feet per unit, 3960 square feet total. The single family structures will be 3 stories and approximately 1850 square feet with a comparatively smaller footprint, a little over 600 square feet. Also associated with the project is additional landscaping required for parking lot, street buffer, street tree, and landscape buffers along with tree preservation shown on the proposed Master Plan (Attachments to City Exhibit 3 – Building Elevations).

The rezoning component of the application is a request to rezone from RS-4/RS-2 to RM-8 to allow for a higher density and to allow for multi-family structures on a single lot. Current zoning would allow up to 3-4 single family units.

At their May 4, 2005, meeting, the Planning & Zoning Commission reviewed the proposed project and unanimously denied the proposal as submitted. Issues of concern centered primarily on the increase in traffic as a result of the increase in density and the inability for the existing road system and infrastructure to support the proposed density. There was a fair amount of public comment in opposition of the proposed project that pointed to examples of lack of off-street parking for existing homes resulting in congestion on the streets from on-street parking, narrow roads, sharp turns, steep grades, and emergency response times. The applicant responded to the some of these concerns with a revised site plan that removed one of the units (originally there had been 6 single family structures proposed) and increased the ratio of parking spaces per unit in order to alleviate any potential contribution to the existing on-street parking situation. In addition, the revised site plan shows that parking spaces from in front of the homes located on Sky View have been moved to parallel on street spaces and that this change, combined with the use of retaining walls, has further reduced the overall impact to the site by further reducing the amount of clearing and grading necessary for construction.

Despite the changes to the site plan, staff remained somewhat concerned over the lack of support from the Commission and the public. In response Planning staff re-visited the site and reviewed the revised plans with both the Fire Marshal's office and the City's Traffic Engineer. Travel routes to both the upper half of the site and the lower half of site appeared to be easily navigated with the lower portion being accessed from the straight line of Baird Street while the upper portion of the site was easily reached from Town Mountain Road. The Fire Marshal's office did not find issue with serving the development and was pleased with the amount of parking provided for development commenting that it would aid in their response to the area. In addition, the Traffic Engineer reviewed the proposal and did not find that the amount of trips generated

172

from the proposed development would contribute significantly to the traffic on the roads, particularly the less traveled roads that were more problematic for safe and easy navigation or wayfinding. In addition, the change to the parking for the units on Sky View was generally preferred by the traffic engineer since it reduced the need for backward movements and provided more spaces per unit.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The site area is an unusual combination of very mild and easily developed property with an equivalent amount of very steep terrain that is significantly more challenging to develop. The applicant has responded appropriately with the larger buildings and parking lot being located in the mildly sloped areas where less grading would be required. The steeper portions of the property are being developed with single family structures that have a comparatively small (600 s.f.) footprint that will accommodate the existing terrain more sensitively and require less disturbance than the average single family home. The use of retaining walls is also shown to help minimize the total disturbed area.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The proposed development will be in character with the development patterns already existing on the hillside and will also be architecturally attractive and consistent with the older Craftsman style homes of the area. This development is not expected to negatively affect adjacent property values.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   It is a relatively typical scenario to find the size of single family home sites increase with the rise in terrain and an increase in grade; as slopes become steeper, lots become larger (Attachment to City Exhibit 3 – Slope and Density Analysis Map). The larger lots perched higher on the hillside are typically developed at a low density due to physical challenges and development costs. Understandably, lower lying properties are commonly developed at a higher density where development costs are not as restrictive. Oftentimes, between the relatively flat low lying properties and the relatively steep hillside properties are pockets of "transition" properties. The subject area appears to be located

in just such a transition zone with a proposed density classified as Medium Density (City Exhibit 4 – Use/Access Study Map). The existing development on the hillside currently supports several similar pockets of medium density development as well as individual lots that would be classified as high density and low density (City Exhibit 5 – Property Selection Map). The scale of the larger duplexes is not out of scale with many of the larger single family homes in the area as well as the existing multi-family structures. The proposed single family homes are taller (3 stories) than many of the single family homes in the more traditional lower lying neighborhood but are not out of place with many of the homes perched on the hillside designed to capture views out over the valley floor. Lastly, the character of all the proposed structures would be compatible with the architecture and materials of the more historic Craftsman style homes in the area and throughout Asheville (City Exhibits 6-10 – Photos).

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The *Asheville City Development Plan 2025 (ACDP 2025)* describes a number of reasons why properties within the City limits remain underdeveloped or vacant, including topographical or other physical problems with the property resulting in prohibitive development costs under existing zoning (by limiting density and a sufficient return given the market for the property's development). The *ACDP 2025* proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property. One way to accomplish this goal is to apply existing zoning tools to encourage higher density residential infill development. A Conditonal Use Rezoning is one such tool that would allow this property to be developed at a higher density than the current zoning would allow. In addition, the same section of the comprehensive plan that discusses the need for residential infill development also outlines the need for this new construction to be of a quality that preserves, protects, and enhances existing neighborhoods. The proposed development utilizes a sensitive building approach and building design that will blend in with the existing hillside neighborhood.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This proposed development is within close proximity to alternative transportation and is located near major road facilities, interstate connections and other service centers with Charlotte Street & I-240 only ¼ mile away and within walking distance. In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed use splits access to the project area on two road frontages and will safely distribute traffic to roads with a higher capacity. The heaviest use to the site, 5 multi-family units, will be able to utilize an existing driveway (that will be improved) that empties onto Oak Park Road, a very short distance from the intersection of Baird Street which is part of the City's more navigable road system. In addition, all units will have the maximum number of off-street parking spaces allowed to prevent the need for any on-street parking. Lastly, the proposed use has been reviewed by the City's traffic engineer who has determined that the number of units and their access does not pose an undue or dangerous traffic hazard.

Pros

- Allows for an attractive mix of infill housing types strategically located to transportation, services, & employment.
- Provides a topographically sensitive design and layout.
- New building construction will be in scale with existing multi-family and single family structures.
- Provides off-street parking in excess of the minimum required (alleviating on-street parking congestion).

Cons

- Results in a higher density than some of the existing residential units.

City staff recommends approval of the zoning change from RS-4/RS-2 to RM-8 (CUZ) and approval of the associated conditional use permit, as proposed by the applicant.

Should the Council choose to deny the request as submitted, staff would like to recommend the following alternatives that reduce the total number of units:

- Remove the single family structure on the multi-family lot (for a total of 4 single family homes+2 duplexes)
- Reduce the number of single family homes on Sky View from 4 to 3
- Replace duplexes with single family structures

Discussion then surrounded why the Planning & Zoning Commission has not reviewed the revised plans, especially since it was a Planning & Zoning Commission unanimous denial. City Attorney Oast advised Council that they have the ability to remand the matter back to the Planning & Zoning Commission. He also noted that the valid protest petition would remain in effect when the issue is brought back again before Council.

Mr. Gerald Green, representing the applicant, said they would be willing to take the project back to the Planning & Zoning Commission. That will give them an opportunity to show the Commission how they have addressed their concerns. In addition, they will meet with a wider range of the neighborhood to see if their concerns can be addressed.

Councilman Dunn moved to remand this matter back to the Planning & Zoning Commission. This motion was seconded by Councilwoman Jones.

The following individuals spoke against remanding this issue back to the Planning & Zoning Commission for various reasons, some being, but are not limited to: the neighborhood has already looked at the revised plans and there is not a huge change; Skyview Place is a narrow road; the inconvenience to the neighborhood; the development does not fit into the site; the developer has not made an effort to meet with the neighborhood:

Mr. Bill Chase, resident on Oak Park Road
Ms. Erin McLaughlin, resident on Oak Park Road
Ms. Elizabeth Wyndelts, resident on Oak Park Road

Mr. Alan Laibson, applicant, said he would like the opportunity to go back to the Planning & Zoning Commission, in particular to address the parking and density concerns. He felt there was some misinformation being relayed to the neighborhood and he would like the opportunity to clear that up as well.

In response to Councilman Newman, Ms. Tuch felt that the Planning & Zoning Commission's prospective was evenly balanced between the technical and fundamental aspect of the project.

After further discussion, the motion made by Councilman Dunn and seconded by Councilwoman Jones to remand the matter back to the Planning & Zoning Commission failed on a unanimous vote.

Mr. Green, on behalf of the developer, withdrew the request at this time. He said they would re-evaluate the site, meet with the neighborhood and possibly come back to Council at a later date.

B. PUBLIC HEARING TO CONSIDER AMENDING THE CONDITIONAL USE PERMIT TO CONSIDER POTENTIAL OUTPARCEL USE BASED ON NEW INFORMATION INCLUDED IN AN UPDATE TO THE TRAFFIC IMPACT ANALYSIS FOR THE RIVERBEND MARKETPLACE DEVELOPMENT, LOCATED OFF BLEACHERY BOULEVARD

ORDINANCE NO. 3275 - ORDINANCE AMENDMENT THE CONDITIONAL USE PERMIT TO CONSIDER POTENTIAL OUTPARCEL USE BASED ON NEW INFORMATION INCLUDED IN AN UPDATE TO THE TRAFFIC IMPACT ANALYSIS FOR THE RIVERBEND MARKETPLACE DEVELOPMENT, LOCATED OFF BLEACHERY BOULEVARD

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:08 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of an amendment to the conditional use permit to consider potential outparcel use based on new information included in an update to the Traffic Impact Analysis for the Riverbend Marketplace development located off Bleachery Boulevard.

In 2002, the Riverbend Marketplace was approved and subsequently permitted for a large scale, level 3, commercial development project (City Exhibit 4 – Site Plan). Concerned about the effect of the development on the carrying capacity of Swannanoa River Road led the Asheville City Council to condition approval for the large project to restrict development so that, at

project build-out, traffic volumes on Swannanoa River Road would not exceed 90% of level of service D; new development above the limits that this established in the plan could not occur without additional mitigation measures and conditional use permit (CUP) modification. This restriction prevented the development of one of the two outparcels (Outparcel 1) and limited development in other areas of the project. Subsequently, in 2004, City Council approved a modification to the CUP to allow an expansion of the allowable development intensity of the associated urban village project based on a traffic impact analysis (TIA) that showed that the constructed road network was capable of handling peak hour traffic without degradation of the level of service on Swannanoa River Road below acceptable limits, although the 90% requirement was exceeded. Staff made its review at that time using site-specific analysis of intersections, a more accurate and accepted method of gauging traffic impact than the somewhat arbitrary 90% of level D capacity measure used in the prior CUP. Now, an updated TIA has been submitted that examines the intersections in the vicinity of this proposal, taking into account the added traffic anticipated from the new Aldi grocery store, the proposed urban village, and the proposed outparcel development, as well as other background traffic increases. This analysis showed that, while the 90% requirement was again exceeded on the corridor, all but two intersections would operate at a level of service meeting the intent of Council's original condition. The two intersections that were not operating optimally are:

1. Swannanoa River Road & S. Tunnel Road
2. Tunnel Road & S. Tunnel Road

The intersection of Swannanoa & S. Tunnel is not of great concern since it is anticipated that the road improvements required as a condition of the Target development will improve the level of service at this intersection. The second intersection, Tunnel and S. Tunnel, was of greater concern, with a level of service of "F". However, it was recognized that the Riverbend Marketplace development contributes a very small amount of peak hour trips to this intersection and is generally considered not to be responsible for its poor level of service. Similarly, it is anticipated that the development of Outparcel 1 would not contribute significantly to the existing problem. Consequently, the mitigation measures planned for the Swannanoa River and Tunnel Roads intersection mitigate the added traffic planned for Outparcel 1.

In summary, in an effort to seek relief from development restrictions established over concern due to increases in traffic, the applicant has updated the former TIA to demonstrate that any increases in traffic as a result of the Riverbend Marketplace development, including Outparcel 1, can be accommodated with recent and anticipated road connections and improvements to meet an acceptable level of service on all affected roadways. As a result, the developer would like to amend the conditional use permit (CUP) to allow Outparcel 1 to be considered for development, based on the updated TIA.

The revised TIA was reviewed at the July 18, 2005, Technical Review Committee meeting where the project was approved with conditions. The majority of the departments commented that since a development plan for the parcel had not yet been determined, a separate review would be required at a later date. As a result, these departments abstained from voting. The only other comments were from the City Traffic Engineer who provided a summary of the revised TIA and how it related to the overall development project. In addition, the Traffic Engineer also responded to questions from the public and provided clarification on issues raised. Ultimately, it was only the Engineering Department that voted, and the project was approved with conditions. The conditions included:

- Identify recommended improvements to the intersection of Tunnel Road and South Tunnel Road
- Provide additional detail to some of the analyses.

A revised TIA has been submitted and will be reviewed to see if the above conditions have been met.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

The larger Riverbend Marketplace Master Plan was reviewed and approved in July of 2002. At that time, the overall development project was found to meet all seven conditional use standards (listed below). It is generally felt that the ability for the project to meet the seven standards has not changed as a result of the requested amendment, however, as it relates to traffic, standards #1 and #7 have been reviewed.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The updated TIA demonstrates that an acceptable level of service is maintained on all affected roadways. As a result, the proposed use is not expected to endanger the public health or safety. Concern was raised during the TRC meeting that increases in traffic accidents have resulted post-development but any information provided to support this concern could be attributed to any number of factors including a simple increase in traffic increasing the statistical likelihood of an accident or a small and/or aberrant sample. In addition, traffic calming that will be implemented as a result of Urban Village development would reduce the likelihood of traffic accidents.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   Not applicable.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   Not applicable.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   Not applicable.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   Not applicable.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   Not applicable.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

An update to the TIA generated for the project reveals that an adequate level of service will be maintained on all affected roadways as a result of this development project. Areas of poor service will either be improved as a result of anticipated road improvements or are not attributable to this development project.

Pros

- Allows for the infill development in an already established retail area.

Cons

- Contributes to a small increase in traffic (but within acceptable limits).

For the reasons stated above, Planning staff concurs with the City Traffic Engineer and recommends approval of this CUP amendment subject to the TRC conditions being met.

Mr. Rick Pressley, with Horne Properties representing the development company, said that this Outparcel was always a part of an intended use of the development. The updated TIA in May of the roads and the new two miles of roadway emptying onto Fairview Road and through the River Ridge Shopping Center shows that traffic is being adequately handled. He noted that the conditional use permit that they were granted included approximately 5,500 square feet of allowable area, which they are not building. Noteably, the Outparcel square feet will probably be less than 5,500 square feet. Finally, the study that was brought before Council for the second phase, which they do not own, which is the Urban Village, included this lot and there is further proof that the level of services are adequate within that study. He asked for a favorable approval to get this Outparcel freed up for development which will conclude the Riverbend Market Place development as far as build-out.

In response to Councilman Newman, Traffic Engineer Anthony Butzek said that when the project was originally approved, Council expressed some concerns about one development absorbing all of the capacity on the roadway and the development density of the project was therefore limited. Now that the project has been built and we are seeing how traffic operations are occurring, the developer is asking relief from a condition that was agreed to at that time. This Outparcel was removed from the project to get them below that maxium density that Council wanted them to adhere to.

In response to Mayor Worley, City Attorney Oast explained that the Urban Village project has a different owner and is not part of this conditional use permit for this project.

Ms. Tuch said that there is a difference between the level of service and the 90% anticipated traffic load. The 90% is a theoritical number. The anticipated amount of traffic that the project will contribute to the road was 90%, which included the Urban Village. An amendment to the conditional use permit for the Urban Village added another 5% to a total of 95% for the Riverbend project. The Aldi development contributed 10% and now this Outparcel is anticipated to contribute 1%. The total percentage is 106%. That theoritical number can exceed 100% because it is theoritical. The way to measure the service is to go out and measure the traffic through the intersections. That is what the TIA did and it showed that we are at an adequate level of service, with the exception of the two. One intersection did not meet that level of service, but it is anticipated that it will be improved as a result of traffic improvements to be completed for the Target development. The other intersection remains at a poor level of service, however, it has been determined that a number of the trips at that intersection are not coming from this Riverbend development. It seems unfair to penalize them for something they are not significantly contributing to.

Mr. William Lentz, resident on Governor's View Road, presented Council with Neighborhood Exhibits 1 and 2 which are photos of the congestion of the South Tunnel Road area with the intersection of Swannanoa River Road. He urged Council to not approve any more development which will contribute to the traffic congestion.

After rebuttal, Mayor Worley closed the public hearing at 6:22 p.m.

Mr. Butzek said that an update to the TIA was required for this project. That TIA does meet the typical traffic engineering standards and shows an acceptable level of service with improvements to the roadways. Improvements to two intersections would be necessary. With regard to the intersection of South Tunnel and Swannanoa River Road, Target is required to do some improvements there. In fact, the N.C. Dept. of Transportation has made some signal timing improvements to that intersection. Regarding the other intersection of South Tunnel Road and Tunnel Road, signal timing improvements would improve conditions there as well. That is quite a distance from this project and the number of trips that this particular outparcel would contribute to the intersection is minimal.

In response to Councilwoman Bellamy, Mr. Butzek said that a TIA looks at intersection analysis and determines the specific level of service. The 90% rule is a fairly general type rule that doesn't relate very closely to the specific analysis. It's not a standard way of determining the capacity of a roadway. It's a way of getting a general idea of the capacity of a roadway. That condition was imposed to keep this one development from absorbing all the capacity. The TIA looks much more specifically at intersections and is a better determination of actual operations. The Aldi development, which is unrelated to this development, contributed approximately 10%. They also had a separate traffic study which determined acceptable operation. This study then factored in all of those approved developments, the Urban Village expansion as well as the Aldi develoment.

Councilman Newman was concerned about how close are we getting until we see a poor level of service to the intersections in the area, based on the rate growth in the area. He wondered if we had a planning tool for future development in that area.

In response to Councilwoman Bellamy, Planning & Development Director Scott Shuford said that this is the last piece of development for the Riverbend project. There are two outparcel pieces that are undeveloped. The first outparcel piece was included in the original TIA and has been accommodated in this TIA. The second outparcel piece here is the last piece of the Wal-Mart development itself. The Urban Village is at the top of the hill and its traffic generation has been accommodated in this study as well.

Responding to Councilwoman Bellamy's question about future plans for the corridor development, Mr. Shuford said we have a plan for constructing the Wilma Dykeman Riverway. It won't be a huge capacity increase because Swannanoa River Road will still remain a two-lane roadway, but many of the intersections that do cause congestion will be widened. He said that if we continue to look at high traffic generating retail uses in that area, we will run out of capacity a lot faster than if we look at mixed-use development. He said that Swannanoa River Road is a state road and there are no plans to widen it. He did say that they are trying to get the Wilma Dykeman Riverway Plan on the Transportation Improvement Program, which they hope they will get it on this year.

When the Urban Village project was brought before Council, Councilwoman Jones felt she was clear in asking what plans there were for future development on that site. She did not recall this being mentioned. She did recall a possible movie theatre and asked what the status of that is. Mr. Shuford said that was associated with the Urban Village project and as far as he

knows there are no plans to construct that. He did state that if a movie theatre is proposed, it would have to come back to City Council for approval.

Upon inquiry of Councilman Davis, Mr. Shuford said that Target will add another left turn lane from Swannanoa River Road onto Tunnel Road. With regard to the intersection improvements, Mr. Butzek said that several deadlines have passed and the City is working with Target to move the improvements forward. He has another meeting scheduled with Target within the week. He said that staff will let Council know if they reach a stopping point, however, he doesn't feel Council involvement at this time is necessary. He feels comfortable that they intend to move forward with that improvement. If the improvement is not completed, City Council can revoke Target's conditional use permit.

In response to Vice-Mayor Mumpower, Mr. Butzek said that the Target improvement will have a very large impact to that intersection. It will increase the capacity on the east bound approach significantly as it will provide for an additional left-turn movement. It will also reduce the amount of greentime that is allocated to that eastbound movement. The traffic signal will reallocate that greentime around the intersection to serve the other movements more appropriately.

Councilwoman Jones pointed out that in staff's report, it say that "this analysis showed that, while the 90% requirement was again exceeded on the corridor, all but two intersections would operate at a level of service meeting the intent of Council's original condition." She clarified that it was not her sole intent. The level of service is one aspect of it in terms of traffic, but it was also the future planning capacity. She felt the 90% was too high even then. She felt that Council made a promise to the community. To say that this is an amendment to the intent of Council is a problem for her.

Mr. Shuford said that the 90% issue was not a requirement. It is referred to in one of the findings of the conditional use permit. It was never included as a specific condition of the conditional use permit. The point was, and an effort was made at that time, to try to reserve some capacity for future development along the roadway. There is no question that was what Council intended. He felt he may have made a mistake back on July 23, 2002, when the conditional use permit was before Council, by suggesting that particular measure, because that is not a stardard measure for level of service. It was his planner's effort to try to take a number that a two-lane roadway would typically have and have some capacity associated with it to get Council to where they wanted to go be. He feels Council s intent was that Council wanted to make sure that the roadway operated at an acceptable level of service. That is why the sentence was written the way it was.

In response to Councilman Newman, Mr. Butzek said that it appears that neighborhood encroachment has not been as significant as the original traffic study forcasted, based on the data we have available. In addition, traffic calming is scheduled for Governor's View Road and also for Redwood Forest.

Councilman Dunn moved to adopt Ordinance No. 3275 to approve the modification to Ordinance No. 2939 and to Ordinance No. 3178, and Condition No. 2 as set forth in said ordinances is amended to read (changes indicated in red) provided all TRC conditions are met and that there be no further changes without traffic mitigation, a Traffic Impact Analysis, etc.: The attached Exhibit A, the level of development intensity approved for this Project, is amended to permit the following level of development for Phase 2 (the urban village) of the project: 96,858 sq. ft. of commercial uses (retail, office, restaurant, etc.) and 240 residential condo/townhouse units as approved by Council by adoption of Ordinance No. 3179, and for the development of Outparcel 1 as a 5,000 square foot high-turnover restaurant or similar use of an equal or lesser impact. There shall be no further changes to Exhibit A that will increase traffic on Swannanoa

River Road unless further traffic impact mitigation measures are implemented. In addition, the applicant agrees to support a general transit service hub at the site and to participate in an effort to develop a specialized transit system for the site and surrounding area, including developer provision of a transit stop on the site, designing the interior of the site to accommodate transit vehicles, allowing transit vehicles to traverse the site, developer participation in a plan to create a specialized transit program, and developer commitment to any agreed upon funding mechanism, such as a special taxing district, necessary to maintain this system that may be implemented in the future. Finally, in order to ensure the viability of the River Ridge Shopping Center connection, the applicant shall escrow not less than $50,000 to be used for improvements on the River Ridge site to upgrade the interior access "road" that will connect to the public street being constructed by the developer as part of the Phase II urban village project; the implementation of this upgrade project will require approval by the River Ridge Shopping Center owner and by the City of Asheville.This motion was seconded by Councilman Davis.

Vice-Mayor Mumpower wondered at what point, if any, should the City should say no to development in order to keep the capacity open for future development. Mr. Shuford felt this is a policy question for Council. He suggested Council look at the roadway corridor and think about the type of land use you want to see occurring and think about the traffic generation characteristics of that type of land use and then see if there are ways to accommodate it or not. We are trying to do that with the River Redevelopment Plan.

In response to Councilwoman Bellamy, Mr. Shuford believed that Ingles has purchased the former Wal-Mart site, but would confirm that and report back to Council.

Vice-Mayor Mumpower commented that he felt it was unfair to limit or otherwise impair development allowed under our ordinance in anticipation of future development that Council might feel is better.

Councilwoman Jones will not support the motion. She actually likes the Urban Village site, however, the 90% meant something to her and she feels that we are going beyond the capacity of the road. In addition to that being an important part of her reasoning, she also feels like Council made some statements to the community and she doesn't feel we are living up to those statements.

Councilman Newman said that this was a very controversial project when it came before Council and traffic congestion was a principle part of the equasion that people were concerned about. Since the traffic projections at that time showed that on the day the project opened, it would already be above a level of service "D", a decision was made to require the developers to scale the project back to 90%. He felt that while there was not community consensus, it was like a deal was struck with the community.

Councilwoman Bellamy said she could not support the motion. She read the following portion of the July 23, 2002, minutes: "However, the applicant indicated that the option they would prefer to pursue at the current time is to reduce the scale of the project in order to meet the 10% capacity retention standard proposed at the City Council meeting. Included in this option is the provision of an expanded connection, via a public street to be constructed by the applicant, to the River Ridge Shopping Center. In other words, they propose to delete some land uses from this request and to change others to such an extent that the total projected traffic on Swannanoa River Road falls below 12,600 vehicles per day."

Upon inquiry of Councilman Dunn, Mr. Pressley said that with all the testimony heard it is very easy for anyone to get tangled up on intent. He assued Council that at no time did they ever mean to state, or in his opinion state, that they would not develop that second outparcel. We said that we had the intent, along with everyone in the room, to address the traffic situation. We have

182

done that through the exterior and rear entrances. Again, it was never their intent to take this off the table on a continuing, forever basis.

When Councilman Dunn called the question, a vote was taken to cut off the debate, which motion carried unanimously.

The motion made by Councilman Dunn and seconded by Councilman Davis carried on a 4-3 vote, with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

ORDINANCE BOOK NO. 22 - PAGE 345

At 7:26 p.m., Mayor Worley announced a short recess.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR UMBRELLA SIGNS

ORDINANCE NO. 3276 - ORDINANCE CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR UMBRELLA SIGNS

Mayor Worley opened the public hearing at 7:34 p.m.

Urban Planner Julia Coburn said that this is the consideration of an amendment to the Unified Development Ordinance for the purpose of adding provisions for umbrella signs. This public hearing was advertised on July 29 and August 5, 2005.

The current sign regulations of the City of Asheville do not address umbrella signs. Umbrella signs are those signs printed on umbrellas that are commonly used at outdoor eating and drinking establishments and often advertise products sold on the premises. This amendment provides for such signage.

This ordinance amendment defines umbrella signs as those signs printed or painted on an umbrella. This amendment goes on to classify umbrella signs as a type of sign exempt from permit requirements. This means that an umbrella sign is permitted without having to actually obtain a permit for the signage so long as the applicable regulations are met.

The regulations stipulated in this amendment for umbrella signs include that such signs not be illuminated, that they be located at a lawfully permitted outdoor dining/drinking establishment, that they not be suspended from the umbrellas, and that the signage be limited to 25% of the surface area of the umbrella cloth.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment sets forth regulations for a type of signage not currently addressed in the UDO and which has been raised as an issue for enforcement staff.
- The amendment permits umbrella signs without permit (subject to specific requirements) which will not add to the permitting burden for staff.

Cons-

- The amendment allows this type of signage (with restrictions) that may be considered to add to sign clutter.

The Planning and Zoning Commission recommended approval of this code amendment on February 2, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Mayor Worley closed the public hearing at 7:36 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3276. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 249

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING THE DEFINITION OF ADULT ESTABLISHMENTS

ORDINANCE NO. 3277 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING THE DEFINITION OF ADULT ESTABLISHMENTS

Mayor Worley opened the public hearing at 7:36 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an amendment to the Unified Development Ordinance for the purpose of changing the definition of "adult establishments. This public hearing was advertised on July 29 and August 5, 2005.

The UDO regulates "adult establishments" as conditional uses. In defining "adult establishments" the current ordinance simply refers to the definition contained in the North Carolina General Statutes.

The definition of "adult establishment" found in the North Carolina General Statutes does not specifically address retail operations that deal specifically with "sexually oriented devices" although that term is defined in the statutes. N.C. Gen Stat. sec. 14-202-11 gives local governments power to regulate "adult establishments or other sexually oriented business to the extent consistent with the constitutional protection afforded free speech." "Sexually oriented devices" are defined in the statutes as "without limitation any artificial or simulated specified anatomical area or other device or paraphernalia that is designed principally for specified sexual activities but shall not mean any contraceptive device."

Due to recent inquiries concerning operations that retail "sexually oriented devices," the Planning and Development Department and the City Attorney's Office recommend the addition of operations where the principal retail business is in such items to the definition of "adult establishment."

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment clarifies an issue that has recently been brought to staff's attention as to whether or not retail operations dealing primarily in "sexually oriented devices" are "adult establishments."

Cons-

- Some as unnecessary could view the amendment over regulation of adult establishments.

The Planning and Zoning Commission recommended approval of this code amendment on March 2, 2005, by a unanimous vote of 6-0. Staff recommends approval as well.

Mayor Worley closed the public hearing at 7:37 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3277. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 451

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH BUNCOMBE COUNTY FOR MAINTENANCE OF NON-CITY WATER LINES, TANKS AND PUMPS LOCATED IN BUNCOMBE COUNTY

This matter was removed from consideration at this meeting.

B. RESOLUTION NO. 05-161- RESOLUTION SUPPORTING SENATE BILL 1006 INTRODUCED IN THE 2005 SESSION OF THE NORTH CAROLINA GENERAL ASSEMBLY

Councilman Newman explained the need for the following resolution and asked for City Council's consideration and support: "WHEREAS, air pollution is a significant contributing cause of respiratory and other ailments in the population of Western North Carolina, especially in the very young and very old; and WHEREAS, air pollution has harmful effects on the ecology and environment, including the weakening and destruction of vegetation at high elevations; and WHEREAS, air pollution has a harmful effect on the economy of Western North Carolina, in that it interferes with mountain views which have long been an attraction for the tourism industry; and WHEREAS, a major source of controllable air pollution is exhaust emissions from motor vehicles; and WHEREAS, a bill has been introduced in the N. C. General Assembly, Senate Bill 1006, entitled "An Act to Establish the North Carolina Low-Emission Vehicles Program," which bill provides for the State of North Carolina to adopt and administer a program for reducing vehicular emissions, and for the State and its political subdivisions to purchase low-emissions vehicles. NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: (1) The Asheville City Council of the City of Asheville does hereby express its support for Senate Bill 1006, and urges the members of its local delegation, and all members of the General Assembly, to adopt said legislation, and further urges the Governor to sign said legislation into law, as soon as possible (2) The Mayor, through the City Clerk, is authorized to transmit a copy of this resolution to the sponsors of Senate Bill 1006."

It was the consensus of Council that Asheville is a leader in the south and this continues our leadership role.

Councilman Newman moved for the adoption of Resolution No. 05-161. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 195

C. RESOLUTION SUPPORTING FULL IMPLEMENTATION OF THE FEDERAL CLEAN AIR ACT AND THE ADOPTION OF OTHER MEASURERS TO CONTROL INTERSTATE POLLUTION

This matter was removed from consideration at this meeting.

VI. OTHER BUSINESS:

Councilman Davis commended the Asheville Police Department for responding in such a rapid manner to a break-in at his store, resulting in the culprit being captured.

Vice-Mayor Mumpower announced the Midnight Basketball event at Hillcrest Apartments for the children of Hillcrest and Deaverview on Friday, August 12, 2005.

The following claims were received by the City of Asheville during the period of July 15-28, 2005: Kyle Ann Ross (Police), Rob Weed (Water), Ann E. Sams (Streets) and Teresa Foster (Sanitation). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton felt the City of Asheville "needs to demonstrate its ability to consistently provide service that meets customer ... requirements." He felt City Council should review the ISO 9001 requirements to operate successfully.

At 7:55 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To consider the qualifications, competence, performance, character, fitness, conditions of appointment, or initial employment of an individual prospective public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Dunn and carried unanimously. At 9:05 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:05 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 16, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Contract with Carolina Cornerstone to Construct Tennis Facility at Aston Park

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Carolina Cornerstone Construction to construct a tennis facility in Aston Park.

The City of Asheville Parks and Recreation Department is in the process of implementing the first phase of development on the Aston Park Master Plan. This phase of significant public park improvements includes a new tennis facility, driveway and handicap parking to replace the current building that is in poor condition and doesn't meet the needs of the tennis program and the community. The project was bid out according to City standards that include the Minority Business Plan. The Director of the Asheville-Buncombe Office of Minority Affairs has reviewed the bid submittal and found that the company provided the appropriate good faith effort documentation along a listing of certified firms that will be participate on this project. Funds for this project are coming from the Irene and Dick Covington Foundation and the Parks and Recreation Trust Fund grant. This building will also house the memorabilia from Dick Covington who was affectionately known as "Mr. Tennis" for his work in Asheville on enhancing this sport for over five decades.

Pros

- The construction of this portion of the project is an integral-supporting aspect of the unique clay tennis courts.
- The park will provide greatly needed recreation facilities for recreation users, especially the tennis players in the area.
- The tennis facility will be a local and regional attraction that will foster economic development.
- No City tax funds will be used in the development of this facility.

Cons

None

City staff recommends that City Council authorize the City Manager to enter into a contract with Carolina Cornerstone Construction, in the amount of $361,237, to construct the tennis facility at Aston Park.

There was considerable discussion, initiated by Councilwoman Jones, about the number of people who just hang out at Aston Park. Parks & Recreation Director Irby Brinson explained that they have hired off-duty officers for the last 3-4 months taking shifts at that location, in addition to other measures, including the design of the park and zero tolerance policy in the parks. He felt that to discourage that type of activity a full-time person is needed to police the area. He felt that when positive activities take place in the park, the unwanted element will go somewhere else. He agrees that it is a big problem, which will take some time to resolve.

At the request of City Manager Jackson, it was the consensus of Council to ask the City Manager to report back to Council with other ideas on improving the security of our downtown parks, along with any resource commitments that may be necessary to accomplish the task.

Setting a Public Hearing to Close an Alley off Clingman Avenue

Summary: The consideration of a resolution of intent to close an unnamed alley off Clingman Avenue and set a public hearing for September 27, 2005.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mountain Housing Opportunities has requested the City of Asheville permanently close to public use as an unnamed alley off Clingman Avenue. This alley is more particularly described as the alley mentioned in Deed Book 1700 at page 471 and prior deeds in the same chain of title, said alley being further described as Lot 1 of a plat of property of Wilson and Teasley as recorded in the Office of the Register of Deeds for Buncombe County, North Carolina, in Plat Book 2 at page 24 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this alley is not a City maintained street. Closure of this alley will not deny any of the abutting properties a reasonable means of ingress or egress as Mountain Housing Opportunities has submitted to the Planning Department a recombination request for the parcels affected. There are three parcels that abut this section of alleyway. They are identified by PIN Nos. 9648.05-08-4179, 9648.05-08-5118, and 9648.05-08-4248. The petitioner has authority over all the abutting parcels.

Pros:

- The closure allows the property to be used to its maximum (density) potential.
- Affordable housing can be constructed on the consolidated site.
- There will be no future compromise of ingress/egress to other property.

Cons:

- In consideration of the proximity of the alley, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution setting a public hearing for September 27, 2005, to close an alley off Clingman Avenue.

FAA Grant Offer

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $836,729.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $836,729, is for the Airport Improvement Program Project No. 3-37-0005-30. This project consists of expanding the terminal apron (including rehabilitation), Phase II.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-30.

Provisions for Possession and Consumption of Malt Beverages and/or Unfortified Wine at the Lexington Avenue Arts & Fun Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Lexington Avenue Arts & Fun Festival.

The Arts 2 People group has requested, through the Asheville Parks and Recreation Department, that City Council permit them to serve beer and/or unfortified wine at their Lexington Avenue Arts & Fun Festival, scheduled for Sunday, September 4, 2005, from 11:00 a.m. – 10:30 p.m.

City staff requests City Council adopt a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Lexington Avenue Arts & Fun Festival.

Budget Amendment for Aston Park Renovations

Summary: The consideration of a budget amendment, in the amount of $260,000, from a $260,000 grant award from the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund.

The City of Asheville applied in January 2005 for a grant from the N.C. Dept. of Environment and Natural Resources, Department of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund. The grant was recently awarded in the amount of $260,000.

The money will be used for the Irene and Dick Covington Center construction, new backboard, trailhead for greenway to Clingman Forest.

Pros:

- Allows for the City to develop improvements to Aston Park without taxpayer investment.
- Completes the construction of the Irene and Dick Covington Tennis Center.
- Completion of the Center will allow for community use in the meeting space provided.
- Allows for the construction of the trail head for the Clingman Forest Greenway.

Cons:

- None

This action complies with City Council's Strategic Plan in that it deals with the 11 areas of greenway development mentioned in the Strategic Plan.

The Parks and Recreation Department recommends City Council approve the budget amendment in the amount of $260,000 to increase the budget for the renovation of Aston Park.

Next Community Meeting – August 30, 2005 – Public Works Facility

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

LEAGUE OF WOMEN VOTERS BOARDS & COMMISSIONS STUDY

Ms. Kathleen Balogh, President of the League of Women Voters of Asheville/Buncombe County ("League"), said that the League is proud to present this compilation of two years of

intensive dialogue and study, documenting the appointment process for Asheville and Buncombe County boards and commissions.

This report represents Phase I of a two-part study. It is not meant to be a definitive work, as the process is in a constant state of refinement. Part I is a baseline, a detailed accounting of the current process, from the point when a board vacancy is identified to the point when an appointment is made to fill that vacancy at both the city and county levels. Phase II will begin at the point of appointment and move forward into how boards and commissions 'work'.

She said the purpose of the study was to create a comprehensive overview of the appointment process in order to establish better understanding of the process and enhance citizen participation in public decision-making and action.

She summarized the issues of concern:

(1) Availability of information/lack of computerized database - (a) information published in the major publications for the City and County is fragmented and incomplete; (b) access to some information requires knowledge of whom to contact and how and when to contact them; and (c) procedures for the City and County are different, and are described differently. This difference could be confusing, especially in the case of a joint city/county board or commission.

(2) Clarify of descriptions and understanding of the appointed bodies and their duties and responsibilities – (a) major publications lack "standard nomenclature." There is no guiding principle as to why there are so many different terms used to name and describe the duties of the appointed bodies; (i) descriptions of the appointed bodies and their duties and responsibilities are vague and unclear; (ii) major publications use different wording to describe the duties, etc., of boards/commissions; and (iii) major publications use words that have subjective interpretations and/or no real definition, such as "assist with," "combat poverty," "ensure/assure," "advance community awareness," "solve human problems," and "fix and revise.; (c) major publications contain contradictory information (e.g., joint boards/commissions with different names); and (d) websites have limited information and are often out of date.

(3) Limitations with the appointment process – (a) it is difficult to discern where information about board/commission openings is being distributed; (i) the current list of contacts are for internal use by staff; and (ii) we were not able to identify a formal list for the general public; (b) major publications do not provide references for citizens to define key terms used in the descriptions and assigned duties of boards and commissions; and (c) county booklet does not list meeting dates or locations.

Specific recommendations include: (1) language used in describing duties and roles of boards and commissions should be standardized; (2) descriptions of jointly appointed boards should be standardized; (3) City and County might wish to consider computerized management systems for tracking vacancies and appointments; (4) more administrative support for appointment process – especially for recruitment and community education on the important role boards and commissions play in governance; (5) better use of websites for both the appointment process and the work of the boards and commissions – like vacancies, minutes, and meeting schedule (time/location); (6) develop and upkeep of "Boards and Commissions" sections in branches of the public library; and (7) standardize applications – available on the website with an on-line application process.

The League recommends that City Council and the County Commissioners, in collaboration with the League, follow-up on the findings in this study.

She thanked Dr. Alison Climo, League member, who contributed time and expertise in data gathering, formulation, and comparison for this study.

Councilwoman Jones suggested a review be made about specific boards or commissions that have served well in the past, but have out-served their existence.

Vice-Mayor Mumpower, Chair of the City's Boards and Commissions Committee, said that he would review the study in depth with City Clerk Burleson and possibly bring back some items for implementation for Council's approval.

On behalf of City Council, Mayor Worley thanked Ms. Balogh and the other participants for their participation, support and assistance in this study. He said that City Council will look forward to the report on Phase II.

ASHEVILLE DRUG COMMISSION

Vice-Mayor Mumpower asked for Council's endorsement and support of the Asheville Drug Commission. He said the mission of the Drug Commission is to "Focus, learn and act on the causes, sources, and impacts of hard drugs on Asheville and our neighbors..."

He explained our problems consist of (1) A factor in an estimated 80% of the crimes committed in our community; (2) The foundation for much of the child abuse and neglect that occurs; (3) A tremendous drain on the service and financial resources of Asheville costing millions each year; (4) A persisting foundation for violence, fear, and impaired quality of life for the poor and disadvantaged in our community.

Our methods include (1) Monthly meetings – one hour +/-; (2) Monthly target issues which we learn, focus, act on, measure, and assess; (3) Sub-committees to enhance and solidify policy commitments using outside resources, time, and energy.

Initial target areas include (1) treatment; (2) education; (3) enforcement and adjudication; (4) social interventions; and (5) local, state and national policy.

Our methodologies include (1) solid pre-meeting preparation; (2) stay on task and realistic; (3) emphasize action over reaction; (4) assure tangible outcomes; and (5) emphasis on practical and realistic follow-up.

Sample issues for the Commission include (1) Bottleneck in SBI lab processing; (2) Economic and social impact of hard drug users who misuse resources at Mission Hospital – lack of availability of more cost-effective and appropriate inpatient "social detox" resources in the community; (3) Coordination of intelligence and communication between enforcement agencies; (4) Inconsistencies in our treatment network; and (5) Harmful exposures to children and elderly in public housing developments.

He suggested the following Commission members: Mr. Gene Bell – Housing Authority of the City of Asheville; Judge Gary Cash – Senior District Court Judge; Dr. Buddy Corbin – Senior Minister, Calvary Baptist Church; Mr. Joe Damore – CEO, Mission Hospital Systems; Dr. Cliff Dodson – Superintendent of Buncombe County Schools; Ms. Beverly Jeter – President, Bartlett Arms Resident's Council; Dr. Robert Logan Superintendent of Asheville City Schools; Chief Bill Hogan – Asheville Police Department; Mr. Jerry VeHaun – Director of Buncombe County Emergency Services; Mr. Rick Lutovsky – Executive Director, Asheville Chamber of Commerce; Mr. Bobby Medford – Buncombe County Sheriff; Mr. Ron Moore – Buncombe County District Attorney; Ms. Valerie Collins – Director, Helpmate; Nathan Ramsey – Chairman, Buncombe County Commission; Mr. Bob Smith – Director A-B Buncombe Community Relations Council; Mr.

Virgil Smith – President, Asheville Citizen-Times; Mr. Paul Vest – Director, YMCA; Ms. Mandy Stone – Director, Buncombe County DSS; and Dr. Carl Mumpower – Vice-Mayor, City of Asheville.

He said that they are scheduled to meet with The Asheville City Council, Buncombe County Commission, C-T Editorial Board, and Asheville Housing Authority Board to secure their official endorsement of this effort. We will move forward with the Chamber Board, Mission Hospital System Board, and others. Community buy-in is one of several foundations for future success.

He said our people are being harmed by a force that affects every child, adult, family, school, church, and business in our community. It's a growing problem – too many of our friends, neighbors, family members, and loved ones are gazing into the abyss. We are beginning a bold adventure in community responsibility. We must match the energy, enthusiasm and resources of those who traffic in hard drugs. We can make a major difference and we will, we must – together.

Council members spoke in support of endorsing the mission of this Commission and felt it was a good approach in a comprehensive way.

Councilwoman Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Dunn and carried unanimously.

Councilman Newman felt that if this is going to be a Commission of the City, he felt Council might want to take some time to think about the charge of this group, the lifetime of this group, the terms of the group, the structure of the group, the relationship of group to City Council, etc.

Vice-Mayor Mumpower said that if Council endorses this effort, he would like to come back to Council in approximately 3 months to update City Council with a sense on what they have done, where they are, and how it's going. Then, Council can have some more detailed discussion about ways to improve or enhance their effort. He would also make sure that City Council receives copies of their meeting minutes.

Councilwoman Jones moved to endorse the initial effort of the Commission. This motion was seconded by Councilwoman Bellamy and carried unanimously.

DEVELOPMENT TASK FORCE RECOMMENDATION UPDATE

Building Safety Director Terry Summey said that this is a Status Report on the 2004 Development Review Task Force Recommendations.

As part of the Fiscal Year 2004-05 budget approval process, members of City Council requested the creation of a task force to evaluate the current development processes. Approximately 50 citizens were invited to participate. As many as 34 citizens attended the various meetings. Citizens representing the following groups submitted recommendations: Architects, Engineers, Designers, Surveyors, Business Owners, Managers, Commercial Contractors/ Developers, and Residential Contractors/Developers. City Council was last updated on the recommendations at the February 15, 2005, worksession.

Based upon the guidance given by Council, staff has worked to implement some of the 32 recommendations, which have been categorized into four areas:

- Items that will require additional input and decisions by City Council (5 items)
- Items implemented by staff (7 items)

- Items staff is working on (9 items)
- Ongoing issues being worked on (11 items)

Considerations in the ongoing implementation of the recommendations:

- Greater reliance on staff expertise, and facilitation on development projects
- More business friendly approach to development
- More timely review and approval of projects
- Better communication and coordination with citizens and industry

City staff recommends City Council receive this report as information.

Mr. Russ Martin, Chair of the Development Review Task Force explained how significant progress has been made with the implementation of some of the recommendations, e.g. the consolidation of six forms into one. He explained why some of the recommendations had not been implemented after further review. He passed out to Council a "Asheville Development Guide to Building in Asheville, N.C." which serves as a tool to identify the review and permitting process that corresponds to a particular project. In addition, it contains an outline of key contacts for specific areas that provide technical support to th Development Services Center staff. The Building Safety Department has a DVD that is very informative (and is shown on the Government Channel), however, people do not know that is an available resource, thus identifying the need for communication. He suggested Council appoint a small advisory committee made up of people in the contracting business and representatives from homeowners associations who could meet on a quarterly basis with staff to come up with ideas to improve the process. He also suggested the Task Force members meet one last time to be updated and let them know of the suggestion to form a small advisory committee.

Mr. Summey and City Engineer Cathy Ball responded to various questions from Councilman Dunn about some of the recommendations, in particular the consistency of inspectors and the one-stop shop.

City Manager Jackson said that he understands this is a priority of City Council. He requested comments from the Development Forum and asked the citizens for their on-going involvement. He asked them what was going well and ways where we can improve. He said some of the improvements were that they are seeing better customer from the staff, electronic permitting, the additional code seminars, communication with the building profession, and the form consolidation. Areas to improve include the standardization of the process, streamlining the process, the one-stop shop, the need for tracking, and trouble-shooting.

City Manager Jackson said he has met with individuals in the construction field, development field, neighborhood representatives, individuals for more regulation and individuals for less regulation. As a result of these meeting, he determined that the interpretations in the gray areas meant that we were not doing sufficient enforcement. He cited a couple of examples - accepting streets that had been built; and requiring a developer to extend a waterline. He felt this hands-on involvement has been very beneficial. In some cases he reached the conclusion that staff had a very sound basis for their decisions. He has met with every staff member associated with the permitting process. His first conclusion is that the recommendation that was made by Chair Russ Martin is a sound one. He felt Council needs to commend and compliment the Task Force for the work that they did. He also thinks we need an on-going forum for issues. He would support the recommendation that there be an advisory committee made up of representatives of the development community (including developers, staff, realtors, neighborhood representatives, people from the construction and trades) and that they meet monthly. Regarding the one-stop shop, it is his personal view that we need to explore that further. It does require resources, additional staffing, and technology for tracking. He would like to explore that with the new future

Building Safety Director. He felt we need to have better reporting of performance measures, in that the development community should be able to track their project on the Internet. There will always be a dynamic tension, gray areas and a regulatory role. Our goal in a regulatory role should be to do that in the most efficient and effective way. He said that he would like to position the Economic Development Director to be on top of the technical issues as they relate to the development activity, real estate changes, etc.

On behalf of City Council, Mayor Worley thanked Mr. Martin and the Task Force for their hard work on these issues.

At 5:07 p.m., Mayor Worley announced a short recess.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on September 13, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Addition of General Retail Sales as a Use of Right in the Neighborhood Business District.

Mr. Joe Heard, Director of Development Services, said that this is the consideration of amending the Unified Development Ordinance (UDO) for the purpose of adding general retail sales as a use of right in the Neighborhood Business District.

This proposed ordinance was drafted in response to requests from local businesses and property owners to allow a broader range of retail activities in the Neighborhood Business District (NBD). In reviewing this proposal, staff noted that many types of specific retail uses are already allowed within the NBD, including bakeries, bicycle shops, bookstores, candy/snack shops, delicatessens, florists, fruit/vegetable markets, gift shops, grocery stores, hardware/garden supply stores, pharmacies, and video stores. Both Planning staff and the Planning & Zoning Commission gave careful consideration to types of retail uses that would not be desirable in this district. More objectionable uses, such as the sale of adult-oriented items, are subject to more restrictive standards and are not classified as "retail sales". As the NBD does not allow drive-thrus or outdoor storage and limits the size of any building to 3,000 square feet for commercial use, uses are not of a scale or character that could significantly impact a neighborhood.

The intent of the NBD is to provide for the daily convenience and personal service needs of the surrounding residential neighborhood while minimizing conflicts with surrounding residential uses. The district is designed to be located within or adjacent to residential neighborhoods where large commercial operations are inappropriate, but small neighborhood oriented businesses are useful and desirable. Examples of existing NBD districts include small, traditional commercial areas within Emma, Montford, Oakley, Shiloh, and West Asheville.

Pro –

- This amendment would allow a greater variety of opportunities for the establishment of businesses in the NBD.
- The additional uses allowed would not have a greater impact than the uses presently allowed in the NBD.

Con –

- None.

The Planning and Zoning Commission recommended approval of these code amendments on August 3, 2005 by a unanimous vote of 7-0. Staff recommends approval of the proposed ordinance amendment as well.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next appropriate formal City Council agenda.

STRATEGIC PLAN UPDATE

Assistant City Manager Jeff Richardson said that this is a quarterly status report of the progress made in key areas of the city's Strategic Operating Plan.

Staff continue to make significant progress in a number of the core focus areas outlined in the plan. Specific progress includes:

Focus Area: Economic Development

- Implementation of the 2004 Development Task Force recommendations, in an effort to facilitate a more efficient and economical permitting process.

Focus Area: Sense of Place, Heritage & Arts

- Completion of the College Street improvement project as part of the gateway/corridor improvement focus.

Focus Area: Housing Opportunities

- Continuing to facilitate community involvement through forums to increase support of affordable housing funds and expand the Housing Trust Fund to include private investment.

Focus Area: Planning

- Successful public transportation partnerships with UNC-Asheville and the Town of Weaverville to increase the effectiveness of the transportation system.

Focus Area: Partnerships to Improve Critical Services & Infrastructure

- Severance of the Water Agreement, which has led to an improved water system governance that better serves our community and its citizens.
- Increased resources and efforts aimed at reducing drug-related crime.

Focus Area: Natural & Built Environment

- Adoption of the Stormwater Utility program, allowing the city to comprehensively address and improve the city's stormwater infrastructure.

Focus Area: Community Building

- Expansion of the city government cable access channel capability by producing over three times the amount of programming over the past year.
- Creation of the Citizen's Academy (62 city residents have graduated thus far)

Staff is prepared to answer any additional questions that City Council may have regarding this document. We would appreciate Council direction on the future steps as follows:

- November, 2005: Next Quarterly Strategic Plan Update

- January, 2006: City Council Annual Retreat: City Council may choose to comprehensively review and update the plan at this time. Staff will align the Fiscal Year 2006-07 annual budget based on council direction at this time.

Council felt the even though the completion of the College Street improvement project as part of the gateway/corridor improvement focus, fits well in the focus area of sense of place, heritage and arts, they felt that was not something Council took the lead on or envisioned when the Strategic Operating Plan was developed.

Councilwoman Jones felt it was time to update the document but felt it was very important to get citizens involved in next stage.

City Manager Jackson felt that the Strategic Plan is an important document and agreed it was important to involve the citizens in the front end. Council should then hold their retreat and be clear about what are the business plan initiatives. Staff will not implement those initiatives without having a follow-up by this Council because it is a commitment of time and resources, and that is a policy decision.

FEDERAL CLEAN AIR ACT

Councilman Newman read the following resolution and asked for City Council's support: "WHEREAS, air pollution is a significant contributing cause of respiratory and other ailments in the population of Western North Carolina, especially in the very young and very old; and WHEREAS, air pollution has harmful effects on the ecology and environment, including depletion of the ozone layer, and weakening and destruction of vegetation at high elevations; and WHEREAS, air pollution has a harmful effect on the economy of Western North Carolina, in that it interferes with mountain views which have long been an attraction for the tourism industry; and WHEREAS, a substantial amount of the air pollution that affects Western North Carolina originates in other states and drifts into this area on prevailing winds; and WHEREAS, in 2001, the State of North Carolina adopted the Clean Smokestacks Act in order to reduce air pollution originating from within the State; and WHEREAS, federal law, like the federal Clean Air Act, is the most effective way to control interstate air pollution. NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: (1) The City Council of the City of Asheville does hereby support full implementation of the federal Clean Air Act, and the adoption of laws that would make the standards established by the N. C. Clean Smokestacks Act applicable in other states; and (2) The City Council of the City of Asheville urges the N.C. Congressional Delegation to oppose any legislation that would weaken the federal Clean Air Act or that would undercut or delay North Carolina's legal authority to seek reductions in pollution that originate from upwind states."

Although all of Council supported the resolution, discussion surrounded introducing resolutions about issues that are not within Council's power to solve or that City Council does not have direct responsibility for.

Vice-Mayor Mumpower wanted to be supportive but would not because he felt that Council should limit their resolutions to issues that they have a direct impact on or control over.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next appropriate formal City Council agenda.

ASHEVILLE-BUNCOMBE FLOOD REDUCTION TASK FORCE

Councilwoman Jones said that our community witnessed the devastating power of the back-to-back floods that tore through western North Carolina last summer. Millions of dollars in

property were destroyed, businesses were washed away, our rivers suffered serious environmental contamination and lives were lost. The whole region was hit hard. Locally, the flooding was most severe in the Swannanoa Valley, and especially where the Swannanoa River flows through Biltmore Village.

Since the floods, many people have worked hard to help our community recover. Legislators helped secure flood relief and local agencies helped families and businesses who were dislocated. Although it inflicted great pain, the floods also brought out the best in our community.

She believes that we need to do more to understand what we can do to minimize the threat of future flooding in our community. Climate scientists tell us we may be entering an era where severe weather events will become more common. In order to protect the safety of our properties and our families, and the health of our economy and environment, it is vital for us to be prepared and plan for the future. It is not a of if Asheville and Buncombe County will experience another severe rain episode, it is only a matter of when.

One of the major lessons that should be learned is that floods have no respect for political boundaries. The Swannanoa Watershed includes large areas within the Asheville city limits, the unincorporated areas of eastern Buncombe County and the towns of Black Mountain and Montreat. The floods of 2005 sent a clear message – we are all in this together.

The Asheville City Council has indicated its willingness to take steps to minimize future flooding by commissioning a study of possible new reservoir management strategies for the North Fork Reservoir. We don't know if the study will indicate if alternative reservoir management studies could meaningfully reduce flooding during heavy rain episodes, but Council is doing the right thing by asking such questions and determining best management practices.

In the big scheme, the management of the reservoir levels represents only a minor part of what can be done to minimize future flooding. Our community is growing and developing at a rapid rate. We know that how we grow and develop can have a huge impact on future flood events. Poor planning can lead directly to more severe flooding. It would be the height of irresponsibility to grow in a manner that increases the threat to property, businesses, the environment, and the safety of families in our community by exacerbating future flooding.

Addressing the threat of future flooding requires a cooperative, regional approach. No single entity can effectively address the challenge alone. With this in mind, she would like to suggest that the Asheville City Council begin conversations with the Buncombe County Commissioners and other local governments (Black Mountain and Montreat) regarding the creation of an Asheville-Buncombe Flood Reduction Task Force.

She suggested that the task force include representatives appointed by all local governments that are located in the Swannanoa Valley. The purpose of the task force would be to: (1) study strategies to reduce future flood levels in the Swannanoa Valley Watershed during heavy rain episodes; (2) study strategies to minimize the economic, environmental and social impacts and the risk to human life when floods occur in the future; and (3) make recommendations to the local governments on those matters.

She has spoke with several members of the Buncombe County Commissioners about the concept and some members of the community who have strong interests in these issues, such as RiverLink. Everyone she has spoken to has either been supportive or at least open to the concept.

If members of City Council believe this would be a worthwhile effort, she would be willing t continue talking with other members of the County Commissioners and other local municipalities, and members of the community who may have an interest in this issue.

Vice-Mayor Mumpower was supportive of this effort and wondered if we would want to limit this to the Swannanoa Valley or look to other flood-prone areas as well.

In response to Councilman Dunn about development along the River, Councilman Davis said that in reality the bottom line is good planning and development tools. He felt you can build in the floodway responsibly.

Mayor Worley felt this is a good concept and that the task force should be technical in nature.

Councilwoman Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Dunn and carried unanimously.

Councilwoman Bellamy moved to endorse the concept of the Asheville-Buncombe Flood Reduction Task Force, as envisioned by Councilwoman Jones. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to arrange interviews with Janet Whitworth, Darryl Hart and Leslie Fay for vacancies on the Planning & Zoning Commission. Mr. Harry Weiss will be a candidate, however, it is not necessary to bring him in for an interview.

It was the consensus of City Council to instruct the City Clerk to arrange interviews with James Rentz, Eric Scheffer, Elizabeth Sims and Joseph Malki for a vacancy on the Buncombe County Tourism Development Authority.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 23, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Diana Hollis Jones

PLEDGE OF ALLEGIANCE

Councilman Davis led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 5-9, 2005, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Councilwoman Bellamy read the proclamation proclaiming September 5-9, 2005, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to Mr. Marvin Vierra, who briefed City Council on some activities taking place during the week.

B. PROCLAMATION PROCLAIMING SEPTEMBER 2005 AS "CHILDHOOD CANCER AWARENESS MONTH"

Mayor Worley read the proclamation proclaiming September 2005 as "Childhood Cancer Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Mike Traynor, President of the Pediatric Brain Tumor Foundation, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING SEPTEMBER 2005 AS "CELEBRATION OF THE ARTS MONTH"

Mayor Worley read the proclamation proclaiming September 2005 as "Celebration of the Arts Month" in the City of Asheville. He presented the proclamation to Mr. Dean Schatley, Vice-Chair of the Arts Council, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

At the request of Vice-Mayor Mumpower, Consent Agenda Items "B" and "D" were removed from the Consent Agenda for individual votes.

At the request of Councilwoman Bellamy, Consent Agenda Items "F" and "G" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 9, 2005, AND THE WORKSESSION HELD ON AUGUST 16, 2005

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA CORNERSTONE TO CONSTRUCT A TENNIS FACILITY AT ASTON PARK

This item was removed from the Consent Agenda for further discussion.

C. RESOLUTION NO. 05-163 - RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $836,729.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $836,729, is for the Airport Improvement Program Project No. 3-37-0005-30. This project consists of expanding the terminal apron (including rehabilitation), Phase II.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-30.

RESOLUTION BOOK NO. 29 – PAGE 197

D. BUDGET AMENDMENT FROM A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR ASTON PARK RENOVATION

This item was removed from the Consent Agenda for further discussion.

E. RESOLUTION NO. 05-164 - RESOLUTION AMENDING THE CITY COUNCIL 2005 MEETING SCHEDULE TO INCLUDE A COMMUNITY MEETING ON TUESDAY, AUGUST 30, 2005, AT 7:00 P.M. IN THE WILLIAM F. WOLCOTT JR. BUILDING LOCATED AT 161 S. CHARLOTTE STREET

RESOLUTION BOOK NO. 29 – PAGE 198

F. RESOLUTION SETTING A PUBLIC HEARING ON SEPTEMBER 27, 2005, TO CONSIDER CLOSING AN UNNAMED ALLEY OFF CLINGMAN AVENUE

This item was removed from the Consent Agenda for an individual vote.

G. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL

This item was removed from the Consent Agenda for an individual vote.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Dunn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 05-162 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA CORNERSTONE TO CONSTRUCT A TENNIS FACILITY AT ASTON PARK

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Carolina Cornerstone Construction to construct a tennis facility in Aston Park.

The City of Asheville Parks and Recreation Department is in the process of implementing the first phase of development on the Aston Park Master Plan. This phase of significant public park improvements includes a new tennis facility, driveway and handicap parking to replace the current building that is in poor condition and doesn't meet the needs of the tennis program and the community. The project was bid out according to City standards that include the Minority Business Plan. The Director of the Asheville-Buncombe Office of Minority Affairs has reviewed the bid submittal and found that the company provided the appropriate good faith effort documentation along a listing of certified firms that will be participate on this project. Funds for this project are coming from the Irene & Dick Covington Foundation and the Parks & Recreation Trust Fund grant. This building will also house the memorabilia from Dick Covington who was affectionately known as "Mr. Tennis" for his work in Asheville on enhancing this sport for over five decades.

Pros

- The construction of this portion of the project is an integral-supporting aspect of the unique clay tennis courts.
- The park will provide greatly needed recreation facilities for recreation users, especially the tennis players in the area.
- The tennis facility will be a local and regional attraction that will foster economic development.
- No City tax funds will be used in the development of this facility.

Cons

None

City staff recommends that City Council authorize the City Manager to enter into a contract with Carolina Cornerstone Construction, in the amount of $361,237, to construct the tennis facility at Aston Park.

Mr. Jack Petty felt that there are adequate facilities at Aston Park. He felt there is no need to build an attractive nuisance. In addition, he felt the Asheville tennis players have not been brought into the discussion of the use of public funds for expansion of the facilities, other than those that are directly involved in tennis. He felt this is a waste of public funds.

City Manager Jackson noted that the City is working on addressing the existing unwanted element in Aston Park.

Mr. Irby Brinson, Director of Parks & Recreation, said that this process has been going on for five years. It was the dream of Dick & Irene Covington to build a clubhouse at Aston Park for two reasons: (1) to house the memorabilia of Mr. Covington through his many years of tennis; and (2) to build a facility to be used by the public, not only for tennis. The funds for the project are coming from the Dick & Irene Covington Foundation, being matched by a Parks & Recreation Trust Fund grant. He noted there are no taxpayer dollars going into construction of this facility. This has been discussed many times through the N.C. Tennis Association and the Irene and Dick Covington Foundation. In addition, a community meeting was held to discuss the overall design. He will continue to work to build a dialogue with the public as we proceed with this process.

Mr. Fred English felt that to build the new facility will be a waste of money, due to the number of vagrants that frequently use the park.

Mr. Bobby Robinson, speaking on behalf of the Dick & Irene Covington Foundation, spoke in support of the facility, noting it was Mr. Covington's dream to do something for the City and County that was suitable for visitors and players to enjoy a decent and clean facility.

Mr. Gene Hamilton urged City Council to support the building of this new facility.

Vice-Mayor Mumpower said that we do have people that misuse the area, but we don't stop doing good things because of bad people. He said we are working to make Aston Park a better place.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-162. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 196

D. ORDINANCE NO. 3278 - BUDGET AMENDMENT FROM A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR ASTON PARK RENOVATION

Summary: The consideration of a budget amendment, in the amount of $260,000, from a $260,000 grant award from the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund.

The City of Asheville applied in January 2005 for a grant from the N.C. Dept. of Environment and Natural Resources, Department of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund. The grant was recently awarded in the amount of $260,000.

The money will be used for the Irene and Dick Covington Center construction, new backboard, trailhead for greenway to Clingman Forest.

Pros:

- Allows for the City to develop improvements to Aston Park without taxpayer investment.
- Completes the construction of the Irene and Dick Covington Tennis Center.
- Completion of the Center will allow for community use in the meeting space provided.
- Allows for the construction of the trail head for the Clingman Forest Greenway.

Cons:

- None

This action complies with City Council's Strategic Plan in that it deals with the 11 areas of greenway development mentioned in the Strategic Plan.

The Parks and Recreation Department recommends City Council approve the budget amendment in the amount of $260,000 to increase the budget for the renovation of Aston Park.

Councilman Dunn moved to adopt Ordinance No. 3278. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 253

RESOLUTION NO. 05-165 - RESOLUTION SETTING A PUBLIC HEARING ON SEPTEMBER 27, 2005, TO CONSIDER CLOSING AN UNNAMED ALLEY OFF CLINGMAN AVENUE

Councilman Davis moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

Summary: The consideration of a resolution of intent to close an unnamed alley off Clingman Avenue and set a public hearing for September 27, 2005.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mountain Housing Opportunities has requested the City of Asheville permanently close to public use as an unnamed alley off Clingman Avenue. This alley is more particularly described as the alley mentioned in Deed Book 1700 at page 471 and prior deeds in the same chain of title, said alley being further described as Lot 1 of a plat of property of Wilson and Teasley as recorded in the Office of the Register of Deeds for Buncombe County, North Carolina, in Plat Book 2 at page 24 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this alley is not a City maintained street. Closure of this alley will not deny any of the abutting properties a reasonable means of ingress or egress as Mountain Housing Opportunities has submitted to the Planning Department a recombination request for the parcels affected. There are three parcels that abut this section of alleyway. They are identified by PIN Nos. 9648.05-08-4179, 9648.05-08-5118, and 9648.05-08-4248. The petitioner has authority over all the abutting parcels.

Pros:

- The closure allows the property to be used to its maximum (density) potential.
- Affordable housing can be constructed on the consolidated site.
- There will be no future compromise of ingress/egress to other property.

Cons:

- In consideration of the proximity of the alley, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution setting a public hearing for September 27, 2005, to close an alley off Clingman Avenue.

Councilman Newman moved for the adoption of Resolution No. 05-165. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 199

RESOLUTION NO. 05-166 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Lexington Avenue Arts & Fun Festival.

The Arts 2 People group has requested, through the Asheville Parks and Recreation Department, that City Council permit them to serve beer and/or unfortified wine at their Lexington Avenue Arts & Fun Festival, scheduled for Sunday, September 4, 2005, from 11:00 a.m. – 10:30 p.m.

City staff requests City Council adopt a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Lexington Avenue Arts & Fun Festival.

Councilman Dunn moved for the adoption of Resolution No. 05-166. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 29 – PAGE 200

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING AND APPLICATION OF A PLANNED UNIT DEVELOPMENT OVERLAY ZONING TO 72 ACRES LOCATED OFF KENILWORTH ROAD AND RESERVOIR ROAD, IDENTIFIED AS KENILWORTH HEIGHTS, FROM THE UNDERLYING ZONING OF RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT; AND MASTER PLAN APPROVAL FOR A 172 UNIT RETIREMENT COMMUNITY WITH RELATED AMENITIES

City Attorney Oast said that the City has received a protest petition and, using the procedures that the staff normally uses, staff has determined that it is a valid protest petition.

Mr. Albert Sneed, attorney representing the developer, provided City Council with various documents regarding ways to calculate whether a protest petition is valid. He felt City staff arbitrarily decided how to pick their four sides for calculation. He requested City Council rule on its validity, not City staff.

City Attorney Oast observed that there is no case law to provide much guidance on the issue of what constitutes a side for purposes of validating a protest petition, especially with an irregular shaped piece of property, such as this. He explained how staff reviews protest petitions and added that staff has always, in his experience, done it this way.

Vice-Mayor Mumpower felt Mr. Sneed raised some valid concerns, however, he didn't feel this was the appropriate time to address those concerns. This protest petition has been reviewed based on our current practices and past actions.

City Attorney Oast said that there is an amendment to the statute that is under consideration by the General Assembly and if, and when, it passes, it will be a good opportunity for us to re-examine our current process.

Vice-Mayor Mumpower moved to adopt staff's interpretation that the protest petition is valid. This motion was seconded by Councilman Davis and carried unanimously.

Mr. Sneed said that only six Council members are present at this meeting, he requested a continuance of the public hearing until all seven Council members are present, in fairness to the applicant.

Councilman Newman moved to continue this public hearing until September 13, 2005. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3275 – SECOND AND FINAL READING OF AN ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A POTENTIAL OUTPARCEL USE BASED ON NEW INFORMATION INCLUDED IN AN UPDATE TO THE TRAFFIC IMPACT ANALYSIS FOR THE RIVERBEND MARKETPLACE DEVELOPMENT, LOCATED OFF BLEACHERY BOULEVARD

Mayor Worley said that the public hearing and first reading of this ordinance was held on August 9, 2005. A second reading was required since the ordinance passed on a 4-3 vote.

After a brief discussion about the 90% capacity issue, Councilman Newman said that he could not support this motion because when the conditional use permit was originally approved, Council stated that they would not allow expansion of the traffic impact, as part of this project, unless there was additional traffic mitigation measures to address it and he did not see that additional traffic being mitigated.

By a show of hands, Ordinance No. 3275 carried on a 4-2 vote with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy and Councilman Newman voting "no."

ORDINANCE BOOK NO. 22 – PAGE 245

V. NEW BUSINESS:

A. RESOLUTION NO. 05-167 - RESOLUTION SUPPORTING FULL IMPLEMENTATION OF THE FEDERAL CLEAN AIR ACT AND THE ADOPTION OF OTHER MEASURERS TO CONTROL INTERSTATE POLLUTION

Councilman Newman read the following resolution and asked for City Council's support: "WHEREAS, air pollution is a significant contributing cause of respiratory and other ailments in the population of Western North Carolina, especially in the very young and very old; and WHEREAS, air pollution has harmful effects on the ecology and environment, including depletion of the ozone layer, and weakening and destruction of vegetation at high elevations; and WHEREAS, air pollution has a harmful effect on the economy of Western North Carolina, in that it interferes with mountain views which have long been an attraction for the tourism industry; and WHEREAS, a substantial amount of the air pollution that affects Western North Carolina originates in other states and drifts into this area on prevailing winds; and WHEREAS, in 2001, the State of North Carolina adopted the Clean Smokestacks Act in order to reduce air pollution originating from within the State; and WHEREAS, federal law, like the federal Clean Air Act, is the most effective way to control interstate air pollution. NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: (1) The City Council of the City of Asheville does hereby support full implementation of the federal Clean Air Act, and the adoption of laws that would make the standards established by the N. C. Clean Smokestacks Act applicable in other states; and (2) The City Council of the City of Asheville urges the N.C.

Congressional Delegation to oppose any legislation that would weaken the federal Clean Air Act or that would undercut or delay North Carolina's legal authority to seek reductions in pollution that originate from upwind states."

Vice-Mayor Mumpower wanted to be supportive but would not because he felt that Council should limit their resolutions to issues that they have a direct impact on or control over.

Councilman Newman moved for the adoption of Resolution No. 05-167. This motion was seconded by Councilwoman Bellamy and carried on a 5-1 vote, with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 202

C. RESOLUTION NO. 05-168 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Mumpower said that the terms of Cindy Weeks, Jerome Jones and Hedy Fischer, as members on the Planning & Zoning Commission, expired on August 14, 2005.

At the City Council worksession on August 16, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Weeks and Mr. Jones, each to serve a three-year term respectively, terms to expire August 15, 2008, or until their successors have been appointed.

Also at the City Council worksession on August 16, City Council instructed the City Clerk to arrange interviews for Leslie Fay, Darryl Hart, and Janet Whitworth. Mr. Harry Weiss is also a candidate, however, it was not necessary to bring him in for an interview. Ms. Fay was unable to attend the interview.

After each Council member spoke in support of the candidates interviewed, Leslie Fay received no votes; Darryl Hart received five votes; Janet Whitworth received no votes; and Harry Weiss received one vote. Therefore, Darryl Hart was appointed as a Planning & Zoning Commission member to serve a three-year term, term to expire August 15, 2008, until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 203

D. RESOLUTION NO. 05-169 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Vice-Mayor Mumpower said that Mr. Randy Fluharty has resigned, as the individual who is involved in the tourist business who has demonstrated an interest in tourist development, and who does not own or operate hotels, motels or other taxable tourist accommodations, from the Buncombe County Tourism Development Authority.

At the City Council's worksession on August 16, the City Clerk was instructed to arrange interviews for Joseph Malki, Eric Scheffer, Elizabeth Sims and James Rentz. Mr. Rentz was not interested in the position at this time.

After each Council member spoke in support of the candidates interviewed, Joseph Malki received one vote; Eric Scheffer received five votes; and Elizabeth Sims received no votes. Therefore, Eric Scheffer was appointed to the Buncombe County Tourism Development Authority, to serve a three-year term, term to expire August 30, 2008, until his successor has been appointed.

VI. OTHER BUSINESS:

Vice-Mayor Mumpower said that a group of businesses have contributed a basketball court to Deaverview Apartments and invited the public to attend the dedication ceremony.

The following claims were received by the City of Asheville during the period of July 29 – August 11, 2005: Dan Gerber (Water), John Moutos (Streets), Julia S. Reed (Police), Swen Froemke (Engineering) and Paul Raybon (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke about the need for the City of Asheville to have a comprehensive quality plan.

Mr. Fred English spoke about the high fuel prices in Asheville.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:56 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 30, 2005
Public Works Facility
161 South Charlotte Street

7:00 p.m. – Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Fire Chief Greg Grayson briefed Council on weather emergency response.

City Engineer Cathy Ball briefed Council on the parking garage project downtown and the opportunities for future communication with the residents.

Civic Center Director David Pisha briefed Council on the Civic Center.

Assistant City Manager Jeff Richardson updated Council on the renovations to Pack Square Renaissance Project and the City/County Plaza area.

The following topics were raised by residents and addressed by City Council and City staff: what is the City's contingency plan should there be a shortage of gas, i.e., expanded bus service; break-in's on Biltmore Avenue, especially along Lexington Avenue; concerns about the perceived lack of public involvement by the residents of the Battery Park Apartments regarding the Haywood Street Parking Garage; concerns surrounding the health, safety and security of the residents in the Battery Park Apartments from the Haywood Street Parking Garage; and suggestion that the City work to establish a local drug lab in order to identify drugs faster, thus getting drug dealers off the streets quicker.

Mayor Worley adjourned the meeting at 8:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 13, 2005 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor R. Carl Mumpower, Presiding; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Charles R. Worley

PLEDGE OF ALLEGIANCE

The Asheville High School ROTC led City Council in the Pledge of Allegiance.

INVOCATION

Reverend Spencer Hardaway, from Rock Hill Missionary Baptist Church, gave the invocation.

SPECIAL REPORT

City Manager Jackson updated City Council on the City's efforts regarding Hurricane Katrina and what our citizens can do to assist in the aftermath.

I. PROCLAMATIONS:

A. PRESENTATION OF CITIZEN BOARD MEMBER AWARD

Vice-Mayor Mumpower recognized Mr. Lindsey Dunevant, President of the North Carolina Recreation and Park Association, who presented Parks & Recreation Directory Irby Brinson with the Citizen Board Member Award.

B. RECOGNITION OF ASHEVILLE WINNING THE MAYOR'S CUP RAFT RACE

Vice-Mayor Mumpower recognized the following crew members in their efforts of Asheville placing 1st in the Mayor's Cup Raft Race: Jonathan Feldman, Jason Mann, Mike Quinones, Charley Cox and stand-by member Herb Roberson. In addition to these crew members, Mayor Worley and Vice-Mayor Mumpower manned the raft as well.

C. PROCLAMATION PROCLAIMING SEPTEMBER 12-16, 2005, AS "UCANSING2 WEEK"

Councilman Newman read the proclamation proclaiming September 12-16, 2005, as "UCANSING2 Week " in the City of Asheville. He presented the proclamation to Bob Burns, Land of the Sky Chapter of the Barbershop Harmony Society, and Mr. Mike Richard, bass player of "Almost Famous." In addition, the quartets "Almost Famous" sang a song.

D. ANNOUNCEMENT OF NEW CHIEF FINANCIAL OFFICER

City Manager Jackson was pleased to announce Benjamin Durant as the City's new Chief Financial Officer.

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 23, 2005, AND THE COMMUNITY MEETING HELD ON AUGUST 30, 2005**

B. **RESOLUTION NO. 05-170 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO INSTALL ADA COMPLIANT RAMPS ALONG HAYWOOD ROAD**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NC DOT) to install Americans with Disabilities Act (ADA) compliant ramps along Haywood Road in conjunction with the NC DOT's resurfacing project.

Both the City of Asheville and the NC DOT are in need of ADA compliant ramps along their respective street systems. It is a requirement of NC DOT to install ADA compliant ramps in conjunction with their resurfacing projects. In order to install some additional City amenities, and to expedite completion, the City of Asheville has offered to install these ramps using Street Division forces. For completing this work on their behalf, the NC DOT has agreed to reimburse the City the full cost of construction, which is estimated at $16,000 (16 ramps X $1,000 each). In accordance with N.C. Gen. Stat. sec. 136-66, municipalities may participate in improvements to the State highway system through mutual agreement.

Funding for this project has already been allocated in the NC DOT's project budget.

This project meets several goals or task identified in the City Council Strategic Operating Plan, specifically:

- Planning section, Goal 2- Multi-modal transportation enhancement, Task 2- Leverage outside funding to achieve multiple transportation goals.
- Sense of Place, Heritage, and Arts- Goal 3- Support and advocate initiatives to encourage new downtown development including gateway/corridor improvements. Task 1- Construct infrastructure including… sidewalks… to include growth downtown.
- Natural and Built Environment- Goal 3- Increased street and sidewalk connections- Expand street and sidewalk connections- Task 6- Pursue additional local and outside funding.

Pros:

- This project will render the existing sidewalks through the project area ADA accessible, which will meet the City's obligation of providing consistent and compliant accessible features.
- It will aesthetically enhance the impacted intersections by providing a consistent design throughout the project area.
- The NC DOT is willing to reimburse the City the full costs of constructing the ADA ramps.

Cons:

- There is an opportunity cost to the City in that Street Division staff would be pulled off of other duties to complete this project; however, the NC DOT reimbursement could offset those costs by enabling the City to construct other needs with those funds.

2M

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into a municipal agreement with the NC DOT to install ADA compliant ramps in conjunction with the Haywood Road resurfacing project.

RESOLUTION BOOK NO. 29 – PAGE 205

C. RESOLUTION NO. 05-171 - RESOLUTION AUTHORIZING THE EXCHANGE OF REAL PROPERTY WITH CHRISTOPHER J. PETERSON TO ALLOW ACCESS INTO RICHMOND HILL PARK VIA RICHMOND HILL DRIVE

Summary: The consideration of a resolution authorizing the exchange of real property with Chris Peterson at Richmond Hill

Back in January, the City Council authorized the City to enter into an agreement with the State of North Carolina (National Guard) for the joint use and development of the City's Richmond Hill property. The Guard proposes to construct a training and readiness center there to replace its facility on Shelburne Road, and to perform some grading work for the City's proposed multi-use athletic fields. The City will also have substantial use of the assembly facilities in the Guard's training center.

This agreement was contingent on the City obtaining access to the property from the current terminus of Richmond Hill Drive across intervening property owned by Chris Peterson. The City negotiated an option with Mr. Peterson that provided either for a payment in cash, or for an exchange of adjacent property belonging to the City. If the City exercised the option, Mr. Peterson could elect to receive the cash or the land.

Back in June, Council authorized giving notice to Mr. Peterson of our intent to exercise the option. After completing some routine inspection and title investigation work, that notice was given on August 18. Mr. Peterson has elected to receive property rather than cash, and has identified the property that he proposes to receive. The resolution is the last step required in the process for authorization of this transaction.

Based on appraisals performed in 2003, the value of the properties to be exchanged is approximately equal, at about $37,000. The difference in size reflects a difference in per acre value, due mostly to the Peterson tract's accessibility to a road.

Considerations: The property that we will be conveying to Mr. Peterson is larger than the property he will convey to the City, but the values are essentially equal, especially in view of the public benefit that the City will receive through better access to its property.

- The property that the City will be acquiring is needed for access to the City's Richmond Hill property, and would be needed whether or not the National Guard facility were being constructed.
- The completion of this transaction is necessary in order to complete the transaction with the National Guard.
- Other considerations (pros and cons) are set out in the June 14 Staff Report.

City staff recommends adoption of the resolution authorizing the exchange of property.

RESOLUTION BOOK NO. 29 – PAGE 206

D. **RESOLUTION NO. 05-172 - RESOLUTION AMENDING THE 2005 CITY COUNCIL MEETING SCHEDULE IN ORDER TO RESCHEDULE (1) THE TUESDAY, OCTOBER 11, 2005, MEETING UNTIL WEDNESDAY, OCTOBER 12, 2005; AND (2) THE TUESDAY, NOVEMBER 8, 2005, MEETING UNTIL WEDNESDAY, NOVEMBER 9, 2005**

RESOLUTION BOOK NO. 29 – PAGE 210

E. **RESOLUTION NO. 05-173 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN ADDENDUM TO THE MEMORANDUM OF UNDERSTANDING WITH THE U.S. DEPT. OF HOUSING & URBAN DEVELOPMENT FOR ENFORCEMENT OF FAIR HOUSING BY THE ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION**

Summary: The consideration of a resolution authorizing the Mayor to execute an addendum to the Memorandum of Understanding (MOU) with HUD for enforcement of Fair Housing.

The Asheville-Buncombe Fair Housing Commission was created in 1987 by a joint ordinance of the City and County. Since then, it has operated under a MOU between the City, County, Commission and HUD. The purpose of the MOU is to set standards for local enforcement of fair housing law and eliminate duplicate enforcement activity. While the MOU is in force, the City is eligible to receive an annual Fair Housing Assistance Program (FHAP) grant from HUD. In 2004-05 that grant amounted to $173,600.

HUD has requested that the City execute an addendum to the MOU, which was last renewed in 1995, to reflect continued certification of the Commission's Fair Housing Program and make minor amendments to reflect changes in HUD procedures.

Pros:
- Continued ability to provide a local response to fair housing complaints
- Continued receipt of an annual FHAP grant in order to fund this work.

Cons:
- None

City staff recommends approval of the resolution authorizing the Mayor to sign the addendum to the MOU.

RESOLUTION BOOK NO. 29 – PAGE 211

F. **RESOLUTION NO. 05-174 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR FUNDING FOR THE REPLACEMENT PURCHASE OF 20 ON-VEHICLE SECURITY CAMERAS FOR THE TRANSIT FLEET**

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) for funding for the replacement purchase of 20 on-vehicle security camera systems for the transit fleet.

These cameras record events on the bus. They are useful in reviewing customer complaints, and are very valuable in staving off superfluous or opportunistic lawsuits. The NCDOT requires an agreement between the City and the NCDOT for reimbursement of up to $120,978 for the replacement of 20 on-vehicle security camera systems for the transit fleet. The

212

state will reimburse the City up to 90% ($120,978) of the total expended amount of $134,420. The local matching funds have been programmed in the City budget.

This action complies with the Strategic Operating Plan in the Planning Focus Area - Goal #2-A Multi-modal Transportation System, leveraging outside funding sources.

Pros:

- Replacement of aging equipment
- Additional protection from spurious lawsuits
- Enhance safety and security for passengers

Cons:

- $200 a year on-going costs for recording media

City staff recommends adoption of the resolution authorizing the Mayor to enter into an agreement with the N.C. Dept. of Transportation for funding for the replacement purchase of 20 on-vehicle security camera systems for the transit fleet.

RESOLUTION BOOK NO. 29 – PAGE 212

G. RESOLUTION NO. 05-175 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE BID OF ORION BUS INDUSTRIES INC. AND AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH ORION BUS INDUSTRIES INC. FOR THE PURCHASE OF BUSES

Summary: The consideration of a resolution authorizing the City Manager to execute an agreement with Orion Bus Industries Inc. for the purchase five new 30-foot buses and two new 20-passenger buses and associated equipment.

The City of Asheville has received a federal grant, the federal share of which is $1,354,796, the state share is $136,204, and the city share is $141,645. The total project cost is $1,632,284. The buses to be purchased are Orion VII, 30 foot, 29 passenger low floor buses similar in appearance to our current buses, and smaller cutaway buses similar to the current models. Both will be purchased through the state bus consortium contract. Delivery will take about 56 weeks after order for the large buses, and 3 to 6 months for the smaller buses. Two of these buses are from congressional earmarks gained by our state delegations.

The Orion buses will have diesel engines with Exhaust Gas Recirculation technology for a cleaner engine than at present and will be able to use Ultra Low Sulfur Diesel fuel, to be required in 2007. The Orion's have been certified to use 5% Bio-Diesel, and it is expected that they will be certified for 20% Bio-Diesel by year's end.

The smaller buses will be able to use bio-diesel, and we will try to purchase diesel engines, which will use ultra-low sulfur fuel. If these are not available we will purchase gasoline engines, as the life expectancy of the vehicle extends beyond 2007.

Associated equipment consists bike racks (triple) and in-bus security cameras for each vehicle.

Funds have been allocated and budgeted for this purchase in the Fiscal Year 2005-2006 budget.

Benefits to the City of Asheville:

- The purchase of these buses is the beginning of the project to stagger the purchase of the fleet to spread out the demand for funds on state and federal agencies. This also allows the purchase of the latest technology on buses.
- Low floor buses provide better access for all riders, especially for the elderly and handicapped
- Replacement of aging buses.

Costs to the City of Asheville:

- There are no costs to the City other than those already in the currently approved budget.

This action complies with the City Council's Strategic Operating Plan through the routine replacement of buses - Goal #2, Task #2: Leverage outside funding to achieve multiple transportation goals where possible.

City staff recommends City Council grant the City Manager authority to enter into an agreement with Orion Bus Industries Inc.

RESOLUTION BOOK NO. 29 – PAGE 213

Vice-Mayor Mumpower said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING AND APPLICATION OF A PLANNED UNIT DEVELOPMENT OVERLAY ZONING TO 72 ACRES LOCATED OFF KENILWORTH ROAD AND RESERVOIR ROAD, IDENTIFIED AS KENILWORTH HEIGHTS, FROM THE UNDERLYING ZONING OF RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT; AND MASTER PLAN APPROVAL FOR A 172 UNIT RETIREMENT COMMUNITY WITH RELATED AMENITIES

Vice-Mayor Mumpower said that this public hearing was originally scheduled for August 23, 2005; however, the applicant had requested the hearing be continued until September 13, 2005, in order to have a full Council present for the hearing. That request was granted.

Due to Mayor Worley's absence at this meeting, Mr. Albert Sneed requested that this public hearing be continued until September 27, 2005, in order to have a full Council present for the hearing. Councilman Dunn moved to continue this public hearing until September 27, 2005. This motion was seconded by Councilman Newman and carried unanimously.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR A DUPLEX AT 96 LOUISIANA AVENUE REGARDING A CHANGE IN SIDING MATERIAL

Late September 12, 2005, City Clerk Burleson received a fax from Mr. Brian Fuchs, developer and owner of 96 Louisiana Avenue, stating "It has just been brought to my attention that Mr. Worley will not be present at the Council meeting scheduled for 9-13-05. I feel it is

important to have the Mayor and a full Council in session to hear my request for amendment concerning the materials of the building. For this reason I am requesting a continuance until the next available time on October 25, 2005, or before."

Mr. Nathan Bryant, resident on Louisiana Avenue, spoke against the continuance in that he feels this is an attempt to delay the matter in order to maneuver votes.

Mr. Tom Rightmyer, secretary of the Coalition of Asheville Neighborhoods (CAN), said that CAN has unanimously requested City Council to deny further change the conditions under which the original conditional use permit was approved.

Ms. Julie Allen, resident on Louisiana Avenue, spoke in support of proceeding with the hearing at this time.

Mr. Brian Fuchs urged Council to continue the hearing until there is a full Council present. As soon as he found out Mayor Worley was not going to be present, he faxed a copy of a continuance request to City Clerk Burleson.

Councilman Newman moved to proceed with the public hearing at this time. This motion was seconded by Councilwoman Jones and carried on a 5-1 vote, with Vice-Mayor Mumpower voting "no."

City Attorney Oast said that in order to have the modification to the conditional use permit granted, there would need to be an affirmative vote of 4 members of Council.

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

All Council members disclosed that they have visited the site and/or have received correspondence relating to this project and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

After hearing no questions about the procedure, Vice-Mayor Mumpower opened the public hearing at 5:44 p.m.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Shannon Tuch, Urban Planner, said that this is the consideration of an amendment to a conditional use permit for a duplex at 96 Louisiana Avenue regarding a change in siding material. This public hearing was advertised on September 2 and 9, 2005.

She said that the Asheville City Development Plan 2025 (ACDP 2025) proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property. One way to accomplish this goal is to apply existing zoning tools to encourage higher density residential infill development. A Conditonal Use Rezoning is one such tool and was utilized to allow for this property to be developed at a higher density than the current zoning would allow. However, the same sections of the comprehensive plan that discusses the need for residential infill development also states

that the "protection, preservation, and enhancement of existing neighborhoods must be as much a part of our development pattern as promoting new construction". The applicant is proposing a change to the Conditional Use Permit that is felt to detract from the predominant character of the homes in close proximity and the larger neighborhood, particularly those homes that are currently under consderation for historic district designation.

This property was Conditionally Rezoned from a split-zoned RM-8/RS-8 lot to RM-8 CUZ to allow for the addition of a new duplex at the rear of the lot for a total of 4 units.

This project was originally reviewed under a conditional use rezoning application for 96 Louisiana Avenue on April 12, 2005, where the property owner requested a rezoning of the unusually configured and split-zoned lot in order to allow for the addition of a new duplex at the rear of the lot behind an existing single family home and accessory apartment.

During the public hearing for this project there was a substantial amount of concern expressed by both the neighborhood and the Council regarding the appearance and compatibility of this project. At the Council's request, staff attempted to mitigate these concerns by adding conditions during the hearing that would help ensure a more compatible product that would contribute to the enhancement of the neighborhood. This included a condition that was designed to reflect the proposed illustrative character sketch supplied by the applicant and described a number of architectural features and building materials. The condition in question is as follows:

"Before the issuance of a final zoning permit, the applicant shall provide final plans detailing and qualifying the character of the proposed building elevations including details such as the amount and location of window and door fenestration, the number and direction of the multiple roof pitches with moderate to deep overhangs, the location and layout of the proposed foot paths and ornamental plantings, building materials and architectural details including asphalt roof shingle, hardi-plank siding, cedar shake shingles, window shutters, exposed end rafters and/or painted wood trim."

With this condition (and others) added to the CUP, the project was approved 7-0.

In the weeks following the hearing, staff was contacted by the applicant who stated that he had always intended to use vinyl siding and wanted administrative approval to change the building materials included in the conditional use permit. Although staff was not aware of the applicant's intentions, it was felt that siding materials contributed significantly to the appearance and character of a structure and that a change from hardi-plank and cedar shake siding to vinyl siding constituted a significant change and would require Council approval. Staff polled Council and did not find consensus on this issue and we advised the applicant of his appeal options.

The recommended usage of hardi-plank and cedar shake siding was a deliberate choice due to its ease to obtain, apply, and maintain. It is also considered to be more durable and affordable than real wood siding and more flexible than vinyl siding. Lastly, hardi-plank is the only non-wood alternative that is recommended in situations where the preservation of historic character is preferred. This property borders the boundary of a neighborhood in West Asheville (Brucemont/Dorchester) that is currently under consideration for Historic District designation and it is common for conditional zonings to be held to a standard that helps enhance a neighborhood's character.

Staff has worked with the applicant on a number of other relatively minor changes that deviate slightly from the illustrative drawing presented at the April hearing including: changes to window placement to accommodate an internal staircase, the addition of a building protrusion to the rear of the building face to accommodate unanticipated exterior venting to second story (protrusion will resemble a chimney flu), a small increase in height, alterations to stairs leading to

the second entrance, reductions/alterations to the ornamental plantings, and removal of the exposed end-rafter requirement. These changes were approved administratively.

Because this requested amendment involves a change to the appearance of the structure only, it was not required a review by the Technical Review Committee.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   Not applicable.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   Not applicable.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   Although the vinyl siding itself is not believed to adversely affect adjacent property values, it is felt that the proposed vinyl siding does little to enhance the character and subsequent values of the adjacent properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   It has generally been argued that the character defining features of a structure do have an impact on more than the character of the building itself; they also alter the visual relationship between buildings. The applicant is proposing to add a vinyl-sided structure that would be surrounded by other homes, the majority of which, are currently sided with a material other than vinyl. Furthermore, the predominant siding material on the larger block is not vinyl and the vinyl sided homes that do exist in the area are typically older wood-sided homes that have been covered in vinyl.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The ***Asheville City Development Plan 2025 (ACDP 2025)*** proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property. One way to accomplish this goal is to apply existing zoning tools to encourage higher density residential infill development. A Conditonal Use Rezoning is one such tool and was utilized to allow for this property to be developed at a higher density than the current zoning would allow. However, the same sections of the comprehensive plan that discusses the need for residential infill development also states that the "protection, preservation, and

enhancement of existing neighborhoods must be as much a part of our development pattern as promoting new construction". The applicant is proposing a change to the Conditional Use Permit that is felt to detract from the predominant character of the homes in close proximity and the larger neighborhood, particularly those homes that are currently under consderation for historic district designation.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   Not applicable.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   Not applicable.

Pros

- Results in less expense to property owner.

Cons

- Compromises the character of the structure.
- Weakens the relationship between subject property and adjacent homes through less compatible materials.
- Further dilutes the historic character of the area attempting to be preserved.

Staff does not recommend a change to the coniditonal use permit to allow for the substitution of the previously specified hardi-plank and cedar shake siding for vinyl siding.

Ms. Tuch summarized by saying that this is a request for an amendment to a conditional use permit associated with the conditional use zoning of the property located at 96 Louisiana Avenue. The purpose of this rezoning was to grant a multi-family zoning designation to allow for the addition of a duplex to a site that already supported two residential units. This project was originally approved in April of 2004. (Attachment to City Exhibit 3 – Location Map).

The project met with a fair amount of opposition from the adjacent property owners and other west Asheville residents and despite the relatively small scale, resulted in a fairly significant amount of discussion. Ultimately, the infill project was approved after being conditioned by staff, at Council's request, to ensure adherence to an illustrative drawing that was submitted by the applicant (Attachment to City Exhibit 3 – Illustrative Drawings). These conditions included the application of a cement fiberboard siding (commonly referred to as hardi-plank siding) and cedar shake siding to the new structure. With this condition in place, the Council unanimously approved the proposal.

After the hearing, the applicant contacted staff to request a change in the siding material. Although siding had never been discussed prior to the City Council's public hearing, apparently the staff's choice of preferred siding material was not what the applicant had intended to use. Given the amount of discussion over the appearance of the structure, staff was uncomfortable with an administrative change and felt that the project should return to the City Council for an amendment. In evaluating the project against the seven conditional use standards, not all standards are applicable in this case, but of particular concern to staff is standard #4 related to compatibility with a neighborhood's character. Although vinyl siding is present in the neighborhood, it is not the predominant siding material and it is staff's preference that the project be more compatible with the older more historic character of the neighborhood rather than the

some of the other less historic structures. Furthermore, conditional use rezonings are often projects that request special consideration. These projects are commonly asked to meet a higher standard than the minimal standard normally required, and for this they are allowed to do something that they are not normally allowed to do. In this case, Mr. Fuchs was granted the ability to add two additional units to this property that otherwise would not have been allowed. For this, staff feels that it is not unreasonable to request a building material that aids in the project's compatibility with the neighborhood.

Lastly, the character of the neighborhood is of a higher concern given it's proximity to a proposed historic district (Brucemont/Dorchester area) currently under consideration (City Exhibit 4). Even though this property is not included in this proposed district, it is in close proximity. That is another reason why staff is concerned with compatibility issues. The choice of hardi-plank siding and the cedar shake siding was a deliberate choice by staff, not to burden the applicant, but because it is the only non-historic material that is generally considered to be acceptable in historic areas. It is also very flexible building material and it is a relatively cost-effective material. Again, staff felt that material better reflected the character that was proposed by the applicant.

Mr. Brian Fuchs said that he is not requesting to change anything he originally had planned to do. He felt there was a major misunderstanding that occurred at the end of the Council meeting in April. There was a major issue Council had concerning the look of the building. Council wanted to hold him accountable to make sure it looks like the picture he presented at the Council meeting and not the picture he used at the Planning & Zoning Commission meeting. His problem is the siding materials (hardi-plank, cedar shakes and open-end rafters) suggested by Ms. Tuch (and voted on by Council) were materials never discussed with him because they were not an issue. He did not have the opportunity at the Council meeting to raise that concern since the public hearing was closed. All along he was going to use a very high end vinyl siding, as well as a vinyl shake. He stressed that the siding materials staff suggested were never discussed or agreed to by him. He raised two issues about using the material suggested by staff – maintenance and the cost of $6-10,000. He said that out of the 17 dwellings on his block, 30% have vinyl siding. He feels vinyl siding will fit well into the character of the neighborhood. Using photographs (Applicant Exhibit 1) he showed the siding materials of various houses in the immediate area. He said that the closest house with hardi-plank siding is 3.2 miles away. He urged Council to allow him to us a top-end and first-class vinyl siding.

Mr. Nathan Bryant, resident on Louisiana Avenue, felt that the purpose of the conditions were for the neighborhood and Mr. Fuchs to come to a middle ground. He felt it was appropriate to draw from the best materials for something that has a high impact to the neighborhood He urged Council to not allow vinyl siding in that he did not think it was aesthetically pleasing material.

Ms. Shao Chung, resident who lives on Louisiana Avenue two doors down from the applicant, noted that her house has hardi-plank siding on it. She presented photographs (Neighborhood Exhibit 1) of a sewer line the developer put in. She was opposed to allowing vinyl siding on the building. She felt that any additional buildings or renovations to existing homes should be to enhance the area.

Ms. Julie Allen, resident on Louisiana Avenue, said that the developer has already had administrative modifications made to his project and felt that vinyl siding materials should not be allowed.

Ms. Jennifer Long, resident on Dorchester Avenue, asked Council protest the integrity of the neighborhood and not allow vinyl siding.

Vice-Mayor Mumpower closed the public hearing at 6:09 p.m.

Upon inquiry of Councilman Dunn, Planning & Development Director Scott Shuford said that at the April Council meeting, Council asked staff to help formulate an exact description of the materials that would be used for the building in order to allay neighborhood concerns and to clarify what the building would look like and what it would be made out of. At Council's request, Ms. Tuch made her best effort to clarify that for Council and came up with a condition of hardi-plank siding and cedar shake siding. Those materials were arrived at considering the age of the neighborhood, the type of materials available, etc. It was Council's decision to accept that condition. Unfortunately there was not a lot of time for discussion with the developer.

Councilman Dunn felt it was the developer was never given the opportunity to comment about the siding materials.

Councilwoman Jones said that it would have been City Council's responsibility to engage the developer at the point when the condition was developed by staff.

At the request of Councilman Davis, Ms. Tuch outlined other minor changes made, which did not detract from the character of what the conditional use permit issued by City Council.

Councilman Davis and Councilman Dunn felt that a lot of people have vinyl siding and thought that that siding would be in character with the surrounding neighborhood.

Councilman Dunn moved to approve the amendment to the conditional use permit to allow for the substitution of the previously specified hardi-plank and cedar shake siding for vinyl siding.

Councilwoman Jones said that if Council is going to be advocates of affordable housing we have got to make sure that the neighborhoods know that the project will be attractive and compatible. She feels Council made a commitment to the neighborhood of what the building siding will be.

Councilman Newman felt that staff has been willing to work with the developer on changes to the project but they did not feel comfortable with the compatibility issue of the siding. He felt there was a compromise crafted because this was such a tough site to fit in. He would not be able to support the modification request.

Councilwoman Bellamy explained that Council deliberated at length about what the project would look like and would not support the modification request.

Vice-Mayor Mumpower felt the kind of vinyl siding Mr. Fuchs is talking about installing on the home would look similar to the materials outlined in the condition.

The motion made by Councilman Dunn and seconded by Councilman Davis failed on a 3-3 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

At 6:40 p.m., Vice-Mayor Mumpower announced a short recess.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED MASTER PLAN ASSOCIATED WITH THE FORMERLY KNOWN BROTHERTON COMMONS PROJECT, NOW KNOWN AS GREENWOOD POINT, TO ALLOW FOR A MULTI-FAMILY PROJECT LOCATED AT VIRGINIA AND BROTHERTON AVENUES

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

All Council members disclosed that they have visited the site and/or have received correspondence relating to this project and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

After hearing no questions about the procedure, Vice-Mayor Mumpower opened the public hearing at 6:54 p.m.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

This is the consideration of an ordinance to amend a previously approved Master Plan associated with the formerly known Brotherton Commons Project, now known as Greenwood Point, to allow for a multi-family project located at Virginia and Brotherton Avenues. This public hearing was advertised on September 2 and 9, 2005.

The project is supported by numerous goals and strategies in the ***Asheville City Development Plan*** relating to infill development, smart growth policies and affordable housing. The project will provide for a sustainable medium-density residential development within the City Limits. The site is also located within close proximity to transit service along Haywood Road, several area parks (Riverfront Park, Malvern Hills, and West Asheville Park) potential employment centers, restaurants and shopping centers.

In addition, this project will make a significant contribution to meeting the needs for affordable housing outlined in the ***Consolidated Strategic Housing and Community Development Plan 2000-2005***.

Although, not directly related to the identified tasks of the "Housing Opportunities" goals of the SOP, this project utlizies CDBG funding that will assist in providing an increased supply of affordable housing opportunities within the City Limits.

This project received a conditional use rezoning from RS-8 to RM-8/Conditional Use in May of 2002.

The applicant, the Hunter Group working with Neighborhood Housing Services (NHS), is requesting an amendment to the Master Plan and Conditional Use Permit associated with a Conditional Use Rezoning from RS-8 to RM-8/Conditional Use for the Brotherton Commons project located in West Asheville on the corner of Virginia Avenue and Brotherton Avenue. In May 2002 the Asheville Council approved the rezoning and Master Site Plan for two lots totaling approximately 7.61 acres to allow for a 32-unit co-housing project. The proposed amendment proposes to remove 1.7 acres from the total site area in addition to an increase in the total number of units to 44. The smaller total site area combined with the increase in units raises the density of the project from the previously approved 4.2 units per acre to 7.8 units per acre. Both density totals are classified as "Medium Density".

Since 2000, the City has invested federal Community Development Block Grant (CDBG) funds in acquiring and improving the Brotherton site. The developer, Morse Properties Inc.,

Upon inquiry of Councilman Dunn, Planning & Development Director Scott Shuford said that at the April Council meeting, Council asked staff to help formulate an exact description of the materials that would be used for the building in order to allay neighborhood concerns and to clarify what the building would look like and what it would be made out of. At Council's request, Ms. Tuch made her best effort to clarify that for Council and came up with a condition of hardi-plank siding and cedar shake siding. Those materials were arrived at considering the age of the neighborhood, the type of materials available, etc. It was Council's decision to accept that condition. Unfortunately there was not a lot of time for discussion with the developer.

Councilman Dunn felt it was the developer was never given the opportunity to comment about the siding materials.

Councilwoman Jones said that it would have been City Council's responsibility to engage the developer at the point when the condition was developed by staff.

At the request of Councilman Davis, Ms. Tuch outlined other minor changes made, which did not detract from the character of what the conditional use permit issued by City Council.

Councilman Davis and Councilman Dunn felt that a lot of people have vinyl siding and thought that that siding would be in character with the surrounding neighborhood.

Councilman Dunn moved to approve the amendment to the conditional use permit to allow for the substitution of the previously specified hardi-plank and cedar shake siding for vinyl siding.

Councilwoman Jones said that if Council is going to be advocates of affordable housing we have got to make sure that the neighborhoods know that the project will be attractive and compatible. She feels Council made a commitment to the neighborhood of what the building siding will be.

Councilman Newman felt that staff has been willing to work with the developer on changes to the project but they did not feel comfortable with the compatibility issue of the siding. He felt there was a compromise crafted because this was such a tough site to fit in. He would not be able to support the modification request.

Councilwoman Bellamy explained that Council deliberated at length about what the project would look like and would not support the modification request.

Vice-Mayor Mumpower felt the kind of vinyl siding Mr. Fuchs is talking about installing on the home would look similar to the materials outlined in the condition.

The motion made by Councilman Dunn and seconded by Councilman Davis failed on a 3-3 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

At 6:40 p.m., Vice-Mayor Mumpower announced a short recess.

C. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED MASTER PLAN ASSOCIATED WITH THE FORMERLY KNOWN BROTHERTON COMMONS PROJECT, NOW KNOWN AS GREENWOOD POINT, TO ALLOW FOR A MULTI-FAMILY PROJECT LOCATED AT VIRGINIA AND BROTHERTON AVENUES**

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

All Council members disclosed that they have visited the site and/or have received correspondence relating to this project and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

After hearing no questions about the procedure, Vice-Mayor Mumpower opened the public hearing at 6:54 p.m.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

This is the consideration of an ordinance to amend a previously approved Master Plan associated with the formerly known Brotherton Commons Project, now known as Greenwood Point, to allow for a multi-family project located at Virginia and Brotherton Avenues. This public hearing was advertised on September 2 and 9, 2005.

The project is supported by numerous goals and strategies in the ***Asheville City Development Plan*** relating to infill development, smart growth policies and affordable housing. The project will provide for a sustainable medium-density residential development within the City Limits. The site is also located within close proximity to transit service along Haywood Road, several area parks (Riverfront Park, Malvern Hills, and West Asheville Park) potential employment centers, restaurants and shopping centers.

In addition, this project will make a significant contribution to meeting the needs for affordable housing outlined in the ***Consolidated Strategic Housing and Community Development Plan 2000-2005***.

Although, not directly related to the identified tasks of the "Housing Opportunities" goals of the SOP, this project utilizies CDBG funding that will assist in providing an increased supply of affordable housing opportunities within the City Limits.

This project received a conditional use rezoning from RS-8 to RM-8/Conditional Use in May of 2002.

The applicant, the Hunter Group working with Neighborhood Housing Services (NHS), is requesting an amendment to the Master Plan and Conditional Use Permit associated with a Conditional Use Rezoning from RS-8 to RM-8/Conditional Use for the Brotherton Commons project located in West Asheville on the corner of Virginia Avenue and Brotherton Avenue. In May 2002 the Asheville Council approved the rezoning and Master Site Plan for two lots totaling approximately 7.61 acres to allow for a 32-unit co-housing project. The proposed amendment proposes to remove 1.7 acres from the total site area in addition to an increase in the total number of units to 44. The smaller total site area combined with the increase in units raises the density of the project from the previously approved 4.2 units per acre to 7.8 units per acre. Both density totals are classified as "Medium Density".

Since 2000, the City has invested federal Community Development Block Grant (CDBG) funds in acquiring and improving the Brotherton site. The developer, Morse Properties Inc.,

began development of the site including some infrastructure improvements, as approved by Council in May 2002, but later withdrew from the project in October 2003 after failing to obtain construction financing on terms that were acceptable to the developers.

After the withdrawal of Morse Properties Inc., the Community Development Division drafted a new Request for Proposals of which NHS/Hunter Group and Carolina Cornerstone submitted proposals in September 2004. NHS/Hunter Group was selected as the developer due to their direct access to construction financing without typical pre-sale requirements, and the agency's Loan Program which provides an experienced, full-time staff person dedicated to developing a steady pool of low to moderate income buyers.

The Master Site Plan approved by City Council in May 2002 included the following:

- 2 lots totaling approximately 7.61 acres;
- A co-housing development consisting of 32 units at a density of approximately 4 units per acre;
- Seven residential buildings consisting of a mix of quadraplex and sixplex structures ranging in heights of 2-3 stories;
- A 3500 square foot Common House and several storage shed areas;
- 2 parking lots consisting of 52 spaces (some stacked);
- A central Village Green, Court Yard and Plaza and the proposal of a woodland conservation easement with an extensive network of trails.

On March 21, 2005, the project was presented to the Technical Review Committee (TRC) for review and approval. The project was approved with a number of minor conditions easily addressed in a revised site plan. The most significant condition was that due to the existing low pressure water flow, the applicant had to meet with a representative of the Fire Marshall's office to determine an acceptable alternative to meeting fire building code for the two largest multi-family structures. The applicant has met with the Fire Marshall's office and has resolved the issue by proposing to either add additional fire walls to create areas less than 3600 square feet or to sprinkler the buildings.

In addition to the TRC revisions, the plans reflect previous revisions deviating from the original approved plan for the Brotherton Commons Co-Housing project.

A complete summary of the proposed amendment to the Master Site Plan is as follows:

Proposed Changes to Master Site Plan:

- The removal of the smaller 1.71 acre tract of land from the development which would result in the lot reverting back to an RS-8 zoning designation;
- A change from co-housing units to more traditional condominium units;
- An increase in the number of proposed units to 44-units, for a density of 7.8 units per acre;
- A total of 11 buildings consisting of a mix of duplex and triplex units along Virginia Avenue and Brotherton Avenue, and 3 larger scaled buildings to be located internal to the site. Heights range from 1.5 stories for the smaller buildings, and up to 3 stories for the larger scaled buildings;
- A smaller (1000 s.f.) Community Center;
- A total of 54 off-street spaces and the creation of 21 on-street spaces on both Virginia and Brotherton Avenue; and
- Several designated open space areas and the preservation of approximately 2.1 acres.

222

Building details consist of 4 duplex units and 4 triplex units intermixed on the street faces of Virginia Avenue and Brotherton Avenue. These smaller multi-family units will all be 3 bedroom units, 1½ stories, and will range in size from 2460 s.f. for the smallest duplex, to 5718 s.f. for the largest triplex Interior to the site will be the three multi-family buildings; the two larger buildings will include 9 units each while the third building is slightly smaller with 6 units total. The multi-family buildings are 2 and 3 stories and range in size from 7290 s.f. to 11,135 s.f. The total project will consist of 16 two bedroom units, and 28 three bedroom units, for a total of 116 bedrooms and 44 units. All units will be sold as condominiums.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the ***UDO***, the ***Standards and Specifications Manual***, the ***North Carolina Building Code*** and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   Previous grading and retaining wall work on site has constricted the practical building area of the site and the applicant has proposed a revised plan that adapts well to the site constraints utilizing the existing retaining walls and building pads. Where practical, the applicant has also proposed adding basements to some of the units to better accommodate and utilize the existing grades. Lastly, the steep topography and riparian area along the eastern boundary of the site will remain undeveloped and be preserved as open space for the project.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   There is significant evidence that supports the position that the addition of well maintained multi-family or affordable housing does not substantially injure the value of adjoining or abutting property. The applicant has proposed a mix of housing types whose architecture will be in keeping with the character of the neighborhood.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The mix of housing types proposed are designed to place the smaller structures (duplexes and triplexes) along the street faces of Brotherton and Virginia Avenues in order to create a stronger and more compatible relationship between the new units and the existing single family homes; these units are not out of scale with the average new single family home. The larger buildings are placed further from the street and internal to the site effectively buffering their mass. In addition, the architecture of all the buildings

will have features that reflect the character of some of the older craftsman homes in the area by providing a mix of siding materials (hardi-plank and cedar shake), porches, multiple roof lines & pitches, moderate overhangs, exposed end rafters, and windows with craftsman styled muntins. Lastly, the overall density, although higher than most of the adjacent lots, is still within the overall density of the RM8 or RS8 zoning designations and is not out of character with the medium density zoning districts.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The project is supported by numerous goals and strategies in the ***Asheville City Development Plan*** relating to infill development, smart growth policies and affordable housing. The project will provide for a sustainable medium-density residential development within the City Limits. The site is also located within close proximity to transit service along Haywood Road, several area parks (Riverfront Park, Malvern Hills, and West Asheville Park) potential employment centers, restaurants and shopping centers.

In addition, this project will make a significant contribution to meeting the needs for affordable rental housing outlined in the ***Consolidated Strategic Housing and Community Development Plan 2000-2005***.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

The subject property is well positioned in respect to transportation facilities with easy access to major thoroughfares and multiple bus lines operating on Haywood Road and Brevard Road. The project has also been reviewed by the technical review committee which did not indicate any problems with providing service to the property (with special provisions to accommodate state fire code requirements).

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The proposed project has been reviewed by the City's traffic engineer who determined that the project would not cause undue traffic congestion or create a traffic hazard due to the relatively modest scale of the project, typical trips generated by residential units, and multiple access points. In addition, the project is proposing a mix of off-street parking with newly created on-street parking that is expected to adequately meet the needs of the residents while providing an improvement to the current on-street parking situation.

Pros

- Provides a variety of housing types accommodating a mix of income levels
- Provides infill housing compatible with the existing neighborhood
- Provides on-street parking improvements

Cons

- Results in a higher density than what had previously been approved.

Staff recommends approval of the proposed masterplan and map amendment to the former Brotherton Commons project, now referred to as Greenwood Point.

Ms. Tuch said that this is a request for an amendment to the Master Plan associated with the Brotherton Commons Co-housing project, originally approved by the City Council back in May 2002. The original application was a request for a Conditional Use Rezoning from RS-8 to RM-8 to allow for a multi-family style co-housing project for 7 buildings and a total of 32 units. The former developers for the project abandoned the approved co-housing development after having done some infrastructure work on site due to financing constraints. The zoning from the original approval the project remains in place and the new developers are requesting an amendment to the approved Master Plan (Attachment to City Exhibit 3 – Aerial Photo).

She pointed out that the original proposal included two lots, of which a 1.7 acre upper lot would remain undeveloped (Attachment to City Exhibit 3 – Location Map). The new proposal removes this lot from the overall project area, which contributes to the increase in density.

The original project proposed 32 units on 7.6 acres which resulted in a density of 4.2 units/acre (Attachment to City Exhibit 3 – Original Brotherton Co-Housing Site Plan). The Master Plan shows 7 buildings, 2 quadraplex buildings, 4 sixplex buildings, and one large community building. There was open space delineated in the center of the development area as well as a preserved area along the eastern boundary buffering the steeper slopes and the creek. In addition, there were 3 curb cuts and a couple of large parking areas.

Among the infrastructure improvements to the site included the addition of a fairly significant amount of retaining walls. The designers for the new Master Plan have attempted to optimize the already disturbed area while minimizing any additional disturbance to the site.

The new Master Plan increases the number of units to 44 which, combined with removing the upper parcel, increases the density to 7.8 units an acre (City Exhibit 4 – Site Plan). Both the original density and the new proposed density are classified as medium density and are within the standards for both the RS-8 and RM-8 zoning districts. The new Master Plan includes 4 triplexes, 4 duplexes, and 3 multi-family buildings with the smaller duplex/triplex structures fronting on the street facing Brotherton and Virginia Avenues. The larger multi-family buildings are placed further away from the street with off-street parking in proximity. The 100 and 200 buildings are 9 units each, 3 stories while the 300 building is 6 units and two stories. As with the earlier proposal, open space is shown central to the project as well as the preserved area along the creek. In addition, there have been a few road and traffic improvements over the original plan including a reduction in the number of curb cuts, off-street parking has been more evenly distributed throughout the site creating a lesser demand on certain spaces, a turn-around has been provided at the dead-end of Brotherton Avenue, and the surface area of both Brotherton and Virginia Avenues has been widened to accommodate on-street public parking, improving the current on-street parking situation. Lastly, the architecture for the project buildings has been revised to better reflect the character of the existing craftsman style homes (City Exhibit 5 – Streetscape Elevations) (Attachments to City Exhibit 3 – Building Elevations for the Different Units).

The revised Master Plan has been reviewed by the Technical Review Committee where the project was approved with a number of minor conditions. The most significant condition dealt with water pressure and fire code compliance to which the applicant has responded by coordinating with the Fire Marshall's office to agree to either adding sprinklers to the two 3 story multi-family buildings or by adding firewalls to create floor areas of less than 3600 square feet. Again, this would only be required of the two largest multi-family buildings. The other buildings all currently comply.

Staff has reviewed this project for compliance with the 7 conditional use standards and has determined that the project does meet these standards.

Mr. Richard Rice, member of the West Asheville Community League, felt the original project did not meet the seven standards that must be met in the Unified Development Ordinance, in particular condition no. 7 dealing with traffic The City of Asheville being the owner of the property creates a problem. He said the City, as owner, is biased and incapable of sitting in judgment oh its own application for conditioning zoning He cited the Supreme Court case of The County of Lancaster SC vs. Mecklenberg County NC (No 293 PA 92) The North Carolina Supreme Court determined that due process requires an impartial decision-maker. He said City Council will probably have to appoint an independent group, hopefully made up from representatives from the neighborhood, to obtain an impartial decision. He would be glad to serve on that group.

Mr. Carlos Montgomery, resident on Virginia Avenue, cited neighborhood concerns of water supply. He said that the I-240 project will cut a connection that was re-established recently to allow the water flow to meet minimum acceptable standards. Since the project size is increasing, the problems exaberates the concerns over traffic, water and pedestrian safety. The only sidewalks installed will be around the project. Access to Haywood Road has not changed - there will be no sidewalks to access City or school buses. When the I-240 project cuts off a piece of the property, there will be only one entrance.

Mr. Anthony Jones, resident on Virginia Avenue, felt the density is too high and the parking is not enough. He feels that the parallel parking on the road will cause more congestion. This development will double the number of houses on Virginia Avenue.

Ms. Katherine Stevens, owner of property on Brotherton Avenue, stated her biggest concern is the on-street parking. She feels that the people who parallel park will use the property owner's driveways and yards to turn around.

Mr. Patrick Stacy, resident on the corner of Brotherton and Virginia Avenue, was concerned about the traffic on Virginia Avenue, the lack of sidewalks, and the water pressure. He feels that once this development is built, there will be no more peace and quite in the neighborhood.

Mr. Christopher Slusher, Executive Director of Neighborhood Housing Services, said that this development will be in high quality and design. They have tried to be respectful of the community by placing the lower denity housing units along the edges of the street. They have met with community representatives on-site and acknowledged their concerns about traffic increases. Unfortunately we see traffic increases all over the City as we grow and try to find decent housing for people. He believed that on-street parking will help slow the traffic down. In addition, the City's Traffic Engineer did not feel that the incrase in traffic is so burdensome that the street cannot handle it. He urged Council to approve the amendment.

Mr. Chris Eller, engineer for the project, said that water has been an issue, but some improvements have been made by the City to improve the water flow. We have worked closely with the water maintenance crew for updated information to verify that our original projections and original design would still incorporate the existing infrastructure that is now in the ground as well as accommodate additional units proposed. We are confident we can meet all building codes and domestic and Fire Code requirements regarding water. We are proposing on-street parking which is a natural traffic calming measure. In addition to the on-street parking there are sidewalks being proposed around the perimeter of the property. All of these measures are mitigating the addition of units requested. They do feel like this revised Master Plan will blend in with the neighborhood.

Vice-Mayor Mumpower closed the public hearing at 7:23 p.m.

Upon inquiry of Councilman Newman, City Attorney Oast said that he didn't think that there is a legal impediment to Council considering this application. The City's ownership of this property has been disclosed and discussed publicly. Council acts on zoning requests involving it's own property not infrequently.

Discussion surrounded the water flow in the area and the potential of I-240 connection cut. Mr. Eller said that they are required to have 1,000 gallons per minute for multi-family if the buildings are not sprinklered. A couple of years ago the flows were 700-730 without sprinkling. With sprinkling, they are allowed to reduce that to 500 gallons per minute. Based on recent flows, the 700's would drop to 650-670, but again, they feel confident they can meet the 500 gallon per minute requirement, coupled with the sprinkling or the additional fire walls that could potentially be added. He felt that if there is a connection cut, he was confident that there will be cross connectivity with other existing lines to supply the availability for water.

When Councilman Dunn expressed concern over the number of parking spaces in the development as well as the on-street parking.

Upon inquiry of Councilman Newman about the people using existing driveways to turn around, Mr. Mitchell Sorin, architect for the project, said that the turnaround is designed for emergency vehicles as well as for people coming to the end of the street.

Upon inquiry of Councilman Davis, Mr. Slusher said that the 1.78 parcel of property has not been included in the design of this project. At present, it is only a request for the City to consider taking that parcel out. They see the extra 1.78 acres as an additional burden of maintenance and insurance risk for a condominium community. We are trying to hold the costs of administration down. He said it can stay as unimproved green space for the City. It is very steep and beautifully wooded and they would prefer not to take it into this project. If they do buy it, it will be undeveloped green space for the condominium community. Again, they do not have any plans for development that 1.78 parcel.

Upon inquiry of Councilman Newman, Planning & Development Director Scott Shuford said that they did share the original plans for this property with the N.C. Dept. of Transportation. He said that he does not see that there would be any significant impact impact of the property. They would put in noise walls and other things to mitigate the impact. In addition, if the connection is severed, it may be an opportunity to make better connections.

Councilman Dunn felt this project did not comply with the conditional use zoning standard no. 4, in that it does not fit in the existing neighborhood. He felt the project condenses a lot of people in a small area with no room for the children to play.

Councilman Dunn moved to deny the amendment to the conditional use permit. This motion was seconded by Councilman Davis.

Councilman Newman felt this is a good solid project and the density is very typical in the older neighborhoods in West Asheville. He also felt the quality of the units, in terms of design, is good.

Councilwoman Jones explained why she supported the project since there is such a need for affordable housing and land is scarce.

Vice-Mayor Mumpower's concern is traffic and felt the neighbors voiced legitimate concerns about on-street parking.

The motion made by Councilman Dunn and seconded by Councilman Davis to deny the amendment to the conditional use permit failed on a 3-3 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

Councilman Newman asked if Council or Mr. Slusher had any ideas to address Council's concerns so the project could move forward. Mr. Slusher explained they tried to scale the project at the absolute minimum to make it work financially and they are right on the cusp at 44 units. They tried to give as much green space in the community as possible within the property. He said they have spent a great deal of time and money on this project trying to design a project that is respectful of the neighborhood by putting duplexes and triplexes along the edge that look like the style of the neighborhood.

Councilman Davis expressed concern about traffic and water flow, even though it will meet the minimum flow standards. He felt the project would be better if it was a little less dense, more than the minimum flow, and provided the extra parcel for open space for kids to play.

Councilwoman Jones moved to table the matter until the developer has had some time within which to think about mitigation and the concerns raised by Council. This motion was seconded by Councilman Newman.

City Attorney Oast said that public comment will need to be taken only on the new information, if any, presented.

Mr. Slusher pointed out that delaying the project will have a big impact on them because construction costs are going up daily. However, he said that he would look at a traffic study to see what kinds of mitigation measures might be implemented to make it safer for the community.

The motion made by Councilwoman Jones and seconded by Councilman Newman to table the matter failed on a 3-3 vote, with Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Mr. Slusher asked City Council to continue this matter until October 12, 2005. Therefore, Councilman Newman moved to continue the meeting until October 12, 2005. This motion was seconded by Councilwoman Bellamy and carried on a 4-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

~~ORDINANCE BOOK NO. 21 - PAGE~~

D. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD GENERAL RETAIL SALES AS A USE OF RIGHT IN THE NEIGHBORHOOD BUSINESS DISTRICT**

ORDINANCE NO. 3279 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADD GENERAL RETAIL SALES AS A USE OF RIGHT IN THE NEIGHBORHOOD BUSINESS DISTRICT

Vice-Mayor Mumpower opened the public hearing at 8:23 p.m.

Mr. Joe Heard, Director of Development Services, said that this is the consideration of amending the Unified Development Ordinance (UDO) for the purpose of adding general retail

sales as a use of right in the Neighborhood Business District. This public hearing was advertised on September 2 and 9, 2005.

This proposed ordinance was drafted in response to requests from local businesses and property owners to allow a broader range of retail activities in the Neighborhood Business District (NBD). In reviewing this proposal, staff noted that many types of specific retail uses are already allowed within the NBD, including bakeries, bicycle shops, bookstores, candy/snack shops, delicatessens, florists, fruit/vegetable markets, gift shops, grocery stores, hardware/garden supply stores, pharmacies, and video stores. Both Planning staff and the Planning & Zoning Commission gave careful consideration to types of retail uses that would not be desirable in this district. More objectionable uses, such as the sale of adult-oriented items, are subject to more restrictive standards and are not classified as "retail sales". As the NBD does not allow drive-thrus or outdoor storage and limits the size of any building to 3,000 square feet for commercial use, uses are not of a scale or character that could significantly impact a neighborhood.

The intent of the NBD is to provide for the daily convenience and personal service needs of the surrounding residential neighborhood while minimizing conflicts with surrounding residential uses. The district is designed to be located within or adjacent to residential neighborhoods where large commercial operations are inappropriate, but small neighborhood oriented businesses are useful and desirable. Examples of existing NBD districts include small, traditional commercial areas within Emma, Montford, Oakley, Shiloh, and West Asheville.

Pro –

- This amendment would allow a greater variety of opportunities for the establishment of businesses in the NBD.
- The additional uses allowed would not have a greater impact than the uses presently allowed in the NBD.

Con –

- None.

The Planning and Zoning Commission recommended approval of these code amendments on August 3, 2005 by a unanimous vote of 7-0. Staff recommends approval of the proposed ordinance amendment as well.

Vice-Mayor Mumpower closed the public hearing at 8:25 p.m.

Vice-Mayor Mumpower said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3279. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 155

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. **ORDINANCE NO. 3280 - ORDINANCE INCREASING THE TAXICAB FARES**

RESOLUTION NO. 05-176 - RESOLUTION AMENDING THE FEES AND CHARGES MANUAL TO ELIMINATE THE TAXICAB INSPECTION FEE

Transit Services Director Bruce Black said that this is the consideration of an ordinance amending Ordinance No. 2773, § 1, 11-28-00 adopted November 28, 2000, Appendix F Schedule Of Taxicab Fares, and amending the Fees and Charges Manual to reduce the fee for Taxicab inspections from $15.00 to zero.

The Fare Schedule (Appendix F) established by section 18-5 (a) of the Asheville Code of Ordinances establishes the Taxicab Fares for all vehicles operating legally within the City of Asheville. Appendix F established fares of $1.90 for the activation of the meter (Drop Fee), and $0.20 per every 1/10th mile thereafter, or, $2.00 per mile. Appendix F has not been amended since November of 2000.

Two taxicab operators have suggested that the drop charge be increased to $3.00 and the per mile rate be increased to $0.25 per 1/10th mile, or $2.50 per mile. Staff is recommending a drop charge of $2.20 and a per mile rate of $0.22 per 1/10th mile, or $2.20 per mile.

In making its recommendation, staff analyzed both gasoline and overall cost increases that have occurred since the last time fares were increased in November 2000. Staff determined that the average price per gallon of gas in 2005 (prior to Hurricane Katrina) is $1.12 higher than it was in 2000. Assuming that a taxicab gets 13 miles per gallon of gas, this per gallon cost increase translates into a per mile cost increase of only nine cents. Staff also looked at the overall Consumer Price Index (CPI) for the South region and determined that prices overall have increased by 11.8% since November 2000. Staff believes that is more appropriate to use the CPI when adjusting fares since it reflects the overall increase in operating costs as opposed to just the increase in the cost of gasoline. Applying the CPI to Appendix F would yield new fares of a $2.20 drop charge and $0.22 per 1/10th mile, or $2.20 per mile. Appendix F, Schedule of Taxicab Fares should be adjusted to reflect the increase in the overall CPI. Specifically, the drop charge should be increased to $2.20 with a charge of $0.22 for each additional 1/10 mile.

The State of North Carolina requires that taxicabs be inspected annually. There is a great deal of duplication between the annual taxicab inspection performed by the City and the annual vehicle inspection required by the State of North Carolina. The current taxi cab inspections performed by city cover only three additional items: 1) vehicle appearance, 2) company lettering, and 3) top light & trip meter. The City charges taxi cab owners $15 for this annual inspection. Over the last three fiscal years, the City has collected, on average, approximately $600 in annual revenue from taxicab inspections. Since the North Carolina Inspection is identical to all other requirements of section 18-33 except items 1 through 3 above, presentation of a state inspection certificate would satisfy all requirements of 18-33 except for items 1 through 3 above. The inspection of the taxicab for items 1 through 3 above requires minimal staff time and uses no city equipment. If a taxicab has already passed the annual State inspection, then the city need only inspect those three items not covered by the State inspection and since time and labor is minimal, the fee for the inspection should be discontinued.

Benefits to the City of Asheville:

- Preservation of mobility for the citizens of Asheville at a level commensurate with the increase in costs as expressed by the Consumer Price Index, the best available measure of inflation
- Preservation of revenue to the Taxicab operators at a level commensurate with the increase in costs as expressed by the Consumer Price Index, the best available measure of inflation.

Costs to the City of Asheville:

- Increased costs to those who are dependent on taxi transportation

City staff recommends City Council amend Ordinance No. 2773, § 1, 11-28-00 Adopted November 28, 2000, Appendix F Schedule Of Taxicab Fares be amended to increase taxi fares from $1.90 for the initiation of the meter (drop charge) to $2.20 for the initiation of the meter (drop charge), and from $0.20 for each 1/10th mile to $0.22 for each 1/10th mile, and amend the Fees and Charges Manual to reduce the fee for taxicab inspections from $15.00 to zero.

Mr. Fred English felt that poor people can't afford much of an increase and agreed with the City's proposed increase.

The following individuals spoke in support of an increase because of the location of Asheville. They talked about the terrain in Asheville being different from other cities; the rise of gas prices; the higher insurance rates; the increase in the price of tires; and their taxes. They requested a compromise of $2.50 drop charge and $2.80 a mile:

Mr. Jerry Queen, J&J Cab Service
Ms. Georgie Jefferson, owner Your Cab II
Representative from the Blue Bird Cab Company
Mr. Spiro Alferis, A Red Cab Company

Mr. Liverman, visually impaired citizen, said he spends over $2,000 a year on taxicabs. He suggested Council look at the Raleigh system where the federal government subsidizes taxicab fares.

Mr. Peter Dawes commented how Asheville was a tourist town with prohibited taxicab service to our major airport.

Councilman Dunn, member of the Asheville Regional Airport Authority, felt that taxicabs should be allowed to service the Airport and would bring that matter up at the next Authority meeting.

Councilman Davis, owner of a Jan Davis Tire Store, pointed out that our terrain makes a lot of difference on everything automotive, e.g., tires, brakes, etc. He would like the taxicab owners to be able to make a reasonable profit to be able to deliver this important service.

Councilman Davis moved to increase the taxicab rates to $2.50 drop charge and $2.80 per mile. This motion was seconded by Councilwoman Bellamy.

Discussion took place after reviewing a comparison of different North Carolina cities and their taxicab structure.

At 9:10 p.m., Vice-Mayor Mumpower announced a short recess.

Discussion surrounded the appropriate cost increase for taxicab service. Mr. Black recommended Council increase the drop charge to $2.50 and a $2.50 per mile fee, with staff continuing to work with the taxicab companies to refine those figures.

Councilman Davis amended his motion to increase the drop charge to $2.50 with a $2.50 per mile fee, with staff review of the fee schedule in 90 days. Councilwoman Bellamy withdrew her second. However, Councilman Newman seconded Councilman Davis' amended motion.

At the request of Councilwoman Bellamy, Councilman Davis and Councilman Newman amended their motion for review in 30 days rather than 90 days.

Councilman Newman also asked that the Council's Fees & Charges Committee review this matter as well.

Councilman Dunn felt that 30 days will not give an accurate picture of the gas prices. He would vote against this amended motion but would support a higher increase. Councilwoman Bellamy agreed.

The amended motion by Councilman Davis and seconded by Councilman Newman to increase the drop charge to $2.50 with a $2.50 per mile fee, (1) with staff review of the fee schedule in 90 days, (2) with the City Council's Fees and Charges Committee reviewing this matter in conjunction with the staff review, and (3) with staff reviewing the federal subsidizes and tier system that the City of Raleigh is currently using, passed on a 4-2 vote, with Councilwoman Bellamy and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 22 – PAGE 256

Councilwoman Jones moved for the adoption of Resolution No. 05-176. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 214

B. WIRELESS INTERNET NETWORK SERVICE FOR CITY OF ASHEVILLE

Vice-Mayor Mumpower said that on behalf of Councilman Davis and Councilman Dunn and himself, this is a presentation on the possibilities for a citywide broadband wireless system as a utility to city residents and an enhancement to public safety and citywide service delivery.

Discussion surrounded Councilman Newman's questioning of why this matter was being brought up at a formal meeting opposed to a worksession. He felt this was the kind of issue that would normally be reviewed at a worksession, in that it is a new idea. In addition, Mayor Worley and our Information Technologies Director are absent. He understands that Councilman Davis will not be at the September 20, 2005, worksession, but suggested it can be brought up at the October 18, 2005, worksession. He said that it has been mentioned that there is national legislation affecting this and after a little research into that, his research indicates that there is little or no chance that Congress is on the verge of passing some legislation that would pre-empt anything the City of Asheville wants to do this year.

After further discussion, Councilman Davis moved to continue this matter until the September 20, 2005, worksession, stating that he would rearrange his plans in order to attend the worksession. This motion was seconded by Councilwoman Bellamy and carried on a 4-2 vote, with Councilwoman Jones and Councilman Dunn voting "no."

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced activities taking place with the For Our Kids Program.

The following claims were received by the City of Asheville during the period of August 12-25, 2005: J.W. Burris Co. (Water), Ismini Barlas (Engineering), Randolph Carson (Sanitation), Beverly Dillon (Police), Fred Daugherty (Sanitation), Jerry Cook (Water), Lee Davis (Water) and Stoner Giltz (Water). The following claims were received during the period of August 26-31, 2005: Patricia Leake (Streets), Vladimir Shostak (Transit Services) and D'Lorah Small (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke about the Asheville Citizens for Quality Government is a public information and participation organization whose primary function is government quality assurance. He stated that the NC Citizens for Quality Government Conference will be held on March 25, 2006.

Mr. Mike Fryar commented on how the City can annex when it doesn't have enough Police officers to take care of the existing City limits.

Mr. Joe Minicozzi said that he is working on behalf of some of the residents (in particular Mr. Thompson) in the Maxwell Street neighborhood. He said that Mr. Thompson is not suing the City of Asheville. He said what has happened is that they are following due process that is required by law. We have an issue of what was approved and we filed the challenges administratively to appeal those things. First to staff, and then to the Board of Adjustment. Our case went to the Board of Adjustment and was dismissed by the City Attorney's Office, to which we are now appealing again. We have not had a public hearing on any of this. We have gone before the noise board for the trucks for the air conditioners three different times. The first time it was moved in an order of compromise. The second two times it was dismissed by the City Attorney's Office. This is now a request for the process. He asked that City Council become involved in this. He showed some pictures of Greenlife Grocery and pointed out where Mr. Thompson and Mr. Miller live. They have many issues with this project, but there are some basic problems. First of what is allowed to be administratively approved by City staff. He showed the driveway on Maxwell Street. He said that what is allowed by Code is a 36-foot wide driveway. The driveway is about 78 feet from edge to edge. He has asked Mr. Shuford if this is allowed to be approved and Mr. Shuford stated yes. He questioned the City Attorney if it is allowable for Mr. Shuford to administrative approve a numeric adjustment to the code. After Mr. Shuford makes a decision, we have 30 days within which to appeal it. If it is an administrative decision, how does a neighborhood know about it. There is no way legally, in his experience as a former zoning administrator, that a zoning individual can give an approval for variances without the proper procedure to go before a board of adjustment. The Merrimon Avenue entrance is measured at 69 feet. The allowable dimension is 36-feet. Mr. Thompson has complained about the trucks coming in Maxwell and received a letter from the Police Chief, basically citing that there are large trucks that appear in the driveway. He said that sometimes there are 16 trucks a day on this residential street. The Police Department, in an effort to curb their own manpower that they put on that street, issued a letter to Mr. Thompson, basically saying that if the trucks are too big and they don't fit, so be it – they will not cite. We appealed that decision to the City Manager. They are well aware of the staff time that has gone into this and how complex the issue is, but they are questioning the process. They are basically saying that trucks can appear there and park on sidewalks, block sidewalks all when the code states they are not allowed to block a sidewalk. The Police Chief's letter basically says that if they are too big, they are too big. In addition, the nature of that residential street has been compromised. The law states that you can't have anything greater than a 22-foot long truck on a City street. In addition to that, nothing greater than 10,000 pounds. He showed a picture of a truck on the Greenlife property that was 14,000 pounds. Council has approved Maxwell Street as a residential street that shall have no through truck traffic. There needs to be some due diligence done in a very objective, independent way. Finally, the originally loading area was approved by the City. The only working drawing that he could find in the City's building department has a roof on a pole mounted loading bay that they constructed. Using a picture taken back in 2004, you can see the structure in a distance with the pole. Today, you would see that they have enclosed it. There is no permit for that. He also asked how a truck was allowed to be approved in a visibility triangle. They have brought that to the attention of City staff and nothing has been done. They asked Council to have a worksession on this so they can state their concerns to an objective body. Vice-Mayor Mumpower asked that Mr. Minicozzi summarize his points raised and submit those to the City Manager. The City

Manager was instructed to report back to Council on those concerns raised and Council will in turn, respond to Mr. Minicozzi

Mr. Peter Dawes questioned whether the City of Asheville has an evacuation program in conjunction with Buncombe County. He also spoke about the lack of manpower in the Police Department.

Upon inquiry of Councilman Dunn, Assistant City Manager Jeff Richardson responded to questions raised and updated City Council on the efforts that are underway to address sworn officer vacancies in the Police Department. In addition, City Attorney Oast said that he would respond in a memorandum form to City Council regarding vacancies in the Police Department since we have been challenged in a couple of the annexations. City Manager Jackson also stated that the market competitiveness and analysis of salaries and health care is a major issue for the upcoming budget. He was pleased that Council is open to receive the analysis of that.

Vice-Mayor Mumpower announced vacancies on the Taxicab Advisory Board.

Ms. Mary Steiner spoke about the drug problems near Pisgah View Apartments. At Councilwoman Bellamy's request, City Manager Jackson said that he would provide Council with an update of police services at Pisgah View Apartments.

VIII. ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 11:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – September 20, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding (left at 9:08 p.m.); Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn (left at 8:30 p.m.); Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman (arrived at 3:38); City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Acquisition and Acceptance of a Partial Donation of Property on Rocky Ridge Road

Summary: The consideration of a resolution authorizing acquisition and acceptance of a partial donation of property on Rocky Ridge Road.

The City of Asheville Fire and Rescue Department (AFRD) has recognized the need for a fire station in the vicinity of the Brevard Road and I-26 interchange in order to provide fire protection for residents and businesses in the area. AFRD staff has selected certain real property located on Rocky Ridge Road, identified as PIN No. 9626.08-78-7720 as the optimal location for the new fire station.

The property is located about 250' west of the intersection of Rocky Ridge Road and Brevard Road at the I-26 interchange. It is rectangular in shape and contains approximately 0.81 acre. It is generally level with the street and forms an elevated flat building site with retaining walls along three sides. There is a traffic signal at the intersection with Brevard Road providing direct access to Brevard Road in either direction and I-26 East. Access to I-26 West is at the next intersection one block away. The site has been evaluated by the architectural firm of Stewart-Cooper-Newell Architects and found to be suitable for its intended use.

The property was appraised by Francis J. Naeger, MAI, at a value of $603,000. Real Estate Manager Ed Vess has reviewed the appraisal and concurred with the fair market value of $603,000 based on the appraisal. In discussing the City's needs and budget limitations with the property owners, Karl and Nick Koon of G. E. Enterprises, they agreed to donate a portion of the purchase price in order to make the purchase possible for the City. The City and the Koons executed an Option to Purchase Real Property, which provided for a purchase price of $603,000 with $303,000 of the purchase price to be donated by the Koons to the City. The remaining $300,000 of the purchase price would be paid in cash by the City.

The AFRD has $300,000 budgeted for the purchase of a site in the Brevard Road area.

The positive aspects of the proposed acquisition are:

- The site is the optimal location for a fire station based on the service area and access.
- There will be significant savings in site preparation costs compared to other available sites.
- The purchase of this site will enable this station to be bid at the same time as the Exit 44 station resulting in construction cost savings.
- It is a voluntary sale at fair market value.
- Includes only the land necessary for the fire station.

The negative aspects are:

- Removes property from the tax base.
- Removes a commercial lot from the market.

Approval of the resolution will establish $603,000.00 as fair market value for the property, authorize exercising the option along with a cash payment of $300,000 and accept the donation of $303,000 from G. E. Enterprises, Inc.

Planning & Development staff and AFRD staff recommend adoption of the resolution authorizing acquisition and acceptance of a partial donation of property on Rocky Ridge Road.

Demolition of 34 Crescent Street

Summary: The consideration of an ordinance directing that the dwelling located at 34 Crescent Street be demolished and that all debris removed from the property, and an associated budget amendment, in the amount of $15,000.

The structure located at 34 Crescent Street (PIN No. 9649.15-54-5121) is a two-story wooden frame, severely dilapidated dwelling in danger of collapse. The framing of the dwelling is positioned on 4x4 posts and untreated stiff knees with no footings. The roof of the dwelling has several layers of asphalt shingles in various stages of decay causing water penetration and rot throughout the dwelling. The roof is collapsing in on the dwelling. The porches on the back and side of the house have structurally failed and are collapsing. Still photos further illustrate the condition of the dwelling (to be shown during the presentation).

A hearing was held on March 2, 2004, and a Findings of Fact and Order was issued, ordering the dwelling demolished. The owners, Mr. and Mrs. Eugene E. Galloway, have failed to comply with the order of demolition. Pursuant to N.C.G.S. sec. 160A-443, when an Owner fails to comply with an order of demolition, the City has the option of demolishing the dwelling upon compliance with certain due process requirements. The owners have acknowledged the urgency and need for the dwelling to be demolished by executing a Consent for Demolition for the City to demolish and remove the dwelling. Further, the owners have executed a waiver of any and all further notice requirements pertaining to the demolition of the dwelling.

In order to file a lien against the property for the cost to the City to demolish and remove the dwelling, the City must have an ordinance directing the demolition of the dwelling as required by N.C.G.S. sec. 160A-443 and sec. 4-217(e)(3) of the City's Housing Code.

The following is an overview of some general information regarding this property:

- Buncombe County Tax value: $43,000
- Estimated cost to demolish dwelling: Approximately $15,000
- Notification of affordable housing agencies: Yes (no input received)

Pro: Removes blight and deterioration

Con: Allocation of public funds to demolish private property

This action promotes Goal #4 of the City's Strategic Operating Plan in that as a vacant lot centrally located in downtown Asheville, the lot is appropriate for consideration for the construction of affordable housing.

The Building Safety Department recommends adoption of the ordinance ordering demolition and removal of 34 Crescent Street, and an associated budget amendment.

Acquisition of Property for Grovestone Pump Station

Summary: The consideration of a resolution accepting an offer of sale of land on Lake Eden Road, which is needed for the Grovestone Pump Station.

: City of Asheville has received an Offer of Sale of Land from Robert & Michelle Grabill for land on Lake Eden Road in the amount of $5,000. The subject property is a cut out parcel located at the north east corner of a 2.57 acres parcel at the corner of Lake Eden Road and Eden View Drive. It is an irregular trapezoidal shape containing approximately 0.049 acre. It is generally level with the street wooded and adjacent to a small creek. Its highest and best use per the surrounding properties is residential. It is proposed to be acquired as part of the Grovestone Pump Station project.

Real Estate Manager Ed Vess reviewed the tax values of residential properties in close proximity to the subject property. Six lots were investigated in the Glen Eden subdivision, which is about a quarter mile from the subject property. The lots ranged in size from 0.35 acre to 0.67 acre and values ranged from $36,000 to $38,200. The per acre values calculated from the tax values ranged from $102,857 to $57,000 per acre respectively. This is consistent with the trend in real estate prices that the smaller the parcel the higher the per acre price. The subject parcel is quite small and thus the higher per acre value would be most indicative of the value. Using a per acre value of $102,857 the indicated value for the subject parcel would be $5,000.

The positive aspects of the proposed acquisition are:

1. It offers an efficient and practical site for the needed pump station.
2. The price is consistent with value evidence for property near the site.
3. The purchase will expedite completion of the Grovestone Pump Station.
4. It is a voluntary sale and will not involve eminent domain.
5. It only includes the land necessary for the pump station leaving the remainder of the property in private ownership.

There are no negative aspects to this transaction.

Approval of the resolution will establish $5,000 as the just compensation for the property and accept the Offer of Sale of Land from Robert & Michelle Grabill for that amount.

Planning & Development staff and Water Resources staff recommend adoption of the resolution accepting an offer of sale of land on Lake Eden Road, which is needed for the Grovestone Pump Station.

Contract Renewal with Asheville Claims Corporation

Summary: The consideration of a resolution authorizing renewal of claims administration contract with Asheville Claims Corporation

Since 1993, the City of Asheville has funded and operated a self-funded loss reserve program, as authorized by North Carolina law. This program is administered by the Asheville Claims Corporation (herein "ACC"). Pursuant to this Agreement, ACC is the first referral for claims that are made against the City of Asheville. The claims are reviewed by ACC, and based on that review, determinations are made as to the City's potential liability and damages. In appropriate cases, claims are paid. If a claim develops into a lawsuit, the City's legal defense is provided through ACC. The City Manager, City Attorney, Risk Manager, and Finance Officer are also consulted as and when appropriate with respect to the processing of claims.

The City's "loss experience" since embarking on this self-funded reserve program has improved dramatically over what it was before. Costs are down, and claims are handled better, and there is an emphasis on loss prevention. Asheville's experience as compared to cities with conventional insurance coverage is very favorable. If the City had to obtain insurance on the open market to provide similar coverage, the costs would likely be higher in terms of premiums and claims administration, and the coverage would likely not be as good.

Considerations:

- current arrangement has worked well since 1993
- City is more closely involved in the handling of claims
- costs are lower than for conventional insurance
- coverage is better than with conventional insurance

City staff recommends City Council adopt the resolution authorizing renewal of the claims administration contract with Asheville Claims Corporation.

Grant from N.C. Dept. of Crime Control & Public Safety

Summary: The consideration of a budget amendment, in the amount of $180,000, to receive grant money from the N.C. Dept. of Crime Control and Public Safety, Division of Emergency Management through the Governor's Crime Commission, for procurement of emergency response and preparedness equipment for Asheville Fire and Rescue Department and 12 other Buncombe County public safety agencies.

With Council approval, the City of Asheville Fire and Rescue Department requested $492,800 from the NC Division of Emergency Management for emergency response by updating communication equipment. Council Resolution Number 05-13 adopted on January 25, 2005, approved applying for the grant. The grant will enhance interoperability between City and County public safety agencies. Staff was successful in obtaining $144,000 of the requested funding. The City share will be $36,000 of which a prorated share will be reimbursed to the City by the other 12 Buncombe County public safety agencies upon purchase of the equipment. A memorandum of understanding was signed by all agencies sharing in this grant on January 19, 2005. This grant will purchase mobile radios for vehicles without communications and additional portable radios for positions without a radio assigned. The added communication will increase firefighter safety during emergency response.

PROS:

- Interoperability between differing agencies and responding units will be increased.
- The equipment will increase the City's ability to protect human life, property, and the environment.
- The equipment will increase firefighter and police officer safety.
- 75% of the funding comes from the State of North Carolina.
- The other 12 Buncombe County agencies would share in the 25% cost not funded by the State.

CONS:

- The City of Asheville's share of the matching grant.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County

Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the City.

City staff recommends City Council approve the budget amendment to receive grant money from the NC Division of Emergency Management.

Grant from NC Governor's Highway Safety Program

Summary: The consideration of the resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program (GHSP) for the purchase of computer equipment and travel/training money for the Asheville Police Department's Regional Law Enforcement Liaison, and the associated budget amendment, in the amount of $10,000.

The City of Asheville has been awarded a grant from the GHSP in the amount of $10,000 with no local match required. The purpose of the grant program is to fund highway safety projects, allowed under the grant program, designed to reduce traffic speed, traffic accidents and improve highway safety. We have chosen to purchase a Dell Dimension XPS Gen 5 desktop computer and a Dell Inspiron 9300 Laptop computer totaling $5000.00. The other grant monies would be spent on in-state and out-of-state travel expenses, totaling $5,000.00. The desired equipment is to be located in an office where officers could utilize the desktop computer to complete traffic crash investigation duties. The laptop would be assigned to the GHSP Regional Liaison to aid that person in managing GHSP duties as well as performing traffic crash investigation duties. The travel monies will allow out department's Regional Liaison Officer to maintain contact with other liaisons and attend necessary highway safety functions as requested by the Governor's Highway Safety Program.

Pros:

- Equipment will improve the efficiency and availability of traffic safety computer related resources.
- Will contribute to the enhanced effectiveness of traffic homicide investigators and crash reconstructionists by providing needed computer hardware and software.
- Equipment will facilitate better communication between the Regional Law Enforcement Liaison and other Highway Safety Specialists around the country.
- The travel funds will allow the liaison to attend important training and interact with other highway safety specialists so that highway safety concerns are addressed appropriately.

Cons:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment including servicing and replacement when needed.

This action complies with City Council's Strategic Operating Plan: Goal #2 A multi-modal and congestion management transportation program – In conjunction with major employers and traffic generators, develop and implement a comprehensive multi-modal transportation and congestion management program that works for Asheville. Objective B. Mitigate overall impacts of congestion through effective local partnerships. This is accomplished by identifying areas of the City that are particularly prone to traffic accidents due to speed and other aggressive driving tactics. Through the efforts of the Asheville Police Department and the use of the equipment purchased through the GHSP Grant, this will allow officers and traffic engineers to develop better highway safety goals. This will be achieved by utilizing the computer equipment to aid in the traffic crash investigation area. Better investigations and crash reporting facilitates better policy and engineering decisions, related to highway safety.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program for the purchase of computer equipment and travel/training money for the Asheville Police Department's Regional Law Enforcement Liaison; and (2) the associated budget amendment, in the amount of $10,000.

Contract for Architectural Services for Fire Station 11 Construction

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Stewart-Cooper-Newell Architects for architectural services for the construction of Fire Station #11 in the Biltmore Square Mall area on Rocky Ridge Road.

The need of a Fire Station in the southwest quadrant of the City is a priority for emergency response and our community's Insurance Service Office public fire protection rating. This rating directly affects the amount of fire insurance home owners or business owners pay for property insurance. Council allocated funds to purchase land in the Fiscal Year 2004-2005 budget. Property to place the station on has been properly identified and option to purchase signed by both parties. Asheville's fire protection and emergency response standard of cover will increase with the addition of this fire station. A fire station in the Brevard Road and I-26 area is necessary to provide municipal level fire protection and emergency services to the southwestern sections of the City. In addition to the building housing an engine company, the building will also provide some office space for the Asheville Police Department.

A formal request for qualifications (RFQ) was properly advertised and a preliminary meeting was held with interested architects in conjunction with the relocation of Fire Station 6. The RFQ was specific for the one station with the potential for additional stations in the near future. Written proposals were received by city staff and were evaluated against identified rating criteria distributed in the RFQ. A team of staff from Fire and Rescue, Police, Parks and Recreation as well as Budget reviewed all of the submittals. Three finalists were identified and one firm was clearly selected as the recommended architect to complete the job. References for the recommended firm, especially past performance with other North Carolina cities, were completed with a focus on combination fire and police stations. The committee selected Stewart-Cooper-Newell Architects as the recommended architects for this project.

Stewart-Cooper-Newell Architects, based in Gastonia, North Carolina has provided architectural services for scores of North Carolina cities for fire stations and police stations. Stewart-Cooper-Newell has designed a number of combination fire and police stations. The firm continuously has between 25-35 fire stations in progress at any given time. Approximately 15-20 stations are completed each calendar year under their direction. Stewart-Cooper-Newell is the largest architectural firm in the fire station construction arena in the United States at the current time. With over 100 cities as customers, to date, Stewart-Cooper-Newell Architects reports that they have never completed a fire station project in which the owner did not use the firm again on subsequent fire station projects.

Fire Station 11 is planned to be approximately 12,000 square feet with approximately 11,000 square feet for fire and rescue use and approximately 1,000 square feet for police use. Construction cost of the project is anticipated at an average of $135.00 per square foot, or $1,620,000.00. Stewart-Cooper-Newell proposes their fee for full architectural, civil, structural, plumbing, mechanical and electrical design to be at seven and one-half (7.5) percent of the cost of construction, or approximately $121,500.00. The fee is ½ percent lower than previous work due to this station having the same basic floor plan as Fire Station 6. Funding for the entire project including construction, architectural, and utility/site/furnishings and other "soft" costs is budgeted at $2,800,000 as approved within the Fiscal Year 05-06 budget.

Completion of this station would be in approximately 18 months. Timeliness of this project is important to the City of Asheville due to the upcoming evaluation of the City's fire insurance rating by the Insurance Services Office and North Carolina Office of State Fire Marshal. Stewart Cooper Newell has designed Fire Station 6 and this station would follow that same format. Both stations would be bid at the same time. It is anticipated that by having the same floor plan and construction simultaneously a significant cost savings could occur.

The resolution authorizes the City Manager to execute a contract with Stewart-Cooper-Newell Architects for Fire Station #11. The contract is an AIA Document with appropriate modifications for the City of Asheville.

Pros:

- The experience of the firm in designing fire stations for the City of Asheville;
- One design firm bidding two stations with the same basic floor plan;
- Lower architectural fee.

Cons:

- None could be identified.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

The Fire and Rescue Department recommends City Council authorize the City Manager to sign the contract with Stewart-Cooper-Newell Architects for architectural services in the construction of Fire Station #11.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

ANNOUNCEMENT

City Manager Jackson announced the appointment of Deputy Fire Chief Robert Griffin as the Interim Building Safety Director.

On behalf of City Council, Mayor Worley expressed Council's sincere appreciation to Terry Summey, Director of Building Safety, who will be retiring after 10 years of service with the City of Asheville.

EMERGENCY PREPAREDNESS AND UPDATE ON HURRICANE KATRINA

Fire Chief Greg Grayson recognized Mr. Tim Miller, NC Emergency Management Western Branch Director; Mr. Jerry VeHaun, Buncombe County Emergency Services Director and Ms. Bonnie Spradling, Chairman of the Asheville Mountain Area American Red Cross. He said that roots are found in Civil Defense. The North Carolina Emergency Management Act was established in 1977 and the Federal Emergency Management was created in 1979. Through experience, the function of emergency management has evolved into comprehensive, all-hazards management – from natural catastrophe to technological and nuclear disaster.

The NC's system is an all-hazards approach to emergency assistance: (1) severe weather (hurricane, snow, tornado, flood, drought); (2) technological (hazardous

materials/radiological, fixed nuclear facilities); (3) man-made (weapons of mass destruction, cyber-terrorism); and (4) lost person search/rescue.

Emergency management traditional phases include preparedness (training and equipment), response, recovery and mitigation.

When disaster strikes in Asheville the City of Asheville emergency services respond. If disaster exceeds the City's capability, Buncombe County Emergency Management Services is requested. If disaster exceeds Buncombe County capability, Statement Emergency Management activates resources. If severity and magnitude of disaster exceeds state and local capabilities, the Governor requests federal assistance. If approved, State receives assistance from DHS/FEMA and other federal agencies.

City, County and State agencies as well as Federal agencies operate within an incident management system known as National Incident Management System (NIMS), which is mandated by the Federal government. This system provides for provision of services, command and control and unification of all emergency services agencies.

The City of Asheville primary emergency services include fire; police; public works – fleet, streets; water; and support departments such as finance, information technology, engineering, public information and buildings safety.

The City Manager keeps all elected officials apprised of emergency situations and obtains policy direction from elected officials, when necessary. Fire and Rescue has the key coordinating role to ensure that unified command and control is in place and operates in concert with Buncombe County and the NC Emergency Management efforts. All other operating departments perform specific services as needed for the emergency.

The Buncombe County primary emergency services include the Emergency Medical Services, Emergency Management, Sheriff's Department, Human Services Department, Health Department and support departments.

Regarding the transition from County to State Emergency Management, (1) all 100 counties have an Emergency Management Director whose position is partially funded by state government, (2) the states has three geographical districts that the County directors connect with. The WNC branch headquarters is located in Conover; and (3) NC operates an Emergency Operations Center in Raleigh 7/24/365 and upgrades when needed for all significant emergencies.

He outlined the organizational chart for the North Carolina State Government; the NC Dept. of Crime Control & Public Safety; and the NC Division of Emergency Management.

The Buncombe County and City of Asheville Hazard Mitigation Plan is a plan for response and recovery from emergencies and disasters for Buncombe County and all municipalities in Buncombe County.

In summary, Chief Grayson said that we work in a City/County/State/Federal system whereas the City's primary focus is to provide initial response to all emergencies and work within the Emergency Management system and network to obtain the necessary resources to effectively manage emergencies that may occur within Asheville.

City Manager Jackson noted that the City of Asheville is aggressive and committed to training to handle all types of emergencies.

Fire Chief Grayson, along with Mr. Jerry VeHaun, responded to various questions and comments from Council, some being, but are not limited to: do we have an evacuation plan, and if so, what does it consist of; the City has the reverse 911 system, but does the County have that capability; and if the City of Asheville goes into an emergency mode, do we have enough resources, and if not, do we have mutual aid agreements with other cities and states.

In response to Councilwoman Bellamy about using the Civic Center in case of an emergency, Ms. Spradling said that the Red Cross handles shelter operations and they do not have the Civic Center listed as a shelter. Fire Chief Grayson also noted that the Red Cross has national standards that must be met in order to provide temporary shelter. Some of those standards are at least 50 square feet of space per person, adequate restrooms and shower facilities, disposal of solid waste, provisions for emergency power, and enough space for processing.

In response to Councilwoman Jones, Mr. VeHaun said that the Mayor and the Chairman of the Buncombe County Commissioners makes the call for Asheville and Buncombe County to evacuate, based on input from State and Federal officials.

Upon inquiry of Councilwoman Bellamy, Mr. VeHaun said that when he reviews the evacuation plan and makes revisions to it, he would provide City Council with a copy of it.

Vice-Mayor Mumpower said that since citizens hold City Council members accountable, he wondered if there a way to strengthen utilization of City Council as a resource to emergency response. Ms. Spradling encouraged interested Council members to get involved with the Red Cross training.

City Manager Jackson said that he is continuing to work on verifying long-term housing and what is available.

Civic Center Director David Pisha asked for Council direction to waive Civic Center fees and make the Civic Center available to groups who wish to host a benefit concert with the proceeds going to the victims of Hurricane Katrina. After discussion of the pros and cons associated with such a request, it was the majority of Council's decision to follow the existing policy and not waive the Civic Center fees for requests such as these. City Manager Westbrook said that he would provide Council with a memorandum regarding these requests.

PERFORMING ARTS CENTER PRESENTATION

Ms. Sidney Powell, President of the Asheville Area Center of Performing Arts, said that on September 10, 2004, a diverse group of individuals dedicated to bringing to fruition a true center for the performing arts in Western North Carolina convened for the first time as the independent board of the Asheville Area Center for the Performing Arts. We began the auspicious task of organizing, formulating, defining, and creating our board, mission, structure, and vision, reviewing and building on concepts passed on to us by Peter Collins, Lilian Fischer and Crawford Murphy. This new, independent board has moved mountains in our first year.

We have not only visited, but fully explored the inner workings of some of the greatest performing arts centers in our country: The Meyerson Symphony Center in Dallas, Bass Hall in Fort Worth, RiverCenter in Columbus, Georgia, The Blumenthal in Charlotte, The Eisemann in Dallas, The Fox Cities in Wisconsin, and the Alberta Bair Theater in Billings, Montana. We have talked with numerous executive directors to hear their successes and learn from their mistakes. We understand that while performing arts and entertainment are our product, the center itself must succeed as a business. We have examined the business aspects of these centers, and we have identified a successful business model. We joined the HUB Project, led by the Institute at

Biltmore, working closely with County and City officials and a strong community collaborative group to whom we made a successful presentation. That Collaborative Group of distinguished civic leaders has endorsed our project and featured the Center as a substantial component of the HUB Project. The overwhelmingly positive responses we have received at every turn are invigorating.

We have retained appropriate, experienced consultants on a project-by-project basis and have benefited enormously from consultations generously donated to us by current, seasoned executive directors of successful facilities. In addition to exploring all aspects of a stand-alone performing arts center, we have obtained a concept and financial feasibility study for the complete adaptive reuse of the existing Civic Center and arena. We completed a business plan for a center and an extensive geodemographic marketing study for the region. In all of this, we have identified partners appropriate to share the facility, and we have worked in conjunction with 13 local arts organizations who are now joining us in a committee of our Resource Advisory Council to develop and implement strategies for increasing the visibility of the arts in our region, create new artistic endeavors, explore the creation of a summer arts festival for children, and increase audience attendance for all of the arts. Periodically we have met with City and County officials and they would like to present our concepts for adaptive reuse of the Civic Center to the Asheville City Council.

As we embark on our second year, we have much exciting work to do. We will unite the City, County, non-profit, and private sectors in obtaining the approval and funding to design and build an acoustically excellent, multi-purpose venue for the performing arts for the entirety of Western North Carolina–a facility that will enable Asheville and the entire region to enjoy an international reputation in an appropriate showcase for the amazing talent and spirit that surrounds and beckons us here.

Using a powerpoint presentation, she said that (1) a completely new and independent AACPA Board was formed September 10, 2004; (2) obtained 501 (c) (3) status in early 2005; (3) carefully evaluated numerous other venues and successful economic models; (4) joined the HUB strategy and has the approval and recommendation of the Community Collaborative Working Group; and (5) began partnering with more than a dozen local arts organizations for marketing and development of arts audiences for all.

The Performing Arts Center update (1) due diligence requires us to look at all possibilities; (2) stand-alone facility (a) business plan done, including likely cost; and (b) to include 2150 seats, banquet facilities, be a true multi-purpose hall and related facilities, approximately 150,000 square feet; (3) geodemographic marketing study completed; and (4) possible resident partners: Symphony, Bravo, MAP, URTV.

Possible uses and users include: Broadway shows, Symphony, Bravo, Opera, theater companies, dance companies, chamber music, Asheville Choral Society, Asheville Symphony Chorus, URTV, MAP, corporations/meeting facilities, schools/graduations, UNC-Asheville events/productions, Folkmoot, Brevard Music Festival indoor events, Bele Chere indoor events, Diana Wortham overflow, Children's Summer Arts Festival, Summer Jam Festival, Ashley Capps productions, our own productions, multi-media events, URTV shows, religious functions/events, rent rehearsal space for East Coast productions, and unlimited potential.

She explained the performing arts partners marketing committee.

The adaptive re-use of the Civic Center (1) requires contemporaneous development of an arena/large facility elsewhere (possibility of substantial state funding; igniting economic development in another area of the city); (2) Westlake Architectural firm has completed an initial concept/feasibility and cost study for a re-do of the entire civic center complex into multi-use

space; and (3) costs would be approximately half of that of a stand-alone facility and give us more space – 188,000 square feet. Room for administrative offices for all users and possibly the City.

She explained the space uses as follows: (1) 2150-2400 seats; (2) plenty of bathrooms; (3) state of the art catering kitchen(s) to enable use by existing restaurants and businesses; (4) large/multi-use hall in what is now TWA (rehearsals/concerts/events/exhibits/banquets/ conventions; (5) chamber music/voice venue in the old banquet hall upstairs; (6) room for media arts center/other uses with broadband; (7) room for a funky black box or TV/music small hall on lower level for uses, including residence of URTV and MAP in collaboration with UNC-Asheville and A-B Tech; (8) educational/classroom space; and (9) administrative space for Symphony, Bravo, URTV and MAP.

She said the economic impact is that non-profits add more than $1.8 billion to the Western North Carolina economy and studies of comparable facilities show substantial economic impact. She used the example of the $67 Million facility from the Long Center of Austin.

She pointed out the number of private donors totaling gifts to date of more than $200,000.

Ms. Powell then reviewed with Council the sales and demographic data for 2004-05 for Broadway in Asheville. For the four shows of Fosse, Fiddler on the Roof, Male Intellect and Crazy for You, gross sales totaled $171,768.20 with a gross attendance of 5439. She then showed a breakdown of attendance based on zip codes – out of state 0.5%; Virginia 0.4%; North Carolina 96.0%; and South Carolina 3.1%. Out of the 96% in North Carolina, 37.0% was from Asheville and 63.0% were from North Carolina counties.

She showed facilities in York, Pennsylvania; Rockford, Illinois; Wausau, Wisconsin; Cleveland, Ohio; and Denver, Colorado.

Using the powerpoint, she showed concept designs for the different areas of the Civic Center.

She asked City Council to form a public/private partnership with the AACPA and Buncombe County. The partnership with the non-profit AACPA will secure funding from County, State, Federal and private sources. The partnership will contract for and oversee design, construction and operation of the facility. She requested City Council's commitment to the public/private partnership and authorization to proceed to work with the City Attorney on the partnership papers, in addition, Council's commitment to proceed with the transformation of the Civic Center. They are prepared to get the paperwork done and get started before the end of the year.

Vice-Mayor Mumpower felt that the examples offered are of large cities and Asheville is a city of 75,000 people. He was concerned of going from one facility to two facilities and the dramatic expenses with that. After talking with four architects about possibilities of the Civic Center, reports and dollars are always high. There is always hopeful optimistic interest in getting those dollars and creating special initiatives, but he had concerns based on what he has learned. He felt that whatever they do will be subsidized by City taxpayers and it is impressive that they are trying to pull the County into this, but again, the City taxpayers will be subsidizing whatever they do. He doubted you can find a free-standing performing arts center in America that wasn't subsidized and would be interested in receiving information on that if he is incorrect. He said he was concerned about partnering with the AACPA in pursuing a project with dollars that he believed are not realistic.

Ms. Powell said they are planning to build in an endowment that will help subsidize the facility without looking to the taxpayers to do that every year. They've also identified successful economic models in other communities where they are running the business in the black and we do view this as a business.

Upon inquiry of Mayor Worley regarding cost estimates, Ms. Powell said that for a completely new ground up-stand alone, the cost was around $100 Million. For a complete re-do of the entire Civic Center complex, the ballpark is $50 Million. They are part of the HUB strategy and the HUB project and the community collaborative working group are in the process of putting together a package for the entire county and community that will include a substantial component of funding for this facility. She felt that if the City would put in what it would simply cost for the City to alone repair the Thomas Wolfe Auditorium, we can fundraise from the private sector to raise the rest of the money and look to some federal and state assistance and we could get it done.

Ms. Powell responded to various questions and comments from Council, some being, but are not limited to: have they consulted with John Cort, architect of the original structure; what type of state funding has been discussed; and has this concept been discussed with the Civic Center Commission.

Upon inquiry of Councilman Dunn, Ms. Powell said that there is an initiative underway now to look at the possibility of putting an arena facility on the river with state funding available for that. She said that she understands that the legislative delegation has indicated some support for that project.

Councilman Newman said that their focus is on the performing arts, however, there is a need for some space to do other things that currently happen at the Civic Center, e.g., the gun show. He wondered how much demand there would be for an additional stand-alone facility just to cover those other things, in light of the fact that sports are not on the horizon.

Councilman Davis felt that a number of events happen at the Civic Center that are successful and people want to see at the Civic Center. He was concerned that if we are so limited to just have a performing arts center, we are missing an opportunity for an occasional big event to lower the deficit. He was also concerned about how many performing-art type events is the community willing to support.

Councilman Dunn expressed concern of the cost and the potential of overruns. He felt we need a hard, firm cost for this project.

Civic Center Director David Pisha responded to various questions from Vice-Mayor Mumpower. He said that live entertainment goes through cycles. The current facility the way it basically operates is that about 2/3 of our revenues come out of the arena, but in the long-run, we probably get more diversity of events happening in the Auditorium. One side supports the other in terms of finances, while the other side supports a broader base of entertainment.

Councilwoman Jones felt City Council needs to have a discussion on what they want to see happening with the Civic Center. She was grateful that there are energized citizens behind this proposal. She felt that if we don't do anything with the Civic Center because of money, there will always be a stalemate.

Councilwoman Bellamy agreed that Council needs a discussion whether we should renovate the existing Civic Center or if we want to build a new performing arts center.

Mayor Worley felt that the essential steps to move forward would be for (1) identify the funding sources and get commitments from those funding sources; and (2) collaborate together on what Council wants, what the performing arts organization wants, and what the community wants so we can move to a true conceptualization. From the construction drawings and after it goes out to bid will we get a true cost.

Mr. Battle Haslam felt the first thing is not a commitment from the funding sources, but a commitment from City Council that this is a good plan. If Council commits that in principle, then they can go to the funding sources.

Councilman Newman wondered if UNC-Asheville is building a new sports facility.

There was considerable discussion on how City Council wished to move forward. In summary, it was the consensus of City Council to hold a special worksession on Tuesday, October 4, 2005, at 3:00 p.m. in the First Floor Conference Room of City Hall. City Manager Jackson said that he provide Council with the policy analysis and alternatives so that Council can provide direction and decide how they want to participate or lead a community process. It was also the consensus of Council for City Manager Jackson to prepare a list of resource people to invite to this special meeting and circulate that list to Council for possible additions.

At 6:45 p.m., Councilman Dunn moved to go into closed session in Room 209 of the City Hall Building to consult with attorneys employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Jones and carried unanimously.

At 7:08 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

SUSTAINABLE ECONOMIC DEVELOPMENT STRATEGIC PLAN IMPLEMENTATION TASK FORCE REPORT

Mr. Chuck Tessier, Vice-Chair of the Sustainable Economic Development Strategic Plan Implementation Task Force said that City Council has requested a report from the Task Force on the progress to date for the implementation of the recommendations of the Sustainable Economic Development Plan by Lockwood Green Consulting.

In May 2000, Asheville City Council established the Sustainable Economic Development Plan Implementation Task Force to assist and advise the City Council and City staff in implementation of the Lockwood Green Report. The Task Force was reauthorized for an additional two years in 2003 and the terms of all members expired on June 30, 2005. The Task Force has had four primary focus areas: City development process improvements, riverfront redevelopment, real estate/development pattern, and workforce education and training.

Major implementation accomplishments of the Task Force are many, including: working with staff and a citizen-led review team on a comprehensive review of the City permitting process; creation of educational materials to assist those customers in the development process; establishment of regularly-held developer forums; increase in the use of technology applications to speed the process; improvements to the Technical Review Committee process; support for implementation of the Riverway Redevelopment Plan; support of an entrepreneurial network by working with AB Tech, AdvantageWest and the Chamber; support for the operations of the Small Business Incubator; support for the creation of the Urban Village Zoning District; support in the buildout of the Broadband technology infrastructure through Congressman Taylor's ERC; support

of the Engineering degree programs at UNCA and WCU; and support for the work of the Advisory Committee for Biotechnology in WNC.

The members of the Task Force have met several times with new City Manager Jackson and Economic Development Director Powers, and the Task Force would like to be reauthorized to become a Standing Committee of the City of Asheville as outlined in this report.

Defined role and responsibility:

A. A Standing Committee of the City of Asheville made up of community and economic leadership recommended to City Council by the committee for terms established by Council. Current members of the task Force recommend that Chuck Tessier become the Chair of the Committee.

B. Established to assist Council to:

1. Maintain an overview on the economic health of the City and those programs, initiatives and developments impacted.

2. Propose priorities among those programs, initiatives, investments, and developments to be supported by the City which will have the most positive impact on improving the long-term, sustainable, economic health of the City of Asheville while adhering to the basic underlying principles including: affordability, sustainability, livability, commitment to quality, maximizing job creation, promoting creation of local wealth capital, and insuring equal opportunity for all citizens.

3. Seek advice and information, invite and receive presentations, conduct research, formulate strategy, make recommendations, and, where necessary, propose programs, initiatives, financing alternatives, and developments to further established goals.

4. Review and make recommendations on economic development policy to be established by Council.

5. Coordinate between City and other economic development organizations and initiatives within the region.

Immediate areas of focus and attention:

A. River development including flood studies, river way plan, river redevelopment plan.

B HUB Project.

C. Land use policies and initiatives that will open areas for new development and make better utilization of existing land areas, building stock and infrastructure (water, sewer, gas, fiber, roads, etc.) within the City.

D. Sense of Place, Heritage, and Arts: Assess the impact of performing arts, festivals, and events on tourism, business, and local citizens.

E. Small business and workforce development.

F. Creation of development capital and growth of locally owned businesses.

G. Affordability of housing and business locations related to their impact on economic development.

H. Project Development Financing.

As reported to Council in 2003 by the Task Force in its report, the members believe that the group can help prepare Asheville to be a competitive community for the 21st century knowledge-based economy, by advocating for community-based priorities promoting a diversified and sustainable economy which increases the tax base and improves the standard of living for all residents.

Discussion surrounded ways within which to strengthen a stronger role of communication between City Council and the Task Force.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda to establish an Economic Development Advisory Committee, with three-year staggered terms, along with defining their responsibilities

WIRELESS INTERNET NETWORK SERVICE

Councilman Davis said that on behalf of Vice-Mayor Mumpower, Councilman Dunn and himself, this is a presentation on the possibilities for a citywide broadband wireless system as an enhancement to public safety and service delivery and utility to city residents.

Wireless broadband service will (1) improve the efficiency of City services; (2) assure that City residents have widespread, reliable, and affordable high speed internet access; and (3) high speed internet access represents crucial infrastructure in today's world.

Regarding improving the efficiency of City services, it will (1) enhance public safety through greater information access, intelligence sharing, and communication speeds; (2) improve city services (sanitation, street maintenance, permitting, inspections, etc.) through enhanced communication and information access; and (3) improve the quality of communication between all City departments due to efficiencies of high tech applications over voice, letter, or other communication means.

Regarding the assurance that City residents have widespread, reliable and affordable high speed internet access, (1) wireless internet access is a utility that the City government is in a unique position to provide on a timely basis due to infrastructure advantages; (2) it is possible for this City service to be self-supporting; (3) high speed internet access is an increasingly necessary commodity that the City can provide as a service to its citizens in partial compensation for the additional tax burdens of living within the City limits; and (4) affordable high speed internet access is not readily available to a majority of City residents and the picture on the horizon is foggy at best.

High speed wireless internet access is one of the primary tools for success in the 21st century. Our children and citizens need the tools necessary to compete in a global economy. High speed access is an economic development resource and is about the future.

How we can do this is by (1) partnerships with private and public entities; (2) use of our traffic signals and street lights to create our net; (3) incremental investment; (4) external management; (5) Congressman Taylor's educational network; (6) establish a utility; (7) explore advantages of WiMAX (new technology with broader scope than Wi-FI); and (8) other ways.

Other models of success include cities of Winston-Salem, Corpus-Christy and Philadelphia.

Pros include (1) minimal cost; (2) we have existing infrastructure (traffic signals and street lights); (3) economic development impact; (4) enhances City services; (5) benefit to City residents; and (6) propels us into the 21st Century.

Cons include (1) competes with the private market; (2) initial tax dollar investment; and (3) risks (and rewards) of a bold initiative.

We are soliciting Council support in directing the City staff to explore the possibility of establishing a citywide wireless broadband internet access service for our City departments and citizens. In addition, we are asking that City staff report back to Council within 30-60 days with recommendations on this issue.

Discussion surrounded looking at not only government involvement on the internet, but also looking at some immediate opportunities as well.

Vice-Mayor Mumpower reiterated his concerns about government partnering with a political entity, such as Mountain Area Information Network.

Information Technologies Director Jonathan Feldman indicated that as general policy towards this project is formed, this will allow staff to better focus their efforts and create a more in-depth and realistic proposal.

Mayor Worley suggested that this be a two-phase approach, where staff has an initial presentation followed up by a later in-depth presentation. Mr. Feldman agreed and will report back within the next 30-60 days.

STAPLES SITE DESIGN

Planning & Development Director Scott Shuford said that this is a report to City Council addressing the Staples Development on Merrimon Avenue.

Staples submitted design plans in July 2004 for design review by the Downtown Commission. The subject property, located at the corner of Orange Street and Merrimon Avenue, is in the gateway corridor area for design review. The design review process is mandatory review/voluntary compliance. The Downtown Commission made a wide range of comments concerning the design. There was strong effort on the part of both the Commission and City staff to encourage a 2-story façade that would begin at the Merrimon Avenue sidewalk level. Staples chose not to pursue a multi-tenant, multi-story design due to its focus on a single-use building and site design. Staples did agree to utilize brick for the exterior façade, an upgrade over their standard design.

Staples submitted for site permits in August 2004; staff comments were issued in August, revisions were received in October, new staff comments were issued in October, revisions were received in mid-December, and the site permits were approved December 29, 2004. All code conditions for development in the CB-II zoning district have been complied with. The design meets all height, floor area, parking, setback, and other technical requirements of our codes.

Issues identified include retaining wall location and height, building design, and site layout. The following information is provided for each of these three issues.

250

Retaining Wall. The height is more pronounced on the northern end due to site topography. The wall height and location complies with our code requirements. If this type of design is a concern for Council, staff can develop some regulations to address this issue. The regulations could apply to height of retaining walls adjacent to all streets or to major thoroughfares or to selected "gateway" streets, depending on Council direction. We would suggest that such regulations also address berms and non-structural banks that create similar visual issues (for example, the Red Lobster bank on Tunnel Road).

Building Design. There are no design requirements for building appearance in the CB-II district (this is the case in all of our "suburban" districts; only CBD, Urban Village District, Neighborhood Corridor District, Urban Residential District, and Urban Place District contain what could be considered as "building design" requirements). For gateway corridors like Merrimon Avenue, it may be appropriate to consider one or more of these districts to replace the "suburban" CB-II and CB-I zones that regulate most of the properties fronting the roads along these gateway corridors. The Planning and Zoning Commission has requested a zoning study for Merrimon and staff plans to complete that analysis in the fall of 2005. Implementation of the components of this study may be facilitated by new planning legislation that may authorize a greater degree of control over structure design in areas outside local historic districts. Additionally, City Council will most likely see a NCD rezoning request for the Burger King site at Merrimon and Fenner in November 2005. This request utilizes a 2-story design that seems similar to the more desirable development along Merrimon Avenue, such as the new Medicine Shoppe building. A multi-story requirement like that found in the NCD and other "urban" zoning districts would have resulted in the following differences in building design on the Staples site. First, there would likely have been excavation of the area now devoted to the retaining wall to accommodate a sidewalk-level building façade along Merrimon at the southern end of the site. This may have resulted in a lower retaining wall on the northern end of the Merrimon Avenue frontage since the elevation at that location might not have accommodated a full street-level story. Second, a "one-size-fits-all" design would likely not be accommodated in NCD; inflexibility on the part of the developer would most likely have resulted in selection of another site having different zoning. Third, the building design would have had more fenestration (door and window openings) and direct pedestrian access to the adjacent sidewalks.

Site Layout. The CB-II zoning requires parking to be located behind the building. This resulted in the site design of the Staples site. An alternate "suburban" zoning district might have required the developer to set the building back behind the parking, creating less building mass at the street but presenting a definitely non-urban appearance. As with the building design, an "urban" zoning designation would likely have addressed the site design issues in a more positive way since the pedestrian access, building fenestration, and multi-story requirements would have generated a building more sensitive to the street than the Staples design.

Mr. Shuford said that City staff is working on (1) a revised definition of "height" is in process as part of ridgetop/steep slope and open space ordinance; (2) Merrimon Avenue zoning study is ready to be initiated as directed by Planning & Zoning Commission; and (3) Central Business District UDO requirements and design guidelines are under review by the Downtown Commission, including gateway areas.

He said that basically City Council can: (1) do nothing; (2) address future retaining wall/building height design through general UDO amendment(s); or (3) address future retaining wall/building height design through zoning study of Merrimon Avenue.

After discussion, it was the consensus of City Council that staff provide Council with more information on (1) what the Downtown Commission has been working on; (2) the mandatory review/voluntary compliance issue, (2) the potential for this type of situation in other areas and whether we can address it through some specific focus-type language; and (4) what the

Downtown Commission is going to propose to see if it's going to address the issue about over a certain height, certain design standards needs to be met.

LEAGUE OF WOMEN VOTERS BOARD/COMMISSION STUDY FOLLOW-UP

Vice-Mayor Mumpower, Chair of the Boards and Commissions Committee, said that he has met with City Clerk Burleson and outline the some changes to the City of Asheville's Board and Commission application process, suggested by the League of Women Voters of Asheville-Buncombe County Study on Appointed Boards and Commission Study.

ASHEVILLE TRANSIT COMMISSION RETREAT

Transit Services Director Bruce Black said that the Asheville Transit Commission (ATC) held a retreat August 24, 2005. The morning agenda included a presentation from staff about the context of change within a government structure, including the alignment of goals and values, the current state of the transit system, the future of mass transportation in the area, and some alternative ways to gain the participation of the major employers in the area. The afternoon agenda included discussion amongst members of the commission concerning the morning's presentation. The purpose of this memo is to convey to council a summary of the content of the retreat, and to summarize the conclusions that followed form it.

Over the five year period from 2000 to 2005 the Asheville Transit System has increased ridership by just over 11%, or slightly over 105,000 trips. During that same period, the city, not including annexed areas, has grown 2.19%, and the county, including those areas annexed by the city during this time frame, has grown by 5.7%. This indicates that growth in demand within the current service area is greater than the growth in population, and that growth is happening around the perimeter of the city.

So far in Fiscal Year 2006, ridership has been up significantly. Ridership in August of 2005 was up by more than 9,500 trips over August of 2004, which in turn was up only 2800 trips from August of 2003. This is primarily attributed to the fuel price increases that started in August, and for a short period, Hurricane Katrina. It is anticipated that fuel costs will moderate from their Katrina induced highs, but still remain higher than the cost prior to August. This is significant because it is the first time that an increase in ridership coincided with an increase in gasoline prices.

The public transit bus system is within a quarter mile of about 75% of the city's population, 83% of all rental housing, and 85% of all job opportunities in the City. Declining ridership per mile reflects the influence of the longer and newer partnership routes, inherently less productive that most urban routes. Controlling for partnership routes such as the Warren Wilson College Route, the passengers per mile decline is much smaller, but indicates that increasing coverage is responsible for fewer additional trips. The transit system now covers most areas of significant demand.

Land use issues of concern include the migration of some social services to the outskirts of the city, or to places where access by transit is severely limited. This appears to be a function of the increasing costs of space within the City. The population around the city has increased significantly, and affordable housing developments are beginning to occur in the county, where land use is unregulated. The expectation for transit service is very strong, and continues to draw transit focus away from the center of the city.

Financial concerns include the increasing cost of fuel and labor, the flat funding, and the decrease in funding which will affect transit in Federal Fiscal Year 2007.

Staff also presented maps for discussion of the locations of all Mission Hospital and City of Asheville Employees. Analysis indicated that these employers had enough employees living within a quarter mile of a bus route, that, when combined with projected use by UNC-Asheville, they represented a market potential of 66,000 trips per year, and that over 5,178 employees, equivalent to over 3.1 million trips per year, lived beyond a quarter mile from a transit route and were unlikely to consider transit as a transportation alternative. To put it in perspective, Mission Hospital employees alone travel more than 35,000,000 miles to and from work every year, and 5,000,000 miles of those trips occur on streets within the city. Analysis of these demand patterns based on place of residence for two large employers suggests that programs other than transit will be needed to address the needs of the community.

The Commission discussed the feasibility and need for park and ride facilities combined with aggressive ride sharing programs for those not living within a quarter mile of a transit route.

The Commission discussed and recognized that alternative transportation efforts also needed to include programs, which emphasized convenience as the next operational goal. This would include increasing frequency and extending span of service into the evening.

A corporate rate program similar to one used in Olympia Washington was discussed to offer discounted rates with a cap to reduce risk, and a decreasing rate for an increasing number of trips. If demand should become strong enough, additional programs would be considered to deepen discounts, ultimately leading to fare free service in future years.

Staff is planning to present further information to Council during a future worksession, and solicits any specific questions that council may wish to hear addressed.

Mr. Black responded to questions raised by Vice-Mayor Mumpower about bus shelters.

REVIEW OF CITY PROPERTY

Planning & Director Scott Shuford showed a map of the downtown area that contained City properties. They included the Civic Center; ABC area; Battery Park private sector project site; City Hall parking lot; Public Works Facility that houses the Building Safety Department and Public Works Department; Fleet Management building; Water Resources building; Asheville Transit Center; Aston Park; Parks & Recreation Maintenance Facility; and a variety of different outparcels in that area.

Councilman Newman said that the Housing & Community Development Committee has been exploring various "out of the box" ideas to address the scarcity of housing that is affordable to people who work in our service oriented economy. One of the major challenges to the creation of more workforce housing is the scarcity and high-price of good, building land. The City of Asheville owns a large amount of land in Asheville, especially in downtown and near downtown. Most of the properties that are owned by the City of Asheville are needed for governmental operations or are designed for specific community uses, such as parks and recreation or other purposes. However, there may be some properties that are being under-utilized and could have good potential for community redevelopment. He has asked staff to conduct a review of City-owned properties to determine if some of our land may represent good opportunities for community redevelopment, especially redevelopment that significantly adds to our base of workforce housing. In addition, he asked for staff's analysis of any opportunities to consolidate some governmental facilities and thereby potentially free up valuable land for community redevelopment.

He said the potential advantages from conducting such a review could include: (1) creation of workforce housing, especially in areas near major employment destinations in

Asheville; (2) strengthen the City's tax base; (3) consolidation of government facilities; (4) neighborhood enhancements and revitalization; and (5) potential partnerships with for-profit and non-profit builders and neighborhood organizations.

After a brief discussion, City Manager Jackson said that we see there some opportunity to do mixed-use developments downtown and near downtown to accomplish these objectives, that is workforce housing, mixed-use redevelopment, higher and better use, developing tax base, and stimulating private development on our property. We see some prime property downtown that may fit into some of these Civic Center/performing arts facility kind of projects as potential reinvestment opportunities. He said that he would like the opportunity to do some further examination and bring back some candidate evaluations after looking at these properties and seeing where we see the greatest potential. He said those are policy considerations but feels that some preliminary evaluation of these candidate sites is necessary. Council can then give policy direction and instruct staff to perform further due diligence.

MAXWELL STREET

Vice-Mayor Mumpower moved to excuse Mayor Worley from participating in this matter. This motion was seconded by Councilwoman Bellamy and carried unanimously. At this time Mayor Worley left the meeting.

City Attorney Oast it is his understanding the purpose of the topic is to allow Mr. Joe Minicozzi and Mr. Reid Thompson to make a presentation to Council about issues that have arisen with respect to the permitting and occupancy of the Greenlife Grocery store on Merrimon Avenue. As Council knows, many of those issues have been appealed to the Board of Adjustment. That process is still on-going and because of that he views the City of Asheville being in litigation over that issue. If it is Council's determination to move forward with allowing Mr. Minicozzi to make his presentation, he cautioned Council to only receive the information. Ms. Patsy Brison, attorney representing Greenlife Grocery, also has an interest on what is going on here. Once Mr. Minicozzi is finished, in the interest of appearing to be fair, he suggested Council allow Ms. Brison to make a statement. In addition, he said that Mr. Thompson is represented by an attorney. That attorney is not present but he knows that Mr. Thompson is here.

Mr. Joe Minicozzi presented Council with a petition containing 11 signatures, said petition stating "as a resident of Maxwell Street, I/we request that the City Council enforce the requirements of the City's Code. We would like the truck traffic off the residential street and kept on the commercial property of Greenlife. Additionally, we would like to see the required landscape buffer adjacent to Maxwell Street as required by Code. All the truck traffic and designated truck parking on Maxwell Street should be removed and replaced by the original resident parking that was removed without public notice. Finally, we would like the Police department to enforce the requirements of the Code and disallow the commercial truck traffic on Maxwell Street. We want the trucks off the street, and we want our neighborhood back. Greenlife has turned Maxwell into a loading bay and alley without any public process." Mr. Minicozzi also presented City Council with three exhibits (1) e-mail dated March 25, 2005 to Scott Shuford from Joe Minicozzi; (2) e-mail dated March 30, 2005, from Scott Shuford to Reid Thompson; and (3) bullet points representing a breakdown of issues Mr. Thompson has raised with City staff.

Mr. Minicozzi used a powerpoint presentation to address the following issues, outlining the concerns and alleged Code violations: (1) Maxwell Street designation; (2) the first loading bay on Maxwell Street; (3) amended loading bay or #2 bay on Maxwell Street; (4) dumpsters in the first loading bay; (5) driveway at Maxwell Street; (6) driveway at Merrimon Avenue; (7) use of public rights-of-way; (8) nuisance issues (a) loading in the morning; (b) trucks parking in no parking areas; (c) trucks parking on the sidewalk; and (d) mechanical equipment; (9) due

process. He felt all administrative decisions should be published in some form; administrative decisions that happen without public notice should have an appeal period greater than 30 days; and the formation of an ombudsman to guide citizens situations like this. He felt a solution would be to have trucks come up Bordeaux, circulate through the site.

Ms. Patsy Brison, attorney representing Greenlife Grocery, presented to Council a letter dated September 20, 2005, which states "Our firm represents Greenlife Grocery. We understand that City Council has scheduled discussion of Maxwell Street for its worksession agenda on September 20, 2005. As the City Attorney may have informed you or will inform you, the matters about which Mr. Minicozzi complained to you at your City Council meeting on September 13, 2005, have been addressed by the City of Asheville Noise Ordinance Appeal Board and the Board of Adjustment. The matter before the Board of Adjustment has been decided but the appeal time may not yet have expired, and the matter may be subsequently heard in Buncombe County Superior Court. We do not believe, therefore, that a City Council worksession or a regular meeting of the City Council is an appropriate forum for discussion of these issues. We would respectfully request, therefore, that the matter not be discussed at your worksession on September 20, 2005, and any other meeting until the matter has been resolved through other legal processes." She assured Council that we have done everything that was required of us and beyond that under the City's permitting process. They have tried to be a good neighbor as a whole and have made lots of accommodations to try to improve it for our customers and for our neighbors and will continue to do that.

Vice-Mayor Mumpower said that City staff will proceed with the request of September 13, 2005, for staff to review the concerns and report back to City Council. In turn, City Council will follow-through as appropriate.

ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 9:39 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – September 27, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Vice-Mayor Mumpower led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

ADDITION TO AGENDA

Councilman Dunn asked that an item be added to the Agenda regarding Police Department vacancies and how that affects annexation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 2005 AS "SISTER CITIES MONTH"

Mayor Worley read the proclamation proclaiming October, 2005, as "Sister Cities Month" in the City of Asheville. He presented the proclamation to Mr. Dick Hall, President of Asheville Sister Cities Inc., who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING OCTOBER 8, 2005, AS "RIDE TO CURE DIABETES DAY"

Councilwoman Jones read the proclamation proclaiming October 8, 2005, as "Ride to Cure Diabetes Day" in the City of Asheville. She presented the proclamation to Mr. Brian Sarzynski and his family, who thanked Council for their support and them on some activities taking place during that day.

II. CONSENT AGENDA:

Vice-Mayor Mumpower asked that Consent Agenda Item "B" be removed from the Consent Agenda for discussion.

Councilman Newman asked that Consent Agenda Item "K" be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 13, 2005, AND THE WORKSESSION HELD ON SEPTEMBER 20, 2005

B. RESOLUTION AUTHORIZING ACQUISITION AND ACCEPTANCE OF A PARTIAL DONATION OF PROPERTY ON ROCKY RIDGE ROAD

This item was removed from the Consent Agenda for further discussion.

C. RESOLUTION NO. 05-178 - RESOLUTION ACCEPTING AN OFFER OF SALE OF LAND ON LAKE EDEN ROAD

Summary: The consideration of a resolution accepting an offer of sale of land on Lake Eden Road, which is needed for the Grovestone Pump Station.

: City of Asheville has received an Offer of Sale of Land from Robert & Michelle Grabill for land on Lake Eden Road in the amount of $5,000. The subject property is a cut out parcel located at the north east corner of a 2.57 acres parcel at the corner of Lake Eden Road and Eden View Drive. It is an irregular trapezoidal shape containing approximately 0.049 acre. It is generally level with the street, wooded and adjacent to a small creek. Its highest and best use per the surrounding properties is residential. It is proposed to be acquired as part of the Grovestone Pump Station project.

Real Estate Manager Ed Vess reviewed the tax values of residential properties in close proximity to the subject property. Six lots were investigated in the Glen Eden subdivision, which is about a quarter mile from the subject property. The lots ranged in size from 0.35 acre to 0.67 acre and values ranged from $36,000 to $38,200. The per acre values calculated from the tax values ranged from $102,857 to $57,000 per acre respectively. This is consistent with the trend in real estate prices that the smaller the parcel the higher the per acre price. The subject parcel is quite small and thus the higher per acre value would be most indicative of the value. Using a per acre value of $102,857 the indicated value for the subject parcel would be $5,000.

The positive aspects of the proposed acquisition are:

1. It offers an efficient and practical site for the needed pump station.
2. The price is consistent with value evidence for property near the site.
3. The purchase will expedite completion of the Grovestone Pump Station.
4. It is a voluntary sale and will not involve eminent domain.
5. It only includes the land necessary for the pump station leaving the remainder of the property in private ownership.

There are no negative aspects to this transaction.

Approval of the resolution will establish $5,000 as the just compensation for the property and accept the Offer of Sale of Land from Robert & Michelle Grabill for that amount.

Planning & Development staff and Water Resources staff recommend adoption of the resolution accepting an offer of sale of land on Lake Eden Road, which is needed for the Grovestone Pump Station.

RESOLUTION BOOK NO. 29 – PAGE 217

D. RESOLUTION NO. 05-179 - RESOLUTION AUTHORIZING RENEWAL OF CLAIMS ADMINISTRATION CONTRACT WITH ASHEVILLE CLAIMS CORPORATION

Summary: The consideration of a resolution authorizing renewal of claims administration contract with Asheville Claims Corporation

Since 1993, the City of Asheville has funded and operated a self-funded loss reserve program, as authorized by North Carolina law. This program is administered by the Asheville

Claims Corporation (herein "ACC"). Pursuant to this Agreement, ACC is the first referral for claims that are made against the City of Asheville. The claims are reviewed by ACC, and based on that review, determinations are made as to the City's potential liability and damages. In appropriate cases, claims are paid. If a claim develops into a lawsuit, the City's legal defense is provided through ACC. The City Manager, City Attorney, Risk Manager, and Finance Officer are also consulted as and when appropriate with respect to the processing of claims.

The City's "loss experience" since embarking on this self-funded reserve program has improved dramatically over what it was before. Costs are down, and claims are handled better, and there is an emphasis on loss prevention. Asheville's experience as compared to cities with conventional insurance coverage is very favorable. If the City had to obtain insurance on the open market to provide similar coverage, the costs would likely be higher in terms of premiums and claims administration, and the coverage would likely not be as good.

Considerations:

- current arrangement has worked well since 1993
- City is more closely involved in the handling of claims
- costs are lower than for conventional insurance
- coverage is better than with conventional insurance

City staff recommends City Council adopt the resolution authorizing renewal of the claims administration contract with Asheville Claims Corporation.

RESOLUTION BOOK NO. 29 – PAGE 218

E. ORDINANCE NO. 3281 - BUDGET AMENDMENT FROM THE NC DIVISION OF EMERGENCY MANAGEMENT FOR PROCUREMENT OF EMERGENCY RESPONSE AND PREPAREDNESS EQUIPMENT FOR THE FIRE & RESCUE DEPARTMENT AND 12 OTHER BUNCOMBE COUNTY PUBLIC SAFETY AGENCIES

Summary: The consideration of a budget amendment, in the amount of $180,000, to receive grant money from the N.C. Dept. of Crime Control and Public Safety, Division of Emergency Management through the Governor's Crime Commission, for procurement of emergency response and preparedness equipment for Asheville Fire and Rescue Department and 12 other Buncombe County public safety agencies.

With Council approval, the City of Asheville Fire and Rescue Department requested $492,800 from the NC Division of Emergency Management for emergency response by updating communication equipment. Council Resolution Number 05-13 adopted on January 25, 2005, approved applying for the grant. The grant will enhance interoperability between City and County public safety agencies. Staff was successful in obtaining $144,000 of the requested funding. The City share will be $36,000 of which a prorated share will be reimbursed to the City by the other 12 Buncombe County public safety agencies upon purchase of the equipment. A memorandum of understanding was signed by all agencies sharing in this grant on January 19, 2005. This grant will purchase mobile radios for vehicles without communications and additional portable radios for positions without a radio assigned. The added communication will increase firefighter safety during emergency response.

PROS:

- Interoperability between differing agencies and responding units will be increased.
- The equipment will increase the City's ability to protect human life, property, and the environment.

- The equipment will increase firefighter and police officer safety.
- 75% of the funding comes from the State of North Carolina.
- The other 12 Buncombe County agencies would share in the 25% cost not funded by the State.

CONS:

- The City of Asheville's share of the matching grant.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the City.

City staff recommends City Council approve the budget amendment to receive grant money from the NC Division of Emergency Management.

ORDINANCE BOOK NO. 22 – PAGE 258

F. **RESOLUTION NO. 05-180 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE NC GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR THE PURCHASE OF COMPUTER EQUIPMENT AND TRAVEL/TRAINING MONEY FOR THE POLICE DEPARTMENT'S REGIONAL LAW ENFORCEMENT LIAISON**

Summary: The consideration of the resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program (GHSP) for the purchase of computer equipment and travel/training money for the Asheville Police Department's Regional Law Enforcement Liaison, and the associated budget amendment, in the amount of $10,000.

The City of Asheville has been awarded a grant from the GHSP in the amount of $10,000 with no local match required. The purpose of the grant program is to fund highway safety projects, allowed under the grant program, designed to reduce traffic speed, traffic accidents and improve highway safety. We have chosen to purchase a Dell Dimension XPS Gen 5 desktop computer and a Dell Inspiron 9300 Laptop computer totaling $5000.00. The other grant monies would be spent on in-state and out-of-state travel expenses, totaling $5,000.00. The desired equipment is to be located in an office where officers could utilize the desktop computer to complete traffic crash investigation duties. The laptop would be assigned to the GHSP Regional Liaison to aid that person in managing GHSP duties as well as performing traffic crash investigation duties. The travel monies will allow out department's Regional Liaison Officer to maintain contact with other liaisons and attend necessary highway safety functions as requested by the Governor's Highway Safety Program.

Pros:

- Equipment will improve the efficiency and availability of traffic safety computer related resources.
- Will contribute to the enhanced effectiveness of traffic homicide investigators and crash reconstructionists by providing needed computer hardware and software.
- Equipment will facilitate better communication between the Regional Law Enforcement Liaison and other Highway Safety Specialists around the country.

- The travel funds will allow the liaison to attend important training and interact with other highway safety specialists so that highway safety concerns are addressed appropriately.

Cons:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment including servicing and replacement when needed.

This action complies with City Council's Strategic Operating Plan: Goal #2 A multi-modal and congestion management transportation program – In conjunction with major employers and traffic generators, develop and implement a comprehensive multi-modal transportation and congestion management program that works for Asheville. Objective B. Mitigate overall impacts of congestion through effective local partnerships. This is accomplished by identifying areas of the City that are particularly prone to traffic accidents due to speed and other aggressive driving tactics. Through the efforts of the Asheville Police Department and the use of the equipment purchased through the GHSP Grant, this will allow officers and traffic engineers to develop better highway safety goals. This will be achieved by utilizing the computer equipment to aid in the traffic crash investigation area. Better investigations and crash reporting facilitates better policy and engineering decisions, related to highway safety.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program for the purchase of computer equipment and travel/training money for the Asheville Police Department's Regional Law Enforcement Liaison; and (2) the associated budget amendment, in the amount of $10,000.

RESOLUTION BOOK NO. 29 – PAGE 219

G. ORDINANCE NO. 3282 - BUDGET AMENDMENT FROM A GRANT FROM THE NC GOVERNOR'S HIGHWAY SAFETY PROGRAM

Summary: See Consent Agenda Item "F" above.

ORDINANCE BOOK NO. 22 – PAGE 260

H. RESOLUTION NO. 05-181 – RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH STEWART-COOPER-NEWELL ARCHITECTS FOR ARCHITECTURAL SERVICES FOR THE CONSTRUCTION OF FIRE STATIONS 11 IN THE BILTMORE SQUARE MALL AREA

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Stewart-Cooper-Newell Architects for architectural services for the construction of Fire Station #11 in the Biltmore Square Mall area on Rocky Ridge Road.

The need of a Fire Station in the southwest quadrant of the City is a priority for emergency response and our community's Insurance Service Office public fire protection rating. This rating directly affects the amount of fire insurance home owners or business owners pay for property insurance. Council allocated funds to purchase land in the Fiscal Year 2004-2005 budget. Property to place the station on has been properly identified and option to purchase signed by both parties. Asheville's fire protection and emergency response standard of cover will increase with the addition of this fire station. A fire station in the Brevard Road and I-26 area is necessary to provide municipal level fire protection and emergency services to the southwestern sections of the City. In addition to the building housing an engine company, the building will also provide some office space for the Asheville Police Department.

A formal request for qualifications (RFQ) was properly advertised and a preliminary meeting was held with interested architects in conjunction with the relocation of Fire Station 6. The RFQ was specific for the one station with the potential for additional stations in the near future. Written proposals were received by city staff and were evaluated against identified rating criteria distributed in the RFQ. A team of staff from Fire and Rescue, Police, Parks and Recreation as well as Budget reviewed all of the submittals. Three finalists were identified and one firm was clearly selected as the recommended architect to complete the job. References for the recommended firm, especially past performance with other North Carolina cities, were completed with a focus on combination fire and police stations. The committee selected Stewart-Cooper-Newell Architects as the recommended architects for this project.

Stewart-Cooper-Newell Architects, based in Gastonia, North Carolina has provided architectural services for scores of North Carolina cities for fire stations and police stations. Stewart-Cooper-Newell has designed a number of combination fire and police stations. The firm continuously has between 25-35 fire stations in progress at any given time. Approximately 15-20 stations are completed each calendar year under their direction. Stewart-Cooper-Newell is the largest architectural firm in the fire station construction arena in the United States at the current time. With over 100 cities as customers, to date, Stewart-Cooper-Newell Architects reports that they have never completed a fire station project in which the owner did not use the firm again on subsequent fire station projects.

Fire Station 11 is planned to be approximately 12,000 square feet with approximately 11,000 square feet for fire and rescue use and approximately 1,000 square feet for police use. Construction cost of the project is anticipated at an average of $135.00 per square foot, or $1,620,000.00. Stewart-Cooper-Newell proposes their fee for full architectural, civil, structural, plumbing, mechanical and electrical design to be at seven and one-half (7.5) percent of the cost of construction, or approximately $121,500.00. The fee is ½ percent lower than previous work due to this station having the same basic floor plan as Fire Station 6. Funding for the entire project including construction, architectural, and utility/site/furnishings and other "soft" costs is budgeted at $2,800,000 as approved within the Fiscal Year 05-06 budget.

Completion of this station would be in approximately 18 months. Timeliness of this project is important to the City of Asheville due to the upcoming evaluation of the City's fire insurance rating by the Insurance Services Office and North Carolina Office of State Fire Marshal. Stewart Cooper Newell has designed Fire Station 6 and this station would follow that same format. Both stations would be bid at the same time. It is anticipated that by having the same floor plan and construction simultaneously a significant cost savings could occur.

The resolution authorizes the City Manager to execute a contract with Stewart-Cooper-Newell Architects for Fire Station #11. The contract is an AIA Document with appropriate modifications for the City of Asheville.

Pros:

- The experience of the firm in designing fire stations for the City of Asheville;
- One design firm bidding two stations with the same basic floor plan;
- Lower architectural fee.

Cons:

- None could be identified.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services

provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

The Fire and Rescue Department recommends City Council authorize the City Manager to sign the contract with Stewart-Cooper-Newell Architects for architectural services in the construction of Fire Station #11.

RESOLUTION BOOK NO. 29 – PAGE 220

I. RESOLUTION NO. 05-182 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Summary: Bill Schaefer has resigned as the City's Finance Director, thus leaving a vacancy on the Firemen's Relief Fund until January 1, 2006. This resolution will appoint Ben Durant, City's Chief Financial Officer, to fill the unexpired term of Mr. Schaefer, term to expire January 1, 2006, and then to serve a full two-year term, term to expire January 1, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 221

J. RESOLUTION NO. 05-183 - RESOLUTION APPOINTING A MEMBER TO THE BOARD OF DIRECTORS OF VICTORIA OF ASHEVILLE INC.

Summary: Bill Schaefer has resigned from the Board of Directors of Victoria of Asheville Inc, thus creating a vacancy until November 29, 2006. This resolution will appoint Bob Oast, City Attorney for the City of Asheville, to fill the unexpired term of Mr. Schaefer, term to expire November 29, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 222

K. RESOLUTION ESTABLISHING THE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

This item was removed from the Consent Agenda for individual discussion.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR FUTURE DISCUSSION

RESOLUTION NO. 05-177 - RESOLUTION AUTHORIZING ACQUISITION AND ACCEPTANCE OF A PARTIAL DONATION OF PROPERTY ON ROCKY RIDGE ROAD

Summary: The consideration of a resolution authorizing acquisition and acceptance of a partial donation of property on Rocky Ridge Road.

The City of Asheville Fire and Rescue Department (AFRD) has recognized the need for a fire station in the vicinity of the Brevard Road and I-26 interchange in order to provide fire protection for residents and businesses in the area. AFRD staff has selected certain real property

located on Rocky Ridge Road, identified as PIN No. 9626.08-78-7720 as the optimal location for the new fire station.

The property is located about 250' west of the intersection of Rocky Ridge Road and Brevard Road at the I-26 interchange. It is rectangular in shape and contains approximately 0.81 acre. It is generally level with the street and forms an elevated flat building site with retaining walls along three sides. There is a traffic signal at the intersection with Brevard Road providing direct access to Brevard Road in either direction and I-26 East. Access to I-26 West is at the next intersection one block away. The site has been evaluated by the architectural firm of Stewart-Cooper-Newell Architects and found to be suitable for its intended use.

The property was appraised by Francis J. Naeger, MAI, at a value of $603,000. Real Estate Manager Ed Vess has reviewed the appraisal and concurred with the fair market value of $603,000 based on the appraisal. In discussing the City's needs and budget limitations with the property owners, Karl and Nick Koon of G. E. Enterprises, they agreed to donate a portion of the purchase price in order to make the purchase possible for the City. The City and the Koons executed an Option to Purchase Real Property, which provided for a purchase price of $603,000 with $303,000 of the purchase price to be donated by the Koons to the City. The remaining $300,000 of the purchase price would be paid in cash by the City.

The AFRD has $300,000 budgeted for the purchase of a site in the Brevard Road area.

The positive aspects of the proposed acquisition are:

- The site is the optimal location for a fire station based on the service area and access.
- There will be significant savings in site preparation costs compared to other available sites.
- The purchase of this site will enable this station to be bid at the same time as the Exit 44 station resulting in construction cost savings.
- It is a voluntary sale at fair market value.
- Includes only the land necessary for the fire station.

The negative aspects are:

- Removes property from the tax base.
- Removes a commercial lot from the market.

Approval of the resolution will establish $603,000.00 as fair market value for the property, authorize exercising the option along with a cash payment of $300,000 and accept the donation of $303,000 from G. E. Enterprises, Inc.

Planning & Development staff and AFRD staff recommend adoption of the resolution authorizing acquisition and acceptance of a partial donation of property on Rocky Ridge Road.

Vice-Mayor Mumpower thanked Karl and Nick Koon of G. E. Enterprises for helping the City of Asheville secure a safe and more accessible site for a fire station.

Councilman Davis moved for the adoption of Resolution No. 05-177. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 216

RESOLUTION NO. 05-184 - RESOLUTION ESTABLISHING THE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

Summary: On September 20, 2005, City Council heard a report from the Sustainable Economic Development Implementation Plan Task Force on the progress to date for the implementation of the recommendations of the Sustainable Economic Development Plan by Lockwood Green Consulting.

Pursuant to their recommendation, City Council felt it was in their best interest to establish an Economic Development Advisory Committee.

Councilman Newman wanted to make sure that this new standing committee of Council will go through the normal board/commission appointment process.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-184. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 223

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CLOSING AN UNNAMED ALLEY OFF CLINGMAN AVENUE

RESOLUTION NO. 05-185 - RESOLUTION TO CLOSE AN UNNAMED ALLEY OFF CLINGMAN AVENUE

At the request of Councilman Bellamy, Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Mayor Worley opened the public hearing at 5:27 p.m.

Public Works Director Marks Combs said that this is the consideration of a resolution to permanently close an unnamed alley off Clingman Avenue.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mountain Housing Opportunities has requested the City of Asheville permanently close to public use as an unnamed alley off Clingman Avenue. This alley is more particularly described as the alley mentioned in Deed Book 1700 at page 471 and prior deeds in the same chain of title, said alley being further described as Lot 1 of a plat of property of Wilson and Teasley as recorded in the Office of the Register of Deeds for Buncombe County, North Carolina, in Plat Book 2 at page 24 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this alley is not a City maintained street. Closure of this alley will not deny any of the abutting properties a reasonable means of ingress or egress as Mountain Housing Opportunities has submitted to the Planning Department a recombination request for the parcels affected. There are three parcels that abut this section of alleyway. They are identified by PIN Nos. 9648.05-08-4179, 9648.05-08-5118, and 9648.05-08-4248. The petitioner has authority over all the abutting parcels.

Pros:

- The closure allows the property to be used to its maximum (density) potential.
- Affordable housing can be constructed on the consolidated site.

- There will be no future compromise of ingress/egress to other property.

Cons:

- In consideration of the proximity of the alley, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution to permanently close an alley off Clingman Avenue.

Mayor Worley closed the public hearing at 5:28 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 05-185. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 224

B. PUBLIC HEARING TO CONSIDER EXCLUDING TWO PROPERTIES FROM THE CITY'S EXTRATERRITORIAL JURISDICTION

ORDINANCE NO. 3283 - ORDINANCE EXCLUDING 143 AND 145 AVONDALE RIDGE ROAD FROM THE CITY'S EXTRATERRITORIAL JURISDICTION AREA

Mayor Worley opened the public hearing at 5:29 p.m.

Planning & Zoning Director Scott Shuford said that this is the consideration of an ordinance amending the City's extraterritorial jurisdiction to excluded two properties known as 143 and 145 Avondale Ridge Road. This public hearing was advertised on September 16 and 23, 2005.

The properties identified by address and PIN below were added to the City of Asheville's extraterritorial jurisdiction (ETJ) in 2001 as part of a large-scale expansion of the ETJ. The purposes behind that expansion included: Preservation of land suitable for industrial development; securing the development of critical City gateways; and bringing areas likely for rapid, character-defining development under City regulatory authority.

143 Avondale Ridge Road	PIN 966713032937
145 Avondale Ridge Road	PIN 966713031539

Staff was approached by an owner of one of these two properties about further residential development on his property. Because his land did not front on a public or private street in general compliance with City standards, we were unable to accommodate his request. Further staff investigation revealed that the subject properties are not accessed through the City of Asheville's ETJ, that the likelihood of annexation of these properties in the future is extremely remote, and that it is unlikely that their further development will significantly alter the character of the surrounding area. The properties are not suitable for industrial development, nor are they critically situated along a gateway corridor. Consequently, staff was not able to identify a public purpose in maintaining these properties in the City's ETJ.

City staff recommends City Council remove 143 and 145 Avondale Ridge Road from the City of Asheville's extraterritorial jurisdiction.

Mayor Worley closed the public hearing at 5:32 p.m.

Councilman Davis was asked to relay that the property owner was pleased with the Planning Department's quick action and courtesy regarding this matter.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3283. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 262

C. PUBLIC HEARING TO CONSIDER REZONING AND APPLICATION OF A PLANNED UNIT DEVELOPMENT OVERLAY ZONING TO 72 ACRES LOCATED OFF KENILWORTH ROAD AND RESERVOIR ROAD, IDENTIFIED AS KENILWORTH HEIGHTS, FROM THE UNDERLYING ZONING OF RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT; AND MASTER PLAN APPROVAL FOR A 172 UNIT RETIREMENT COMMUNITY WITH RELATED AMENITIES

Mayor Worley said that this public hearing was originally scheduled for August 23, 2005, however, the applicant had requested the hearing be continued until September 13, 2005, in order to have a full Council present for the hearing. That request was granted.

On September 13, 2005, Mr. Albert Sneed requested that this public hearing be continued until September 27, 2005, in order to have a full Council present for the hearing. That request was granted.

Mr. Craig Justus, representing the applicant, said that this is a unique project and has a lot of merit. In the last week or so there has been a lot of information they have received from the community that is based in part on principally the issue of where the main building is located on the property and how big the main building is. It is clear that not all of us agree with where the main building is planned. In talking with staff, we are still trying to figure out, based on their objection to the location and size of the building, what would work from the staff's standpoint. We think the Planned Unit Development (PUD) process is very helpful because Council is controlling how the property will be tailored and they would hate for it to go to something that is more traditional cookie-cutter subdivision. He asked for a continuance to allow them to meet with staff and to also allow them to meet with Ms. Patsy Brison, who has just been retained by the Kenilworth Residents Association. It has been very difficult talking to one representative of a neighborhood with so many others communicating via e-mails, etc. Now that they have an attorney representing an Association, they are hopeful that they can meet with staff and Ms. Brison and her client, to see if we can come to an agreement of the location and size of the main building on this project. We also understand there is some confusion about the tax consequences. He stated that they are not like Deerfield, or Givens Estate, but that we intend to pay taxes and carry their burden as it relates to infrastructure and paying taxes. They would like for it to be a condition of the development that they plan on paying taxes, but we don't understand the legal vehicle to accomplish that. In talking with the City Attorney, it is his understanding that Council cannot condition the approval of this project on them paying taxes. But there may be some method through restrictive covenants that would allow that to occur. In the next 30 days,

they would like to meet with City staff, Ms. Brison and her client to talk about the location and size of the main building on this property, and to also find a better way to lock them in on the representation that they have made that they intend to pay taxes.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that City Council always has the option to remand matters back to the Planning & Zoning Commission and if the changes to the site plan are significant enough, that is an option. By requesting this continuance, it would come back to City Council, not to the Planning & Zoning Commission. Regarding the protest petition, it is his opinion that unless the site plan changes significantly (although they do not have the percentages that they originally had) the protest petition is still valid. He said that the access to this project has to be included within the zoning that they are requesting, thus making the protest petition continue to remain valid. The protest petition would continue to be valid, even into the continuation of the hearing.

Mr. Justus said that they have a 6-1 favorable vote from the Planning & Zoning Commission. What he is suggesting would be changes that would be favorable to the neighborhood, and which typically have been treated as not being significant to have to start over again with the Planning & Zoning Commission.

Upon inquiry of Councilman Newman, Mr. Justus envisioned setting up a charette, where we have staff, representatives from the developer, representatives from the neighborhood and perhaps a Council member to talk about the issues that separate us. Then, they would come back to City Council in approximately 30 days.

Mayor Worley confirmed that if Council continues this public hearing and as a result of whatever discussions take place, City Council can still remand this back to the Planning & Zoning Commission.

Councilwoman Bellamy's only concern regarding process is ensuring that there is due process on both sides, specifically with the validity of the protest petition.

Councilman Dunn didn't see a reason to remand this back to the Planning & Zoning Commission at this point. He was hopeful that the attorneys and the neighborhood could reach a compromise.

Ms. Patsy Brison said that she is representing the Kenilworth Residents Association, not everyone who might wish to speak or who may have signed a protest petition. She only represents the Kenilworth Residents Association. Her client is concerned about continuing this process again. However, they desire to be cooperative in this process. Therefore, it seems like the fairest way to proceed is if there is to be an opportunity for change, which other people can look at and consider whether or not they believe it is appropriate for this property, that the developer should instead withdraw their application and begin anew. That gives everyone a fair change at what the process would be and would remove the question of what happens with the protest petition. That would be their preference. Another reason is a question arises that the ownership of the property has changed during this process. The current property owner has not made application for this project. We would prefer that they withdraw their application at this point. If Council decides it is appropriate to continue it based upon their request, we would not oppose that and will work with the process, at least the client she represents, to have some dialogue. She is not saying that they would agree to anything, but they would be willing to engage in that process.

Mr. Justus said that they are trying to work things out and felt it wasn't fair to make them start all over again.

Upon inquiry of Councilman Newman, Mr. Justus said that they have made a number of efforts to address the concerns raised. Despite those efforts, after they bought the property, they have not gotten a position from staff of what staff would be satisfied with. If the project is turned down, his client already owns the property and will be left with the traditional methods of development, which may not be as good for the property.

Urban Planner Shannon Tuch said that from the very beginning they advised the design team that the number of units, the type of community and traffic weren't huge concerns. Our biggest concern was the amount of disturbance caused as a result of the placement of the two largest buildings on the site. We recommended from the very beginning to keep the buildings off the slopes of 20% or more. If we can keep the buildings off the slopes of 20%, there is no need for a rezoning or a height variance. It would simplify the application significantly. There are portions of this property that are well below 20%. We also cautioned the applicant from the beginning as to whatever development they put forward that it be harmonious with the neighborhood and be sensitive to hillside and ridgeline aesthetics. We don't think that the project that came forward has accomplished that. She felt that staff has been clear from the beginning what their biggest concerns were.

Upon inquiry of Vice-Mayor Mumpower, said they are preserving 50% of open space on this property and where the views are happen to be in an area that is more elevated than where the valley is on this property. It is correct that we want the residents of this community to enjoy views from this property, so we have been trying to balance where we locate the buildings with the views.

Planning & Development Director said that what has been put on the table today is the willingness on the part of the developer to try to reach a better balance between the City's requirements and what the community desires. From that standpoint, staff would support that. It has been staff's position all along that we would prefer to see a clustered development on this property rather than it be developed with a standard subdivision, because the property does vary in elevation, it's not a uniformed site and doesn't lend itself well to standard single-family type of developments.

Councilman Newman wondered if Council continued the meeting if the developer would seek to make further changes to invalid the protest petition. Mr. Justus responded that at this meeting was the first time he heard that the protest is still valid. He said they don't want to remove the access road. He thinks the access road is important for this development. He said that the first continuance was requested because they were informed that there was a protest petition and they were entitled under state law to reduce the project scope to avoid it. We didn't increase the project scope, but actually reduced the density on the property.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that it is state law and this occurs in other communities. This is not peculiar to Asheville. He said that a lot of the issues concerning protest petitions are being addressed in the new legislation, which takes effect on January 1, 2006.

Ms. Brison said that the kind of changes being talked about are substantial changes so it would seem that the developer would withdraw their application and give us a chance to do the charette. However, in order to move forward, we would not oppose the continuance. We have a lot of concern about this being continued before, and the reason for the continuance was perhaps to redraw the lines. She argued that the changes that they made do not help the neighborhood. We believe that the protest petition submitted originally is still valid. We are very concerned that if the public hearing is continued again, the lines will be moved and the project changed, which might lose the protest petition validity that we have today. It is her view that the law in North Carolina is not clear on being able to move the lines after the advertisement has been made for

the public hearing. The case law talks about moving the lines before the public hearing, so then you can determine where the protest petition area is. If it's moved afterwards and it's not a benefit to the neighborhood, our argument that it is an evasion and a subterfuge and we believe that is what was done and we do not want that to happen again.

Upon inquiry of Councilman Newman, City Attorney Oast said that our position is that the PUD consists of two elements – the PUD overlay, which is a zoning decision, and then the Master Plan. It is his position, after talking with staff, that the two have to be co-extensive. To drop that access road, which is to be constructed as part of the project, out of the consideration for zoning purposes, but leave it in for master planning purposes, gives us somewhat anomalous situation where you have a piece of the Master Plan that exists outside of the PUD overlay. For that reason, we felt like the access road needed to be included within the amount of the zoning being requested. If the access road were deleted from the project, then it may be that the protest petition is not valid, but as of this morning, we made a determination that the access road needed to be included, meaning that some of the protesters that were adjacent to the access road made the protest petition valid again.

After a brief discussion, Councilman Davis moved to continue the public hearing until November 9, 2005. This motion was seconded by Councilman Dunn.

When Councilman Newman asked if public comment would be allowed on the continuance request, City Attorney Oast said that Council has heard from both sides and if Council wants to take a limited amount of public comment, that would be up to Council. Usually a motion to continue is within the discretion of Council. Those motions are debatable amongst Council and it's not really a substantive motion and public comment is not required, however, Council usually does take some.

Councilwoman Bellamy wanted to reserve the right to remand whatever comes back from the charette to the Planning & Zoning Commission if it is a substantial difference to the process. She thinks it's important that people who are part of the process, have the right to the protest petition process.

The motion made by Councilman Davis and seconded by Councilman Dunn carried on a 6-1 vote, with Councilman Newman voting "no."

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A RENEWAL CONTRACT WITH BALL-JANIK, LLP

Economic Development Director Sam Powers said that this is the consideration of a resolution authorizing the Mayor to enter into a renewal contract through June 30, 2006, with Ball Janik, LLP, to provide advocacy for the City's federal appropriations and legislative agenda.

Beginning in March 2003, Asheville retained the firm Ball Janik, LLP, to provide advocacy for the City's federal appropriations and legislative agenda. The firm has been retained for two one-year contracts; the third renewal contract is presented for review with no increase in the fee structure as in 2004.

In March 2005, Council agreed on federal priorities for FY 2006. These included City Bus Acquisition; Methamphetamine Response, and Water System improvements as Tier 1 priorities. Additionally, a placeholder for Veteran's Memorial, and Thomas Wolfe Cabin Restoration were

submitted since Council had not voted on priorities by the March 1st deadline, and advocacy with TEA-21 Reauthorization issues, including Pack Square Pedestrian and Roadway Improvements, and Transit Funding flexibility. Ball Janik staff has recently visited Asheville along with congressional staff members, to review current appropriated projects and begin to develop timelines for submittal of any 2007 city priorities.

Funding for this contract renewal has been appropriated in the approved 2005-06 Annual Operating Budget.

Pros: During the two years that the firm has been under contract and tentatively for '06, the City has been successful in receiving $9.99 Million in federal appropriations commitments. The City has also received alerts and analysis about potential legislation and grant opportunities from the firm.

Con: There is no certainty that future federal funding will be secured as a result of the contract renewal.

This action would support the City's Strategic Operating Plan in the following focus areas: Sense of Place, Heritage, and Arts, thru the support for funding of the Pack Place renovations; and Partnerships to improve critical services and infrastructure, thru the efforts to secure funding for programs and policies to defeat street level drug problems and crime.

City staff recommends City Council renew the agreement with Ball Janik for the remainder of the Fiscal Year 05-06 year, with a Request for Proposals process for future contracts when the current agreement expires. Staff also recommends seeking direction from Council to determine any benefits of long-term representation, opposed to one-year contractual agreements for future contracts.

Mr. Fred English requested information regarding how much the City has spent on the lobbyists and what kind of commitments they secured for Asheville for that money.

There was a brief discussion about the good work of Ball-Janik and the reasons why the City originally contracted with them, however, the majority of Council stated that they felt that in a time of growing federal deficit, the City of Asheville doesn't wish to request special appropriations. However, some Council felt they would be open for using lobbyists in the future.

Councilman Newman moved to not renew the contract with Ball-Janik, LLP. This motion was seconded by Vice-Mayor Mumpower and carried on a 6-1 vote, with Mayor Worley voting "no".

VI. OTHER BUSINESS:

ANNEXATION

Councilman Dunn felt that since public safety should be City government's first priority, he was concerned how the City can annex when the Police Department already has 29 vacancies. He felt the City did not have enough police to cover what is currently in the City. He asked Council to rescind our most current annexation ordinances.

Planning & Development Director Scott Shuford updated City Council on the most recent annexation ordinances. In summary, out of the six annexations, two (Ridgefield and Airport Road) have been challenged; two (Ascot Point and Long Shoals Road) are scheduled to come into the City on December 31, 2005; and two are scheduled to come into the City on September 30, 2005 (Two Town Square and Town Square East). The two coming into the City on

September 30 have a total population of 40 people, in an area that is already being well-served in the Biltmore Park area. He explained that we do intend to implement our Annexation Services Plan and will be prepared to give Council a full report for action to implement the Annexation Services Plan.

Assistant City Manager Jefferson reviewed with Council the Police Department staffing issues, some being, but are not limited to: obligated/unobligated times, districts, scheduling, rookie schools, minimum requirements, recruiting and retention.

City Attorney Oast said that it is his opinion that there is not a process that he is aware of for Council to de-annex the areas that are not under appeal. There is a method available to those people in those annexation areas, where if they feel like they are not receiving services at the level that was promised and the level that we are required to deliver. they can petition for relief in Superior Court to require us to provide those services at that level.

There was considerable discussion about annexation, police officer salaries, and vacancies in the Police Department.

It was the consensus of City Council to review the Police Department staffing at the October 18, 2005, City Council worksession.

CLAIMS

The following claims were received by the City of Asheville during the period of September 1-15, 2005: Marilyn Gray (Streets), Alvin Fate Jr. (Police), Deloris Cunningham (Transit Services), Terrie Attwood (Parks & Recreation), Teresa Balding (Fire), Bill Wolfe (Sanitation) and Shawn Hallums (Sanitation).

The following claims were received during the period of September 16-22, 2005: Beverly Belden (Water), BellSouth (Water), BellSouth (Water), Billy Owenby (Water), Penny Benson (Transit Services), Chris Blackwell (Water), David Roberts (Water) and Jonah Phillips (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke about the City's need for a quality management system.

Mr. Fred English felt that the City should hire him as a recruiter for police officers.

Mr. Bill Fishburne, member of the Public Art Board, said that he was requested by the Chair of the Public Art Board to show Council a sketch of the Veterans Memorial, which the Public Art Board approved unanimously earlier today.

Mr. Peter Dawes said that the Sheriff's Department has had to respond to calls in the City of Asheville due to the number of vacancies in the Police Department.

Mr. Mike Fryer presented Council with a petition, containing 183 signatures, opposing annexation of Wellington Park. The petition states "We are residents in Wellington Community Estates Mobile Home Park. We understand that Wellington Park is included in one of the current annexations by the City of Asheville. By this petition we ask that the City of Asheville stop all efforts to annex Wellington Park or any area including Wellington Park. Wellington Park is one of the few affordable housing communities in South Buncombe County. Annexing Wellington Park will nearly double the taxes for the properties in Wellington Park, and will increase our housing

expenses each month. This will make our affordable housing all the less affordable. For these reasons we ask the City of Asheville to discontinue all efforts to annex Wellington Park and to repeal any annexation ordinance that includes Wellington Park." He was concerned that if they move their trailers out for some reason, another one cannot be put back.

Ms. Julia Brant, representing for Asheville Park Community Group, spoke about the City's poor public process. She felt City Council should have given the public the opportunity to speak on the motion to continue in the Kenilworth Heights matter heard earlier in the meeting. She urged Council to take citizen input seriously.

Mr. Martin Reidinger, attorney who has filed the two annexation lawsuits, spoke in support of the City petition to de-annex Wellington Park. It was his opinion that any ordinance City Council has the authority to pass, City Council has the authority to repeal. Once the ordinance becomes effective, you cannot de-annex the area, but until the effective date of that annexation, you can repeal that ordinance.

Mr. Walter Plaue spoke about the shortage of police officers.

Ms. Mary Steiner urged City Council to protect the senior citizen population in Asheville.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:22 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 4, 2005 - 3:00 p.m.

Special Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

City Manager Gary Jackson gave Council an overview of the programs held at the Asheville Civic Center. He said that the Civic Center is a multi-purpose, regional facility serving the cultural and entertainment needs of Asheville and Western North Carolina; it has distinct areas – arena, auditorium, exhibit hall and banquet hall; the arena produces most of the revenues; and the auditorium provides event diversity.

The event overview consists of: (1) 9-10 Arena concerts per year; (2) 12-18 Auditorium concerts per year; (3) 6 Major trade shows per year; (4) The Asheville Symphony and Bravo concerts; (5) Public skating and youth hockey; (6) Broadway productions; (7) Family shows; and (8) Many exhibit hall and local events.

A Partial Event Listing includes: (1) Recent concerts by Toby Keith, Trey Anastasio, Willie Nelson, B.B. King, Alison Krauss and numerous others; (2) Trade shows including Home Show, Boat Show, Gun & Knife Show, Gem & Jewelry Show, Log Home Expo, etc.; (3) Warren Haynes Christmas Jam; (4) Asheville Symphony; (5) Asheville Bravo; (6) Craft Fair of the Southern Highlands; (7) High School Graduations; (8) Disney on Ice; (9) Harlem Globetrotters; (10) Sesame Street Live; (11) Public Skating and Youth Hockey; and (12) Asheville Antique Fair.

He reviewed the sources of revenue as follows: the Banquet Hall produces approximately $8,500 (1%), Exhibit Hall produces approximately $98,000 (9%); the Auditorium produces approximately $441,000 (38%); and the Arena produces approximately $604,000 (62%).

He reviewed significant dates from 1901 when the privately-owned City Auditorium opened to 2005 with the Civic Center Commission's white paper.

Many facility alternatives have been presented and summarized as follows: (1) Renovate with conference component (Hunter); (2) Renovate, add ballroom and construct adjacent performance hall (Heery); (3) Renovate only - $10 M, 2001 (Heery alternative); (4) Construct performance hall downtown; (5) Modify to house state of the art performance hall (Asheville Area Center for Performing Arts); (6) Relocate the arena to the river area (AACPA alternative); and (7) Relocate performance hall within mixed use development (new concept).

Potential Funding Sources include: General – property /sales tax; Debt financing; Hotel occupancy tax; Food and beverage tax; Federal and state grants; Foundations; Private sector/Non-profits investment; Tax Increment Financing; and Other including alcohol, rental car, etc.

The Civic Center ties in with three of City Council's Strategic Goals: (1) Sense of Place, Heritage & Arts – Goal #1A: A renovated CC that is the premier entertainment destination (regional entertainment and event hub) - Tasks: establish and secure funding and schedule phasing for renovation; (2) Sense of Place, Heritage & Arts - Goal #1B: Generate community support by developing partnerships to advocate and fund-raise - Task: Create a non-profit structure to develop social capital and supplement funding; and (3) Partnerships to Improve Critical Services & Infrastructure Goal #2A: Research and develop strategies for securing

significant new, recurring revenue sources - Task: Attain local legislation to provide revenue source.

City Manager Jackson said that the Fiscal Year 2005-06 budget allocates $1.0 million for roof repairs. Mr. John Cort, the original architect, was contacted for consultation and has submitted City Council with a letter dated October 3, 2005, with a total construction cost (only for the roof membrane) of $775,700 for a new roof system over the concourse and arena. He pointed out other issues, which may result in additional costs.

He suggested the following steps moving forward: City Council policy discussion; Form a Council task force; Research recent models of success in NC; Prepare updated cost analysis of preferred model(s); Schedule a follow-up work session to review successful models, updated cost estimates, and hear from community resources; Conduct informal meetings with potential partners: NC Legislators and County Commissioners, Tourism Development Authority, and AACPA and other major stakeholders; Conduct public hearings/community meetings for public input; and Form a community coalition.

He suggested Council consider the following policy questions: (1) Does Asheville need to host a multi-purpose, regional facility? If so, should it be a "state of the art" facility?; (2) What is the preferred location for each component? (a) Downtown in one shared location?; (b) Multiple downtown locations?; or (c) Outside downtown? (Riverfront, Airport Road area, etc.); (3) Total budget?; (4) Phases?; (5) Sources of funding?; (6) Desired partners/coalition?; (7) What trade-offs are acceptable to secure support?; and (8) Location? Design? Management?

Upon inquiry of Council, City Manager Jackson said that he will provide Council with the types of activities that take place in the Civic Center, as well as the expenses for those activities and details regarding the net revenue for each of the four areas in the Civic Center. In addition, he would provide Council with information on the indirect and direct activity downtown and how the Civic Center supports the revitalization of downtown.

Considerable discussion was held regarding policy direction.

Mr. John Cort, architect, and Mr. Richard Fort, architect, responded to various questions/comments from Council, some being, but are not limited to: is it possible to upgrade the Civic Center into a sophisticated capable facility that will carry us into the future; what are the problems associated with the Thomas Wolfe Auditorium, in particular with regard to the Americans with Disabilities Act; is it possible for the Auditorium to be kept open for events while the Arena is being renovated and vise versa; and could the area behind the Civic Center be for future development.

Civic Center David Pisha responded to various questions/comments from Council, some being, but are not limited to: over the past 3-4 years, how many events brought in more than 6,000 people; out of the concerts this past year, how many brought in more than 5,000 people; when building a Civic Center, do you build for maximum utilization or averages; how many people can stand in the Arena; do performers like to do two shows in one night; what are the pros and cons of moving the arena to a different location, e.g., box office personnel, event staff, maintenance staff, supplies, equipment, etc.; and what is our budget deficit and the deficits of other civic centers.

In summary, each Council member voiced their opinion on how to proceed.

Councilman Newman wanted to look at all the options, not just the renovation of the existing Civic Center.

Vice-Mayor Mumpower wanted to learn about the possibilities of fixing up what we have in the most cost effective way. He felt the issue of multi-purpose facility downtown more or less

resolves itself because one area supports the other; we have one staff, it's in our downtown, which encourages others to come downtown; and we will have a parking garage across the street which will improve accessibility.

Councilwoman Bellamy felt we should renovate what we have and keep it a multi-purpose facility, using the land we have around the Civic Center.

Councilwoman Jones was not interested in the City taking the lead in another facility initiative in Asheville. She would be willing to partner, but not to lead. She felt she needed more data to decide on a multi-purpose facility or a performing arts center. She said the point is where the profit centers and how much subsidy do the City taxpayers have to put into this. She also wanted to know how many patrons of the Civic Center are City residents. She felt we needed to sit down with the community first and see what they want and then meet with the legislators for their support.

Mayor Worley felt there was a desire on the part of Council to move forward in some fashion and that Council needs more specific information (technical and usage) on the questions raised today. That would involve input from stakeholders and potential partners. The discussions that will follow will mold exactly what that fashion is. He supported moving forward with a multi-purpose or mixed-use facility, depending on the cost.

Councilman Dunn felt we need a multi-purpose facility downtown with legislative support, but stressed the need for a cost figure.

Councilman Davis felt Council needed to have a vision on the Civic Center, but that we can safely rule out that the Thomas Wolfe Auditorium renovation will be affordable. He said that the Civic Center Commission will provide the City Manager with the results of a survey from a recently held public forum.

Discussion then surrounded the make-up of a task force. In summary, it was the consensus of Council for the following Task Force make-up: Mayor Worley, Councilwoman Bellamy, Councilman Davis, the Chair of the Civic Center Commission, a Buncombe County Commissioner, a representative from the Asheville Area Performing Arts Center, and a representative from the Buncombe County Tourism Development Authority. Once that group meets, they can discuss whether there needs to be other complimentary people brought to the table. The charge of that group, along with the resources and people in the community, will be to go forward and assess possibilities and come back to Council with an action plan in five months consisting of 1-2 specific alternatives along with the pros and cons for each and costs associated with said alternatives, after public comment. Said Task Force is to report back to Council monthly on their progress giving the Council the opportunity to narrow their focus.

City Attorney Oast said that he would prepare a resolution and bring that forward to City Council for consideration at their next meeting.

Mayor Worley adjourned the meeting at 5:17 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Wednesday – October 12, 2005 - 3:00 p.m.
Public Works Facility

Special Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Mayor Worley announced that this special worksession is held to allow the N.C. Dept. of Transportation (NC DOT) representatives to discuss the recent CORSIM analysis studying the proposed traffic flow with 6 vs. 8 lanes on the I-26 Connector Project.

Ms. Debbie Barbour reviewed the steps of the project development process. She described that the process is very collaborative and the NC DOT does not totally control but a very few of the activities. They are in the process of preparing the Draft Environmental Impact Statement (EIS) and analyzing the alternatives. Every time they are asked to re-review or to re-analyze, they have to pause in the process and go into a redo loop. This, of course, adds time to the process and can eventually cause delays.

They currently anticipate that having the draft EIS document completed a year from now or October 2006. This will be a major project milestone. After the draft EIS is complete, they will hold a public hearing, gain input, review input and make a selection of an alternative. After the alternative selection, they will then have a more predictable schedule.

The traffic forecast is a major factor and a foundational component of their planning and design process. In the design of projects across the state, they are charged to ensure they deliver safe designs and designs that will adequately accommodate for traffic for a period of 20 years beyond the project opening.

Over the course of this project study, several traffic models have been developed for the Asheville region with the last model being developed in 2003. They have reviewed capacity analysis and have consistently concluded that 8 lanes are needed on I-240 from I-40 to Patton Avenue. The NC DOT is very confident in the various analysis work and the NC DOT is proceeding with 8 lanes as their studies have indicated.

Late last year, Mayor Worley requested that they review the capacity again by using CORSIM as an analysis tool. They have completed that study and it did not alter their recommendation to continue with 8 lanes.

Mr. Nathan Phillips, representing the N.C. Department of Transportation, reviewed with City Council the transportation decision-making process, topics of discussion, why perform traffic analysis, and level of service concepts. He then explained the different segments of a freeway and the highway capacity analysis, with is the Federal Highway Administration (FHWA)'s standard and the most widely used and accepted traffic analysis procedures in the United States for many applications. He pointed out the different factors affecting speed and flow rates. He then reviewed with Council the 8 lane freeway analysis results and the 6 lane freeway analysis results. He explained about using the CORSIM as a tool, noting that as with any tool, the results must be evaluated and used with other knowledge. He reviewed the capacity analysis of (1) the Highway Capacity Standard, which is both NC DOT's Consultant and FHWA's analysis indicate 8 lanes are required to provide Level of Service D or better for the entire project (some sections will function adequately with 6 lanes); and (2) the CORSIM indicates some sections are identical whether 6 lane or 8 lane alternative is chosen, and it did not alter the NC DOT's previous recommendation of 8 lanes. In summary, based upon the CORSIM analysis and the additional

evaluated criteria, the NC DOT has determined an 8 lane basic freeway facility is needed for the I-26 Connector under the Transportation Improvement Project I-2513A.

Mr. Don Voelker, Assistant Director of Administration of the FHWA, explained that the NC DOT has met the test of the FHWA policy. He said they stand by the NC DOT decision for 8 lanes and considers the issue to be closed.

Representatives of the NC DOT and the FHWA responded to various questions and comments from Council, some being, but are not limited to: is the CORSIM a more accurate tool that other models; is the CORSIM a state-of-the-art analysis and more accurate that the FHWA manual; does the CORSIM analysis determine the Level of Service; did you use Asheville data on the CORSIM analysis or assumptions; who pays for aesthetics; will the money be there when the project begins; how can we communicate support to the NC DOT to move forward; what is the timeline for the specific stages; will citizens be allowed to have input at the design table; and why is the City's Traffic Engineer's interpretation of the CORSIM analysis different than the NC DOT's analysis.

Mayor Worley adjourned the meeting at 4:45 p.m.

Magdalen Bowlerson
CITY CLERK

Charles R. Worley
MAYOR

Wednesday – October 12, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Dunn led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Vice-Mayor Mumpower asked that Consent Agenda Item "J" be removed from the Consent Agenda for discussion.

Mayor Worley asked that Consent Agenda Item "K" be removed from the Consent Agenda for discussion.

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 27, 2005, AND THE WORKSESSION HELD ON OCTOBER 4, 2005**

B. **ORDINANCE NO. 3284 - ORDINANCE DIRECTING THE HOUSING CODE COORDINATOR OF THE BUILDING SAFETY DEPARTMENT TO DEMOLISH THE DWELLING LOCATED AT 34 CRESCENT STREET**

Summary: The consideration of an ordinance directing that the dwelling located at 34 Crescent Street be demolished and that all debris removed from the property, and an associated budget amendment, in the amount of $15,000.

The structure located at 34 Crescent Street (PIN No. 9649.15-54-5121) is a two-story wooden frame, severely dilapidated dwelling in danger of collapse. The framing of the dwelling is positioned on 4x4 posts and untreated stiff knees with no footings. The roof of the dwelling has several layers of asphalt shingles in various stages of decay causing water penetration and rot throughout the dwelling. The roof is collapsing in on the dwelling. The porches on the back and side of the house have structurally failed and are collapsing. Still photos further illustrate the condition of the dwelling (to be shown during the presentation).

A hearing was held on March 2, 2004, and a Findings of Fact and Order was issued, ordering the dwelling demolished. The owners, Mr. and Mrs. Eugene E. Galloway, have failed to comply with the order of demolition. Pursuant to N.C.G.S. sec. 160A-443, when an Owner fails to comply with an order of demolition, the City has the option of demolishing the dwelling upon compliance with certain due process requirements. The owners have acknowledged the urgency and need for the dwelling to be demolished by executing a Consent for Demolition for the City to

demolish and remove the dwelling. Further, the owners have executed a waiver of any and all further notice requirements pertaining to the demolition of the dwelling.

In order to file a lien against the property for the cost to the City to demolish and remove the dwelling, the City must have an ordinance directing the demolition of the dwelling as required by N.C.G.S. sec. 160A-443 and sec. 4-217(e)(3) of the City's Housing Code.

The following is an overview of some general information regarding this property:

- Buncombe County Tax value: $43,000
- Estimated cost to demolish dwelling: Approximately $15,000
- Notification of affordable housing agencies: Yes (no input received)

Pro: Removes blight and deterioration

Con: Allocation of public funds to demolish private property

This action promotes Goal #4 of the City's Strategic Operating Plan in that as a vacant lot centrally located in downtown Asheville, the lot is appropriate for consideration for the construction of affordable housing.

The Building Safety Department recommends adoption of the ordinance ordering demolition and removal of 34 Crescent Street, and an associated budget amendment.

ORDINANCE BOOK NO. 22 – PAGE 263

C. **ORDINANCE NO. 3285 - BUDGET AMENDMENT FOR THE DEMOLITION OF 34 CRESCENT STREET**

Summary: See Consent Agenda "B" above.

ORDINANCE BOOK NO. 22 – PAGE 265

D. **RESOLUTION NO. 05-186 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR RE-INSPECTION OF BRIDGES ON THE MUNICIPAL STREET SYSTEM**

Summary: The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation on a bi-annual basis for the re-inspection of bridges on the Municipal Street System.

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. The program is funded 80% through federal funds and 20% through City funds and administered by the N.C. Dept. of Transportation (NCDOT). To remain eligible for replacement funds and avoid penalties, it is required that all public bridges are inspected every two years. The NCDOT offers three options for meeting the bi-annual inspection requirements – (1) do the inspection with City forces; (2) the City to hire a consultant to do the inspections; or (3) the City to allow NCDOT to do the inspections through a qualified private engineering firm.

Since 1983 the City has elected to execute an agreement with NCDOT to accomplish the required inspection thorough their personnel or engineering consultants. This process allows high numbers of bridges to be inspected under one contract or operation, and therefore, results in

minimum inspection cost per bridge. It is anticipated the inspections cost to be $2,500 per bridge for the upcoming inspections. The City has 25 bridges requiring inspection this year, which bring the cost to $62,500. The City's share of 20% is $12,500. Funds for the City's share are budgeted in the Public Work's Contracted Services budget line.

Pros:

- Lower cost of bridge inspection due to high volume.
- Use of qualified engineering firms through NCDOT.
- Fulfills requirement for bi-yearly bridge inspections.
- Indicates areas for repair for Public Works staff.

Cons:

- None identified.

The Public Works Department recommends adoption of the resolution authorizing the Mayor to execute a municipal agreement with NCDOT for inspection of bridges.

RESOLUTION BOOK NO. 29 – PAGE 226

E. RESOLUTION NO. 05-187 - RESOLUTION SETTING A PUBLIC HEARING ON OCTOBER 25, 2005, TO CONSIDER THE VOLUNTARY ANNEXATION OF 75 LONG SHOALS ROAD

Summary: The consideration of a resolution fixing the date of a public hearing on October 25, 2005, for property located at 75 Long Shoals Road.

Robert Hayes, owner of 75 Long Shoals LLC, has petitioned the City for the annexation of one lot owned by the LLC and located at 75 Long Shoals Road (PIN No. 9644.07-79-1146) containing 4.542 acres. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N.C. Gen. Stat. sec. 160A-31.

Pursuant to N. C. Gen. Stat. sec. 160A-31, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

This area is in the Long Shoals Road annexation that will become effective December 31, 2005, however, in order to proceed with plan approvals, the owner has requested earlier voluntary annexation.

The next step in this process is for City Council to fix the date for the public hearing on this matter. The petitioner has requested that the annexation be effective on the date of adoption of the ordinance if City Council decides to proceed with this request.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Allows the City to review and approve future plans for this parcel as it is developed.
- Assists the developer of the property in achieving his desired development plan and schedule.

Cons:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the resolution setting the date for a public hearing on the annexation petition.

RESOLUTION BOOK NO. 29 – PAGE 227

F. RESOLUTION NO. 05- 188 - RESOLUTION DIRECTING THE APPLICATION TO THE LOCAL GOVERNMENT COMMISSION FOR APPROVAL OF WATER SYSTEM REFUNDING REVENUE BONDS; REQUESTING LOCAL GOVERNMENT COMMISSION APPROVAL OF THE CITY'S WATER SYSTEM REFUNDING BONDS, SERIES 2005A; AND CERTAIN RELATED MATTERS

Summary: The consideration of a resolution directing the application to the Local Government Commission for approval of the City's Water System Refunding Bonds, 2005A and certain related matters.

The City has an opportunity to refund outstanding Water System revenue bonds and realize a substantial savings in annual debt service costs. In order to execute this refunding, City Council must adopt the resolution, giving staff direction to apply to the Local Government Commission (LGC) for approval of the refunding.

Specifically, the resolution: (1) Provides for the issuance of $42,000,000 in bonds to refund outstanding water revenue bonds, purchase municipal bond insurance and reserve fund policy in lieu of funding a debt service reserve and pay the cost of issuing the Bonds; (2) Appoints bond counsel, underwriters, underwriter's counsel and the trustee and escrow agent for the Bonds; (3) Directs the Chief Financial Officer to file an application with the LGC for approval of the issuance of Bonds; (4) Acknowledges that the City Council and the LGC have determined that the issuance of the Bonds is necessary or expedient, etc.

The ability to take advantage of this refunding opportunity, which will produce significant annual debt service savings, is a key benefit derived from achieving our strategic goal of *establishing an improved governance structure and model for the Water System.*

Pros:

- Based on preliminary estimates, the Water System will realize a total of $3.87 million in savings, or approximately $200,000 per year in annual debt service costs.

Cons: None noted.

City staff recommends City Council adopt the resolution directing the application to the Local Government Commission for approval of the City's Water System Refunding Bonds, 2005A and certain related matters.

RESOLUTION BOOK NO. 29 – PAGE 230

G. RESOLUTION NO. 05-189 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON CIRCLE STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Circle Street in the East End community.

A bid has been received from Brandon Knolls LLC in the amount of $1,400 for the purchase of land on Circle Street in the East End Community.

The land on Circle Street is one of three (3) parcels donated to the City in 2001, by Sidney and Mary Schochet and Dale and Irwin Plicso. The parcels were remnants from Department of Transportation takings in connection with the construction of South Charlotte Street. The subject parcel is a trapezoidal shaped lot comprising 0.03 acre±. From street grade it slopes down substantially to the rear property line and is covered with non-significant trees, vines and brush. It is zoned RM-8, but the size, shape and topography render the lot unsuitable as a home site. The tax value is $1,400. The bid from Brandon Knolls LLC, owner of an adjacent parcel is in the amount of $1,400. Brandon Knolls LLC proposes to assemble enough property to construct a small affordable home for sale.

This action complies with the City Council Strategic Operating Plan in that the proposed construction will increase the supply of affordable housing and encourages infill development.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- A non-buildable lot will be assembled with adjoining land to provide an affordable home site.
- The sale of this lot to Brandon Knolls will facilitate infill development.

Planning & Development staff recommends adoption of the resolution, which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 29 – PAGE 233

H. RESOLUTION NO. 05-190 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON HAZZARD STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Hazzard Street in the East End community.

A bid has been received from Brandon Knolls LLC in the amount of $7,000 for the purchase of land on Hazzard Street in the East End Community.

The land on Hazzard Street was one of ten (10) parcels conveyed to the City by the State in 1983, after the construction of South Charlotte Street, as part of a municipal agreement providing for conveyance of residues to the City. A slightly irregular, rectangular shaped lot comprising 0.07 acre±, it is generally level with street grade and mostly covered with grass. It is zoned RM-8, but the size renders the lot unsuitable as a home site. The tax value is $7,000. The bid from Brandon Knolls LLC, owner of property in the vicinity is in the amount of $7,000. Brandon Knolls LLC proposes to assemble enough property to develop the lot consistent with the zoning.

This action complies with City Council's Strategic Plan policy of encouraging infill development.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- A sub-standard lot will be assembled with adjoining land to provide a developable site.
- The sale of this lot to Brandon Knolls will facilitate infill development.

Planning & Development staff recommends adoption of the resolution, which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 29 – PAGE 234

I. RESOLUTION NO. 05-191 - RESOLUTION ACCEPTING STONEBRIDGE DRIVE IN THE HAW CREEK AREA AS A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution to accept Stonebridge Drive as a publicly maintained street in Haw Creek area.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Stonebridge Drive is a developer-constructed street that has an average paved width of 19.5 feet and a length of 0.35 miles. Engineering Department Staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Stonebridge Drive will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Advantages:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.
- Homes constructed on this roadway increase the tax base in the City.

Challenges:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Stonebridge Drive in Haw Creek area as a City maintained street.

RESOLUTION BOOK NO. 29 – PAGE 235

J. BUDGET AMENDMENT TO PROVIDE FOR LEGAL SERVICES

This item was removed from the Consent Agenda for individual discussion.

K. RESOLUTION ESTABLISH TASK FORCE REGARDING THE ASHEVILLE CIVIC CENTER

This item was removed from the Consent Agenda for individual discussion.

L. RESOLUTION NO. 05-193 - RESOLUTION AMENDING THE RESOLUTION OF CLOSURE FOR WEST GREENBRIAR ROAD

Summary: The consideration of a resolution modifying a previous resolution closing West Greenbriar Road

In September of 2003, the City Council adopted a resolution closing a portion of West Greenbriar Road in West Asheville. This road ran through the old Parkwood apartment complex in West Asheville, which is currently developed as a business park. It is located just south of Patton Avenue. Pursuant to discussions with the applicant and owners, the closing was to be subject to a condition that an easement for public access be maintained across the property.

The resolution as signed did not reflect this condition accurately, but rather required the construction of a public road. However, rather than amending the resolution at that time, the applicant and staff agreed to wait on some of the build-out on the site to be completed, and amend the resolution to reflect conditions on the ground.

The plat submitted for redevelopment of the property, and approved by the City, shows a public right-of-way providing pedestrian and vehicular access between Bent Street and Parkwood Road, which remain public streets. Accordingly, even though the right-of-way is not dedicated to the public, to the extent that the City's approvals (including building permits and certificates of occupancy) were based on the existence of the right-of-way, it may not be closed or altered without the City's approval. Also, the right-of-way may be enforced by the abutting property owners.

The resolution of closure contains other conditions that have been satisfied as well. With this in mind, the developer and property owners are requesting that the resolution adopted in 2003 be amended to delete the condition that a public road be constructed across the property, which was never intended, and that the closing be made unconditional.

Staff recommends that the resolution of closure (Resolution No. 03-165) be amended to remove the conditions.

RESOLUTION BOOK NO. 29 – PAGE 242

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR DISCUSSION

ORDINANCE NO. 3286 - BUDGET AMENDMENT TO PROVIDE FOR LEGAL SERVICES

Summary: The consideration of a budget amendment, in the amount of $50,000, to provide for legal services.

This past summer, the Water Agreement terminated, and operation of the water system became the City's responsibility. Almost coincident with the June 30 effective date of the termination of the agreement, the North Carolina General Assembly adopted Sullivan Acts II and III, which limit the City's ability to operate the water system as a public enterprise. These restrictions apply only to the City of Asheville.

The Council has authorized the filing of a declaratory judgment action by the City against the State of North Carolina. The complaint, filed in Wake County on August 10, asks the court to determine the constitutional validity of these local acts. The City has engaged a Charlotte law firm to handle this litigation. This proposed budget amendment will increase the City's legal services budget by $50,000 to cover the City's costs for the lawsuit. It is difficult to estimate with accuracy how much will ultimately be required, and we may have to make a supplemental request later in the fiscal year. However, in the current budget crunch – precipitated in part by the very legislation we are challenging – we thought it better to make these requests incrementally.

City staff recommends City Council adopt the budget amendment to provide for legal services.

Vice-Mayor Mumpower felt it would be less than responsible to accept the legislation that has been placed uniquely upon Asheville. Council doesn't like spending this money, but we have no choice and we will stand up to what we feel is an abusive intrusion on local governmental affairs.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3286. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 267

RESOLUTION NO. 05-192 - RESOLUTION ESTABLISH TASK FORCE REGARDING THE ASHEVILLE CIVIC CENTER

As a result of City Council discussion of October 4, 2005, a task force of the Asheville City Council be, and is hereby, established, to be named the "Asheville Civic Center for the 21st Century Task Force," and consisting of the following three City Council Members and representatives of community organizations:

a. Mayor Charles Worley
b. Council Member Terry Bellamy
c. Council Member Jan Davis
d. Member of the Buncombe County Board of Commissioners
e. Member of the Tourism Development Authority
f. Member of the Asheville Area Center for the Performing Arts
g. Civic Center Commission

The members of the Task Force shall serve a six month term for purposes of recommending a specific policy direction for the City Council.

Mayor Worley felt it may be more appropriate for Council to appoint someone other than him to this Task Force, since he will no longer be a seated member of City Council.

Council members spoke in support of retaining Mayor Worley on this Task Force due to his knowledge and experience in the Civic Center.

City Manager Jackson explained the Civic Center Task Force's Action Plan, which includes a meeting agenda and schedule; and an extensive communications plan. The Task Force's final recommendation and report will be delivered to City Council by he end of February 2006.

Councilman Newman moved to keep Mayor Worley on this Task Force. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER REZONING PROPERTY AT 309 SUMMIT STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT**

ORDINANCE NO. 3287 - ORDINANCE TO REZONE PROPERTY AT 309 SUMMIT STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

Mayor Worley opened the public hearing at 5:13 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone property at 309 Summit Street from RS-8 Residential Single-Family High Density District to Office District. This public hearing was advertised on September 30 and October 7, 2005.

Ms. Cogburn said that the subject property is located on Summit Street, one block off of Hendersonville Road. The property currently contains a single-family home. The property is a through lot, abutting both Summit (to the west) and Reed Street (to the northeast) and is one lot removed from the right-of-way for the Interstate 40 exit ramp.

The property is bordered on two sides by property zoned Office and on the other two sides by property zoned RS-8.

The land uses in the area are varied. Immediately to the north is a Masonic Lodge and vacant parcels associated with this use. To the west, are the developments along Hendersonville Road (hotels, restaurants) and most directly across from the subject property, medical office buildings that are accessed via Summit Street. Immediately to the south are single-family homes (before reaching the highway) and to the east, the land use is single-family in nature. The land uses that currently have access off of Summit Street include single-family and multi-family residences, a church, the lodge and medical offices.

Developing this property for office uses would involve some challenges without combining this property with additional land. The lot does conform to Office District standards. However, the lot is relatively narrow, so that compliance with all the parking and landscaping requirements would be challenging. As Reed Street is a residential street, it is unlikely that access for an office use would be permitted off of Reed.

Office zoning does allow for single-family detached dwellings, so the existing structure would not become nonconforming with this rezoning.

Pros

- The property is bordered on two sides by nonresidential uses and is on a street that is lined with nonresidential uses on one side.
- The property is bordered on two sides by property zoned Office.
- The proximity to the highway and Hendersonville Road (and the uses located along this thoroughfare) make this a less desirable residential location. Noise from the surrounding uses has been an issue as Hendersonville Road has developed more intensely.
- The current use as a single-family dwelling would remain a conforming use.

286

Cons

- If the use were converted to office, there would be a loss of a single-family house in this area.
- Development of this lot for office purposes would be challenging without combining this property with additional land.
- The rezoning could be viewed by some as an incursion of nonresidential uses into a residential area.

The Planning and Development Staff recommended approval of this rezoning to the Asheville Planning and Zoning Commission. At its meeting on September 7, 2005, the Planning and Zoning Commission unanimously (6-0) voted to recommend approval of this rezoning to the City Council.

Ms. Dawnn E. Vaughan, property owner, spoke in support of this rezoning request.

Mayor Worley closed the public hearing at 5:19 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3287. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 269

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED MASTER PLAN ASSOCIATED WITH THE FORMERLY KNOWN BROTHERTON COMMONS PROJECT, NOW KNOWN AS GREENWOOD POINT, TO ALLOW FOR A MULTI-FAMILY PROJECT LOCATED AT VIRGINIA AND BROTHERTON AVENUES

ORDINANCE NO. 3288 - ORDINANCE AMENDING A PREVIOUSLY APPROVED MASTER PLAN ASSOCIATED WITH THE FORMERLY KNOWN BROTHERTON COMMONS PROJECT, NOW KNOWN AS GREENWOOD POINT, TO ALLOW FOR A MULTI-FAMILY PROJECT LOCATED AT VIRGINIA AND BROTHERTON AVENUES

Mayor Worley said that this public hearing was held on September 13, 2005, and the matter was continued until this date in order to give the developer an opportunity to try to mitigate some of City Council's concerns.

City Attorney Oast said that Mayor Worley was not present at the September 13 meeting, however, it was his opinion that it would be appropriate for the Mayor to participate in the vote on this matter provided he studied the staff report and reviewed the minutes. Mayor Worley acknowledged that he had.

Ms. Shannon Tuch, Urban Planner, said that the applicant, the Hunter Group working with Neighborhood Housing Services (NHS), is requesting an amendment to the Master Plan and Conditional Use Permit associated with a Conditional Use Rezoning from RS-8 to RM-8/Conditional Use for the Brotherton Commons project located in West Asheville on the corner of Virginia Avenue and Brotherton Avenue (Attachment to City Exhibit 3 – Aerial Map; City Exhibit 6).

Ms. Tuch then reviewed with Council the following information, which was requested at the September 13 meeting:

Water: The City Water Resources Department has responded that a new 6" water line was installed for the area approximately 2 years ago. The water flow is sufficient for domestic service for the number of multi-family units proposed. The flow at the nearest hydrant was checked 3 separate times (Mar 04/ Aug 05/ Sept 14, 05) and flow was recorded to be between 600 to 780 gallons per minute at 20 PSI. This is sufficient for the proposed residential use of this site.

In the event that lines are relocated due to the N.C. Dept. of Transportation (NCDOT) road widening plans, NCDOT will contract out the relocation and normally increases the size of lines (to accommodate future growth). The increase in the size of lines normally increases flow and that would result in an improvement to water service.

Fire: A flow of 1250 gpm is required for serving the 3-story buildings without additional fire protection. As this site averages around 700 gpm, any wood-frame structure 3-stories or greater requires the addition of sprinklers or the addition of extra fire walls that reduce floor areas to no more than 3600 square feet. The need to mitigate is not uncommon and sprinkler systems are the more common solution, although the applicant hasn't yet decided on the preferred option. Sprinklers have been used in both the Appeldoorn and Campus Crest developments, for example.

Traffic: According to traffic engineering trip generation standards, a condominium/ townhome unit generates 40-45% less traffic than an average single family home (primarily due to smaller family sizes, fewer drivers, more singles, etc.). The proposed increase in density from the prior approved project will increase the trips generated during the peak hour from 17 (Brotherton) to 24 (Greenwood). Developing this site with single family homes would require removal of some acreage for right-of-way (20%) and stream buffer (1.3 acres) to determine development potential. If you then developed the balance of the property at 4 units an acre (pretty typical for the area), that would produce approximately 20 homes. Twenty homes would generate approximately 20 trips in the peak hour. Building to the zoned density, less the right-of-way and stream buffer areas, could result in up to 40 homes, with an associated 40 peak hour trips.

The addition of the road widening to improve the on-street parking situation would result in less congestion while the on-street parking would still provide a modest amount of traffic calming and improved pedestrian environment on Virginia Avenue. Virginia Avenue is suitable for traffic calming measures with a traffic count of around 1,700 per day, and an 85% speed of 35 (posted 30). It is wide enough to accommodate speed humps or islands, depending on neighborhood preference. Using the Appeldoorn model of $500/affordable unit for traffic calming, the City could contribute $12,000 for traffic calming in support of affordable housing. This amount would likely accommodate several speed humps or one island on Virginia Avenue. As with the Appeldoorn case, the developers' financials do not accommodate any traffic calming contribution so the allocation would be from the City.

Mass: The architect for the project and staff had stated during the public hearing that mass of the buildings will be mitigated by the existing topography and position on site. The architect has produced the elevation drawings (City Exhibit 7) demonstrating that much of the building mass will not be visible from the street.

Density: The most recent plan presented to Council proposed to remove the 1.71 acre northern lot from the development proposal in the interest of limiting liability insurance and maintenance fees that would be passed onto the homeowner's through association fees. The

applicant has agreed to retain the upper lot as part of the project, keeping it in its current single family zoning classification and reserving it for open space. Including this upper lot would reduce the overall density from 7.8 units/acre to 6.1 units/acre and provide additional open space for the residents of the development.

Density comparison:

Brotherton Commons - 32 units on 7.2 acres = 4.4 units/acre
Greenwood Point - 44 units on 7.2 acres = 6.1 units/acre
Appeldoorn - 168 units on 11.4 acres = 14.7 units/acre
Prospect Terrace - 21 units on 2.6 acres = 8.1 units/acre

Open Space: The Greenwood Point project proposes:

- 13,400 square feet (.30 acres) of active open space, the largest area being over 8,300 square feet. Note: 8,300 square feet is enough to hold 1 basketball court plus 1 volleyball court side by side.
- Over 1.3 acres of undisturbed green space along a riparian corridor on the east side of the site.
- Over 1.7 acres of undisturbed open space on the north side of the site.

In addition to providing a 1,000 square foot community center, the applicant will work with the condominium association to provide amenities identified by the association in the area reserved for active open space. Ideas discussed with the applicant include an association "playground-build" with the applicant providing materials and technical advice to the residents as they design and construct their own playground as part of a community building effort.

Mayor Worley opened the public hearing at 5:30 p.m.

The following individuals spoke against the proposed amendment to the Master Plan for various reasons, some being, but are not limited to: Virginia Avenue is narrow and increased traffic will endanger the children that live in the area; no sidewalks on Virginia Avenue; lack of existing water pressure; project is not in scale with the rest of the neighborhood; improvements made will be to the project, not benefiting the surrounding neighborhood; speeding on Virginia Avenue; the additional 1.7 acres are not suitable for recreation;

Ms. Marsha Hammond, resident on Virginia Avenue
Mr. Patrick Stacy, resident on Virginia and Brotherton Avenues
Mr. Carlos Montgomery, resident on Virginia Avenue
Ms. Brown, resident on Drake Street
Mr. Brown, resident on Drake Street
Resident at 115 Virginia Avenue
Mr. Leslie Hammond Jones, resident on Virginia Avenue
Resident on Hubbard
Ms. Ballew, resident on Virginia Avenue
Mr. Anthony Jones, resident on Virginia Avenue (Neighborhood Exhibits 2 – Photos)

Ms. Christy Carter, resident on Langwell Avenue, expressed her support for this project. She felt that this is an avenue to get traffic calming on Virginia Avenue.

Mr. Gerald Green, former Board member of Neighborhood Housing Services, spoke in support of the amendment in that the developer has met the Unified Development Ordinance (UDO) standards and will continue to work with the neighborhood to address their concerns. He stated that a multi-family type condominium development generates less traffic than single-family.

Mr. Christopher Slusher, Executive Director of Neighborhood Housing Services, spoke in support of the project and addressed the concerns which Council brought up during the September 13, 2005, public hearing.

Mr. Michael Soren, architect on the project, spoke in support of the amendment. He urged Council not to require this developer to solve the bigger community issue of traffic on Virginia Avenue. He felt this is a good solid project that will increase the property values in the area.

Mayor Worley closed the public hearing at 6:06 p.m.

In response to Councilman Dunn, Community Development Director Charlotte Caplan explained who has paid for the $307,000 in infrastructure on the property.

Ms. Tuch responded to various questions/comments from Council, which include, but are not limited to: how were the traffic counts arrived at; what type of road improvements are proposed and where are those road improvements scheduled to be located; why isn't the developer just building recreational facilities for the project; how big is the open space inside the project area; if the City contributes $12,000 for traffic calming, and how will the City determine the type of traffic calming measures necessary on Virginia Avenue.

Councilman Dunn supported affordable housing, however, he felt this project did not fit in with the scale of the neighborhood and would cause an increase of traffic on Virginia Avenue. In addition, he felt that the proposed open space in the project was not big enough for children to play.

Councilman Newman moved for the adoption of Ordinance No. 3288, subject to all outstanding TRC conditions being met. This motion was seconded by Councilwoman Jones.

Councilman Newman felt this project does meet the standards and felt that the density per acre is not unusual for older residential neighborhoods or streets the size of Virginia Avenue. He knew of many other developments in the City that doesn't have as much open space as this project. He also agreed with the developer to let the homeowners of the project decide the type of recreational facility they would like to have.

When Councilwoman Bellamy questioned if we could use the Housing Trust Fund monies for sidewalks, Planning & Development Director Scott Shuford suggested Council direct staff to come back with options for sidewalks.

In response to Councilwoman Bellamy, Mr. Slusher said that they would be willing to develop a passive park. In response to that, Mr. Shuford suggested the following condition: "That the area set aside for passive recreation shall be cleared to create opportunities for improved access including the possibility of stairs being installed in some of the steeper areas."

In response to Councilwoman Bellamy, Mr. Slusher said that they will be committed to talking with the neighborhood about other recreational needs for the area children.

Councilman Newman and Councilwoman Jones agreed to amended their motion to include the following additional condition: "That the area set aside for passive recreation shall be cleared to create opportunities for improved access including the possibility of stairs being installed in some of the steeper areas."

Vice-Mayor Mumpower was appreciative of Neighborhood Housing Services trying to do something with this land, however, he did not feel they met the standards relating to traffic and being in harmony with the neighborhood.

Councilman Davis also felt that this project was out of character with the surrounding neighborhood and would not be supportive of the amendment.

The amended motion made by Councilman Newman and seconded by Councilwoman Jones carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Councilwoman Bellamy moved to direct City staff to bring back options for (1) funding $12,000 for traffic calming; and (2) funding options for sidewalks on Virginia Avenue. This motion was seconded by Councilwoman Jones carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 22 - PAGE 271

At 6:46 p.m., Mayor Worley announced a recess.

C. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 6 EDWIN PLACE FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED BED AND BREAKFAST HOMESTAY

Mayor Worley opened the public hearing at 7:21 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of conditional zoning for property located at 6 Edwin Place from RS-4 Residential Single-Family Medium Density District to RM-6 Residential Multi-Family Low Density District/Conditional Zoning for a proposed bed and breakfast homestay. This public hearing was advertised on September 30 and October 7, 2006.

The applicant, Jean M. Cassidy, owns a residence located in an RS-4 zoning district within the corporate limits of the City of Asheville and seeks to rezone the property to RM-6 in order to operate a bed and breakfast homestay. The lot is 0.31 acres in area and is located on the south side of Edwin Place.

Bed and breakfast homestays are a use by right subject to special requirements in the RM-6 district, and the proposed project appears to meet all the requirements. Operation of the bed and breakfast homestay would require no changes to the exterior of the existing structure, and the rented rooms would use less than 25 percent of the residence's 2,850 square feet of floor area. The applicant has predicted an average of six visitors a month, typically staying 2-4 days each.

While the property is located in a block face which is zoned entirely RS4, there are a variety of other zoning districts in close proximity. The lot is faced by multi-family zoning districts to both the front and rear. Approximately 30% of the lots on this block face are occupied by multi-unit dwellings (existing nonconformities).

At their July 18, 2005, meeting, the Technical Review Committee (TRC) reviewed the Conditional Zoning and concept plan proposal and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission, stipulating the following project conditions summarized as follows:

1. A combination of vegetation and fence screening meeting type A buffer requirements will be required along the south and west property lines, and a type B buffer will be required along the east property line.
2. Concept plan "title block" lacks the following information: map of the vicinity, date of drawing, zoning district, and parking calculations.
3. Information about driveway and pedestrian paths, setbacks, encroachments into setbacks, parking lot layout, location of nearest fire hydrant, accessibility compliance, street trees, and vehicular use area plantings must be provided.
4. Applicant will need to provide floor plan of building with each room existing use and new use identified.
5. The owner must contact water resources for information regarding required backflow prevention on all commercial water taps.
6. A separate driveway permit must be applied for.
7. Disabled parking will be required, and location depicted on the plans.
8. Show all existing and proposed utilities on the plan.

At their August 3, 2005, meeting, the Planning and Zoning Commission voted 4-3 to deny the request. Two of the four Commission members who voted against the rezoning explained their reasoning; their chief concerns were compatibility and the possibility of a detrimental effect on the neighborhood. The applicant subsequently decided to appeal the Planning & Zoning Commission decision.

Staff has received a number of communications about the proposed rezoning from neighbors, both those for the conditional rezoning and those against. The current and previous presidents of the Grove Park/Sunset neighborhood association have expressed their resistance. The primary reasons for opposition have been concerns about encroachment, traffic, spot zoning, and the applicant's having previously operated this business without a zoning permit (the applicant has since suspended operations). Those in support argued that the business would be beneficial for the community.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards. Staff's review indicates that all seven standards are met as proposed in the conceptual site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** *The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.*

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** *The proposed use is highly compatible with the surrounding natural features and topography, in that the site would hardly be changed at all from its existing state. The only significant changes to the site required thus far would consist of additional plantings and a pervious surface over two parking spaces.*

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** *Staff does not expect that the proposed use*

would have anything more than a minimal impact on property values, and expects that the impact could just as likely be in a positive direction..

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** *The proposed project would be in harmony with these characteristics of the area. The existing residence fits in seamlessly with the surrounding properties, and the proposed use would change very little about the appearance or character of the site.*

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** *The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the City Council in 2000. The plan also recognizes the "New Urbanism" concept and includes as an appendix this movement's charter, which mentions tenets such as the promotion of neighborhoods with a variety of land uses and increased land use intensity. Approval of the proposed plan could perhaps encourage a small business, but excepting that, it would neither support nor hinder the goals and tasks of the Strategic Operating Plan. Thus, it can be said that the proposed use would generally conform to these plans and policies.*

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** *The project's location near Charlotte Street ensures access to transportation facilities and other services. Transit route 5 serves the area. In addition, technical review from other departments has not revealed any problems for serving the development.*

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** *The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.*

Pros

- Proposed use is highly compatible with surrounding area.
- Bed and breakfast homestays have successfully coexisted with residential uses in other neighborhoods.
- The property would maintain its existing residential appearance.

Cons

- Spot zoning has been raised as an issue.

Staff recommends approval of the Conditional Zoning based on the submitted concept plan subject to the conditions listed in the TRC staff report.

Ms. Jean Cassidy, applicant, said that she preferred to remain RS-4, however, she had to apply for conditional zoning since that was the only option to allow her to maintain her homestay. She said that in 1999 she came to the City to find out what she needed to operate a homestay at 6 Edwin Place. She was told she didn't need anything because she hadn't taken in enough yet from the business. She has had limited homestay over previously years while she restored the house. In 2004 she completed the restoration totaling approximately $100,000. She bought a privilege license from the City and was told she needed nothing else, except to have fewer than five rooms. In June 2005, she then received a letter stating that she was in violation of the zoning ordinance. She said that the surrounding properties are multi-family. Her homestay resembles a more of a single-family residence than those around her. The homestay is not just a smaller version of a Bed & Breakfast Inn, but it is an in-home business with an owner/manager on site.

The conditional zoning will restrict what she can do with this property and it will not increase the traffic on Edwin and will not open the doors for businesses in the area. She urged Council to allow her to stay open while discussions continue.

The following residents spoke in opposition of the conditional zoning for various reasons, some being, but are not limited to: Grove Park/Sunset Neighborhood Association has consistently over the years opposed Bed & Breakfast Inns and similar ventures in their residential area; conditional zoning would negatively impact the neighborhood; the multi-family housing in the area is just grandfathered in; Edwin Place is shown to be single-family; the area has many non-confirming multi-family units and could readily reach a tipping point as incremental changes to the RS-4 are made; rezoning of this will result in spot zoning; rezoning this property will limit the rights of many neighboring property owners because those within 500 feet of a Bed & Breakfast cannot apply for a Bed & Breakfast on their property; a Bed & Breakfast homestay is not affordable housing; a Bed & Breakfast homestay is for transient visitors which will increase traffic in the neighborhood; there are plenty of guest accommodations in the area already; and this rezoning will diminish the residential use and allow commercial intrusion into the neighborhood:

Ms. Grace Curry, President of the Grove Park/Sunset Neighborhood Association
Mr. Kevin Huston, resident on Lawrence Place
Ms. Barber Melton, member of Coalition of Asheville Neighborhoods
Ms. Jane Mathews, area resident
Ms. Barbara Hodgson, resident on Edwin Place
Mr. Dennis Hodgson, resident on Edwin Place

Mayor Worley closed the public hearing at 7:51 p.m.

A short discussion was held whether this would constitute spot zoning and what would happen if the owner sells the property.

Councilwoman Bellamy moved to not conditionally rezone the property from RS-4 to RM-6/Conditional Zoning. This motion was seconded by Councilman Davis and carried unanimously.

D. **PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED ON CATAWBA STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/ CONDITIONAL ZONING FOR A PROPOSED GREENWAY, OVERLOOK AND OUTDOOR EXHIBIT SPACE FOR THE PROPOSED HEALTH ADVENTURE PROJECT**

ORDINANCE NO. 3289 - ORDINANCE TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED ON CATAWBA STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/ CONDITIONAL ZONING FOR A PROPOSED GREENWAY, OVERLOOK AND OUTDOOR EXHIBIT SPACE FOR THE PROPOSED HEALTH ADVENTURE PROJECT

Mayor Worley opened the public hearing at 8:04 p.m.

Urban Planner Alan Glines said that this is the consideration of conditional zoning for property located on Catawba Street from RS-8 Residential Single-Family High Density District to Institutional District/Conditional Zoning for a proposed greenway, overlook and outdoor exhibit space for the proposed Health Adventure project. This public hearing was advertised on September 30 and October 7, 2006.

The Asheville 2025 Development Plan recommends that key corridors (such as Broadway) be redeveloped with a higher intensity, mixed use pattern of development. The proposed Health Adventure project would be consistent with these objectives and encourage additional development of the Broadway corridor. The plan also specifically notes the completion of the Reed Creek Greenway as a goal for the City.

The Strategic Operating Plan encourages greenway development in throughout the community. The plan also lists several goals relating to improving gateways and corridors into the downtown. The Health Adventure project could be a positive step toward achieving these goals.

This property has been in City ownership since a portion of the parcel was donated to the City from the Penick family in the late 1960's. The property has been used as the City leaf mulch pile for many years. Over the last few years the Health Adventure has planned an expansion and relocation from their existing downtown site. They were able to purchase the neighboring eight acre parcel a few years ago. The Health Adventure approached the City about acquiring the 'leaf pile' parcel to combine with their land. In 2004 City Council agreed to sell the parcel to be used for the Health Adventure expansion. The conditional zoning request to Institutional District will provide space for the Health Adventure expansion but will limit the use of the City owned parcel to providing outdoor exhibit areas, structures to support these exhibits, greenway and overlook areas and landscape screening. The Reed Creek Greenway section will be located at the outer edges of the property closer to Catawba Street and Broadway. The museum exhibit areas will be located in from the corner.

The specific development plans for the entire Health Adventure project site will be reviewed by the City of Asheville Technical Review Committee (TRC) when they are formally submitted. Plans may be submitted later in the year but this is dependent on the Health Adventure internal schedule. The Health Adventure site development will comply with City development standards.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The development of the site will comply with all codes and regulations and will not create a public hazard.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The proposed use of the site will be a low impact development in a mostly natural state. The project there will be compatible and complement the significant natural features of the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The use of the property is not expected to injure the value of adjoining or abutting property. The use of the property will provide a community amenity.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The proposed use of the property will be in harmony with the scale, bulk, coverage and density and character of the neighborhood.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The Comprehensive plan notes the completion of the Reed Creek Greenway as an outlined goal for the City. This parcels is partially be used to provide a section of the greenway. In addition, the Health Adventure museum is an enhancement to the quality of life for the community.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The parcel has suitable infrastructure in place to serve the requirements of the use.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed use is not expected to create a traffic hazard.

Pros

- Supports the use and expansion of the Health Adventure Museum
- Provides space for the Reed Creek Greenway
- Transfer of the property retains its use and access by the public

Cons

- Could facilitate driveway access from Catawba (could be a pro)

At their September 7, 2005, meeting, the Planning and Zoning Commission voted 6-0 to recommend in favor of the rezoning request. Staff concur with that recommendation with TRC comments as conditions.

A resident on Cumberland Circle questioned what measures would be in place to ensure the developer uses the property for the specific purposes outlined.

A resident on Panola Street felt that the Health Adventure will be environmentally aware of what they are doing, however, she wanted to make sure there are good buffers for the neighborhood. In addition, she suggested the service entrance be moved from the top of Catawba closer to Broadway. She felt Council should deny this request until they have those type plans in place.

Mr. Michael Hunter, resident on Panola Street, agreed that the service entrance should be moved. He felt Catawba Street is narrow with no sidewalks and drainage ditches on both sides. Residents will be affected by traffic and urged Council to deny this rezoning.

The following individuals spoke in support of the conditional zoning for various reasons, some being, but are not limited to: this property will be improved at their cost, making it a safer place for children to play and bicycle; the greenway will be built at their cost; the Health Adventure's mission is about safety and community values; the Health Adventure is willing to continue to work with the neighbors; the leadership of the Health Adventure is one of stewardship and that will guide their work; the Health Adventure has over 40 years of success and this project will match their quality work;

Mr. Sam Stickney, Chairman of the Board of the Health Adventure
Volunteer and Member on the Board of Directors of the Health Adventure
Ms. Jane Mathews, partner on architectural team for the Health Adventure
Mr. William Wolcott, member of the Board of Directors and Chairman of the Building Committee

Mr. John Spake, member of the Board of Directors and Building Committee for the Health Adventure
Mr. Tom Boyette, Chief Executive Officer of the Health Adventure

Mayor Worley closed the public hearing at 8:23 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

City Attorney Oast stated that the City of Asheville does not have a contractual obligation to rezone this property.

There was a brief discussion about how the Health Adventure would continue to work on issues raised regarding buffering for the neighborhood and the impact of the Catawba Street service entrance.

Vice-Mayor Mumpower moved to approve Ordinance No. 3289 to conditionally zone property at Broadway and Catawba to Institutional District/Conditional Zoning with uses limited to those noted above and subject to the TRC conditions being met. This motion was seconded by Councilman Dunn.

A brief discussion surrounded a possible change to the service entrance in that it would be angled away from the front door of more homes.

Vice-Mayor Mumpower moved to amend his original motion to not only conditionally zone the property to those uses noted above and subject to the TRC conditions being met, but to also permit the developer to change the angle of the service entrance from the conditionally zoned property on Catawba Street. This amendment was agreed to by Councilman Dunn with said amended motion being carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 277

E. PUBLIC HEARING TO CONSIDER REZONING PROPERTY ON DOGWOOD ROAD FROM INDUSTRIAL DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 3290 - ORDINANCE TO REZONE PROPERTY ON DOGWOOD ROAD FROM INDUSTRIAL DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley opened the public hearing at 8:47 p.m.

Urban Planner Blake Esselstyn said that this is the consideration to rezone property on Dogwood Road from Industrial District to RS-4 Residential Single-Family Medium Density District. This public hearing was advertised on September 30 and October 7, 2006.

Mr. Esselstyn said that as property is located at the westernmost end of the extraterritorial jurisdiction area (ETJ), much of the property around it is not zoned.

One of the City of Asheville's adopted Smart Growth Land Use policies noted in the ACDP 2025 states that Industrially zoned land should be reserved for industrial purposes. This is further emphasized in the Sustainable Economic Development Strategic Plan that identifies a shortage of industrial zoned properties as one of its top priority issues to be addressed in our

area. It further stresses the importance of strengthening the current zoning ordinance to preserve and maintain selected existing areas of the City that allow industrial type uses.

An application for rezoning of these same two parcels to RM-8 was submitted in January of this year and withdrawn in February, before any public hearing.

The subject site is located in the westernmost section of the City's ETJ area, less than ½ mile off of Smoky Park Highway on Dogwood Road. The property consists of approximately 31 acres and is currently zoned Industrial. The majority of the property is vacant with the exception of a single-family dwelling that is located on the smaller parcel within the site.

Surrounding land uses and zoning include manufactured housing, zoned RS-4 and Industrially zoned land containing multiple dwelling units along the east side of property. Properties to the north, south and west of the site are all outside of the City's Jurisdiction. Land uses, classified by Buncombe County, indicate vacant rural residential land to the north, agricultural land with multiple dwellings to the south and agricultural land plus a single dwelling unit to the west.

The subject site is located within a very low-density rural area of the City's ETJ. The lots surrounding the property range in acreage from less than one acre to 72 acres. The property was zoned Industrial as part of the 2001 ETJ Expansion area for Sardis Road and Brevard Road. The entire area off of Dogwood Road identified for Industrial zoning consists of approximately 103 acres. It was targeted for industrial zoning based on its vicinity to major road facilities (Smokey Park Highway-19/23, and I-40 where the MPO has identified the need for a new interstate interchange at Dogwood Road), the amount of contiguous acreage and the gentle sloping topography of the land making it suitable for industrial development.

The applicant has applied for a rezoning of the lot from Industrial to RS-4 (Residential Multi-family Medium Density District). Based on acreage and density permitted within the RS-4 district, as many as (approximately) 120 units could be permitted. The RS-4 zoning district was intended to establish a medium density for single-family dwellings and to stabilize and protect the residential character of the district while promoting a suitable environment for single-family living.

The purpose of the Industrial zoning district is to reserve land for existing and future industrial activities. Sites are located, where possible, near existing infrastructure and transportation facilities, and also where surrounding land uses provide support to the industrial development and its employees. Development standards within the district were intended to ensure that land uses outside of the Industrial zoning area are not adversely affected by the negative impacts of industrial uses.

At their September 7, 2005, meeting, the Planning and Zoning Commission approved the rezoning by a 5-1 vote. Four neighbors spoke to express their preference for residential use as opposed to industrial.

Information about this application has been passed on to the City's Economic Development Advisory Committee.

Pros

- A residential development in this vicinity would be close to major road facilities, shopping venues and potential employment centers.
- RS-4 zoning would be consistent with the area to the northeast of this property.
- Because the topography of the land is relatively flat, a residential development could be designed to minimize land disturbance.

Cons

- A rezoning of the lot to primarily residential development would go against the practices and policies of several adopted City plans supporting future industrial development.
- The rezoning of the lot would result in the loss of valuable land well suited for a large-scale industrial development that has the potential of generating jobs and contributing to the local economy's tax base.
- Any development on the lot would require a significant extension of public utilities to service the site.

Due to importance of industrial uses to the local economy and given the shortage of land within the City's jurisdiction that is suitable for industrial type development, it has been a practiced policy, based on adopted City Plans and Smart Growth policies, to discourage the rezoning of large tracts of land zoned Industrial.

Based on the above policy and the suitability of this land for industrial uses, staff feels strongly that this rezoning is not in the best interests of the community.

Mr. Gerald Green, representing the property owner, urged Council to rezone this property in that to convert the property to Industrial would require the extension of water and sewer and grading of the property. He reviewed with Council a chart showing the industrial land absorption rates, prices and current stock in Buncombe County. He noted that information provided by the Chamber of Commerce shows that industrial uses typically look for land that is close to an interstate or other major collector road, has good access, is graded, and has utilities installed and internal roads constructed. In addition, the N.C. Dept. of Transportation staff said that it would be at least 10 years before the interchange at Dogwood Road and I-40 would be built.

Mr. Bob Penland, President of an area Homeowners Association, spoke in support of rezoning the property to residential in that they would prefer to have homes in their backyards and not industrial uses.

Ms. Joanne Young, area resident, felt it was out of character for that property to be zoned Industrial and urged Council to rezone it to residential.

Mr. James Harkins, resident on Valleyview Drive, spoke in support of rezoning the property to residential. He felt the industrial zoning will devalue adjacent properties.

Mayor Worley closed the public hearing at 9:04 p.m.

Upon inquiry of Councilman Newman, Economic Development Director Sam Powers said that in general what we see in Buncombe County are projects that are looking for buildings, more so than for green sites. However, he felt it is important to preserve and maintain the limited amount of property that is suitable for industrial development. This property is not fully serviced, but generally speaking the property lends itself to industrial development, especially with the property's location close to a proposed interchange. He pointed out that we can zone the property Industrial, but if the owner is not willing to make it available to be an industrial site, then it doesn't really do us any good. The Economic Development Advisory Committee did receive this information and agreed it was a tough issue in trying to preserve and maintain limited amounts of property that would be suitable for industrial uses vs. making land available for residential growth.

Planning & Development Director Scott Shuford said that assuming Buncombe County has 280 acres of available industrial land, that is less then ½ a square mile in the entire County. Asheville is over 40 square miles, resulting in 1/80th of the City of Asheville available for industrial development. He said this is a classic property rights issue vs. a long range planning issue that

Council has to debate. In the future, if the property is rezoned to residential, people will be wondering why there is a low-density single-family subdivision located right at a highway interchange. In addition, if a large industry does come into that area, he didn't think it would take long before the N.C. Dept. of Transportation builds the interchange.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Because since this is in a rural area in the City's extraterritorial jurisdiction area, Councilman Davis moved to adopt Ordinance No. 3290 to rezone the property from Industrial District to RS-4 Residential Single-Family Medium Density District. This motion was seconded by Vice-Mayor Mumpower.

Councilwoman Jones and Councilman Newman felt that land planning was very important and we need to preserve the little industrial acreage that we have identified.

The motion made by Councilman Davis and seconded by Vice-Mayor Mumpower carried on a 5-2 vote, with Councilwoman Jones and Councilman Newman voting "no."

Mr. Shuford said that City staff will be bringing back to Council a recommendation to rezone the adjacent industrial land RS-4 Residential Single-Family Medium Density District or a similar residential district, due to the residential districts surrounding the Industrial District property.

ORDINANCE BOOK NO. 22 - PAGE 279

F. PUBLIC HEARING TO CONSIDER REZONING PROPERTY ON STATE STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 9:20 p.m.

Urban Planner Blake Esselstyn said that this is the consideration to rezone property on State Street from Neighborhood Business District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on September 30 and October 7, 2006.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

Mr. Esselstyn said that rezoning this lot from Neighborhood Business to RM-16 would be in keeping with the Strategic Operating Plan's objective of encouraging higher-density infill development. Such a rezoning *would* remove an area currently available for a small business (whose development the Strategic Operating Plan aims to facilitate); however, the viability of a business in that location is uncertain.

The subject site is located in West Asheville, within the City of Asheville's corporate limits, two blocks east of where State Street passes beneath I-240. The property consists of approximately 1.2 acres of vacant area and is currently zoned Neighborhood Business.

Surrounding zoning is mostly Residential Multi-Family Medium Density and High Density (RM-8 and RM-16), with the exception of the area across Hanover Street and two small adjacent parcels to the south, which are zoned for neighborhood business. The adjacent residential areas are mostly single-family homes or vacant residential lots. The properties across Hanover Street

300

include one housing businesses which have been closed and boarded up. The average area of parcels in this vicinity is approximately 0.3 acres.

The southern corners at this intersection were zoned Neighborhood Business for the potential development of small businesses to serve the surrounding area. The southeastern corner was developed with a laundromat, restaurant, and grocery, but reportedly problems including theft and vandalism impelled the operators to close the businesses, and they now stand unused.

The applicant, Robert "Tico" Espinosa, has applied for a rezoning of the lot from Neighborhood Business to RM-16 Residential Multi-Family High Density District. Based on acreage and density permitted within the RM-16 district, up to 19 units could theoretically be permitted on the project site (though issues with the right-of-way and the stream bed would have to be addressed). The RM-16 zoning district was intended to permit a full range of high density multi-family housing types along with limited institutional, public, and commercial uses appropriate to the area.

The Neighborhood Business District was established to reserve areas for low-intensity business centers which are accessible to pedestrians from the surrounding residential neighborhood. The intent of the district is to provide for the daily convenience and personal service needs of the surrounding residential neighborhood while minimizing conflicts with surrounding residential uses. In this district, residential uses are restricted to parts of a building other than the first floor or street level.

At the September 7, 2005, meeting, the Planning and Zoning Commission approved the rezoning by a 6-0 vote. Four neighbors voiced their opposition to the project primarily on the grounds that they felt it could exacerbate existing problems with crime in the neighborhood.

Pros

- The RM-16 zoning designation is highly compatible with the surrounding zoning.
- The area can be shown to support residential use, whereas recent attempts at neighborhood businesses have not succeeded.
- The potential for higher-density infill development is consistent with both the City's Comprehensive Plan and Strategic Operating Plan.

Cons

- Loss of a potential site for a new small business.

While the encouragement of small business and the provision of services accessible to businesses at this particular intersection indicates that residential use may be a more appropriate use for the subject property. In addition the adopted City plans' promotion of high-density residential infill supports the type of use, which the proposed rezoning would allow. Based on the above policies and observation, staff recommends approval of this request.

The following individuals spoke against the rezoning for various reasons, some being, but are not limited to: existing crime in the area; proposed units will be low cost housing because no one will build in an environment of drugs and crime that surround them; there is already enough multi-family housing in the area; increase of traffic in the area; State Street is a cut-through street with speeding;

Ms. Mary Steiner, resident on Stewart Street
Ms. Fisher Caldwell, area property owner
Ms. Leslie Cowan, area resident
Ms. Rene' Treece, resident on State Street (presented petition with 7 signatures)

Ms. Sandy Dryman, resident on Stewart Street

Mr. Roberto Espinosa, property owner, suggested the neighborhood get together and organize a neighborhood watch to help with the crime in the area. He urged Council to support his rezoning request in order to build some affordable housing.

Mayor Worley closed the public hearing at 9:46 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved to rezone the property from Neighborhood Business District to RM-16 Residential Multi-Family High Density District. This motion was seconded by Councilwoman Jones.

Vice-Mayor Mumpower would not support the rezoning in that he felt we are not protecting the neighborhood and should not be adding any more people to the dangerous mix.

Councilwoman Bellamy felt to rezone the property residential would not be an effective use of land use planning.

Councilman Newman agreed that the area has major crime problems, but you shouldn't have empty lots in neighborhoods that have crime. The more eyes on the street and the lack of vacant lots will help with that crime problem.

There was a brief discussion on the possibility of having this property owner withdraw his application until the City gets a tighter hold of the harsh reality of crime in that area.

With the approval of Mr. Espinosa, Vice-Mayor Mumpower moved to postpone this matter indefinitely, with the understanding that it be remanded back to the Planning staff and then to the Planning & Zoning Commission prior to it coming back before City Council. This motion was seconded by Councilwoman Bellamy and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of September 23-October 6, 2005: Errol A. Green (Police), Lynn Frazier (Civic Center), William A. Chase (Sanitation), Heather Smith (Sanitation), Patricia Mejia (Sanitation) and Larry Motsinger (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Reid Thompson presented City Council with alleged violations of different sections of the Unified Development Ordinance regarding Greenlife Grocery. After a brief discussion of enforcement avenues, City Attorney Oast cautioned City Council in this matter as the City is in litigation on this issue.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:05 p.m.

Magdalene Bourdeson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 18, 2005 - 5:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Assignment of Lease for Use of McCormick Field

Summary: The consideration of a resolution approving the assignment of lease for the use of McCormick Field to Palace Baseball, L.L.C for the continued operation of minor league baseball for the community.

On July 1, 2005, the City entered into a lease with Asheville Tourist Baseball Club, Inc., for the use of McCormick Field to operate a minor league baseball program. Prior to this lease agreement on June 28, 2005, the Asheville Tourist Baseball Club, Inc entered into an asset purchase agreement with Palace Baseball, L.L.C. Palace Baseball, L.L.C., is part of Palace Sports and Entertainment which also owns the Detroit Pistons of the National Basketball League and the Tampa Bay Lightning of the National Hockey League. The Parks and Recreation Department has been and will continue to work with Palace Baseball, L.L.C., to make McCormick Field a major part of the community. Both parties are interested in making improvements to the facility and incorporating a number of ideas that will make the venue a year-round facility to be enjoyed by the region.

Pros

- Palace Baseball, L.L.C., is committed to keeping minor league baseball in Asheville.
- Palace Baseball, L.L.C., is interested in making improvements to the facility in conjunction with the City of Asheville.
- The facility has the potential of becoming a year round facility.
- Current staff will be retained which will allow for continuity in the transition.

Cons

- Asheville Tourist Baseball, Inc. was an excellent owner and well liked by the community. New ownership will have to establish the same respect from the community.

This action will meet one of the objectives established by the Strategic Plan regarding the termination of the water agreement and operations of facilities formerly operated by Buncombe County.

The Parks and Recreation Department recommends City Council approve the assignment of the lease for the use of McCormick Field from the Asheville Tourists Baseball Club, Inc., to Palace Baseball, L.L.C.

Superintendent of Parks Jim Orr responded to questions from Council regarding the lease.

Vice-Mayor Mumpower was concerned about locking the City into a 10-year lease.

City Attorney Oast stated that Council approved the lease in July of 2005, and the lease included an assignment provision.

Mayor Worley said that a valid, binding lease is already in effect and we are bound to assign that lease unless the new entity is not suitable for the assignment.

Renaming of Shiloh Complex for Linwood Crump

Summary: The consideration of a resolution renaming the Shiloh Recreation Complex for Linwood Crump.

At its September 2005 meeting, the Parks and Recreation Board unanimously voted to rename the Shiloh Recreation Complex after Linwood Crump who recently passed away. The Board approved naming the facility the Linwood Crump/Shiloh Recreation Complex. Linwood was instrumental in making the Shiloh Complex the focal point for the community. He dedicated much of his life to the children who frequented the center and park. He worked many long and hard hours in the concession operation, donating his time so all of the profits could go back to the center and the programs he loved so dearly. Know affectionately as the "Mayor of Shiloh", Linwood made sure that the Shiloh community received its fair share of resources and attention by the City This recommendation is also supported by the Shiloh Advisory Board. The staff plans to hold a formal ceremony in the future and recognize the family for this honor with a new sign placed at the entrance of the facility.

Pros

- This effort is supported by the Parks and Recreation Board as well as the Shiloh community
- This effort will be a great tribute to the leader of the Shiloh community.

Cons

- None

City staff recommends that City Council approve the renaming of the Shiloh Complex as the Linwood Crump/Shiloh Recreation Complex.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

QUARTERLY FINANCIAL REPORT

Chief Financial Officer Ben Durant stated that the reason for this quarterly financial report was to (1) increase the cycle of management information provided to Council; and (2) present key financial data to facilitate informed decision-making.

His presentation consisted of an overview: (1) Asheville is living within its means; (2) Fund balance will be maintained; (3) continued fuel and energy conservation efforts are necessary; and (4) staff recommends no major mid-year budget additions.

In Fiscal Year 2005-06 the adopted budget was $74,357,126. Additions included (1) amendment for County park facilities in the amount of $503,936; and (2) prior year encumbrance rollovers in the amount of $820,071. The Amended Fiscal Year budget is $75,681,133.

General fund revenue highlights include (1) intergovernmental will fall short of budget by $996,436; (2) shortfall will be made up by $337,562 in additional property tax revenue growth,

$460,596 in additional sales tax, and $441,214 in other higher than anticipated revenue growth; and (3) overall, general fund revenues will exceed budget by a net of $242,936.

He reviewed the natural gas projections by saying that (1) Fuel costs are $200,000 higher than last fiscal year; (2) Energy costs may exceed budget by $170,000; and (3) Staff will undertake various conservation efforts to minimize fuel and energy cost impacts.

Overall, departments will save approximately $1.0 Million through targeted savings plans, normal attrition and other operating savings. These savings combined with $242,936 in total revenues over budget will nearly offset $1.37 Million in budgeted use of fund balance. The projected actual use of fund balance use is $110,000.

Mr. Durant then reviewed the fund balance and the enterprise funds.

He mentioned that outstanding budget issues include (1) roll-out containers for duplexes - $80,000; (2) take home vehicles for police - $272,184; and (3) recruitment and retention analysis/compensation plan adjustment.

Throughout the presentation, Mr. Durant responded to various questions/comments from Council, with ultimately the following additional information being requested: is a comparison of the first quarter last year compared to the first quarter this year; a breakdown of revenue and expenditures for all the City's parking decks; what is the capital improvement plan and long-range plan (in terms of strategies to make money) for the Golf Course; long-range cost analysis for police take-home vehicles; full cost analysis for Bele Chere; capital improvement plans for the recreation centers; information on the communication plan for the stormwater utility fee and the possibility of delaying billing until the educational component has been addressed; what is the capital improvement plan for Recreation Park; and the numbers of people who want to lease a parking space in the decks and on the surface lots.

Regarding the Parking Fund, City Manager Jackson said that they will be refreshing the parking plan and bringing that back to Council near the first of 2006. In addition, they will address some of the questions Council has about the design of the additional parking deck. He said it's also time to look not only at capital planning questions, but the operating basis, fee recovery, monthly lease rates, and a wide variety of issues. Discussions will occur with the Fees & Charges Committee regarding if we are operating this like a business, what should those rates be, how do we manage those with better design and purpose in mind, and also linking this Fund to the overall transportation planning.

Regarding the police take-home vehicle policy, Mayor Worley said that there was an indication by Council to have this policy discussion revisited at the Council's retreat.

Interim Water Resources Director David Hanks summarized the Water Resources Department as follows: (1) Fairview Road project – replace existing lines with a new 8-inch line; (2) ISO 15001:2004 – first water utility in North Carolina to be certified; (3) QualServe – American Waterworks Association (AWWA) Customer Service program to enhance and benchmark department against other water utilities; (4) Asset Management implementation has enhanced department culture and decision-making; (5) Drought Management modeling to forecast drought and lake level conditions; (6) current treatment capacity is adequate for near-term demands; (7) new French Broad River supply (intake) provides water resources to support long-term growth; (8) low treatment cost of upland supplies being used to save money; (9) Water Treatment Plan upgrades continue to progress towards completion; (10) reservoir operations (North Fork and Bee Tree) – selection process for new Emergency Action Plan and Operations & Maintenance Plan engineering firm is being finalized; (11) Computerized Maintenance Management System to enhance current work order system and integrate with GIS system being finalized; (12) meter

replacement and testing program – testing all meters 2-inch and larger and replacing non-compliant meters (AWWA standards) to ensure reliability and accuracy; (13) actively managing leaks and breaks; (14) obtaining hydro-stop valve installation equipment to install valves on large lines without cutting off water. This will enable valves to be installed on lines we currently have difficulty cutting off water. This will enhance customer service by keeping more customers in water while repairs are being made; and (15) leak detection – using leading edge leak detection equipment to find underground leaks.

Throughout the presentation, Mr. Hanks responded to various questions/comments from Council, resulting in a request to see the long-range plan on how we anticipate improving the water system.

On behalf of City Council, Mayor Worley thanked City Manager Jackson for bring this and future quarter financial updates to Council.

TAXICAB RATE RECOMMENDATION

Vice-Mayor Mumpower, Chair of the Fees & Charges Committee, said that in the Council meeting of September 13, 2005, City Council voted to increase taxi fares from $1.90 for the activation of the meter (Drop Fee), and $0.20 per every 1/10th mile thereafter, or, $2.00 per mile to a drop fee of $2.50 and a per mile charge of $2.50 (.25 per each 1/10th mile). The inspection fee of $15.00 was also eliminated.

At the same meeting, Council asked that the Fees and Charges Committee review these revised fees within thirty days, taking into consideration the high gasoline prices engendered by the recent hurricanes Katrina and Rita.

City staff was asked to convene a meeting and report to the Fees and Charges Committee on how the taxi companies might be reimbursed for the increasing cost of fuel. The Committee met on Tuesday, September 27, 2005. Public notice was given, and all licensed taxi companies were notified of the meeting, with the exception of one, whose telephone number was listed as disconnected. Representatives of the J&J Taxi Company were in attendance. After significant discussion between the committee, staff, and the taxi company representatives, the committee voted unanimously to recommend the following:

1. Current fares should be set at $2.50 for the "Drop Fee", and $2.80 per mile ($0.28 per 1/10th mile);

2. The fares be reviewed on an annual basis, beginning with the Fiscal Year 2007 budget cycle, and that if no agreement can be reached between the taxi companies and staff, that the Fees and Charges Committee act as the next level to try to resolve outstanding differences; and

3. City staff should review the current regulation of cab companies to determine if current level of regulation is sufficient or necessary, and to recommend changes to the ordinance to the Fees and Charges Committee.

Vice-Mayor Mumpower and Transit Services Director Black responded to various questions from Council, some being, but are not limited to: what impact will the rate increase have on a 10-15 mile trip; are the rates being increased based solely on the rising gas costs; are there opportunities for discounts to members of our community who are visually impaired; what process does the City of Raleigh use to subsidize taxicab fares; and what percentage of the rate increase is attributed to gas prices.

Councilman Newman said that this is an issue that City Council is unaccustomed to handling, where City Council sets rates for businesses that work out in the community. In areas where you have government regulating the pricing for business, like utilities, they have the ability to open the books of those companies and they can make a very informed decision about rate increases and make the company justify their request in a very specific way. He feels like in many ways we are without the true information we need to decide.

Councilwoman Jones felt that Council has heard from the taxicab owners, but City staff needs to try to reach out and hear from the users of taxicabs to get their input on the rate increase and how it, or if, it will affect them.

At the majority of Council's request, Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the November 22, 2005, City Council agenda.

ECONOMIC DEVELOPMENT UPDATE

HUB Project

Mr. Dan Keith Ray, Director of Institute at Biltmore, said that the HUB Project is a consolidated effort by public, private and non-profit participants to create sustainable community building options for Asheville and Buncombe County that will strengthen its role as the regional economic engine, or "Hub" of Western North Carolina.

HUB's strategic parameters include: (1) build critical mass geographically and by business cluster; (2) build critical mass that can expand throughout the region; (3) build business clusters from existing resources; (4) build business clusters that can be sustained; and (5) build through orchestrated public, private, and nonprofit sector collaborations.

He outlined the following strategic goals, noting the specific strategies and key performance targets and measures for each goal:

STRATEGIC GOAL I:	To establish a Community and Economic Development Authority to leverage Buncombe County's unique assets to attract, create and expand business opportunities while improving the well-being of our citizens.
STRATEGIC GOAL II:	To expand our community organizing capability to ensure that both urban and rural communities throughout Buncombe County can play an active role in their future development.
STRATEGIC GOAL III:	To implement inter-related strategies, that combine our unique assets and existing initiatives, and bring about synergy for implementation.
STRATEGIC GOAL IV:	To foster public, private and nonprofit investment in the development of strategic elements of the HUB Project.
STRATEGIC GOAL V:	To work with existing industry in the preservation of productive manufacturing operations and target manufacturing niches that build on our unique assets.
STRATEGIC GOAL VI:	To complete the build-out of broadband and high performance computing and storage infrastructure.

STRATEGIC GOAL VII:	To utilize the world's largest environmental database to lure federal government and private meteorological agencies and companies to Western North Carolina.
STRATEGIC GOAL VIII:	To establish a Digital Media Center as a public, private, nonprofit partnership to spur growth and development of our existing multimedia industry.
STRATEGIC GOAL IX:	To build the Western North Carolina Center for Technology Commercialization into a technology hub for research and development.
STRATEGIC GOAL X:	To utilize the existing technology infrastructure, and the desirability of our location, to promote economic development options in the public, private and nonprofit sectors for secure data storage and retrieval.
STRATEGIC GOAL XI:	To build the "Asheville Brand" as an international identity for our people, culture, products, and services.
STRATEGIC GOAL XII:	To further develop the region as a center for rejuvenation of the mind, body and spirit.

Throughout the presentation, Mr. Ray responded to various questions/comments from Council about the HUB Project Plan, the structure of the organization, the City's financial commitment, and the opportunity for partnership with others.

It was the consensus of Council to have Mr. Ray meet with individual Council members to address to their questions/comments. After those meetings have occurred, and if it is Council's wish, then Council would be requested to adopt the HUB Project Plan and then work out the details of how we partner with Buncombe County on this

Advantage Asheville

Mr. Rick Lutovsky, Chief Executive Officer of the Asheville Area Chamber of Commerce explained how the Chamber of Commerce has participated financially in the HUB Project Plan and how they are excited about expanding their economic development effort. He then updated City Council on the Advantage Asheville 2000 Campaign, the new Advantage Asheville 2010 Campaign.

At 7:46 p.m., Mayor Worley announced a short recess.

POLICE DEPARTMENT STAFFING

Police Chief Bill Hogan updated City Council on the status of recruitment and retention of sworn positions in the Asheville Police Department.

Chief Hogan said their recruitment and retention goals consist of (1) attracting and hiring qualified and motivated employees; (2) developing and improving our outreach efforts to recruit more minority candidates; (3) hiring a work force that reflects the makeup of our community; and (4) creating a work environment that supports and rewards long term careers with the city and police department.

Chief Hogan then reviewed the vacancies of sworn personnel from July 2004 – October 2005: Current Vacancies as of 10/18/05 – 14; Increase in authorized positions - 15; New hires – 31; Loss of sworn officers - 28 (through Retirements – 7; Resignations to other LE positions – 7; Resignation to pursue other interest - 5; Resignation or termination for cause – 5; and Unable to complete training – 4.)

He outlined some major accomplishments at the Police Department including, but not limited to: (1) First year - Focused on organizational culture/guiding principles and leadership; (2) Filled Lieutenant position in Recruitment & Career Development; (3) Evaluated and Redesigned the Hiring Process; (4) Amended Educational Requirements; and (5) Recruitment Outreach; (6) Established Recruitment Teams, Background Investigation Teams, and Mentors; (7) In cooperation with A-B Tech created the First APD Police Academy; (8) Continue to recruit certified officers; and (9) Increased Applications (2004 – Received 79 Applications; and 2005 – Received to date 117 Applications).

Future Considerations include: Competitive wage and benefits (City Human Resources); Special Incentives; Equipment & Technology; Police Training Officer Program; Career Development; Over hire at start of police academy; In-House Police Corps Scholarship Program; and Paid Reserve Police Officer Program.

He outlined the following other vacancy issues: (1) Desirable attrition 6% (190 sworn = 11.4); (2) 2003 survey by NC Criminal Justice Analysis Center – 14% Statewide (190 = 26.6); (3) Baby Boomers retirement bubble; (4) Two State Police Corps Positions; (5) Recruiting underway for 2nd Academy in the Spring; and (6) Continue to receive and process Certified Officer Applications.

He reviewed with Council the Patrol workload & distribution: (1) Council's commitment to Community Building; (2) Police Department is committed to the Community Oriented Policing (COP) Philosophy; (3) Effective COP requires a 2 to 1 ratio for officers' time; and (4) Police Vacancies reduce COP time but not the response time to emergency calls.

He explained the following redistricting and beats: Sheriff's Department – Response to city calls for service; Crime Trends (West Asheville); Redistricting; Work Schedule; and Beat Structure.

Human Resources Director Belinda Odom explained the following (1) Entry Level Police Salary; (2) City Wide Salary Compression; (3) Compression Factors – including (a) Salary offers above minimum; (b) Market outpacing City Compensation; and (c) Not enough difference between pay levels.

Ms. Odom then explained the following Recruitment/Compensation items (1) Ranges/Bands/Steps – evaluation of relative value; (2) Assessing Organizational Challenges; (3) Consideration of Environmental Factors – (a) Cost of Living; (b) Number of employees below the midpoint of salary range; (c) Service based organization; (d) Differentials for Labor Costs; and (e) Incentives; (4) Total Compensation; (5) Rising Cost of Health Care; and (6) Recruitment and Retention – Salary and Benefits.

There was a brief discussion about the actual number of vacancies in the Police Department. Chief Hogan stated that as of today, there are 14 vacancies.

Council members felt the presentation given to Council was very informative and instructed City staff to prepare a video containing this information to play on our Government Channel.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on October 25, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Deadline Requirements

Mr. Joe Heard, Development Services Director, said that this is the consideration of this amendment to the Unified Development Ordinance (UDO) for the purpose of amending specific deadline requirements for rezoning applications and zoning study petitions.

Presently, the UDO outlines a deadline of 9:00 a.m. on the first Monday of the month for the submittal of rezoning applications and zoning study petitions. This day/time conflicts with the application deadline for all other types of applications (conditional use permits, Level II/III projects, etc.). This amendment is proposed by staff to set a consistent deadline for the types of larger scale applications heard by the Technical Review Committee, Planning & Zoning Commission, and/or City Council.

Pro –

- The amendment would make application deadlines consistent for all larger development applications.

Con –

- Moves the currently stated deadline 5.5 working hours earlier.

The Planning and Zoning Commission recommended approval of these code amendments on September 7, 2005, by a unanimous vote of 6-0.

City staff recommends City Council adopt the ordinance to amend specific deadline requirements for rezoning applications and zoning study petitions.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda.

UPDATES TO THE STORMWATER, EROSION CONTROL AND FLOODPLAIN ORDINANCES

Stormwater Coordinator Chad Pierce said that City staff is in the process of evaluating changes to the Stormwater, Erosion Control and Floodplain ordinances. Staff has prepared a Request for Proposals and received proposals for the above work. Staff reviewed the proposals and is recommending the City contract with Woolpert, LLC in the amount of $85,500 to perform this work.

Regarding the stormwater ordinance, the City is required as part of the NPDES – Phase II regulation to add post-development construction requirements to address water quality. This ordinance must be adopted by July 1, 2006. Additionally, our current ordinance is out-dated for calculating stormwater runoff.

Regarding the erosion control ordinance, the City is a delegated review agent of the state for purposes of reviewing and approving sediment and erosion control plans. Due to recent development concerns and excessive erosion problems, staff feels it is appropriate to review this ordinance.

Regarding the floodplain ordinance, the City is delegated by FEMA to administer the National Flood Insurance Program. We administer this program through the floodplain ordinance. Given our recent experience with flooding, this ordinance needs to be reviewed to ensure that it is meeting the city's current needs.

The process of revising these ordinances will include a public Stakeholders process. Staff proposes to bring the contract to Council in November or December 2005 for approval.

BOARDS AND COMMISSIONS:

At the request of the Downtown Commission, it was the consensus of City Council to allow the Commission more time within which to bring a recommendation to Council for their vacancy.

COUNCIL MEETING SCHEDULE

It was the consensus of City Council to cancel the November 29, 2005, City Council community meeting.

CLOSED SESSION

At 9:07 p.m., Councilman Dunn moved to go into closed session for the following reason: to consult with attorneys employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, City of Asheville Board of Adjustment, and Reid Thompson. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 10:20 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:20 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – October 25, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding (left meeting at 8:52 p.m.); Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Enka High School Air Force Junior ROTC Color Guard led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF UNC-ASHEVILLE CHANCELLOR ANN PONDER

On behalf of City Council, Mayor Worley recognized UNC-Asheville's Chancellor Ann Ponder and welcomed her to Asheville.

B. PROCLAMATION PROCLAIMING OCTOBER 30-NOVEMBER 6, 2005, AS "ASHEVILLE STUDENT COMMISSION ON RACIAL EQUALITY (ASCORE) EDUCATION WEEK"

Mayor Worley read the proclamation proclaiming October 30-November 6, 2005, as "Asheville Student Commission on Racial Equality (ASCORE) Education Week" in the City of Asheville. He presented the proclamation to Mr. Marvin Chambers, founding member of ASCORE, and Ms. Deborah Miles, Executive Director of the Center for Diversity Education, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

Councilwoman Bellamy removed Consent Agenda Item "E" from the Consent Agenda for an individual discussion.

A. APPROVAL OF THE MINUTES OF THE SPECIAL WORKSESSION HELD ON OCTOBER 12, 2005, REGULAR MEETING HELD ON OCTOBER 12, 2005, AND THE WORKSESSION HELD ON OCTOBER 18, 2005

B. RESOLUTION NO. 05-196 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY ON CIRCLE STREET IN THE EAST END COMMUNITY TO BRANDON KNOLLS LLC

Summary: The consideration of a resolution authorizing the Mayor to convey land on Circle Street to Brandon Knolls, LLC, in the amount of $1,400.

On October 12, 2005, City Council authorized advertising for upset bids pursuant to a bid from Brandon Knolls, LLC, for land on Circle Street in the amount of $1,400. The advertisement was published on October 14, 2005, and no upset bids were received.

The land on Circle Street is one of three (3) parcels donated to the City in 2001, by Sidney and Mary Schochet and Dale and Irwin Plisco. The parcels were remnants from N.C. Dept. of Transportation takings in connection with the construction of South Charlotte Street. The subject parcel is a trapezoidal shaped lot comprising 0.03 acre±. From street grade it slopes down substantially to the rear property line and is covered with non-significant trees, vines and brush. It is zoned RM 8, but the size, shape and topography render the lot unsuitable as a home site. The tax value is $1,400. The bid from Brandon Knolls LLC, owner of an adjacent parcel is in the amount of $1,400. Brandon Knolls, LLC, proposes to assemble enough property to construct a small affordable home for sale.

The proposed construction is consistent with the Strategic Plan policies of increasing the supply of affordable housing and encouraging infill development.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A non-buildable lot will be assembled with adjoining land to provide an affordable home site.
5. The sale of this lot to Brandon Knolls will facilitate infill development.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to convey land on Circle Street to Brandon Knolls, LLC, in the amount of $1,400.

RESOLUTION BOOK NO. 29 – PAGE 245

C. RESOLUTION NO. 05-197 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY ON HAZZARD STREET IN THE EAST END COMMUNITY TO BRANDON KNOLLS LLC

Summary: The consideration of a resolution authorizing the Mayor to convey land on Hazzard Street to Brandon Knolls, LLC, in the amount of $7,000.

On October 12, 2005, City Council authorized advertising for upset bids pursuant to a bid from Brandon Knolls, LLC, for land on Hazzard Street in the amount of $7,000. The advertisement was published on October 14, 2005, and no upset bids were received.

The land on Hazzard Street was one of ten (10) parcels conveyed to the City by the State in 1983, after the construction of South Charlotte Street, as part of a municipal agreement providing for conveyance of residues to the City. A slightly irregular, rectangular shaped lot comprising 0.07 acre±, it is generally level with street grade and mostly covered with grass. It is zoned RM 8, but the size renders the lot unsuitable as a home site. The tax value is $7,000. The bid from Brandon Knolls LLC, owner of property in the vicinity is in the amount of $7,000. Brandon Knolls LLC proposes to assemble enough property to develop the lot consistent with the zoning.

The proposed construction is consistent with the Strategic Plan policy of encouraging infill development.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A sub-standard lot will be assembled with adjoining land to provide a developable site.
5. The sale of this lot to Brandon Knolls will facilitate infill development.

Planning staff recommends adoption of the resolution authorizing the Mayor to convey land on Hazzard Street to Brandon Knolls, LLC, in the amount of $7,000.

RESOLUTION BOOK NO. 29 – PAGE 246

D. RESOLUTION NO. 05-198 - RESOLUTION APPROVING THE ASSIGNMENT OF LEASE FOR USE OF MCCORMICK FIELD FROM ASHEVILLE TOURISTS BASEBALL CLUB INC. TO PALACE BASEBALL LLC

Summary: The consideration of a resolution approving the assignment of lease for the use of McCormick Field to Palace Baseball, L.L.C for the continued operation of minor league baseball for the community.

On July 1, 2005, the City entered into a lease with Asheville Tourist Baseball Club, Inc., for the use of McCormick Field to operate a minor league baseball program. Prior to this lease agreement on June 28, 2005, the Asheville Tourist Baseball Club, Inc entered into an asset purchase agreement with Palace Baseball, L.L.C. Palace Baseball, L.L.C., is part of Palace Sports and Entertainment which also owns the Detroit Pistons of the National Basketball League and the Tampa Bay Lightning of the National Hockey League. The Parks and Recreation Department has been and will continue to work with Palace Baseball, L.L.C., to make McCormick Field a major part of the community. Both parties are interested in making improvements to the facility and incorporating a number of ideas that will make the venue a year-round facility to be enjoyed by the region.

Pros

- Palace Baseball, L.L.C., is committed to keeping minor league baseball in Asheville.
- Palace Baseball, L.L.C., is interested in making improvements to the facility in conjunction with the City of Asheville.
- The facility has the potential of becoming a year round facility.
- Current staff will be retained which will allow for continuity in the transition.

Cons

- Asheville Tourist Baseball, Inc. was an excellent owner and well liked by the community. New ownership will have to establish the same respect from the community.

This action will meet one of the objectives established by the Strategic Plan regarding the termination of the water agreement and operations of facilities formerly operated by Buncombe County.

The Parks and Recreation Department recommends City Council approve the assignment of the lease for the use of McCormick Field from the Asheville Tourists Baseball Club, Inc., to Palace Baseball, L.L.C.

E. **RESOLUTION RENAMING THE SHILOH RECREATION COMPLEX FOR LINWOOD CRUMP**

This item was removed from the Consent Agenda for an individual discussion.

F. **ORDINANCE NO. 3291 - ORDINANCE TO APPROPRIATE REVENUE AND BUDGET EXPENDITURES ASSOCIATED WITH FOUR ANNEXATION AREAS**

Summary: The consideration of a budget amendment, in the amount of $318,044, to appropriate revenue and budget expenditures associated with the Two Town Square, Town Square East, Ascot Pointe, and Long Shoals Road annexation areas

In June 2005, City Council approved the Fiscal Year 2005-06 Operating Budget. Also, in June 2005, City Council approved the annexation of six areas (Ridgefield, Airport Road, Two Town Square, Town Square East, Ascot Pointe, and Long Shoals Road) into the City. Under state law, property owners are allowed sixty days to file legal challenges to any annexation. As a result, staff was unable to determine if there would be legal challenges until well after the Fiscal Year 2005-06 Operating Budget was adopted; and therefore did not include any revenues or expenses from this annexation in the Adopted Budget.

The period for filing legal challenges to the annexations has now passed, and the City has received legal challenges on two of the six annexation areas that Council approved in June - Ridgefield and Airport Road. As a result, these two areas will not be coming into the City as scheduled. As for the remaining four areas, Two Town Square and Town Square East became part of the City on September 30th; and Ascot Pointe and Long Shoals Road will become part of the City on December 31st. Staff expects these four areas to generate $318,044 in property tax and other revenue in Fiscal Year 2005-06. The cost of providing services to these areas in Fiscal Year 2005-06 will be $250,773. The City will realize a net gain of $67,271, which will be placed into the manager's contingency account. If these funds are not used during the year, this money can go to partially offset the $110,000 reduction in fund balance that is currently projected for Fiscal Year 2005-06. A detailed list of the Fiscal Year 2005-06 revenues and expenditures associated with these four areas is available.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with the Two Town Square, Town Square East, Ascot Pointe, and Long Shoals Road annexation areas.

ORDINANCE BOOK NO. 22 – PAGE 281

G. **RESOLUTION NO. 05-200 - RESOLUTION MODIFYING THE SCHEDULED CITY COUNCIL MEETINGS TO INCLUDE THE ASHEVILLE CITY COUNCIL SWEARING-IN CEREMONY ON TUESDAY, DECEMBER 6, 2005, AT 5:00 P.M. IN THE COUNCIL CHAMBER, LOCATED ON THE SECOND FLOOR OF THE CITY HALL BUILDING; AND CANCELING THE NOVEMBER 29, 2005, COMMUNITY MEETING**

RESOLUTION BOOK NO. 29 - PAGE 249

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

RESOLUTION NO. 05-199 - RESOLUTION RENAMING THE SHILOH RECREATION COMPLEX FOR LINWOOD CRUMP

Summary: The consideration of a resolution renaming the Shiloh Recreation Complex for Linwood Crump.

At its September 2005 meeting, the Parks and Recreation Board unanimously voted to rename the Shiloh Recreation Complex after Linwood Crump who recently passed away. The Board approved naming the facility the Linwood Crump/Shiloh Recreation Complex. Linwood was instrumental in making the Shiloh Complex the focal point for the community. He dedicated much of his life to the children who frequented the center and park. He worked many long and hard hours in the concession operation, donating his time so all of the profits could go back to the center and the programs he loved so dearly. Know affectionately as the "Mayor of Shiloh", Linwood made sure that the Shiloh community received its fair share of resources and attention by the City. This recommendation is also supported by the Shiloh Advisory Board. The staff plans to hold a formal ceremony in the future and recognize the family for this honor with a new sign placed at the entrance of the facility.

Pros

- This effort is supported by the Parks and Recreation Board as well as the Shiloh community.
- This effort will be a great tribute to the leader of the Shiloh community.

Cons

- None

City staff recommends that City Council approve the renaming of the Shiloh Complex as the Linwood Crump/Shiloh Recreation Complex.

After expressing her appreciation of the work of Mr. Crump, Councilwoman Bellamy moved for the adoption of Resolution No. 05-199. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 248

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF 75 LONG SHOALS ROAD

ORDINANCE NO. 3292 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 75 LONG SHOALS ROAD

Mayor Worley opened the public hearing at 5:12 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to extend the corporate limits of the City of Asheville to include 75 Long Shoals Road. This public hearing was advertised on October 14, 2005.

Robert Hayes, owner of 75 Long Shoals LLC, has petitioned the City for the annexation of one lot owned by the LLC and located at 75 Long Shoals Road (PIN No. 9644.07-79-1146)

containing approximately 4.5 acres. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

The lot currently contains a single-family home. The current assessed valuation for this property, according to the Buncombe County tax records, is $266,900. This parcel is in the Long Shoals Road annexation area that will become part of the City of Asheville on December 31, 2005, however, in order to proceed with plan approvals, the owner has requested earlier voluntary annexation.

Pursuant to N. C. Gen. Stat. sec. 160A-31 a public hearing must be held prior to adopting any ordinance for voluntary annexation.

The petitioner has requested that the annexation become effective on the date of the adoption of the ordinance, if City Council decides to proceed with this request.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Allows the City to review and approve future plans for this parcel as it is developed.
- Assists the developer of the property in achieving his desired development plan and schedule.

Cons:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the ordinance annexing the property set forth in the petition.

Mr. Brad Freeman spoke in support of the annexation.

Mayor Worley closed the public hearing at 5:18 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3292. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 284

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR BILTMORE POINT, LOCATED ON FAIRVIEW ROAD, FOR A PROPOSED 136-UNIT MULTI-FAMILY DEVELOPMENT

ORDINANCE NO. 3293 - ORDINANCE TO GRANT A CONDITIONAL USE PERMIT FOR BILTMORE POINT, LOCATED ON FAIRVIEW ROAD, FOR A PROPOSED 136-UNIT MULTI-FAMILY DEVELOPMENT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast said that this is a quasi-judicial site specific act and at this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:19 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of the issuance of a conditional use permit for Biltmore Point, located on Fairview Road, for a proposed 136-unit multi-family development.

The applicants, Charles Radford and Bruce Goforth, have requested a site plan review for a Level III residential townhome development to allow for the new construction of 136 affordable units, public road, secondary emergency access, and other related amenities. The project site is located within City limits just above the northwest corner of Fairview Road and Stoner Road, directly adjacent to the Slosman property from which the 13 acres under consideration will be subdivided. The subject property is surrounded on three sides by industrial or commercial warehousing/storage land uses. The fourth side borders a mix of commercial storage, single family residential, and vacant Commercial Industrial zoned property.

The site, as it currently exists, is undeveloped and heavily wooded with moderate to steep slopes (over 15%) (Attachment to City Exhibit 3 – Aerial Map). The 13 acre site has frontage on two city maintained roads; principal access will be located off of Fairview Road while a gated emergency access road is required off of Stoner Road per the City of Asheville Ordinance and State Fire Code requirements. In addition, a new loop road built to City of Asheville standards will be constructed to provide access to the individual townhome units (Attachment to City Exhibit 3 – Master Plan).

This project was previously reviewed under a Conditional Use Rezoning (CUZ) application that was approved in May 2004. Without project work being initiated, the approved Master Plan and Conditional Use Permit expired after one year; however, the RM-16 zoning remains in place for two years after approval. The applicant is now prepared to initiate site-work and wishes to re-file an almost identical site plan from what had originally been approved. In the intervening 15 months a number of other, unrelated, applications have come forward where a variety of issues and concerns have been discussed and explored including: compatibility with adjacent properties; open space; excessive and tall retaining walls; excessive clearing, grading, and mature vegetation removal. In light of these recent events, staff has re-examined this request and has qualified the earlier position of support with additional information and detail.

At their September 19, 2005, meeting, the Technical Review Committee (TRC) reviewed the Level 3 site plan and Conditional Use Permit request and recommended approval stipulating

that the applicant meet the conditions outlined in the report, along with the following conditions added by the City Traffic Engineer:

1. Remove condition #4 in the TRC staff report
2. A traffic study will be needed to determine the need for a left turn lane on Fairview Road. If the turn lane is required it will be the responsibility of the developer to provide this improvement.
3. Provide a right-of-way for the emergency access road.

At their October 4, 2005, meeting the Planning & Zoning Commission reviewed the proposed site plan and recommended approval with the following conditions:

1. The project is to meet all outstanding TRC conditions
2. The conditions of affordability be worked out between City staff and the applicant and reviewed by the City Attorney's office for legal sufficiency.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety. In the event that federal or City funds are used to support the affordable housing component, an Environmental Review Record (ERR) would have to be completed. Of particular concern to staff is the close proximity of residential units to substantial noise producers and the potential for environmental injustice as a result of excessive noise. There are active Norfolk Southern railroad lines in proximity to the project area (north and south) with one of the two lines running along the northern property boundary and within 100 feet of a number of proposed units. In addition, residents already living in the area have reported noise as the result of steam release from the industrial activity on the Slosman property (once a week for 30-45 minutes). This project is proposed to be constructed with private funds and would not require an ERR. The Planning & Zoning Commission did not require noise abatement measures as a condition of this project however; staff continues to have concern over this issue and would like to note that this project could be conditioned to require review and mitigation measures comparable to those normally required for a publicly funded project.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The majority of the project area has an average natural slope of over 15% which is not unusual for Asheville. A revised grading plan shows a significant amount of clearing and grading that would be required for a project of this size and layout. As a result of the revised grading plan, additional grading and retaining wall information has been supplied

showing removal of 80,000 cubic yards of material from the site and a need for over 2500 linear feet of retaining wall. Approximately 1000 linear feet will be over 20' tall, 500 linear feet will be between 8-19', with the balance of the walls being under 8' tall. During the Planning & Zoning Commission meeting, the landscape architect for the project indicated that extent of retaining walls shown could be reduced considerably if excess dirt from the site could be removed (230,000 additional cubic yards removed could reduce the height of the walls by 50%). Despite the potential reduction in retaining walls, staff remains concerned over the extent of the clearing, grading, & retaining wall particularly given concerns raised by the Commission and City Council regarding projects like Campus Crest. Furthermore, as a result of the extensive grading, very little usable open space is provided. 50% of the land area meeting the open space requirement has slopes over 30% and cannot be used actively. The remaining requirement is met with the installation of one basketball court and a small lawn area (to be shared by all 136 units) where the majority is graded to be over 15% (Attachment to City Exhibit 3 – Grading Plan).

Landscape buffers, a small amount of tree preservation along Stoner Road, and some terracing are proposed and will provide some minor mitigation. The extent of clearing, grading, and retaining walls could be further mitigated by reducing the number of units and/or by massing the units in an alternative layout.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   There is a significant amount of literature that describes how "affordable" housing does not negatively impact adjacent property values. Developments of this size in the City do require a homeowner's association that manages the common open space and typically has minimum site standards that control the deterioration that can contribute to a decrease in property values. These will be individually owned units that, historically, inspire care and upkeep. In addition, the higher density development could serve as a buffer/transition area to the existing single family residences that could be impacted by the more intense uses permitted in the CI zoning district.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The surrounding properties are primarily light manufacturing and warehousing/storage uses with significant work traffic. The proposed development will be residential but through its density and activity, will not be out of character/harmony or scale with these uses. Along the majority of the eastern side of the property are small, modest single family homes on small lots (some lots are vacant) located on the opposite side of the right-of-way for Stoner Road. These homes are similar in size and are expected to be harmonious with the proposed development. The only area of concern is a smaller portion of the eastern boundary where there are two moderately sized single family homes on comparatively larger lots. These homes are larger and less typical of the development in the area and are separated from the proposed development by a vacant lot and a 30' Type C buffer required where adjacent to the subject property. It is expected that these lots will not be significantly impacted by the proposed development.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The Asheville City Development Plan 2025(ACDP 2025), through its "Land Use and Transportation" goals and strategies, clearly supports and encourages efforts to provide affordable housing particularly in areas where public transit and alternative modes of transportation are available. In addition, both the *ACDP 2025* and the City's *Sustainable Economic Development Strategic Plan* describe the connection and need for affordable housing to support economic development. Lastly, the *City of Asheville Strategic Operating Plan* describes a number of goals encouraging an increase in the supply of affordable housing through policy/program changes and developer incentives.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

This proposed development is within close proximity to transportation facilities with the Route 12 bus line running regularly down Fairview Road. In addition, there are some infrastructure improvement plans in place for new sidewalk, road resurfacing, and stormwater control that will improve access along this corridor along with improvements that will be part of the proposed development (additional sidewalk, bus shelter, etc.). The project area is also located in clear and close proximity to other major road facilities and interstate connections, service centers, and easily accessed employment centers. Technical review has not revealed any problems for future utility service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The proposed project will include the construction of a new road to provide clear and safe access to the individual units while a second entrance will be provided to help facilitate traffic movement in the event of an emergency. Lastly, preliminary review by the City's Traffic Engineer does not reveal any significant concern over traffic loads generated by a development of this size; however, he is requiring a traffic impact analysis for verification and to determine whether a left turn lane into the development would be required on Fairview Road.

Pros

- Clearly supports City goals to provide affordable housing in appropriately located areas.
- Provides an opportunity for infill residential development on underdeveloped property.

Cons

- High density residential development that will contribute to the traffic load of Fairview Road and Stoner Road.
- A number of proposed units are located within close proximity to a noise sources (Norfolk Southern Railroad & manufacturing business) without noise abatement measures proposed.
- Proposed residential development is located adjacent to commercial industrial zoning whose current land uses could change to a heavier impact over time.
- Will require significant amounts of clearing, grading, and retaining walls to accommodate the proposed density and layout.

Staff feels that the proposed development has many positive aspects and does meet the minimum technical and conditional standards required of a Level III project and Conditional Use Permit. However, staff also recognizes areas of potential improvement and recommends that the Commission utilize the experience gained over the last 15 months in dealing with such projects

as Campus Crest and in directing staff regarding development on steep sites, to carefully consider whether the conditional use permit should be conditioned to mitigate any potential concerns.

Mr. Bob Grasso, land planner, explained some of the differences of the earlier plan compared to this plan, some being, but are not limited to: number of units reduced from 138 to 136, moved units around to accommodate better access to common areas, and improved the emergency gated access in the rear. He further explained the project and how they have worked to minimize the impact to surrounding neighbors. He felt this affordable housing project was needed for the community and urged Council for their support.

Mr. George Morosani said that he owns the property on the other side of the railroad tracks and has agreed to take 80,000 cubic yards of dirt off this developer's property to fill in on his property. He supported this proposed plan.

After rebuttal, Mayor Worley closed the public hearing at 5:37 p.m.

In response to Vice-Mayor Mumpower's concern about traffic, Traffic Engineer Anthony Butzek said that the Traffic Impact Analysis had not been performed yet so at this point we don't have a specific idea of what traffic will be like. There may be some design modifications required at the intersection, such as the addition of a turn lane, but other than that one intersection, he believed that the roadway system will handle the additional traffic without any problem. Regarding the access, the City always tries to ensure multiple points of access to a community. In this case, there was concern from neighbors on Stoner Road and for that reason the rear access was modified to be an emergency access. He said that we are not stepping around our normal criteria on this emergency access only. Again, he would prefer to have multiple access points, but one access would work.

There was a brief discussion about the noise from the railroad (City Exhibit 4 – Sketch regarding number of feet from train to proposed units). Ms. Tuch explained that it is possible to require additional measures to help mitigate that noise.

Councilman Newman questioned the buffering around the project. Ms. Tuch responded that the only condition we have as far as tree preservation is in the area along Stoner Road. Staff is not recommending a similar buffer on Fairview Road because it appears to be impossible to achieve given this particular layout.

In response to Vice-Mayor Mumpower, Ms. Tuch said that the two-bedroom unit would be $120,000 and a three-bedroom unit would be $135,000.

In response to Vice-Mayor Mumpower, Ms. Tuch said that in the previous application Council dedicated $50,000 of Housing Trust Fund money to help relieve the burden of development costs from the developer for improvements to Fairview Road, if necessary. Again, that was part of the earlier application, which has expired. Ms. Tuch also noted that the emergency access road does have a 30-foot right-of-way associated with it, so in the event that traffic becomes an issue, that right-of-way can be opened to public standards.

There was a brief discussion of open space, with Ms. Tuch stating that it does meet the minimum technical requirements. She could not see any creative ideas to help with open space with the proposed layout.

Upon request of Councilman Newman, Mr. Grasso explained their erosion control plan (City Exhibit 5).

Planning & Development Director Scott Shuford explained that staff tries to make sure that there is adequate open space for suburban-type projects. He said that Planning staff will be bringing forward for Council consideration an ordinance to strengthen our open space requirements.

Mr. Shuford also asked for City Council to clarify, should Council decide to move forward with this project, whether (1) Council is still interested in allocating any funds for infrastructure improvements; and (2) also with the possibility of opening up the emergency access road, that at least we leave open the possibility for requiring that to be converted to a full access at some point in the future, otherwise what will happen is we will determine a need to open that roadway up and be precluded from doing that by the fact that it is shown as an emergency access only on the site plan.

In response to Councilman Newman regarding the affordability aspect, City Attorney Oast said that to the extent they have gotten some incentives from the Metropolitan Sewerage District (MSD) with regard to the provision of some infrastructure based on the affordable housing component, that is one condition that they will have to continue to fulfill under the MSD criteria. In the conditional use process, the best way that we have of controlling affordability is allowing the project to be designed so that the units will be affordable. Based on their representation we can put a condition in that the units be marketed within certain ranges because beyond the point of initial sale it is difficult to guarantee that the units remain affordable.

Mr. Doug Hill, partner in the development, responded to various questions from Council. He said that he did not have any problem with the condition that the units be marketed within certain ranges. The only things that would concern them would be conditions that would raise the cost per unit of the project. He said there were some things they can do to reduce the noise on a unit basis like additional insulation in the walls. He explained the open space in the center is a different grade and also felt that once the homeowners association gets established they may wish to develop the basketball court space into something else.

Councilman Davis moved to adopt Ordinance No. 3293, granting a conditional use permit for Biltmore Point, located on Fairview Road, subject to the following conditions: (1) All outstanding TRC conditions are met; (2) The conditions of affordability be worked out between City staff and the applicant and reviewed by the City Attorney's office for legal sufficiency; (3) Work with City staff to address the buffer along Fairview Road in lieu of an undisturbed area; (4) A traffic study be performed to determine the need for a left turn lane on Fairview Road. If the turn lane is required it will be the responsibility of the developer to provide this improvement; (5) Provide a right-of-way for the emergency access road to be converted into a full access in the future if the Traffic Impact Analysis shows a need; and (6) The sidewalk on Stoner Road be waived. This motion was seconded by Councilwoman Jones.

Councilman Newman was concerned about what happens if after the buildout, the developer can't market the units in the affordability range. City Attorney Oast said that the City can (1) modify the conditional use permit; (2) issue fines and get some kind of financial payback as a result of violating the conditional use permit; or (3) revoke their conditional use permit.

In response to Councilwoman Bellamy, Mr. Shuford said that the applicants will not perform the Traffic Impact Analysis until further along in the project, however, City staff will update Council once we know what the Traffic Impact Analysis shows.

Vice-Mayor Mumpower explained why he would not be able to support the project because he felt Council is bending their rules for this project.

Upon inquiry of Councilman Dunn, Mr. Butzek said that from a technical standpoint, it would be a positive to the development to have two access points. In this case staff felt that if the Traffic Impact Analysis showed traffic could be accommodated from one access, with an emergency access with the option of opening it up in the future, then one access would suffice.

The motion made by Councilman Davis and seconded by Councilwoman Jones carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 286

C. PUBLIC HEARING TO CONSIDER REZONING NINE PROPERTIES ON COUNTRY GARDEN LANE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/MANUFACTURED HOUSING OVERLAY

ORDINANCE NO. 3294 - ORDINANCE TO REZONE NINE PROPERTIES ON COUNTRY GARDEN LANE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/MANUFACTURED HOUSING OVERLAY

Mayor Worley opened the public hearing at 6:41 p.m.

Development Services Director Joe Heard said that this is the consideration of an ordinance to rezone 9 properties on Country Garden Lane from RM-8 Residential Multi-Family Medium Density District to RM-8 Residential Multi-Family Medium Density District/Manufactured Housing (MH) Overlay. This public hearing was advertised on October 14 and 21, 2005.

Mr. Heard said that of the nine lots within the subject area, six of the parcels presently contain manufactured homes and another parcel contains a modular home. The residences appear to be newer models and kept in good condition. In fact, at least three of the manufactured homes are set on permanent foundations similar to a modular home. The proposed Manufactured Housing Overlay zone is requested to allow the remaining parcels to be developed in a manner similar to the rest of the neighborhood. Several adjoining residential neighborhoods to the west already have a manufactured home overly and contain a mixture of mobile, manufactured, and stick-built homes.

Pros

- Several, larger residential neighborhoods abutting the subject area already have MH Overlay zoning.
- Placement of the MH Overlay District would bring many existing uses into conformity and allow for compatible future infill development.
- With many existing manufactured and mobile homes in the surrounding area, adding the MH Overlay District would allow more affordable housing development in an appropriate area.

Cons

- Having the MH Overlay zoning would potentially discourage more substantial investment in this area of the community.

City staff recommends approval of the proposed Manufactured Home Overlay District.

Ms. Clarissa Cornette, resident on Country Garden Lane, spoke in support of this rezoning request.

Mayor Worley closed the public hearing at 6:47 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3294. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 292

At 6:48 p.m., Mayor Worley announced a short recess.

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED ON MARDELL CIRCLE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED CHILDCARE CENTER

Ms. Patsy Brison, attorney representing the applicant, said that her client has spent some time reviewing the Planning & Zoning Commission report and the City's staff report, in addition to spending a lot of time talking with the neighborhood, and they feel it might be helpful to remand this issue back to the Planning & Zoning Commission. Therefore, she asked Council to consider a motion to remand this matter back to the Planning & Zoning Commission in order for them to address some of the issues raised by the neighborhood and possibly adjust the project.

City Attorney Oast said that a valid protest petition has been received. If this matter is remanded back to the Planning & Zoning Commission, a new protest petition would have to be filed.

Vice-Mayor Mumpower moved to remand this issue back to the Planning & Zoning Commission. This motion was seconded by Councilman Newman.

The following individuals spoke in favor of continuing the hearing at this meeting and against remanding this matter back to the Planning & Zoning Commission for various reasons, some being, but are not limited to: applicant also requested postponement at the Planning & Zoning public hearing; postponement is an attempt to wear down residents opposed to rezoning; difficult to keep community organized; applicant has already met with community and no effort has been made to look at their point of view; nothing will change at the Planning and Zoning Commission because there is nothing to negotiate; and neighborhood has been inconvenienced by attending this meeting and now a postponement has been requested:

Mr. Jeff Mackey, resident on Bryant Street
Ms. Sharon Martin, resident on Mardell Circle
Mr. Rick Sculthorp
Ms. Evelyn Baker, area property owner
Mr. Ted Baker
Mr. Andy Askew, resident on Bryant Street
Ms. Gwendolyn Barton, area property owner
A resident on Mardell Circle
Ms. Laurie Newman, resident on Bryant Street

A resident who lives on Burton Street felt that this matter should be remanded back to the Planning & Zoning Commission. She said that she has a petition containing 250 names of people who are in support of the rezoning. She felt that child care is important to the community and

postponing the matter will give the applicant an opportunity to look into the traffic issue and present correct information to Council.

Vice-Mayor Mumpower said that Council does recognize and understand the inconvenience for the neighborhood, but when you talk about development, it is not a seamless process. He agreed that this dialogue should have occurred before it came to Council, but for Council to make a reasonable effort and allow the applicant to address the problems is the responsible thing to do.

The motion made by Vice-Mayor Mumpower and seconded by Councilman Newman carried unanimously.

E. PUBLIC HEARING TO CONSIDER REZONING SEVERAL PROPERTIES ALONG THE WESTERN END OF SARDIS ROAD, LOCATED ON SARDIS ROAD AND SAND HILL ROAD, FROM COMMUNITY BUSINESS II DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3295 - ORDINANCE TO REZONE SEVERAL PROPERTIES ALONG THE WESTERN END OF SARDIS ROAD, LOCATED ON SARDIS ROAD AND SAND HILL ROAD, FROM COMMUNITY BUSINESS II DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Worley opened the public hearing at 7:44 p.m.

Development Services Director Joe Heard said that this is the consideration of an ordinance to rezone several properties along the western end of Sardis Road, located on Sardis Road and Sand Hill Road, from Community Business II District to Commercial Industrial District. This public hearing was advertised on October 14 and 21, 2005.

Mr. Heard said that on May 10, 2005, Asheville City Council evaluated a petition submitted by property owners along Sardis Road and authorized Planning & Development staff to conduct a zoning study of the area. He then reviewed the zoning study. He said that staff evaluated several potential alternatives for zoning and has proposed a mixture of Commercial Industrial (CI) and Community Business II (CB-II) zoning that accommodates a variety of needs in the area.

Pros

- This proposal seems to strike a balance between the provision for larger, more regional retail and services uses and community-scaled shopping and services to serve the surrounding neighborhoods.
- The CB-II district would provide an adequate space for development of a shopping area to serve the surrounding community.
- Development of the CB-II zoned area would be at a smaller, community scale with greater pedestrian orientation.
- Placement of the CI zoning would bring the existing uses into conformity and allow for the compatible future infill development.

Cons

- Developed uses within the remaining CB-II area, including the gas station/convenience store and car wash, would be allowed uses, but are developed in a nonconforming manner (parking in front of building, etc.).
- The CI zoning designation allows intensive business and industrial development. Light manufacturing, warehousing and wholesale uses are all permitted. The presence of residential uses in adjoining areas could lead to conflicts with these higher intensity uses.

Per the zoning study, staff recommends maintaining the existing CB-II zoning for four parcels located at the intersection of Sardis and Sand Hill Roads and rezoning the remaining parcels in the study area to the CI district for the following reasons:

- Given the previous trends of commercial and industrial development in the study area before zoning was introduced in 2001, CI zoning would be consistent with the recent development of the area along Sardis Road.
- CI zoning along this stretch of Sardis Road would bring many nonconforming uses in the study area into conformity while providing for compatible infill development in the future.
- The Sardis Road and Sand Hill intersection is in a stronger location for CB-II zoning because of heavier traffic in this area, as well as residential development in relatively close proximity to the intersection. Zoning for CB-II on both sides of the intersection would encourage the development of a community-oriented shopping/service area in the future.

Mr. Paul Smith spoke in support of this rezoning request.

Mr. Mike Fryar questioned why three of the properties were not zoned Commercial Business II District.

Mayor Worley closed the public hearing at 7:56 p.m.

There was considerable discussion about the requirements and application of the Commercial Business II District in this rezoning request as well as for the entire City.

Councilman Davis felt the area was rural and will have the suburban feel for many years to come. Therefore, he felt the entire study area should be zoned Community Industrial District.

Councilwoman Jones stated that Council asked our staff to study this area and their recommendation is for four lots to remain Community Business II District. In addition, the Planning & Zoning Commission has unanimously agreed. She then moved to support staff's recommendation to rezone 20 parcels along the western end of Sardis Road to Commercial Industrial District and retain the existing Commercial Business II District for 4 parcels. This motion was seconded by Councilman Newman and failed on a 3-4 vote, with Mayor Worley, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Davis and Councilman Dunn voting "no."

There was a discussion about land planning in the extraterritorial jurisdiction area.

Councilman Davis moved to approve rezoning the 24 parcels along the western end of Sardis Road to Commercial Industrial District. This motion was seconded by Councilman Dunn and carried on a 5-2 vote, with Councilwoman Jones and Councilman Newman voting "no."

As a result of Council's discussion, City Manager Jackson said that it would be appropriate for a Planning & Development worksession to revisit the 2025 vision, annexation, goals and objectives, development patterns and standards, and where Council wants to apply these zoning designations. These topics also lend themselves well to developing the alternatives, seeking some public input on the vision and then the development patterns and land use regulations Council wants to put in place. We may talk about a more significant process than just a worksession presentation, but will lay something out for Council in term of what kind of report and presentation to Council and perhaps even some dialogue involving not only the community but also the Planning & Zoning Commission. We will review some of the process ideas after the first of the year.

Councilman Newman said that if the City is going to do land use planning, then Council needs to hear and understand from our Planning & Zoning Commission and Planning staff about how growth and development is occurring around the City and what different choices would accomplish.

ORDINANCE BOOK NO. 22 – PAGE 295

F. PUBLIC HEARING TO AMEND SPECIFIC DEADLINE REQUIREMENTS FOR REZONING APPLICATIONS AND ZONING STUDY PETITIONS

ORDINANCE NO. 3296 - ORDINANCE TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO AMEND SPECIFIC DEADLINE REQUIREMENTS FOR REZONING APPLICATIONS AND ZONING STUDY PETITIONS

Mayor Worley opened the public hearing at 8:34 p.m.

Mr. Joe Heard, Development Services Director, said that this is the consideration of this amendment to the Unified Development Ordinance (UDO) for the purpose of amending specific deadline requirements for rezoning applications and zoning study petitions. This public hearing was advertised on October 14 and 21, 2005.

Presently, the UDO outlines a deadline of 9:00 a.m. on the first Monday of the month for the submittal of rezoning applications and zoning study petitions. This day/time conflicts with the application deadline for all other types of applications (conditional use permits, Level II/III projects, etc.). This amendment is proposed by staff to set a consistent deadline for the types of larger scale applications heard by the Technical Review Committee, Planning & Zoning Commission, and/or City Council.

Pro –

- The amendment would make application deadlines consistent for all larger development applications.

Con –

- Moves the currently stated deadline 5.5 working hours earlier.

The Planning and Zoning Commission recommended approval of these code amendments on September 7, 2005, by a unanimous vote of 6-0.

City staff recommends City Council adopt the ordinance to amend specific deadline requirements for rezoning applications and zoning study petitions.

Mayor Worley closed the public hearing at 8:36 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3296. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 298

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 05-201- RESOLUTION ACCEPTING THE DEED OF GIFT FOR THE COLONEL ROBERT K. MORGAN MEMORIAL PUBLIC ART ENTITLED "ASHEVILLE DEPARTURE"

Mr. David Mitchell, Cultural Arts Supervisor, said that this is the consideration of a resolution accepting an unrestricted gift to the Public Art Collection of the City of Asheville.

On August 23, 2005, the Public Art Board unanimously approved the donation of artwork for the Colonel Robert Knight Morgan Memorial entitled "Asheville Departure." The value of the artwork is $200,000 and will be located between City Hall and the Buncombe County Courthouse, which is the actual location of the Asheville Departure of Colonel Morgan and the Memphis Belle. This is a Deed of Gift to the City of Asheville from the Neal Hanks Sr. Community Foundation, Beverly Hanks & Associates and other community contributors.

As per the requirements of the Public Art Master Plan, a "Public Input Meeting" was held on October 3, 2005, to ascertain feedback from the community. The artwork was received with overwhelming approval and support from the community. The Public Art Board, collaborating artists and the architects from the Pack Square Conservancy, will work together to insure the artwork will be integrated into the design of the new City-County Plaza Pack Square Park.

PROS:

- Commemorates a decorated American war hero who is a native of Asheville
- Recognizes the exceptional talents and legendary status of Colonel Morgan as the pilot of the Memphis Belle
- Educates the community and visitors about the famous and unbelievable flight between City Hall and the County Courthouse
- Enhances the Public Art Collection by including a memorial of this local modern American war hero
- Encourages involvement of local businesses and corporations in the city's public art program and its process

CONS:

- Integrating the design of the Colonel Robert Knight Morgan Memorial in the overall design of the new Pack Square Park
- Cost of the memorial projected to be over $200,000

This action is in keeping with the City of Asheville Strategic Plan by contributing to the (1) "Livability" of Asheville by recounting an uplifting experience in the life of the City of Asheville; (2) "Sense of Place" of Asheville and the need to educate citizens and visitors of its significant history and contributions of local citizens through the arts; (3) "Vibrancy" of Asheville's art scene and its commitment to the development and enhancement of the public art collection; (4) "Participation" of Asheville citizens in the pubic art process as programmatic and financial contributors; and (5) "Heritage & Art" through the significant historical account of that famous flight in Asheville and the need to celebrate and memorialize a local hero.

City staff recommends City Council approve the unrestricted gift of the Colonel Robert K. Morgan Memorial "Asheville Departure" to the Public Art Collection of the City of Asheville.

Ms. Dana Irwin, member of the Public Art Board, explained how she designed the memorial. The symbolic columns are representative of two municipal buildings. The plan (B-17) will be angled at 60 degrees between the two columns, with wind powered propellers. There will be an information plaque/artwork suspended between two columns. Metal propellers inlayed in ground level base structure with cement roundabout viewing area. The dimensions will be (1) 20 feet high (10 feet wide and 8 feet deep); (2) columns will be pink/grey granite; (3) plane will be cast aluminum; (4) plaque will be bronze; and (5) base will be concrete with inlayed metal propellers.

Mr. Steven Duncan, Chair of the Neal Hanks Sr. Community Foundation, discussed how the funding focus will be private and nature of the gift.

In response to Councilman Dunn, Mr. Mitchell said that a significant contribution of marble for the Memphis Belle and the Col. Robert K. Morgan Memorial will come from the Asheville Regional Airport.

Councilwoman Jones would support allocating funds from the Public Art Board allocation for this project, given the historical nature of the Memorial and its location.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-201. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 256

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced current vacancies on the Alcoholic Beverage Control Board and the Citizens-Police Advisory Committee.

Vice-Mayor Mumpower thanked Housing Authority staff, volunteers and residents for their work at Altamont Apartments for fixing and cleaning their game room.

The following claims were received by the City of Asheville during the period of October 7-20, 2005: Loren Hord II (Transit Services), Loraine Wright (Transit Services), Chris Eby (Police), Peter Pardee (Transit Services), Hertz Rental (Parks & Recreation), Sherif Bytyqi (Sanitation), Phil Stubblefield (Sanitation), Dana Alexander (Transit Services), Kimbra Waters (Transit Services), Avail Med Prop (Water), and BellSouth (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke to City Council about the need for a quality management system.

Mr. Mike Fryar spoke about the finances of the construction at Pack Square, annexation, and affordable housing.

At this time, 8:52, Mayor Worley left the meeting and did not return.

Mr. Joe Minicozzi and Mr. Reid Thompson spoke about the problems they are encountering on Maxwell Street from Greenlife Grocery and their alleged violations. City Attorney Oast advised City Council that they are in litigation on this matter, and provided Council with a general response regarding the loading docks. He then said that he has sent a letter to Ms. Patsy Brison, attorney for Greenlife Grocery, today and a recommendation in the letter was that a group be formed where an on-going dialogue of these kinds of issues could take place. He offered to assist in that process as much as the City can.

VIII. ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 9:14 p.m.

Magdalene Burleson
CITY CLERK

Charles R. Hadley
MAYOR

Wednesday – November 9, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding (left meeting at 7:56 p.m.); Vice-Mayor R. Carl Mumpower (left meeting at 7:52 p.m.); Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Owen High School ROTC led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the invocation.

ADDITIONS TO THE AGENDA

At the request of City Manager Jackson and upon consensus of Council, a matter regarding taxicabs and an update about the stormwater services program was added to the "Other Business" section.

I. PROCLAMATIONS:

A. NATURE CENTER ACCREDITATION

Mayor Worley recognized the Nature Center's accreditation from the American Zoo and Aquarium Association. Manager of the Nature Center Pat Lance was pleased to accept the Accreditation Award.

B. NORTH CAROLINA AMATEUR SOFTBALL ASSOCIATION HALL OF FAME

Mayor Worley recognized Charlie Bullman's recent induction into the North Carolina Amateur Softball Association Hall of Fame. Mayor Worley said that Mr. Bullman is a longtime volunteer and former Recreation Board member.

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda Items "B", "C", "E" and "F" be removed from the Consent Agenda for further discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 25, 2005

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE NC STATE RURAL ECONOMIC DEVELOPMENT CENTER FOR A GRANT FOR THE IMPLEMENTATION OF THE REDEVELOPMENT PLAN FOR THE BILTMORE VILLAGE, EAST SWANNANOA RIVER AND FRENCH BROAD RIVER AREAS

This item was removed from the Consent Agenda for an individual discussion.

C. BUDGET AMENDMENT FOR A GRANT FOR THE IMPLEMENTATION OF THE REDEVELOPMENT PLAN FOR THE BILTMORE VILLAGE, EAST SWANNANOA RIVER AND FRENCH BROAD RIVER AREAS

This item was removed from the Consent Agenda for an individual discussion.

D. RESOLUTION NO. 05-203 - RESOLUTION ACCEPTING A PORTION OF BLACK OAK DRIVE AND WEST BLACK OAK DRIVE FOR PUBLIC MAINTENANCE

Summary: The consideration of a resolution to accept a portion of Black Oak Drive and West Black Oak Drive in North Asheville for public maintenance.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Black Oak Drive and West Black Oak Drive are located in an established subdivision called "The Forest." The developer constructed the streets as private streets. The neighborhood has worked with the City to have these streets maintained by the City. The neighborhood association has recently contracted to have the streets repaired. The Forest is an established neighborhood. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards. This portion of Black Oak Drive has an average paved width of 19.3 feet and a length of 0.28 miles. West Black Oak Drive has an average paved width of 18.6 feet and a length of 0.08 miles.

Following City Council's approval of this resolution, this portion of Black Oak Drive and all of West Oak Drive will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pro:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept this portion of Black Oak Drive and West Black Oak Drive for public maintenance.

RESOLUTION BOOK NO. 29 – PAGE 252

E. RESOLUTION AUTHORIZING THE ISSUANCE OF NOT TO EXCEED $42,000,000 WATER SYSTEM REFUNDING REVENUE BONDS OF THE CITY OF ASHEVILLE, N.C.

This item was removed from the Consent Agenda for an individual discussion.

F. RESOLUTION AUTHORIZING THE APPROVAL, EXECUTION AND DELIVERY OF VARIOUS DOCUMENTS IN CONNECTION WITH THE ISSUANCE OF CITY OF ASHEVILLE, N.C., WATER SYSTEM REFUNDING REVENUE BONDS; PROVIDING FOR THE SALE OF THE BONDS AND SETTING THE TERMS AND CONDITIONS UPON WHICH THE BONDS ARE SOLD

This item was removed from the Consent Agenda for an individual discussion.

G. RESOLUTION NO. 05-206 - RESOLUTION FIXING A DATE OF PUBLIC HEARING FOR THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED OFF OF PATTON MOUNTAIN ROAD

Summary: The consideration of a resolution fixing the date of a public hearing on November 22, 2005, for property located off of Patton Mountain Road.

William J. Kimpton, President, on behalf of Ranch 19 Corp., has petitioned the City of Asheville for the annexation of portions of two lots owned by the corporation and located at Patton Mountain Road just off of the intersection of Patton Mountain with Griffing Boulevard. The PIN numbers of the lots involved are 9740.16-93-6462 and 9740.16-83-8119. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N.C. Gen. Stat. sec. 160A-31.

Pursuant to N.C. Gen. Stat. sec. 160A-31, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

The next steps in this process are for City Council to fix the date for the public hearing on this matter. It is suggested that the annexation be effective one week following the date of adoption of the ordinance if City Council decides to proceed with this request.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Allows the City to review and approve future plans for this parcel as it is developed.
- Assists the developer of the property in achieving his desired development plan under one jurisdictional review.

Con:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the resolution setting the date for a public hearing on the annexation petition.

RESOLUTION BOOK NO. 29 – PAGE 260

H. ORDINANCE NO. 3298 - BUDGET AMENDMENT FOR REIMBURSEMENT FROM A DEMOLITION LIEN PLACED ON 56 BURTON STREET

Summary: The consideration of a budget amendment, in the amount of $9,565, for reimbursement from a demolition lien placed on 56 Burton Place.

The City of Asheville Building Safety Department, Housing Code Division, followed the City and State process for demolition of the structure located at 56 Burton Place, PIN No. 9638.10-45-4228, due to the unsafe and dilapidated condition. The Demolition Ordinance No. 2174 was adopted on January 24, 1995. The City of Asheville removed asbestos from the structure as required prior to demolition. The demolition was performed from March 6-13, 1995, by the City of Asheville Public Works Department. The Demolition Lien was filed on March 13,

1995, in Deed Book 1840 at Page 410. The budget amendment will provide some funding for additional demolitions.

Pros:
- Reimburse City for work conducted over ten years prior.
- Establishes some funding for future demolitions.

Con: None noted.

This action complies with the Strategic Operating Plan in that Asheville City Council has directed staff to work diligently to provide sufficient, safe, and affordable housing for Asheville residents. All neighborhoods should provide a safe and nurturing environment within which to raise a family. The section of the Strategic Operating Plan on Partnerships to Improve Critical Services & Infrastructure directs staff to work for providing the quality of life within the mountain region: Goal #3 – Diversified and broadened revenue sources – Develop alternate revenue sources that are available to address local needs; Objective B – Reduce reliance on property tax as a revenue source by incrementally adjusting and/or establishing new fess and charges based on City Council policy;

City staff recommends City Council approve the budget amendment to receive the reimbursement for the demolition lien and provide funding for additional demolitions.

ORDINANCE BOOK NO. 22 – PAGE 301

I. **ORDINANCE NO. 3299 - ORDINANCE AMENDING THE STREET NAME AND ADDRESS REQUIREMENTS**

Summary: The consideration of an amendment to the Street Name and Address Requirements to allow the Emergency Address Coordinator to approve street names that meet the requirements within the ordinance.

Council approved the additional position of Emergency Address Coordinator in the Fire and Rescue Department within the Fiscal Year budget 2004-2005. This position was requested in cooperation with seven other City departments to facilitate address assignments for the Permit Center. The changes proposed for Chapter 16, Streets, Sidewalks and other Public Places, Article VI Street Name and Address Requirements, in the Code of Ordinances for the City of Asheville would reflect this position as responsible for naming and addressing public and private streets within the City of Asheville. The position will coordinate names with Buncombe County to prevent duplication and increase public response effectiveness. The change will allow the Emergency Address Coordinator to approve street names that meet the requirements within the Ordinance. Existing street names that have a proposal to change the name will continue to be placed on Council's agenda. The proposed changes will facilitate faster approval of street names and response times to the applicant.

Pros:
- Faster approval times for new street names.
- Will reflect actual title of position responsible for street naming and addressing

Con:
- Council will not be involved with the naming of new streets within the City of Asheville.

This action complies with the Strategic Operating Plan in that the Asheville City Council has directed staff to work diligently to promote efficiency in city regulations while offering

incentives and practical planning to achieve these goals through the City's Strategic Operating Plan section on Economic Development: Goal #2 – An efficient and economical permitting process; Objective A – Improve the plan review process by enhancing effectiveness and customer service; Task 3 – Re-engineer staff for departments collaborating on plan review.

City staff recommends City Council approve the amendment to the Code of Ordinances for the City of Asheville to allow the Emergency Address Coordinator to approve street names that meet the requirements within the ordinance.

ORDINANCE BOOK NO. 22 – PAGE 303

J. RESOLUTION NO. 05-207 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF A PORTION OF REAL PROPERTY LOCATED ON WEST CHESTNUT STREET FOR A PORTION OF REAL PROPERTY LOCATED ON MAGNOLIA AVENUE

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of a portion of real property located on West Chestnut Street for a portion of real property located on Magnolia Avenue.

The City and Allen & Susan Roderick (Rodericks) have negotiated an exchange of a portion of City owned real property on West Chestnut Street for a portion of Rodericks property at 8 Magnolia Avenue that will allow an improved course for the Reed Creek Greenway Trail.

The proposed location of the Reed Creek Greenway Trail is just west of Broadway and borders Reed Creek for most of its length. Between West Chestnut Street and Magnolia Avenue there is a "pinch point" that is created by the proximity of the Roderick property to Reed Creek forcing the trail closer to the top of the creek bank where the topography poses a challenge for construction. The proposed exchange of property will allow the trail to follow a less constrictive path.

The City's property (PIN 9649.14-23-5411) is on the north side of West Chestnut Street about 100' west of its intersection with Broadway, zoned Neighborhood Corridor District (NCD) and comprising 0.24 acre±. The portion to be exchanged is a 0.05 acre± parcel at the rear of the City's lot that adjoins Rodericks' property. This part of the property due to its configuration is not particularly useful to the greenway design.

The property owned by Rodericks (PIN 9649.13-23-4418) at 8 Magnolia Avenue is on the south side of the street about 100' west of its intersection with Broadway. It comprises 0.24 acre± and is zoned NCD. The portion to be exchanged is a 0.05 acre± parcel located at the rear of the property adjoining the City's property.

The value of each parcel was determined by reviewing the tax assessment for the whole property and extrapolating a value for the cut out portion based on the per acre value of the whole. Both whole lots are 0.024 acre± and have an assessed tax value for land in the amount of $64,000. That reflects a per acre value of about $267,000. Both cut out parcels are 0.05 acre± which calculates to about $13,350.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will be revenue neutral returning property to the tax rolls in exchange for property being taken off the tax rolls.
- It is consistent with the greenway master plan.

- It will provide a better less constrictive path for the greenway trail.
- It is an efficient use of resources both public and private, because the City will own property more functional to the greenway and un-needed property will return to private ownership.

There are no negative aspects to this proposal.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development and Parks & Recreation staff recommend adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of a portion of real property located on West Chestnut Street for a portion of real property located on Magnolia Avenue.

RESOLUTION BOOK NO. 29 - PAGE 265

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 05-202 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE NC STATE RURAL ECONOMIC DEVELOPMENT CENTER FOR A GRANT FOR THE IMPLEMENTATION OF THE REDEVELOPMENT PLAN FOR THE BILTMORE VILLAGE, EAST SWANNANOA RIVER AND FRENCH BROAD RIVER AREAS

Summary: The consideration of a (1) resolution authorizing the City Manager to enter into an agreement with the N.C. State Rural Economic Development Center, for a grant to implement prioritized components of the Redevelopment Plan for the Biltmore Village area, East Swannanoa River area and the French Broad River area, and the accompanying budget amendment, in the amount of $700,000.

With City Council approval in July, 2005, the City of Asheville Planning and Development Department requested and received $40,000 from the North Carolina State Rural Economic Development Center to prepare redevelopment plans for the three areas. In response to last fall's flooding, the General Assembly provided grant funding, through the Center, for preparation of redevelopment plans for communities that suffered flood damage, and also provided funding for the implementation of these plans. The City was successful in obtaining additional grant funds in the amount of $700,000 for future implementation of redevelopment plans. These implementation measures include: loan program for floodproofing historically significant properties in Biltmore Village; purchase of vacant properties in the floodway; traffic circulation and streetscaping improvements in Biltmore Village; and consulting assistance with project development financing.

Pros:

- Allows us to pursue the redevelopment plan for each of these areas.
- Provides a funding source for plan implementation.

Cons: None noted.

City staff recommends City Council adopt the resolution authorizing the City to enter into the redevelopment planning grant agreement with the Rural Economic Development Center, and to also approve the budget amendment, in the amount of $700,000.

RESOLUTION BOOK NO. 20 – PAGE 251

ORDINANCE NO. 3297 - BUDGET AMENDMENT FOR A GRANT FOR THE IMPLEMENTATION OF THE REDEVELOPMENT PLAN FOR THE BILTMORE VILLAGE, EAST SWANNANOA RIVER AND FRENCH BROAD RIVER AREAS

Summary: See above item.

ORDINANCE BOOK NO. 22 – PAGE 299

RESOLUTION NO. 05-204 - RESOLUTION AUTHORIZING THE ISSUANCE OF NOT TO EXCEED $42,000,000 WATER SYSTEM REFUNDING REVENUE BONDS OF THE CITY OF ASHEVILLE, N.C.

Summary: The consideration of (1) Bond Order authorizing the Issuance of Not to Exceed $42,000,000 Water System Refunding Revenue Bonds of the City of Asheville, North Carolina; and (2) Resolution authorizing the approval, execution and delivery of various documents in connection with the issuance of City of Asheville, North Carolina Water System Refunding Revenue Bonds; providing for the sale of the bonds and setting the terms and conditions upon which the bonds are sold.

City Council has previously adopted a resolution directing that actions be initiated to enable the issues of Water System Refunding Revenue Bonds:

The Bond Order provides the following:

- In order to raise the money required to refund the Refunded Bonds, the 2005 bonds are authorized by City Council and shall be issued pursuant to North Carolina General Statues, Section 159-80;
- The principal amount of the 2005 bonds shall not exceed $42,000,000;
- The 2005 bonds shall be paid solely from the revenues from the operation of the water system; NOT from the general funds, credit or taxing powers of the City;
- The proceeds from the sale of the 2005 Bonds shall be deposited in accordance with the Series Indenture; and
- The Bond order shall be effective upon adoption.

The resolution for the sale of bonds provides the following:

- Approves the issuance of 2005 refunding bonds in a principal amount not to exceed $42,000,000;
- Approves, confirms and incorporates by reference the provisions of the General Indenture and Series Indenture;

- Stipulate that the bonds shall be special obligations of the City and shall not be payable from the general funds of the City;
- Authorizes and directs the Mayor, City Manager, City Clerk and Chief Financial Officer to execute and deliver the Series Indenture and do all things necessary to issuance of the bonds and to carry out and comply with the Series Indenture;
- Approves the form and content of the Purchase Contract and stipulates that the bonds will be sold to the underwriters pursuant to the terms of the Purchase Contract; and
- Authorizes and approves the form and content of the Preliminary Official Statement and Official Statement (to be dated on or about November 1, 2005) and their use by the underwriters in the sale of the bonds.

Pro:

- Expected total debt service savings based on current market conditions is $3.4 million. Actual savings level will be determined on the date the bonds are sold which is scheduled for November 15th.

Con: None noted.

City staff recommends City Council adopt (1) Bond Order authorizing the Issuance of Not to Exceed $42,000,000 Water System Refunding Revenue Bonds of the City of Asheville, North Carolina; and (2) Resolution authorizing the approval, execution and delivery of various documents in connection with the issuance of City of Asheville, North Carolina Water System Refunding Revenue Bonds; providing for the sale of the bonds and setting the terms and conditions upon which the bonds are sold.

RESOLUTION BOOK NO. 29 - PAGE 254

RESOLUTION NO. 05-205- RESOLUTION AUTHORIZING THE APPROVAL, EXECUTION AND DELIVERY OF VARIOUS DOCUMENTS IN CONNECTION WITH THE ISSUANCE OF CITY OF ASHEVILLE, N.C., WATER SYSTEM REFUNDING REVENUE BONDS; PROVIDING FOR THE SALE OF THE BONDS AND SETTING THE TERMS AND CONDITIONS UPON WHICH THE BONDS ARE SOLD

Summary: See above item.

RESOLUTION BOOK NO. 29 – PAGE 256

After City staff responded to questions from Councilwoman Bellamy, she moved for the adoption of Resolution Nos. 05-202, 05-204, and 05-205 and Ordinance No. 3297. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO ZONE 75 LONG SHOALS ROAD TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 3300 - ORDINANCE TO ZONE 75 LONG SHOALS ROAD TO COMMUNITY BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 5:17 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to initially zone 75 Long Shoals Road to Community Business II District. This public hearing was advertised on October 28 and November 4, 2005.

Ms. Cogburn said that this initial zoning, as it is taking place in an area that is transitioning due to the widening of Long Shoals Road, supports the land use strategy found in the City's 2025 Plan of identifying appropriate areas for the location of commercial uses. According to the plan, these areas should be adequately served by public services and be easy to access from the interstate highway system.

The City of Asheville recently completed the voluntary annexation of property located at 75 Long Shoals Road. This property is currently in the Limestone Township jurisdiction of Buncombe County and is zoned R-2. The property currently contains one single-family home. The initial zoning process for this property is following the voluntary annexation approved on October 25, 2005, by the Asheville City Council. While this property is in the area of the Long Shoals Road annexation that will become effective on January 1, 2006, the property owner requested the voluntary annexation and zoning so that they may begin development of this property. The owner has requested CBII zoning for this property that is in keeping with the initial zoning studies for the larger annexation area.

Pros

- Supports the 2025 plan goal of identifying appropriate areas for the location of commercial uses.
- Zones properties recently taken into the City of Asheville in consideration of the surrounding zoning and land use.

Cons

- Could be considered by some to be expanding strip commercial development along Long Shoals Road.

At its November 2, 2005, meeting, the Planning & Zoning Commission unanimously recommended zoning the property Community Business II District. Planning staff concurs.

Mayor Worley closed the public hearing at 5:19 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3300. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 306

B. PUBLIC HEARING TO CONSIDER REZONING AND APPLICATION OF A PLANNED UNIT DEVELOPMENT OVERLAY ZONING TO 72 ACRES LOCATED OFF KENILWORTH ROAD AND RESERVOIR ROAD, IDENTIFIED AS KENILWORTH HEIGHTS, FROM THE UNDERLYING ZONING OF RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT; AND MASTER PLAN APPROVAL FOR A 172 UNIT RETIREMENT COMMUNITY WITH RELATED AMENITIES

Mayor Worley said that this public hearing was originally scheduled for August 23, 2005, however, the applicant had requested the hearing be continued until September 13. 2005, in order to have a full Council present for the hearing. That request was granted.

On September 13, 2005, Mr. Albert Sneed requested that this public hearing be continued until September 27, 2005, in order to have a full Council present for the hearing. That request was granted.

On September 27, 2005, Mr. Craig Justus, attorney representing the developers, requested that this public hearing be continued until November 9, 2005, in order to have an opportunity to meet with the attorney who has just been retained by the Kenilworth Neighborhood Association, Planning staff and representatives of the neighborhood to work toward a compromise. That request was granted.

Mayor Worley opened the public hearing at 5:21 p.m.

Ms. Patsy Brison, attorney representing Kenilworth Residents Association, presented City Council with letters dated September 27, 2005, and November 4, 2005, regarding procedural and legal issues; and copies of deeds. In summary, Ms. Brison explained how it is her opinion that the original protest petition is still valid and urged City Council to make that determination as well. Ms. Brison also explained why the provisions of the Mountain Ridge Protection Act should apply to this particular project because there is a protected mountain ridge located within this project. An argument has been made that this protected mountain ridge is not shown on an old, outdated map in the City of Asheville's records. However, it is her opinion that any exclusions from that map of those portions of the ridges which are protected are in error. The text of the City's Code controls. She urged Council to make a determination that this is included within a Protected Mountain Ridge, so the project is prohibited. If Council does not make that determination, she urged Council to instruct City staff to correct all maps to make sure that all the protected mountain ridges within our jurisdiction are clearly shown on every document. Regarding height variances, Ms. Brison said that City Council has established the Board of Adjustment to consider and act upon variances to the City Code, and therefore, variances cannot be considered by City Council. Finally, she explained that the application is invalid because the names on the application are not the owners as shown on the deed.

City Attorney Oast explained his opinion that as to the plan, as revised, the protest petition is not valid.

In response to Councilwoman Bellamy, City Attorney Oast said that if Council remanded this matter back to the Technical Review Committee (TRC), or the Planning & Zoning Commission then a new City Council public hearing date would be established, thus triggering another opportunity for a new protest petition.

City Attorney Oast then responded to the Mountain Ridge Protection Act issue. It was his opinion that the written provisions of the Code shall control over maps and illustrations contained in the Unified Development Ordinance (UDO). He didn't think that means that it controls over maps that are not contained in the UDO. The Mountain Ridge Protection ordinance refers specifically to a map that is not contained in the UDO, but it is referenced in the UDO. That map has been in the Planning Department unchanged since the early 1980's and it does not show this ridge as a protected mountain ridge. Council can direct staff to review the map, but he felt this developer is entitled to rely on the map that is of record.

Councilman Davis recalled that this particular mountain was mentioned in connection with a separate mountain project being considered in 2001-02. He recalled that the Planning Department made a determination that the mapping was correct.

There was considerable discussion about the map of the Mountain Ridge Protection Act and the definition of the adjacent valley floor.

Mr. Craig Justus, attorney representing the developer, said that the law says there are maps available for developers to come in and do due diligence and those maps indicate that this ridge is not part of the protected ridges. He then explained why he felt the protest petition was invalid. Regarding the height variance issue, he said that it was the staff's interpretation that they could look to City Council for a variance. Finally, as to the application being invalid because the ownership changed, he said that this process has gone on for a long time and there was a need to lock in on the property. He urged Council to move ahead with the merits of this project.

Because Councilwoman Bellamy felt that the project has changed significantly, she moved to remand this matter back to the Planning & Zoning Commission for review. This motion was seconded by Councilwoman Jones and failed on a 2-5 vote, with Councilwoman Bellamy and Councilwoman Jones voting "yes," and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis, Councilman Dunn and Councilman Newman voting "no."

Vice-Mayor Mumpower felt that all parties have the law on their side in that the neighbors had the right to file a protest petition and the developer also has the right to revise the boundaries of the project to invalidate the protest petition.

There was considerable discussion regarding the access road and whether or not it needed to be included as part of the project in order to calculate the validity of the protest petition. Ms. Tuch said that staff feels that if that access is removed the plan would not meet the technical standards. City Attorney Oast said that if Council feels the access road is required for the project, then Council would have to turn down the project as presented (because the developer has revised their application to have the PUD overlay only apply to the area with what used to be the Kenilworth Road access being a stub-out).

Mr. Justus urged Council to hear the merits of the project and, if appropriate, condition approval of the project subject to improvements being made off-site.

At 6:29 p.m., Mayor Worley announced a short recess.

City Attorney Oast explained his interpretation of the PUD ordinance and why it was his opinion that Council is supposed to be considering a Master Plan that has been reviewed by the TRC and this one hasn't been. He felt it was up to Council on whether they want to remand this back to the TRC for review or proceed with the hearing. However, he feels that without going through the TRC, there may be a potential legal problem having Council's action invalidated.

Vice-Mayor Mumpower moved to remand this issue back to the Technical Review Committee. This motion was seconded by Councilwoman Bellamy.

Mr. Joe Heard, Director of Development Services, said that, from his understanding of the changes proposed in the Master Plan recently received, it does contain not only the truncating the entrance road discussed, but also within this Plan are a reduction in the improvements to Reservoir Road, as well as changes to the location of the buildings on the site. Certainly together or any one of those by itself could be classified as a substantial change to the Plan. In our discussions with the City's Traffic Engineer, those changes would involve different comments from him had these changes been proposed before the TRC. Staff does feel that these are substantial changes and felt it would be appropriate for the TRC to review.

The motion made by Vice-Mayor Mumpower and seconded by Councilwoman Bellamy to remand this issue back to the Technical Review Committee carried on a 5-2 vote, with Mayor Worley and Councilman Davis voting "no."

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Update on Stormwater Services Program

City Engineer Cathy Ball briefly reviewed with Council the stormwater services program which beginning in December all property owners with developed land in Asheville's city limits will receive a stormwater utility bill. It was the consensus of Council to have a more detailed update at their November 15, 2005, worksession.

Taxicabs

At the request of City Manager Jackson, Vice-Mayor Mumpower moved to continue the taxicab increase discussion from the November 22, 2005, meeting until the January 10, 2006, to give staff the opportunity to research this issue further. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Claims

The following claims were received by the City of Asheville during the period of October 21-November 3, 2005: Thomas R. Penland (Water), Janet Goode (Parks & Recreation), Enterprise Rent-A-Car (Planning), Ida Myres (Water), Jennifer Sims (Transit Services), Sharon Smith (Water), Gail Hipshire (Streets) and James M. Pressley (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Mumpower thanked the Seabees for completing the fence at the basketball court at Klondyke Apartments. He also expressed appreciation to those involved in building a bench at Altamont Apartments.

Councilman Davis briefed Council on the Civic Center Task Force's first meeting.

At this time (7:52 p.m.), Vice-Mayor Mumpower left the meeting.

Mr. Gene Hampton spoke about the impossibility of operating successfully without a quality management program.

At this time (7:56 p.m.), Mayor Worley turned the meeting over to Councilwoman Bellamy and left the meeting

Mr. James Judd, Coalition of Asheville Neighborhoods board member, urged Council's continuance attention to the Greenlife Grocery issue and the alleged injustice done to the residents of Maxwell Street. In addition, he voiced several enforcement problems related to this matter.

VIII. ADJOURNMENT:

Councilwoman Bellamy adjourned the meeting at 8:06 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 15, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilwoman Diana Hollis Jones; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Joseph C. Dunn and Councilman Brownie W. Newman

CONSENT AGENDA:

Interim Shelter to Hurricane Katrina Evacuees

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into contracts with local non-profit agencies to provide housing for families displaced by Hurricane Katrina; the costs of which will be reimbursed by FEMA via the NC Division of Emergency Manager; and (2) the associated budget amendment, in the amount of $100,000.

The Asheville Chapter of the Red Cross has dealt with requests for assistance from over 500 individuals or families who have evacuated to our area as a result of Hurricanes Katrina and Rita. Of these, 332 had registered with FEMA by October 18 giving temporary addresses within Buncombe County – the fourth highest total for counties in North Carolina.

Housing is the #1 need reported by these evacuees and, to date, approximately 300 families have been provided with temporary shelter in hotels/motels, in conference centers such as Ridgecrest, and in apartments offered by private individuals. An estimated one-third of these have already moved back home to the Gulf States and a handful have moved into more permanent housing here. Over the next few weeks, as Red Cross payment for hotel accommodation runs out we expect that the remainder will either move back home, or seek more permanent housing in our area.

Staff has been in close contact with the non-profit agencies assisting these families – the Red Cross, Asheville-Buncombe Community Christian Ministry (ABCCM), the Affordable Housing Coalition (AHC), and the Housing Authority of the City of Asheville (HACA). A number of faith-based groups and individuals have donated temporary accommodation to ABCCM, and the Red Cross receives reimbursement directly from FEMA for the cost of hotel/motel accommodation for up to 60 days, but otherwise our local non-profits have used their own resources for intake, advice, and housing placements. They will not be able to support the cost of longer-term housing assistance without severely diminishing the assistance they provide to local residents.

We have contacted FEMA and NCEM to find out what federal assistance is available for local efforts and how to structure those efforts in a way that is consistent with FEMA rules for reimbursement. On October 17, we received detailed guidance from NCEM on FEMA's Interim Shelter Assistance program and on October 28 submitted the Interim Shelter Plan, created after consultation with the agencies listed above and with Buncombe County staff.

Through this plan, the City will be reimbursed for the cost of providing housing (not rent assistance) to evacuees for up to 12 months. The City will contract with ABCCM and AHC who will identify those in need of housing, lease suitable units, and place families in those units. We are also seeking retrospective reimbursement of housing expenses already incurred by non-profit providers but at this point we are uncertain whether or not that will be allowed.

It has not been possible to obtain a reliable estimate of the number of people who will remain in our area and seek assistance through the Interim Shelter Program nor for how long

they will need it. Other types of FEMA and HUD assistance are available, though not to everyone. We are initially requesting budget authority for $100,000, which is sufficient to rent about 35 apartments for three months.

Every effort will be made to ensure that all expenses incurred by our non-profit partners are eligible for reimbursement by FEMA through NCEM. However, it is possible that our partners may, in good faith, incur expenses that FEMA will deem ineligible. We recommend that in such cases, after all other avenues have been explored, staff should have the discretion to use the City's Housing Trust Fund as a contingency fund to reimburse such good-faith expenses. It is extremely unlikely that such costs would exceed $5,000.

Advantages:

- Provides up to 12 months of housing for people displaced by Katrina
- Prevents homelessness
- Should be 100% reimbursed by FEMA
- Ensures that local non-profits can maintain services to local residents as well as helping Katrina evacuees.

Disadvantages:

- Scale of need is still uncertain – budget is only a rough estimate
- A small probability exists that some expenses may not be reimbursed, requiring a source of contingency funding (Housing Trust Fund recommended).

Staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into contracts with local non-profit agencies to provide housing for families displaced by Hurricane Katrina, which costs will be reimbursed by FEMA via the NC Division of Emergency Manager; and (2) the associated budget amendment, in the amount of $100,000.

Community Development Director Charlotte Caplan updated Council on the families in Buncombe County displaced by Hurricane Katrina. Throughout her update, she responded to various concerns raised by Vice-Mayor Mumpower regarding affordable housing.

Councilwoman Bellamy requested an update in 6-8 months regarding the families we have assisted.

NC DOT Municipal Agreement for Bike Plan

Summary: The consideration of a resolution approving a municipal agreement with the North Carolina Department of Transportation (NCDOT) to receive $24,000 in grant money to develop a bicycle plan for the City of Asheville.

In 2004 the City Council approved a grant application to the NCDOT for $24,000 to develop a bicycle plan in Fiscal Year Fiscal Year 2005-06. This grant was awarded in May of 2005. The plan requires $16,000 in local matching funds. The matching funds are already budgeted in the Fiscal Year 2005-06 operating budget. In addition, the Blue Ridge Bicycle Club has agreed to contribute $1,000 toward the local match.

The bicycle plan will be developed beginning in early 2006. City staff will oversee the project, which will be carried out by a consultant.

This project supports the Asheville 1998 Greenway Master Plan and 2003 Update and the 2025 City Development Plan. It also implements several tasks in City Council's Strategic Operations Plan in the areas of:

- Planning, Goal #2, Obj. A, Tasks 1 and 2 – to incorporate multi-modal uses of transportation options and to leverage outside funding to achieve multiple transportation goals where possible.
- Planning, Goal #2, Obj B, Tasks 1 and 2 – to determine opportunities for managing traffic demand and to explore public-private partnerships with major employers and education providers to increase the effectiveness of the transportation system.
- Sense of Place, Heritage & Arts, Goal #3, Obj. B, Task #1 – to construct infrastructure including bicycle facilities to accommodate growth downtown.
- Natural and Built Environment, Goal # 2, Obj. A, Tasks 1-4 – to implement the Wilma Dykeman Riverway Plan and the Completion of several Greenways
- Natural and Built Environment, Goal #2, Obj. B, Task 1 – to work with the State to fund greenway projects via the Transportation Improvement Plan.

Consideration:

- Executing this municipal agreement is one of the required formal steps to follow-through on the 2004 commitment to pursue this grant and develop a bicycle plan for the City of Asheville in Fiscal Year 2005-06.

City staff recommends City Council approve the resolution approving a municipal agreement with the N.C. Dept. of Transportation to receive $24,000 in grant money to develop a bicycle plan for the City of Asheville.

Housing Trust Fund Allocation – Vanderbilt Apartments

Summary: The consideration of a resolution approving a $150,000 Housing Trust Fund loan for the preservation of affordable rental housing at Vanderbilt Apartments.

National Church Residences, Inc. (NCR) has requested a Housing Trust Fund (HTF) Loan in the amount of $150,000 as partial financing for its proposed acquisition and rehabilitation of the Vanderbilt Apartments. NCR has recently completed a similar project at the Battery Park Apartments.

NCR will acquire the property from the current non-profit owner, for $1 plus assumption of outstanding loan obligations, and, using Low Income Housing Tax Credits and other financing, will extensively renovate the building, the interior of which has been essentially unchanged for 30 years. In the process they will convert many of the hard-to-lease efficiency units into 1-bedroom units, reducing the number of units from 141 to 123.

In April, Council awarded $250,000 in HOME funds to this project. Since then, estimated costs have increased from $10,000,000 to $11,000,000. Most of this has been offset by increased tax credit revenues. The remaining gap will be filled by deferring more of the developer fee and by this HTF loan. All other financing is now in place, and NCR plans to start work early in 2006.

The application was evaluated by a panel of staff and outside experts and scored well against the HTF criteria. The Housing and Community Development Committee reviewed the

application on October 31, 2005, and has recommended awarding an HTF loan of $150,000 at 2% interest amortized over a 30 year term.

Advantages:

- Long-term preservation of 123 units of affordable housing for the elderly and disabled
- Keeps affordable housing downtown
- Brings a significant tax-exempt property back on to the tax-rolls with estimated annual tax revenue of $80,000

Disadvantages: None

Staff recommends City Council approve a $150,000 Housing Trust Fund loan to National Church Residences.

As a result of concerns raised by Councilman Davis, there was discussion regarding the structural integrity of the Vanderbilt Apartments. Councilwoman Jones, Chair of the Housing & Community Development Committee, spoke in support of this loan. Community Development Director Charlotte Caplan responded to various questions raised and summarized by saying that she would contact NCR to make sure they have done their due diligence in researching the structural integrity of the building.

Clerk to Advertise License Agreement with Mountain Area Information Network

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding execution of a License Agreement with Mountain Area Information Network (MAIN) for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge. It has exceptional range for telecommunication with approximately 300° coverage from northeast to west to southeast. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

MAIN has offered to enter into a license agreement for antenna space and related equipment on the tower known as the "U S Cellular Tower" which is the tower to the east with several large dish antennas attached. U S Cellular is the primary tenant on that tower and any antenna installations by others are subject to their approval. U S Cellular is agreeable to the installation by MAIN subject to a favorable tower analysis. A tower analysis is required by the license agreement to assure that the new installation does not interfere with existing installations and that the tower is structurally able to support the additional installation. MAIN will pay for and provide a tower analysis. The proposed License Agreement will enable MAIN to operate three (3) antennas at that site; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. MAIN will pay a License Fee of $7,200 ($200 per antenna per month) the first year with a 4% increase annually thereafter.

The request by MAIN has been reviewed by staff and the proposed equipment compared to existing installations to determine comparability. Currently we have three somewhat similar installations that are producing as follows:

Arch Communications	1 antenna	@ $350 per month
Cingular Communication	4 antennas	@ $287.50 per antenna per month
Morris Communications	3 antennas	@ $276.25 per antenna per month

The license fee proposed for MAIN is somewhat below market rate consistent with the rate approved for the Housing Authority of the City of Asheville by Resolution No. 05-92. Both MAIN and the Housing Authority provide public benefit services to lower income persons that are compatible with governmental function and/or sponsorship. A discounted rate for a non-profit providing such services as well as public safety and emergency response agencies seems reasonable and appropriate

Staff recommends that Council review discounted antenna license fees annually during consideration of appropriations to outside agencies.

Relationship to Broadband Initiative: Antenna rental requests are relatively simple transactions and will not materially affect any potential municipal broadband strategy. Specifically cellular and 900Mhz antenna rentals will not create interference with likely technologies to be used for broadband.

The following benefits will be realized from approval of this item:

- The City will receive revenue that it does not currently receive.
- Antenna space that is currently vacant will be utilized.
- MAIN will have improved capacity to provide low cost high speed wireless internet service to City residents.

Planning & Development and Information Technology staff recommend City Council adopt the resolution directing the City Clerk to publish a Notice of Intent regarding execution of a License Agreement with MAIN for an antenna at 36 Reservoir Road.

Traffic Enforcement Equipment Grant

Summary: The consideration of a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Governors Highway Safety Program to assist the Asheville Police Department in the investigation and reduction of traffic crashes, and an accompanying budget amendment, in the amount of $252,380,

The Police Department and the City of Asheville have the opportunity to be considered for a grant from the North Carolina Governors Highway Safety Program (GHSP) for equipment to outfit a dedicated traffic unit. The total amount of the grant is $252,380, which includes $183,690 in grant funds from GHSP and a required City match of $68,690.

This grant will allow the City to fully outfit a dedicated traffic unit of five officers for traffic enforcement, accident reduction, community traffic education, and overall improved public safety. The grant includes fully equipped police vehicles and special traffic investigation and enforcement equipment. The equipment, training and technology provided in this grant will enhance the police department's ability to conduct traffic crash reconstruction. This is an equipment only grant with no personnel cost.

This grant opportunity came about after the adoption of the 2005/06 budget, so the City match of $68,690 was not budgeted. However, funds have been identified for the local match. The Police Department has been able to save $42,675 in the school crossing guard program following a review and redesign of the program. The remaining $26,015 needed for the City match will be taken from the Manager's contingency funds. This will leave $158,469 in the Manager's contingency account for other needs that may arise during the remainder of the fiscal year.

Pros

- The Police Department obtains much needed traffic enforcement equipment that will improve its ability to address traffic related issues throughout the City.
- The City does not have to bear the full cost of initially purchasing the equipment.

Cons

- The City is required to use $26,015 in contingency funds.
- The City will have the bear the full cost of replacing the equipment in future budgets.

This grant opportunity meets Council's focus area of *Partnerships to Improve Critical Services & Infrastructures* under Goal 2: Diversified and broadened revenue sources – Develop alternate revenue sources that are available to address local needs.

City staff requests City Council adopt a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Governors Highway Safety Program to assist the Asheville Police Department in the investigation and reduction of traffic crashes, and an accompanying budget amendment, in the amount of $252,380.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

STATUS REPORT ON BUNCOMBE COUNTY SCHOOLS

Mr. Cliff Dodson, Superintendent of Buncombe County Schools, provided City Council with a status report on Buncombe County schools and the performance of the students. He reviewed some assets of the schools, being: (1) S.A.T. scores; (2) 89.2% of students, grades 3-8 score at or above grade level in Reading; (3) 91.4% of students, grades 3-8 at or above grade level in Math; (4) clear expectations; (5) early college/middle college; (6) middle school initiative; and (7) afternoon college. Challenges include (1) the largest minority population in the Buncombe County Public Schools is now Hispanic students – not African-American; (2) per pupil expenditure ranking; and (3) non-English speaking students.

Throughout the presentation, Mr. Dodson responded to various questions from Council.

On behalf of City Council, Mayor Worley thanked Mr. Dodson for his hard work with limited resources.

GREENLIFE PRESENTATION

At this time, 4:15 p.m., Mayor Worley turned the meeting over to Vice-Mayor Mumpower and left the room.

Mr. John Swann, co-owner of Greenlife Grocery on Merrimon Avenue, briefed Council on the controversial issues regarding the effect that his store has had on his neighborhood. He cited incidents of the harassment and behavior by Mr. Reid Thompson on his employees, deliver drivers and contractors. Last summer, Greenlife agreed to enter mediation with Mr. Thompson, however, Mr. Thompson refused that offer. Mr. Swann outlined the many actions taken (and thousands of dollars spent) to address Mr. Thompson's concerns, some being, but are not limited to: noise created when dumpsters were emptied; noise made by their refrigeration compressors; and the difficult issue of trucks on Maxwell Street. He said they are willing to consider any reasonable solution to any issue that is brought to their attention. They are in full compliance with all applicable City ordinances and would like nothing more than be able to continue to offer valuable products and services to our neighborhood and the City of Asheville.

After Mr. Swann responded to questions/comments from Council, he said that he is still agreeable to mediation.

At 4:55 p.m., Vice-Mayor Mumpower announced a short recess.

At 5:10 p.m., Mayor Worley returned to the meeting.

WATER RESOURCES CAPITAL IMPROVEMENT PROGRAM/FEE STUDY

Water Resources Director David Hanks said that this is the consideration of a dedicated funding source for water system improvements based upon meter size and be implemented effective January 1, 2006.

The engineering firm of Brown & Caldwell, along with City staff has taken a comprehensive look at all aspects of the water system operations, including water treatment plants, distribution system, leak detection, meter accuracy, financial, administration and the water capital improvement program and department fees. A capital improvement fee was requested through the Regional Water Authority, Buncombe County and the City of Asheville previously with the County turning down the request.

Brown & Caldwell was contracted to study the water treatment requirements to meet current and future EPA standards for turbidity in the water. The study also included looking at the asset management of the water system to help determine replacement and refurbishment cost, including distribution lines, pump stations, valves, meters, replacement and refurbishment program, capital improvement program including fees. A replacement model was created to determine annual funding requirements needed to make necessary improvements to the water infrastructure. The consultant has determined a dedicated capital improvement fee is required to fund the necessary improvements of the water system. This fee will be based upon meter size with small residential type meters having a monthly charge of $3.50 up to a ten inch meter monthly charge of $1,430.00. Water Resources staff has been and will continue to work with system customers who may be able to decrease the size of their meters based upon consumption and fire flow requirements to minimize the economic impact on the customers.

Staff recommends approval of a dedicated funding source for water system improvements per the consultant's recommendation based upon meter size and be implemented effective January 1, 2006.

Mr. Richard Stahr, consultant with Brown and Caldwell Engineering, reviewed with Council the current water system overview along with the goals related to water infrastructure sustainability. He benchmarked Asheville vs. other utilities. He pointed out that staff reductions over 10 years have resulted in a lean organization. There has been a 30% reduction in the number of positions since Fiscal Year 1992-93.

He explained that the goals of the Asset Management Program is to minimize life cycle costs while meeting customer needs. Benefits of the Asset Management Program include (1) establishes funding requirements for refurbishment and replacement; (2) prioritizes capital investments; (3) increases dependability of water delivery; (4) focusing resources in the "right" places using asset criticality; and (5) uses improved system knowledge and analytical tools to meet customer services expectations at the lowest life-cycle cost.

He explained that the water plant optimization identifies large capital savings – (1) plant upgrade was expected to cost $12 Million; (2) pilot study showed smart operational changes would save capital dollars; and (3) scaled back upgrade focused on minor improvements and refurbishment needs saving $6 to $7 Million.

He said that the focus needs to be on main replacement rather than leak repair. He said that $5 to $6 Million in upgrades are needed – North Fork upgrade needed to meet regulations; and Bee Tree upgrade needed for long-term operation following 6-year closure. He outlined how the asset management principles were used to develop prioritized a repair & replacement capital improvement program, but more refinement is needed. The current budget for capital projects does not fund needed improvements. The average rate increase over the past 13 years is less than the inflation rate. The current funding shortfall could have been avoided with an annual 4.1% rate increase.

He shared the results of a customer telephone survey and focus group meeting surrounding the issue of whether our rate payers would support an increase to fund sustainable infrastructure.

Some consequences of inaction would be (1) increased line breakages resulting in higher water loss and increased response costs; (2) inability to support economic development (3) deteriorating customer service; and (4) possible violation of bond covenant.

Water rate challenges include residential customer base is growing but demand remains flat; adequate funding is needed for sustainability; current declining block structure should be evaluated; and outdated development fee may not reflect current value of facilities needed to serve new customers.

He reviewed with Council the capital improvement fee structure that will be based upon meter size with small residential type meters having a monthly charge of $3.50 up to a ten-inch meter monthly charge of $1,430.

In summary, the Capital Improvement Program recommendations are to (1) implement the Capital Improvement Program to address the backlog of urgent infrastructure needs; (2) adopt the Capital Improvement Program fee effective January 1, 2006, to address the critical refurbishment and replacement needs; and (3) use revenue bond financing to accelerate the recovery from historical underinvestment (Funding Plan is under development.)

In summary, the rate structure recommendations are to (1) conduct stakeholder input process for an updated development fee and migrating toward a Uniform Rate Structure; and (2) complete the rate structure analysis on a timeline that ties to the budget process.

After a brief discussion, City Manager Jackson said that there are other timing considerations other than those of the legal process. The entire fee structure should be looked at as part of the budget process, including the capital surcharge as well. With regard to the recommendation of the January 1 implementation date, he felt there needs to be a reasonable timeframe allotted for public education and awareness.

Councilwoman Bellamy felt Council should look at the comprehensive capital improvement plan, not just the rate structure. She suggested an analysis of how much the Metropolitan Sewerage District puts into their capital improvement plan and how they fund that.

Councilwoman Bellamy suggested this presentation be broadcast on our Government Channel to let the public know of our needs and the possibility of a rate increase.

It was the consensus of Council to have a short presentation at the Council meeting next week at which time Council will review a communications plan and a timeline for consideration of the water system capital improvement plan and fee structure.

RECOGNIZE STAKEHOLDERS & RECEIVE COMMUNITY RECOMMENDATIONS FOR RESERVOIR OPERATIONS AND DOWNSTREAM IMPACTS

City Engineer Cathy Ball and Water Resources Director David Hanks said that this is the consideration of a resolution authorizing the Mayor to enter into a contract with Schnabel Engineering for updating reservoir operations and emergency action plans; and approval of a budget amendment, in the amount of $692,835, to provide funding for this project.

An engineering consultant conducts an inspection of the North Fork and Bee Tree Dams annually to ensure the safety of the dams. The latest dam inspection report completed in June 2005, recommended updating the reservoir operations and emergency action plans for the City's dams. The City has an action plan that provides guidance for operating the radial gates during flood conditions, but it was developed in 1996 and is outdated. It is critical that the City update this and other reservoir operations and maintenance procedures in order to ensure the integrity of the dams and to proactively respond to future flood events.

The Water Resources and City Engineering Departments along with community stakeholders developed request for proposals (RFP) for professional services to update the Operation and Maintenance Plans, Emergency Action Plans, Flood Inundation Maps, Flood Operation Plan for North Fork and Bee Tree Reservoirs, including computer models for operation of the flood gates and down stream mitigation to limit the impact of operating the North Fork gates during extreme weather events. A group of City staff and community stakeholders reviewed the submitted proposals and have selected the engineering firm of Schnabel Engineering South P. C. to perform these tasks.

The RFP included six (6) tasks and one optional item:

- Task 1 – Operation and Maintenance Plan – update ten year old plan
- Task 2 – Emergency Action Plan – update ten year old plan
- Task 3 – Flood Inundation Maps – create maps of Swannanoa River basin, including feeder streams
- Task 4 – Flood Operations Plan – operations to include minimizing down stream effects of operating the flood gates, including computer models
- Task 5 – Training – hands on training for using computer models
- Task 6 Executive summary/public involvement/meetings – summary of non security sensitive aspects of plans and public involvement of how plans will be used and implemented
- Optional item – Low Flow Protocol – impacts down stream of low flows – staff recommends including this item in contract

The total cost of this project has been negotiated at a cost not to exceed $692,835. The annual dam inspection report recommending this project was not received until June 2005, so funding was not included in the Fiscal Year 2005-06 budget. The current Fiscal Year 2005-06 budget does not have sufficient funding available to fund a project of this magnitude. Staff is, therefore, recommending funding this very important project from cash reserves.

Project Cost Breakdown:

Task 1 – Operation and Maintenance Plan	$23,920.00
Task 2 – Emergency Action Plan	$51,710.00
Task 3 – Flood Inundation Maps	$151,715.00
Task 4 – Flood Operations Plan	$271,650.00
Task 5 – Training	$17,080.00
Task 6 – Executive Summary/Public Involvement/Meetings	$36,205.00

Optional Item – Low Flow Protocol	$18,365.00
Project Administration	$59,205.00
Sub-Total:	$629,850.00
10% Contingency	$62,985.00
Total Not to Exceed:	$692,835.00

Pro:

- Plans are over ten years old and need to be updated. Impact of flood gate operations needs to be determined more accurately to help minimize down stream flooding.

Con:

- Cost is a factor. Cost is not to exceed $692,835, which will have to come from cash reserves. Cash and investments were reported to be $13,675,503 Million at the close of Fiscal Year 2004-05. Funding this project will reduce reserves to $12,982,668; however, this is still sufficient to meet current bond covenant obligations, to provide at least 3 months of O&M expenses, and to maintain needed reserves for emergencies. This level of reserves is also consistent with consultant recommendations for target reserves.

Staff recommends City Council approve the request for the Mayor to enter into a contract with Schnabel Engineering for updating water reservoir plans and maps as well as approve a budget amendment to provide funding for this project.

City Engineer Cathy Ball said that the following are 10 year old plans – Operation and maintenance of reservoirs and dams; emergency action plans; flood inundation maps; and operations of flood gates at North Fork.

She said that the Water Resources and Engineering Department looked at old plans which required updating. The stakeholders involvement was solicited to create Request for Proposals (RFP) for professional services to update existing plans and also create flood inundation maps and a flood control management plan to minimize downstream flooding from operation of the flood gates at North Fork. The stakeholders group included Biltmore Village representatives, Town of Black Mountain, Buncombe County Emergency Management, RiverLink, local professional engineer and City staff, including Water Resources, Engineering, Planning, and City Administration.

The stakeholders group went over the draft RFP to ensure all concerns of group were covered in the proposal. The draft the RFP went through three changes before final version was acceptable to group and the final version was sent out to over 25 local, regional and national engineering firms. The stakeholders group selected Mr. Jim Augins and Mr. Michael Miller to represent the group in the selection process; and (5) selection committee also consisted of City staff from Water Resources and Engineering Departments.

Water Resources Director David Hanks outlined the following RFPs: Task I – Update Operations and Maintenance Plan for North Fork and Bee Tree; Task 2 – Update Emergency Action Plan for North Fork and Bee Tree; Task 3 – Flood Inundation Map and Impact of Dams on Downstream Customers; Task 4 – Flood Operation Plan and Manual; Task 5 – Training for using analysis tools, maps and models; Task 6 – Executive Summary/Public Involvement – summary written that can be given to general public; and Low Flow Protocol – Impact of dam operations downstream during low flow conditions.

Mr. Hanks then reviewed with Council the selection process: (1) three firms submitted proposals; (2) selection committee was given copies of the proposals and asked to upgrade each on a number system of questions – based upon criteria in the RFP; (3) each committee member graded the three proposals and then met as a group to discuss; (4) committee agreed that one proposal did not meet the required standards requested in the RFP; (5) the other two firms were highly qualified and scoring by all committees members was very close; (6) the committee decided to bring both firms in for face-to-face interviews; (7) selection committee graded each firm on its presentation and answers to questions by each member of the committee; (8) the committee selected Schnabel Engineering South as the best firm for conducting these studies and plans for operations of the dams at North Fork and Bee Tree; (9) staff met with representatives from the engineering firm to establish cost and time schedule for each task; (10) cost is not to exceed $692,835; and (11) estimated completion for the entire project is October 2006 with modeling requirements by July 2006.

City staff recommends that Council approve (1) the request for the Mayor to enter into a contract with Schnabel Engineering South in the amount of $692,835 for reservoir and dam operation plans; and (2) the budget amendment to reallocate funds from the Water Fund equity account to cover the cost of this project.

In response to Vice-Mayor Mumpower, City Engineer Ball said that last year there was some criticism because we had a plan that said don't open the gates until you have 6 inches of rain in a 24-hour period. The plan done in 1995 only looked at the integrity of the dam. It did not concern itself at all with any flooding downstream. At that time we had no idea that if we opened up the gates prior to flooding what the impact of the full stream length would be. Last year Mr. Hanks had a good solution to have his employees stand at some of the pinch points watching for flooding to occur, but we need to have better technology to operate that system better. What we are getting with the mapping and the modeling component is an up-to-date program that will tell us all the way up to the reservoir what the impacts of opening the gates will do.

In response to Councilwoman Bellamy, Ms. Ball said that there are trying to coordinate the different analyses taking place trying to make sure that the data can be used in each of the different programs to avoid duplication of efforts.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

STORMWATER UTILITY PROGRAM

City Engineer Cathy Ball said that the purpose of this report is to update City Council on the status of the Stormwater Utility Program.

In December 2004 City Council adopted an ordinance establishing a Stormwater Utility. As part of the Fiscal Year Budget process, City Council approved a rate of $2.34 per month per Equivalent Residential Unit (ERU). One ERU is equal to 2,442 square feet of impervious surface. The budget for the program is $2,000,000. This program includes money for maintaining the current program, implementing the unfounded federal mandate, increasing the capital improvement program and developing stormwater master plans.

Since July 2005 staff has been working to educate rate payers about the purpose of the fee. Our efforts have included direct mailings with an additional mailing to the top 20 rate payers, community meetings, public meetings and individual meetings.

The first stormwater utility bills are scheduled for mailing on December 1, 2005. The stormwater utility bill is separate from the water and sewer bill because it is sent only to property owners and not to tenants.

Ms. Ball then addressed specific questions associated with the stormwater utility as well as billing, crediting, tiering and the appeal process.

Ms. Ball outlined the Stormwater Program Goals: (1) plan for, improve and operate the stormwater system in an efficient and effective manner; (2) adopt development policies and standards that prevent flooding, preserve streams and channels, and minimize water pollution without arresting new or infill development; (3) develop detailed watershed plans that promote orderly growth; (4) fully comply with federal and state regulatory requirements; (5) inform the public about stormwater issues and involve them in stormwater initiatives; and (6) implement utility fees to meet these needs in a fair and equitable manner.

She gave a brief history (1) 1999 Federal mandate passed as an amendment to the Clean Water Act – NPDES Stormwater Regulations – Phase II; (2) requires the local governments our size develop a stormwater program to improve water quality; (3) unfunded mandate; (4) in June of 2004, the Stormwater Advisory Committee (SAC) began meeting to discuss program and funding options; (5) in December of 2004, the SAC made a recommendation to City Council to adopt a Stormwater Utility as a means of funding the stormwater program. City Council acted on this recommendation by adopting a stormwater utility enterprise fund; and (6) in June of 2005, City Council adopted a fee structure of $2.34 per Equivalent Residential Units (ERU'S) = 2,442 square feet of Impervious surface.

The stormwater utility (1) is a utility that charges a fee based on the amount of impervious surface on the property; (2) fee is based on impervious area which directly relates to the quality of water as a result of stormwater runoff; and (3) enabling legislation allows Asheville as well as other local governments in North Carolina to charge this fee.

This is a fee because it's based on impervious surface not value of the property. The fee is charged to both taxable and non-taxable properties. Stormwater runoff is the water that flows off roofs, driveways, parking lots, streets, and other hard surfaces during rain storms. Rather than being absorbed into the ground, it pours into ditches, culverts, catch basins, and storm sewers. It does not receive any treatment before eventually entering the community's streams and lakes.

She explained that the definition of the impervious surface is any surface that does not readily absorb water and impedes the natural infiltration of water into the soil. Common examples include roofs, driveways, parking areas, sidewalks, patios, decks, tennis courts, concrete or asphalt streets, crushed stone and gravel surfaces.

Two hundred and fifty homes were sampled in the City of Asheville and the median square feet of impervious surface for these homes was 2,442. The City determined that the Stormwater Program needed to be funded at an amount of $2,000,000. Based on this information, it was determined that $2.34/month per ERU was the appropriate charge to generate these funds.

The fee for all residential rate payers is $2.34/per month. Commercial, industrial, multi-family and institutional will pay $2.34 per ERU. One ERU equals 2,442 square feet of impervious surface.

Residential rate payers will be billed once a year in the amount of $28.08. The first bill will be sent in January. Commercial, industrial, multi-family and institutional rate payers will be

billed twice a year – in December and June. The fees are for the Fiscal Year 2006 (July 1, 2005 – June 30, 2006).

The estimated $2,000,000 in revenue will be spent on the budget, which was approved by Council in June 2005: stormwater maintenance/capital - $1,020,000; plan review/inspection code enforcement - $100,000; compliance with federal mandate - $530,000; stormwater master planning - $200,000; and administration - $150,000.

Regarding public involvement, (1) direct notices were sent to more than 3,000 non-profit and commercial entities (workshop series hosted in September and October); (2) met with community groups like Council of Independent Business Owners and Coalition of Asheville Neighborhoods in September and October; (3) 19,000 direct notices sent to residential customers this month; (4) paid print advertisements placed in the Citizen-Times, Mountain Xpress and Asheville Daily Planet; (5) media coverage on WLOS, News Radio WWNC and the Western Carolina Business Journal (working with other outlets for coverage this month).

Ms. Ball then reviewed with Council some questions they may hear concerning the fee, some being, but are not limited to: why isn't this bill just added to the water and sewer bill; can we delay the program; why do all single family homes pay the same regardless of their size; why do you have to exceed the requirements of the ordinance to get a credit; and how are you billing private streets.

Ms. Ball responded to a comment from Councilman Davis regarding a group of stakeholders to interface with the public and possibly meet annually to review the program; and a concern about the credit system.

Vice-Mayor Mumpower asked the City Attorney to research what constitutional authority the government has to place this unfunded mandate on cities.

At 6:45 p.m., Mayor Worley announced a short recess.

UDO AMENDMENT REVIEWS

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on November 22, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Changes Required by Acts of the State Legislature

Mr. Joe Heard, Director of Development Services, said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of bringing City codes into compliance with recently adopted amendments to State planning statutes.

On September 22, 2005, the General Assembly of North Carolina passed two pieces of legislation amending planning and development procedures: Session Law 2005-418 entitled *An Act to Clarify and Make Technical Changes to City and County Planning Statutes*; and Session Law 2005-426 entitled *An Act to Modernize and Simplify City and County Planning and Land-Use Management Statutes*. In general, this legislation was adopted to codify certain legal issues, update the types of development tools available to local governments, and clarify many procedural aspects of the development process. Specifically, the legislation requires the City of Asheville to amend the UDO in order to address the following issues:

- Conditions applied to approval by the Board of Adjustment must be related to the circumstances that give rise to the need for the variance.
- The Planning & Zoning Commission must provide a written recommendation to the City Council addressing a proposed amendment's consistency with adopted plans.
- In adopting any amendment, the City Council must adopt a statement describing whether its action is reasonable and consistent with adopted plans.
- Any condition placed on a project undergoing conditional zoning must be mutually agreed to by the City Council and the petitioner.
- Many standards for protest petitions are amended and clarified. Changes of significance include vacant or excused seats on Council shall not be calculated when figuring a supermajority, a minimum of 5% of a buffer 100 feet surrounding the property is necessary for a valid protest, and a person can withdraw his/her name from a petition at any time prior to the vote.

Pro –

- The proposed amendments would bring the UDO into compliance with State planning statutes, making the UDO more consistent with other adopted laws and more legally defensible.

Con –

- The proposed requirements place additional burdens on applicable boards, commissions, and City Council to justify decisions based on reasonableness and consistency with adopted plans.

The Planning and Zoning Commission recommended approval of these code amendments on November 2, 2005, by a unanimous vote of 6-0. In order to bring the UDO into compliance with State planning statutes, staff recommends approval of the proposed ordinance amendment as well.

City Attorney Oast responded to questions from Councilwoman Jones.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda.

DRUG COMMISSION BEST ENFORCEMENT PRACTICES

Vice-Mayor Mumpower briefed Council on the activities of the Asheville-Buncombe Drug Commission. He explained the following three initiatives, with more to follow, that are being initiated. One, a 12-month poster services; Two, a new award program; and Three, a best practices 2-day seminar on hard drug interdiction for the southeast in April, 2006. He asked for Council's support in name only via co-sponsorship.

Councilman Davis moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Councilman Davis moved to be a co-sponsor of the best practices 2-day seminar on hard drug interdiction for the southeast. This motion was seconded by Councilwoman Bellamy and carried unanimously.

BUS STOP INITIATIVE

Vice-Mayor Mumpower said that this program is a joint effort by Councilman Davis, Councilman Dunn and himself. The Asheville's "Top a Stop" Program is a community initiative to help improve our City's bus service by bringing folks in out of the rain.

The "Top A Stop" Program is (1) a community partnership to provide more widely available shelters for bus stops; (2) It requires limited government manpower or expense; and (3) It is a program to help neighbors help neighbors and people help people.

The "Top A Stop" Program is being proposed because (1) People are standing in the rain; (2) Mobility is one of the most important ways to help people step up and forward; (3) The more user friendly our bus system is, the more riders it will attract; and (4) It's about working together.

The Program works by taking a simple, affordable and attractive bus stop cover design; arranging for materials to be provided at cost; and finding partners who will fund and/or build the shelters as a community service.

Jennings Builders Supply (and others) will help with at cost materials. Western Carolina Rescue Ministries, Seabees, Neighborhood Associations, Civic Clubs, and others with a wish to help. We will pursue grants and other forms of non-governmental support. The City can chose to participate with material support once we are able to successfully activate the program.

The next step is to (1) secure Council support; (2) Complete our initial design & permit work; (3) Work with Transit Director and meet with the Transit Board; and (4) Finalize our plan, complete an initial pilot shelter.

Vice-Mayor Mumpower said that we would like to get started immediately. We have the money, the people, and a plan for an initial pilot shelter. He then showed a picture of what the design will look like.

He feels the program will work because (1) The design is simple and doable as a weekend project; (2) The costs are low ~ a neighborhood or civic club can afford to do it; (3) maintenance is limited; (4) The shelters are attractive and appealing; and (5) Because there is a real need.

In response to Councilwoman Bellamy, Transit Services Director Bruce Black said that the benches received by a N.C. Dept. of Transportation grant can be incorporated very easily with this program.

Councilwoman Jones hoped that the posting of bus schedules can also be incorporated into the timing of the new benches.

Councilman Davis moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Councilman Davis moved to endorse the "Top A Stop" Program. This motion was seconded by Councilwoman Bellamy and carried unanimously.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to reappoint Thomas Bell and appoint Charles R. Worley to the Alcoholic Beverage Control Board.

It was the consensus of City Council to arrange interviews for Ed Taylor and Beverly Jeter for a vacancy on the Citizens-Police Advisory Committee.

It was the consensus of City Council to postpone filling the vacancy on the Downtown Commission until the applications for the end-of-the-year vacancies are received.

It was the consensus of City Council to postpone filling the vacancies on the Economic Development Advisory Committee until the Committee can make recommendations to City Council in January, 2006.

CLOSED SESSION

At 7:33 p.m., Councilwoman Bellamy moved to go into closed session for the following reason: To consult with attorneys employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; Carolina Power & Light Co.; and Reid Thompson. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Davis and carried unanimously.

At 8:00 p.m., Mayor Worley was excused from the meeting due to a conflict of interest – he did not return. At 8:20 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 8:20 p.m.

Magdalen Bowlerson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 22, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Vice-Mayor Mumpower led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 05-208 - RESOLUTION OF SUPPORT FOR THE NATIONAL GUARD AND RESERVE

Mayor Worley read and presented the resolution which supports the City of Asheville employees who are in the National Guard and Reserve to Mr. David Burnette, representing the Department of Defense, the Under Secretary for Reserve Affairs, and the NC Committee for Employer Support of the Guard and Reserve. Mr. Burnette presented the City of Asheville with a plaque that salutes the employers who go above and beyond the call of duty.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-208. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 - PAGE 266

II. CONSENT AGENDA:

At the request of Vice-Mayor Mumpower, Consent Agenda "B" was pulled from the Consent Agenda for an individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 9, 2005, AND THE WORKSESSION HELD ON NOVEMBER 15, 2005

B. RESOLUTION AUTHORIZING THE MAYOR TO SIGN A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO RECEIVE GRANT FUNDS TO DEVELOP A BIKE PLAN

This item was pulled from the Consent Agenda for an individual discussion.

C. RESOLUTION NO. 05-210 - RESOLUTION APPROVING A HOUSING TRUST FUND LOAN FOR VANDERBILT APARTMENTS

Summary: The consideration of a resolution approving a $150,000 Housing Trust Fund loan for the preservation of affordable rental housing at Vanderbilt Apartments.

National Church Residences, Inc. (NCR) has requested a Housing Trust Fund (HTF) Loan in the amount of $150,000 as partial financing for its proposed acquisition and rehabilitation of the Vanderbilt Apartments. NCR has recently completed a similar project at the Battery Park Apartments.

NCR will acquire the property from the current non-profit owner, for $1 plus assumption of outstanding loan obligations, and, using Low Income Housing Tax Credits and other financing, will extensively renovate the building, the interior of which has been essentially unchanged for 30 years. In the process they will convert many of the hard-to-lease efficiency units into 1-bedroom units, reducing the number of units from 141 to 123.

In April, Council awarded $250,000 in HOME funds to this project. Since then, estimated costs have increased from $10,000,000 to $11,000,000. Most of this has been offset by increased tax credit revenues. The remaining gap will be filled by deferring more of the developer fee and by this HTF loan. All other financing is now in place, and NCR plans to start work early in 2006.

The application was evaluated by a panel of staff and outside experts and scored well against the HTF criteria. The Housing and Community Development Committee reviewed the application on October 31, 2005, and has recommended awarding an HTF loan of $150,000 at 2% interest amortized over a 30 year term.

Advantages:

- Long-term preservation of 123 units of affordable housing for the elderly and disabled
- Keeps affordable housing downtown
- Brings a significant tax-exempt property back on to the tax-rolls with estimated annual tax revenue of $80,000

Disadvantages: None

Staff recommends City Council approve a $150,000 Housing Trust Fund loan to National Church Residences.

RESOLUTION BOOK NO. 29 – PAGE 268

D. RESOLUTION NO. 05-211 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM TO ASSIST THE ASHEVILLE POLICE DEPARTMENT IN THE INVESTIGATION AND REDUCTION OF TRAFFIC CRASHES

Summary: The consideration of a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Governors Highway Safety Program to assist the Asheville Police Department in the investigation and reduction of traffic crashes, and an accompanying budget amendment, in the amount of $252,380,

The Police Department and the City of Asheville have the opportunity to be considered for a grant from the North Carolina Governors Highway Safety Program (GHSP) for equipment to outfit a dedicated traffic unit. The total amount of the grant is $252,380, which includes $183,690 in grant funds from GHSP and a required City match of $68,690.

This grant will allow the City to fully outfit a dedicated traffic unit of five officers for traffic enforcement, accident reduction, community traffic education, and overall improved public safety.

The grant includes fully equipped police vehicles and special traffic investigation and enforcement equipment. The equipment, training and technology provided in this grant will enhance the police department's ability to conduct traffic crash reconstruction. This is an equipment only grant with no personnel cost.

This grant opportunity came about after the adoption of the 2005/06 budget, so the City match of $68,690 was not budgeted. However, funds have been identified for the local match. The Police Department has been able to save $42,675 in the school crossing guard program following a review and redesign of the program. The remaining $26,015 needed for the City match will be taken from the Manager's contingency funds. This will leave $158,469 in the Manager's contingency account for other needs that may arise during the remainder of the fiscal year.

Pros

- The Police Department obtains much needed traffic enforcement equipment that will improve its ability to address traffic related issues throughout the City.
- The City does not have to bear the full cost of initially purchasing the equipment.

Cons

- The City is required to use $26,015 in contingency funds.
- The City will have the bear the full cost of replacing the equipment in future budgets.

This grant opportunity meets Council's focus area of *Partnerships to Improve Critical Services & Infrastructures* under Goal 2: Diversified and broadened revenue sources – Develop alternate revenue sources that are available to address local needs.

City staff requests City Council adopt a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Governors Highway Safety Program to assist the Asheville Police Department in the investigation and reduction of traffic crashes, and an accompanying budget amendment, in the amount of $252,380,

RESOLUTION BOOK NO. 29 – PAGE 269

E. ORDINANCE NO. 3301 - BUDGET AMENDMENT FOR GRANT FUNDS FROM THE N.C. GOVERNOR'S HIGHWAY PROGRAM TO PURCHASE TRAFFIC ENFORCEMENT EQUIPMENT

Summary: See Consent Agenda Item "D" above.

ORDINANCE BOOK NO. 22 – PAGE 308

F. RESOLUTION NO. 05-212 - RESOLUTION TO RE-DESIGNATE THE ASHEVILLE STATE DEVELOPMENT ZONE

Summary: The consideration of a resolution to re-designate the Asheville State Development Zone as proposed.

The State of North Carolina has designated certain census tracts and census block groups in and around the City of Asheville as qualified for inclusion in a State Development Zone. Development zones were created to provide economic incentives to stimulate new investment and job creation in economically distressed urban areas. The City of Asheville has been a participating member in this program since its inception in 1999.

The current State Development Zone for Asheville will expire on December 31, 2005. Application for re-designation is due and, if approved, will take effect January 1, 2006, for a period of two years.

Staff has revisited the Asheville State Development boundaries and supporting data. Pursuant to the state-mandated guidelines, staff has been able to identify two new, previously undesignated areas for inclusion. The Development Zone area will now include Census Tract 4, Block Group 1 (North Asheville area along Merrimon Ave, north of WT Weaver Blvd) and Census Tract 21.02, Block Group 2 (South Asheville area east of Sweeten Creek Rd). The total zone must have a minimum of 20% population below the poverty level.

Re-designating the Development Zone would provide multiple opportunities to promote the City of Asheville's Strategic Operating Plan goals. The program is designed to stimulate new job creation and employment training, and encourage business expansion and small business development.

Advantages: Continued incentives for investment in economically distressed areas. The inclusion of significant commercial/industrial zoned areas of Asheville.

Disadvantages: None.

Staff recommends City Council adopt the resolution defining the State Development Zone to be effective January 1, 2006, through January 1, 2008.

RESOLUTION BOOK NO. 29 – PAGE 270

G. RESOLUTION NO. 05-213 - RESOLUTION AUTHORIZING THE EXCHANGE OF A PORTION OF REAL PROPERTY LOCATED ON WEST CHESTNUT STREET FOR A PORTION OF REAL PROPERTY LOCATED ON MAGNOLIA AVENUE

Summary: The consideration of a resolution authorizing the Mayor to convey a portion of real property located on West Chestnut Street in exchange for a portion of real property located on Magnolia Avenue.

The City and Allen & Susan Roderick (Rodericks) have negotiated an exchange of a portion of City owned real property on West Chestnut Street for a portion of Rodericks property at 8 Magnolia Avenue that will allow an improved course for the Reed Creek Greenway Trail.

The proposed location of the Reed Creek Greenway Trail is just west of Broadway and borders Reed Creek for most of its length. Between West Chestnut Street and Magnolia Avenue there is a "pinch point" that is created by the proximity of the Roderick property to Reed Creek forcing the trail closer to the top of the creek bank where the topography poses a challenge for construction. The proposed exchange of property will allow the trail to follow a less constrictive path.

The City's property (PIN No. 9649.14-23-5411) is on the north side of West Chestnut Street about 100' west of its intersection with Broadway, zoned Neighborhood Corridor District (NCD) and comprising 0.24 acre±. The portion to be exchanged is a 0.05 acre± parcel at the rear of the City's lot that adjoins Rodericks' property. This part of the property due to its configuration is not particularly useful to the greenway design.

The property owned by Rodericks (PIN 9649.13-23-4418) at 8 Magnolia Avenue is on the south side of the street about 100' west of its intersection with Broadway. It comprises 0.24 acre±

and is zoned NCD. The portion to be exchanged is a 0.05 acre± parcel located at the rear of the property adjoining the City's property.

The value of each parcel was determined by reviewing the tax assessment for the whole property and extrapolating a value for the cut out portion based on the per acre value of the whole. Both whole lots are 0.024 acre± and have an assessed tax value for land in the amount of $64,000. That reflects a per acre value of about $267,000. Both cut out parcels are 0.05 acre± which calculates to about $13,350.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will be revenue neutral returning property to the tax rolls in exchange for property being taken off the tax rolls.
- It is consistent with the greenway master plan.
- It will provide a better less constrictive path for the greenway trail.
- It is an efficient use of resources both public and private, because the City will own property more functional to the greenway and un-needed property will return to private ownership.

There are no negative aspects to this proposal.

Approval of the resolution will authorize the exchange of the properties pursuant to the provisions of N. C. G. S. 160A-271.

Planning & Development and Parks & Recreation staff recommend adoption of the resolution authorizing the Mayor to convey a portion of real property located on West Chestnut Street in exchange for a portion of real property located on Magnolia Avenue.

RESOLUTION BOOK NO. 29 – PAGE 271

H. RESOLUTION NO. 05-214 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON BENT TREE ROAD

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Bent Tree Road.

A bid has been received from Sheryl H. Williams in the amount of $16,000 for the purchase of land on Bent Tree Road.

The land on Bent Tree Road was acquired by the City from Sunset Mountain Company, Inc. in 1954. It is an irregular shaped lot comprising 1.2 acre±. It is very steep and wooded and runs in a long and narrow north/south direction between and parallel to Bent Tree Road and Old Toll Road. It is zoned RS2, but the slope and shape render the lot unsuitable as a home site. The deed of conveyance to the City also restricts the property prohibiting any building or structure of any kind. The bid from Sheryl H. Williams, owner of property across the street, is in the amount of $16,000. Williams has provided an appraisal prepared by Mark Morris SRA dated September 29, 2005, estimating the market value of the property at $16,000. Williams proposes to acquire the property to maintain the lot consistent with the residential character of the neighborhood. She is aware of the deed restrictions and does not plan any construction.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.

Planning & Development staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 29 - PAGE 272

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 05-209 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO RECEIVE GRANT FUNDS TO DEVELOP A BIKE PLAN

Summary: The consideration of a resolution approving a municipal agreement with the North Carolina Department of Transportation (NCDOT) to receive $24,000 in grant money to develop a bicycle plan for the City of Asheville.

In 2004 the City Council approved a grant application to the NCDOT for $24,000 to develop a bicycle plan in Fiscal Year Fiscal Year 2005-06. This grant was awarded in May of 2005. The plan requires $16,000 in local matching funds. The matching funds are already budgeted in the Fiscal Year 2005-06 operating budget. In addition, the Blue Ridge Bicycle Club has agreed to contribute $1,000 toward the local match.

The bicycle plan will be developed beginning in early 2006. City staff will oversee the project, which will be carried out by a consultant.

This project supports the Asheville 1998 Greenway Master Plan and 2003 Update and the 2025 City Development Plan. It also implements several tasks in City Council's Strategic Operations Plan in the areas of:

- Planning, Goal #2, Obj. A, Tasks 1 and 2 – to incorporate multi-modal uses of transportation options and to leverage outside funding to achieve multiple transportation goals where possible.
- Planning, Goal #2, Obj B, Tasks 1 and 2 – to determine opportunities for managing traffic demand and to explore public-private partnerships with major employers and education providers to increase the effectiveness of the transportation system.
- Sense of Place, Heritage & Arts, Goal #3, Obj. B, Task #1 – to construct infrastructure including bicycle facilities to accommodate growth downtown.
- Natural and Built Environment, Goal # 2, Obj. A, Tasks 1-4 – to implement the Wilma Dykeman Riverway Plan and the Completion of several Greenways
- Natural and Built Environment, Goal #2, Obj. B, Task 1 – to work with the State to fund greenway projects via the Transportation Improvement Plan.

Consideration:

- Executing this municipal agreement is one of the required formal steps to follow-through on the 2004 commitment to pursue this grant and develop a bicycle plan for the City of Asheville in Fiscal Year 2005-06.

City staff recommends City Council approve the resolution approving a municipal agreement with the N.C. Dept. of Transportation to receive $24,000 in grant money to develop a bicycle plan for the City of Asheville.

Vice-Mayor Mumpower felt that the City is already making an active effort for bike paths where they lend themselves and wondered if this was the best way to spend $40,000 when he did not feel this grant would have a meaningful impact on the reality

Councilwoman moved for the adoption of Resolution No. 05-210. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 267

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE PLANNED UNIT DEVELOPMENT ZONING OVERLAY DISTRICT

Vice-Mayor Mumpower moved to reschedule this public hearing to a later date. This motion was seconded by Councilwoman Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED OFF OF PATTON MOUNTAIN ROAD

ORDINANCE NO. 3302 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED OFF OF PATTON MOUNTAIN ROAD

Mayor Worley opened the public hearing at 5:16 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to extend the corporate limits of the City of Asheville to include portions of two lots located off of Patton Mountain Road. This public hearing was advertised on November 11, 2005.

William J. Kimpton, President, on behalf of Ranch 19 Corp., has petitioned the City of Asheville for the annexation of portions of two lots owned by the corporation and located at Patton Mountain Road just off of the intersection of Patton Mountain with Griffing Boulevard. The PIN Nos. of the lots involved are 9740.16-93-6462 and 9740.16-83-8119. These areas are contiguous to the existing corporate limits and qualify for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

These areas are part of a larger tract of land that has been reviewed and approved (with conditions) for the creation of a seventeen (17) lot subdivision to be known as Grove Park Cove. The entire tract is approximately 30 acres in size (with a current assessed valuation of $369,100.00). The portions to be annexed are 3.51 acres in size.

Pursuant to N. C. Gen. Stat. sec. 160A-31, a public hearing must be held prior to adopting any ordinance for voluntary annexation.

If City Council decides to proceed with this request, it is proposed that the annexation become effective on November 30, 2005.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Allows the City to review and approve future plans for this parcel as it is developed.
- Assists the developer of the property in achieving his desired development plan under one jurisdictional review.

Cons:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the ordinance annexing the property set forth in the petition.

Mayor Worley closed the public hearing at 5:18 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3302. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 310

C. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTIES ALONG COLUMBINE ROAD AND HEATHBROOK CIRCLE TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3303 - ORDINANCE TO ZONE PROPERTIES ALONG COLUMBINE ROAD AND HEATHBROOK CIRCLE TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:19 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to zone properties along Columbine Road and Heathbrook Circle to RS-8 Residential Single-Family High Density District. This public hearing was advertised on November 11 and 18, 2005.

The City of Asheville has recently annexed properties located in Biltmore Park, the most recent annexation becoming effective on September 30th of this year. The purpose of this initial zoning is to zone these odd properties that had not been taken into the City's extraterritorial jurisdiction because they were under Buncombe County's planning jurisdiction. The proposed zoning is RS8 – the zoning of the surrounding properties. Biltmore Farms, Inc. has been contacted concerning this proposal and is supportive of the recommendation.

The City's Technical Review Committee evaluated this initial zoning and voted unanimously in favor of supporting the recommended zoning classification.

Pros

- Zones properties recently taken into the City of Asheville in consideration of the surrounding zoning and land use.

Cons

None.

The Plannning and Zoning Commission of the City of Asheville, at its meeting on November 2, 2005, unanimously recommended approval of this initial zoning to the Asheville City Council. The Planning and Development Staff and the City's Technical Review Committee also recommend this initial zoning.

Mayor Worley closed the public hearing at 5:20 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3303. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 312

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON MERRIMON AND FENNER AVENUES FROM COMMUNITY BUSINESS I TO NEIGHBORHOOD CORRIDOR DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING WITH A BANK DRIVE-THROUGH

ORDINANCE NO. 3304 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON MERRIMON AND FENNER AVENUES FROM COMMUNITY BUSINESS I TO NEIGHBORHOOD CORRIDOR DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING WITH A BANK DRIVE-THROUGH

Mayor Worley opened the public hearing at 5:21 p.m.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to conditionally zone property located on Merrimon Avenue and Fenner Avenue from Community Business I District to Neighborhood Corridor District/Conditional Zoning for a proposed office building with a bank drive-through. This public hearing was advertised on November 11 and 18, 2005.

Mr. Shuford said that Neighborhood Corridor District (NCD) zoning requires corner properties to address the corner by placing the building within the maximum setback areas at the corner. In this case, the corner street – Fenner – is a wholly residential street that intersects Merrimon Avenue at a sharp angle and is much higher in elevation than Merrimon along most of its length. Access to Fenner from the subject property is precluded by code. Because of these circumstances, staff has classified this property not as a corner lot but as a mid-block lot for the purpose of applying the building placement and setback requirements of the NCD district.

The 2025 Plan classifies Merrimon Avenue as an Urban/Neighborhood Corridor: "The Urban/Neighborhood Corridor connects neighborhoods with each other, with employment centers, with institutional uses, and with major thoroughfares. Mixed-use structures, typically 2 to 4 stories in height, contain retail, office, and residential uses that serve and are complemented by adjacent neighborhoods. Sidewalks, streetscape and building design acknowledge and provide a safe environment for the significant pedestrian users of the urban/neighborhood corridor. " The proposed development is consistent with this type of development when conditioned as recommended by the Planning & Zoning Commission and City staff.

A variance request to permit a bank drive-through was denied by the Board of Adjustment on April 25, 2005. The Planning and Zoning Commission directed staff to investigate a revised zoning pattern for Merrimon Avenue on May 4, 2005.

The proposed development redevelops an existing nonconforming fast-food restaurant development/drive-through with a multistory bank/retail/office building. The proposed drive-through would serve a bank and would have limitations placed on the hours of operation.

A policy issue for this development involves the drive-through. Drive-through uses are not allowed in CB-I zoning and staff opposed a prior variance request to allow a drive-through on this site. Drive-through uses were specifically avoided in the 1997 Unified Development Ordinance (UDO) rezoning of much of Merrimon Avenue and later-hour drive-throughs associated with pharmacies on Merrimon Avenue have not been approved. Staff feels that a rezoning approach is the best way to gauge current policy direction on this matter.

In the subject case, the proposed drive-through would serve a bank as opposed to the current fast food restaurant drive-through that is grandfathered. This allows strict limits to be place on the hours of operation of the drive-through. The applicant has agreed to provide 24-hour ATM service on the street side of the development that will be accessible only to pedestrians.

The design of the proposed development is fully compliant with and helps implement the 2025 Plan. It is consistent with desirable new and older development on Merrimon Avenue in terms of scale, including building height and orientation. The applicant has added features recommended by the neighborhood, including distinguishing driveway location through special pavement treatments where they cross the sidewalk, the construction of a missing sidewalk segment between Fenner and Larchmont, and crosswalk and pedestrian-signal installation at Merrimon and Larchmont. The existing buffer will remain. The applicant has also agreed to rezone a separate tract to the rear of the site from CB-II to RS-8 at the neighborhood's request

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO and must take the seven standards for approval of conditional use permits into account when considering conditional zoning requests. Staff review indicates that all standards are met as proposed in the site plan and the recommended conditions of approval.

1. That the proposed use or development of the land will not materially endanger the public health or safety. *The development is designed to meet City standards for access and site design; it poses no danger to public health or safety.*

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant. *The proposed development will convert a non-conforming developed site into one meeting City landscaping and buffering standards. Existing on-site vegetation will remain largely intact and be supplemented with additional plantings.*

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property. *City standard buffering will be provided. The site is considerably lower in elevation than the neighboring residential development and this topography change provides a natural buffer. The proposed development is a significant upgrade from the prior land use in terms of on-site activity, noise, and hours of operation. Property values should not be negatively impacted by this development.*

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located. *The proposed development is consistent with the recommended development pattern for the corridor according to the 2025 Plan. The building location is topographically separated from residential areas, site lighting and buffering standards will address visual and audible impacts.*

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City. *The proposed development is consistent with the recommended development pattern for the corridor according to the 2025 Plan.*

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. *The proposed development is a mixed use, infill redevelopment that makes appropriate use of infrastructure serving the site.*

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard. *The City Traffic Engineer has approved the site access and traffic study. The proposed access will meet current City access standards.*

Pros

- Redevelops a nonconforming site to a fully-conforming one.
- Complies with and helps implement the 2025 Plan.
- Appropriately utilizes existing infrastructure and contains many pedestrian features.

Cons

- Would "legitimize" a drive-through use on this site.

The Planning and Zoning Commission recommended that Council approve the proposed conditonal zoning proposal subject to the following conditions. Staff also recommends approval subject to the same conditions: (1) All TRC conditions shall be met; (2) The teller-assisted drive-through operation shall be limited to the hours between 7:00 a.m. to 6:00 p.m. Monday through Saturday; (3) Site lighting shall be limited to a maximum of 12 feet in height and fitted with 90-degree cutoff fixtures to minimize light trespass onto adjoining properties. Site lighting shall be oriented away from residential properties; (4) Retention areas shall be designed as rain-gardens with slopes and depths so as to not require protective fencing; (5) The ATM shall be placed on the front of the building and not be part of the drive-through; (6) Pedestrian design (distinct pavement treatments) shall be installed where driveways cross the sidewalk; (7) The applicant shall install a sidewalk connection between Fenner and Larchmont prior to any occupancy of the building; (8) The applicant shall install a pedestrian crosswalk and signalization across Merrimon at Larchmont prior to any occupancy of the building; (9) Large shade trees shall be utilized for interior landscaping; and (10) The southernmost driveway shall be designed to be right-out only.

Mr. Shuford presented City Council with a list of conditions from the Grace Neighborhood Association. He said that Ms. Billie Buie, representing the Grace Neighborhood Association, met

with Mr. Greg Edney, the developer, and they have agreed on the conditions. However, one item still in question is the sidewalk specification of a ten-foot width. The Association would prefer a two-foot buffer-planting space between the sidewalk and Merrimon Avenue. It was his understanding that Mr. Edney is in agreement with that, however, he needed to clear it through the City's Traffic Engineer. The Association feels that an 8-foot width on most of Merrimon will be sufficient, especially if a buffer is used between the sidewalk and the street. They hoped City Council would include the following conditions in the ordinance: (1) A copy of the final conditions set by City Council will be attached to or recorded on all site plans used for inspection purposes by City staff. This is to insure that inspectors are aware, on site, of all conditions that need to be met. Representatives of Grace Neighborhood Association will review those conditions if they feel the conditions aren't being met; (2) The sidewalk between Fenner and Larchmont that the developer has agreed to build will be completed by the time a CO is granted for the proposed development. The retaining wall behind said sidewalk will be faced with stone or brick or pavers of equal quality. No cinderblock.; (3) The façade of the proposed buildings will be faced with stone, brick, stucco or materials of equal quality to those listed; (4) Real windows will be built into both floors of the proposed building; (5) The South "exit only" curb cut will be a right-turn only exit and will have signage to that effect; (6) Both proposed curb cuts will include paving material different from that of the driveway where the sidewalk crosses it (for pedestrian safety); (7) Hours of operation for the drive-through on the site will be limited to regular banking hours; (8) Rain gardens as shown on the site plan will remain as rain gardens and not just retention basins. Shade trees will be part of the islands used for rain gardens to help shade paved areas; (9) Shade trees that will reach a mature height of greater than 30-feet will be used in the parking lot to shade paved areas; (10) On-site lighting will be low level and directed away from adjacent residential properties; (11) Speaker systems used at the drive-through area will remain at low levels; and (12) signage for the site will follow the requirements of the existing CB-I zoning if it is more restrictive than the proposed NCD/conditional use. Mr. Shuford said that many of the conditions are covered in the staff's recommendation; however, for some conditions he presented alternates or revised conditions.

Ms. Patsy Brison, attorney representing the developer, spoke in support of the conditional zoning, noting how the developer has met with the neighborhood and has made many revisions at the suggestion of the neighborhood.

There was considerable discussion of the hours of operation of the drive-through, in that the staff recommendation was limited between 7:00 a.m. to 6:00 p.m. Monday through Saturday; the neighborhood and developer agreed to 8:30 a.m. to 6:00 p.m. Monday through Friday; and some members of Council were apprehensive about restricting the bank's drive-through hours when the banking business is evolving.

Mr. Shuford responded to Council's concerns associated with some of the neighborhood conditions.

Mr. W. Louis Bissette, attorney representing the property owners who signed the valid protest petition, urged Council to either deny the conditional zoning, or remand it back to the Planning & Zoning Commission for significant changes to the site plan. The proposed structure would block the visibility of the small shopping center just to the south of it. He felt that the proposed zoning is more permissive than the current zoning, allowing the larger building and drive-through. In addition, he felt the exit drive is too close to the existing entrance and will cause more traffic congestion in that area. They have talked to the developer and he said that moving the building 5 feet to the north is the best he could do regarding overshadowing the smaller shopping center.

Mr. Mike Lewis, resident on Gracelyn Road, stated this is the third request for a drive-through since 1995 for a drive-through and wondered why we have a Unified Development

Ordinance if it is not being enforced. He asked Council to consider an interim conditional zoning regulation for the entire Merrimon Avenue corridor until a comprehensive and coordinated plan can be developed.

Ms. Billie Bule reviewed with Council some of the conditions requested. She agreed with Mr. Lewis that there be an interim conditional zoning regulation for the entire Merrimon Avenue corridor until a comprehensive and coordinated plan can be developed. She said that Mr. Edney and his development team have done a really good job meeting with and continuing dialogue with the surrounding neighbors. She hoped that the process the neighborhood and developer have gone through for this development proposal can be a model for future development along Merrimon Avenue.

Mr. Walter Plaue suggested that the entrance to the parking lot be on Fenner Avenue instead of Merrimon Avenue with a traffic light to alleviate traffic congestion on Merrimon Avenue. Mr. Shuford responded why this is not a good option.

Ms. Sarah Rightmyer, area resident, spoke in support of the development in that it does raise the bar for good development along Merrimon Avenue.

At 6:20 p.m., Mayor Worley closed the public hearing.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: can the building be moved back 5 feet; will there be a visibility problem for people exiting onto Merrimon Avenue; is the development compatible with the neighborhood; and is there any solution for the visibility of the one-story building that is at a much lower level than the surrounding property.

Mr. Shuford said that they are planning to do some surveys of people who own property along Merrimon Avenue, as well as in the general vicinity and neighborhoods; to find out how they use Merrimon Avenue; what their visions are for Merrimon Avenue; and what type of development that has occurred along Merrimon Avenue that they like and what type they don't like. That information will be used to help put together a draft corridor zoning plan to comply with the direction that the Planning & Zoning Commission has given and that Council has affirmed.

City Attorney Oast explained to City Council on conditional zonings that the seven conditional use standards need only be considered, not agreed to.

Councilman Davis felt that as we see more development with the new urban design, that we need to educate the public that this is a pedestrian friendly concept.

Councilman Newman moved for the adoption of Ordinance No. 3304, conditionally rezoning property on Merrimon and Fenner Avenues from Community Business I to Neighborhood Corridor District/Conditional Zoning for a proposed office building with a bank drive-through, subject to the following conditions: (1) All TRC conditions shall be met; (2) The teller-assisted drive-through operation shall be limited to the hours of 8:30 a.m. to 6:00 p.m. Monday through Friday (3) Site lighting shall be limited to a maximum of 12 feet in height and fitted with 90-degree cutoff fixtures to minimize light trespass onto adjoining properties. Site lighting shall be oriented away from residential properties; (4) Retention areas shall be designed as rain gardens with slopes and depths so as to not require protective fencing; (5) The ATM shall be placed on the front of the building and not be part of the drive-through; (6) Pedestrian design (distinct pavement treatments) shall be installed where driveways cross the sidewalk; (7) The applicant shall install a sidewalk connection between Fenner and Larchmont prior to any occupancy of the building; (8) The applicant shall install a pedestrian crosswalk and signalization across Merrimon at Larchmont prior to any occupancy of the building; (9) Large shade trees shall

be utilized for interior landscaping; (10) The southernmost driveway shall be designed to be right-out only; (11) The sidewalk between Fenner and Larchmont that the developer has agreed to build will be completed by the time a CO is granted for the proposed development. The retaining wall behind said sidewalk will be faced with stone or brick or pavers of equal quality. No cinderblock.; and (12) We remain flexible in the two-foot buffer-planting space between the sidewalk on Merrimon Avenue. This motion was seconded by Councilwoman Jones.

After further discussion about the conditions, and at 7:02 p.m., it was the consensus of Council to take a short recess to allow Mr. Shuford, the developer and Ms. Buie (as the neighborhood representative) to meet and see if an agreement can be reached regarding the conditions.

At 7:25 p.m., Mr. Shuford presented City Council the a set of conditions that were agreeable to the City, the developer and the neighborhood.

Therefore, Councilman Newman and Councilwoman Jones were agreeable to revising their motion to approve Ordinance No. 3304, conditionally rezoning property on Merrimon and Fenner Avenues from Community Business I to Neighborhood Corridor District/Conditional Zoning for a proposed office building with a bank drive-through, subject to the following conditions: (1) All TRC conditions shall be met; (2) The bank teller-assisted drive-through operation shall be limited to the hours between 8:30 AM to 6:00 PM Monday through Friday; (3) Site lighting shall be limited to a maximum of 12 feet in height and fitted with 90-degree cutoff fixtures to minimize light trespass onto adjoining properties. Site lighting shall be oriented away from residential properties; (4) Retention areas shall be designed as rain gardens with slopes and depths so as to not require protective fencing. Rain garden plantings shall include shade trees adaptive to rain garden conditions; (5) The ATM shall be placed on the front of the building and not be part of the drive-through; (6) Pedestrian design (distinct pavement treatments via stamped concrete) shall be installed where driveways cross the sidewalk; (7) The applicant shall install a sidewalk connection between Fenner and Larchmont prior to any occupancy of the building. Any associated retaining walls will be faced with stone, brick or pavers of equal quality; (8) The applicant shall install a pedestrian crosswalk and signalization across Merrimon at Larchmont prior to any occupancy of the building; (9) Large shade trees shall be utilized for interior landscaping; (10) The southernmost driveway shall be designed to be right-out only, including directional signage; (11) Building façades shall be faced with stone, brick, stucco, or materials of equal quality to those listed; real windows shall be used on both floors of the proposed building; and (12) Sidewalk design shall include features that provide a clear transition from the pedestrian to the vehicular realm. The revised motion by Councilwoman Newman and Councilwoman Jones carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 314

E. PUBLIC HEARING TO CONSIDER THE REZONING OF VACANT PROPERTY ON MERRIMON AVENUE FROM COMMUNITY BUSINESS I DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3305 - ORDINANCE TO REZONE VACANT PROPERTY ON MERRIMON AVENUE FROM COMMUNITY BUSINESS I DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 7:34 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to rezone a vacant lot on Merrimon Avenue from Community Business I District to RS-

8 Residential Single-Family High Density District. This public hearing was advertised on November 11 and 18, 2005.

The adjoining Burger King site is proposed for Neighborhood Corridor District/Conditional Zoning development as a mixed use development.

The *Asheville City Development Plan 2025* encourages compatible zoning. The proposal would rezone a parcel that is physically separated from the commercially-zoned property by topography to the same zoning as the more similarly-situated neighboring properties.

The owner, Northwest Properties, is pursuing this rezoning as a concession to the neighborhood for their support of his NCD CZ zoning of the Burger King site. Staff finds that the proposed rezoning is substantially more compatible than the existing zoning.

- The Community Business-I zoning district is established to provide areas for medium density business and service uses which may serve as a workplace for residents and should be sensitive to a significant pedestrian population. These business areas should be located primarily on streets that serve multiple residential neighborhoods.

- The RS-8 zoning district is designed to establish and promote a suitable and high-density single-family district where public infrastructure is sufficient to support such development.

Pros

- Recognizes the property's physical orientation to surrounding development.

Cons – None noted.

The Planning and Zoning Commission recommended approval of this rezoning request. Staff also recommends approval of this rezoning request.

Ms. Patsy Brison, attorney representing the developer, spoke in support of the rezoning, noting that this rezoning was at the neighborhood's request.

Mayor Worley closed the public hearing at 7:37 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3305. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 316

F. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CONFORM WITH REQUIREMENTS OF STATE LAWS 2005-418 AND 2005-426 ADOPTED SEPTEMBER 22, 2005, CLARIFYING AND MAKING TECHNICAL CHANGES TO THE STATUTES REGARDING PLANNING AND LAND USE MANAGEMENT (INCLUDING THE ENABLING LEGISLATION FOR PLANNING AND REGULATION FO DEVELOPMENT, ART. 19 OF CHAPTER 160A OF THE N.C. GEN. STATUTES)

ORDINANCE NO. 3306 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CONFORM WITH REQUIREMENTS OF STATE LAWS 2005-418 AND 2005-426 ADOPTED SEPTEMBER 22, 2005, CLARIFYING AND MAKING TECHNICAL CHANGES TO THE STATUTES REGARDING PLANNING AND LAND USE MANAGEMENT (INCLUDING THE ENABLING LEGISLATION FOR PLANNING AND REGULATION FO DEVELOPMENT, ART. 19 OF CHAPTER 160A OF THE N.C. GEN. STATUTES)

Mayor Worley opened the public hearing at 7:38 p.m.

Mr. Joe Heard, Director of Development Services, said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of bringing City codes into compliance with recently adopted amendments to State planning statutes. This public hearing was advertised on November 11 and 18, 2005.

On September 22, 2005, the General Assembly of North Carolina passed two pieces of legislation amending planning and development procedures: Session Law 2005-418 entitled *An Act to Clarify and Make Technical Changes to City and County Planning Statutes*; and Session Law 2005-426 entitled *An Act to Modernize and Simplify City and County Planning and Land-Use Management Statutes*. In general, this legislation was adopted to codify certain legal issues, update the types of development tools available to local governments, and clarify many procedural aspects of the development process. Specifically, the legislation requires the City of Asheville to amend the UDO in order to address the following issues:

- Conditions applied to approval by the Board of Adjustment must be related to the circumstances that give rise to the need for the variance.
- The Planning & Zoning Commission must provide a written recommendation to the City Council addressing a proposed amendment's consistency with adopted plans.
- In adopting any amendment, the City Council must adopt a statement describing whether its action is reasonable and consistent with adopted plans.
- Any condition placed on a project undergoing conditional zoning must be mutually agreed to by the City Council and the petitioner.
- Many standards for protest petitions are amended and clarified. Changes of significance include vacant or excused seats on Council shall not be calculated when figuring a supermajority, a minimum of 5% of a buffer 100 feet surrounding the property is necessary for a valid protest, and a person can withdraw his/her name from a petition at any time prior to the vote.

Pro –

- The proposed amendments would bring the UDO into compliance with State planning statutes, making the UDO more consistent with other adopted laws and more legally defensible.

Con –

- The proposed requirements place additional burdens on applicable boards, commissions, and City Council to justify decisions based on reasonableness and consistency with adopted plans.

The Planning and Zoning Commission recommended approval of these code amendments on November 2, 2005, by a unanimous vote of 6-0. In order to bring the UDO into compliance with State planning statutes, staff recommends approval of the proposed ordinance amendment as well.

Mayor Worley closed the public hearing at 7:42 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3306. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 318

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ANNUAL AUDIT REPORT

Chief Financial Officer Ben Durant said that this is the presentation of the City of Asheville annual audit report for the Fiscal Year Ended June 30, 2005.

City Council retained an independent audit firm, Martin Starnes & Associates, CPA's, P.A. of Hickory, N.C., to perform an audit of the City of Asheville for the Fiscal Tear ended June 30, 2005, as required by N. C. Gen. Stat. sec. 159-34. The auditors gave the City an unqualified audit opinion. (The term "unqualified" means that the auditors' opinion that the financial statements present fairly the financial position of the City, is not modified by reservations or restrictions.)

Ms. Marcie Spivey, of Martin Starnes & Associates, gave Council a brief presentation of their findings. She explained the role of the auditor, those being (1) to obtain reasonable assurance that basic financial statements are free of material misstatement; (2) to examine evidence supporting the amounts and disclosures in the financial statements; and (3) to assess accounting principles used and overall financial statement presentation. She said they have issued an unqualified opinion on the financial statements of the City. They have noted no matters involving the internal control over financial reporting and its operation that they consider to be material weaknesses. They disclosed no instances of non-compliance or other matters that are required to be reported under Governmental Auditing Standards. Regarding the management letter, (1) they noted certain areas where the City can further enhance its internal control and reported them in a management letter; (2) a management letter normally covers items too immaterial to be included in the report on internal control and compliance; and (3) the items in the current year management letter have been addressed and additional procedures have been put in place. She then reviewed the Fund Balance Summary.

In response to Councilwoman Jones, Mr. Durant said that he would provide Council with details on the approximately $8 Million increase in the total expenditures and transfers to other funds.

B. MOTION TO ACCEPT THE BROWN & CALDWELL WATER SYSTEM IMPROVEMENT REPORT AND DIRECT STAFF TO REPORT BACK TO COUNCIL WITH A PLAN FOR PUBLIC INVOLVEMENT AND RECOMMENDATIONS FOR A TIMEFRAME FOR IMPLEMENTATION FOR BOTH THE CAPITAL IMPROVEMENT FEE AND THE RATE RESTRUCTURING

Mr. Richard Stahr, consultant with Brown and Caldwell Engineering, reviewed with Council the current water system overview along with the goals related to water infrastructure

sustainability. He benchmarked Asheville vs. other utilities. He pointed out that staff reductions over 10 years have resulted in a lean organization. There has been a 30% reduction in the number of positions since Fiscal Year 1992-93.

He explained that the goals of the Asset Management Program is to minimize life cycle costs while meeting customer needs. Benefits of the Asset Management Program include (1) establishes funding requirements for refurbishment and replacement; (2) prioritizes capital investments; (3) increases dependability of water delivery; (4) focusing resources in the "right" places using asset criticality; and (5) uses improved system knowledge and analytical tools to meet customer services expectations at the lowest life-cycle cost.

He explained that the water plant optimization identifies large capital savings – (1) plant upgrade was expected to cost $12 Million; (2) pilot study showed smart operational changes would save capital dollars; and (3) scaled back upgrade focused on minor improvements and refurbishment needs saving $6 to $7 Million.

He said that the focus needs to be on main replacement rather than leak repair. He said that $5 to $6 Million in upgrades are needed – North Fork upgrade needed to meet regulations; and Bee Tree upgrade needed for long-term operation following 6-year closure. He outlined how the asset management principles were used to develop prioritized a repair & replacement capital improvement program, but more refinement is needed. The current budget for capital projects does not fund needed improvements. The average rate increase over the past 13 years is less than the inflation rate. The current funding shortfall could have been avoided with an annual 4.1% rate increase.

He explained the cost distribution of priority capital projects – (1) management, operations and maintenance projects at $5,750,000; (2) mandatory N.C. Dept. of Transportation projects at $9,305,000; and (3) Repair and Restoration Projects are $32,034,000. The total 7-year capital improvement program is $57.09 million.

He shared the results of a customer telephone survey and focus group meeting surrounding the issue of whether our rate payers would support an increase to fund sustainable infrastructure.

Some consequences of inaction would be (1) Safe Drinking Water Act compliance risks; (2) increased line breakages resulting in higher water loss and increased response costs; (3) inability to support economic development (4) deteriorating customer service; and (5) possible violation of bond covenant.

Water rate challenges include residential customer base is growing but demand remains flat; adequate funding is needed for sustainability; current declining block structure should be evaluated; and outdated development fee may not reflect current value of facilities needed to serve new customers.

He reviewed with Council the capital improvement fee structure that will be based upon meter size with small residential type meters having a monthly charge of $3.50 up to a ten-inch meter monthly charge of $1,430. He used a graph to explain the N.C. water rates trending away from declining block structures.

In summary, the Capital Improvement Program recommendations are to (1) implement the Capital Improvement Program to address the backlog of urgent infrastructure needs; (2) adopt the Capital Improvement Program fee effective January 1, 2006, to address the critical refurbishment and replacement needs; and (3) use revenue bond financing to accelerate the recovery from historical underinvestment (Funding Plan is under development.)

In summary, the rate structure recommendations are to (1) conduct stakeholder input process for an updated development fee and migrating toward a Uniform Rate Structure; and (2) complete the rate structure analysis on a timeline that ties to the budget process.

Mr. Stahl then presented Council with the following implementation timeline: (1) January 1, 2006 – CIP fee effective; (2) January 1, 2006, through, July 1, 2006 – stakeholder input/education process for uniform rate and debt financing plan development; and (3) July , 2006, rate restructuring effective.

He then reviewed with Council the following capital program timeline: (1) November 22, 2005 – Council approves the CIP fee; (2) December 13, 2005 – CMMS Award; (3) January 1, 2006 – CIP fee effective; (4) January 2, 2006 – Water Plant bidding; (5) April, 2006 – Water Plant award; and (6) July 1, 2006 – CIP implementation and rate restructuring effective.

Upon inquiry of Councilman Newman, Mr. Stahl explained the difference of a uniform rate and a flat rate.

Mr. Fred English spoke against the fee in that the City of Asheville citizens already pay the highest rates in North Carolina.

In response to Vice-Mayor Mumpower, City Attorney explained that by the end of calendar year 2006 we should have the Sullivan Acts II and III resolved. Vice-Mayor Mumpower said that he was hesitant in moving forward until the larger picture is resolved.

Councilwoman Jones moved to accept the Brown and Caldwell Funding Needs for Sustainability Report and direct the City Manager to begin scheduling these recommendations into the budget for Fiscal Year 2006-07, specifically not implementing the Capital Improvement Fee to be effective January 1, 2006, because the community needs to be educated similar to the stormwater user fee communication plan. This motion was seconded by Councilman Newman.

Councilman Newman felt it was important to look at the overall rate structure and make those kinds of decisions concurrently with decisions of the Capital Improvement Plan.

Mayor Worley was concerned with the delay of the Capital Improvement Fee, especially since this Council has voted in favor of it in the past, but it had not been implemented due to Buncombe County turning it down when there was a Regional Water Authority. He did feel that January 1, 2006, was a little quick, but he could support a motion that says Council will move forward with the public input portion of the rate fee as quickly as possible. He agreed that we need to look at the rate structure as well.

Councilwoman Bellamy suggested City Council receive the report and give staff adequate time to look at all the nuances as we move forward. Council hasn't even discussed the implementation as she would like to phase the fee in a little at a time. She agreed we need to give staff time to look at this and as it moves forward staff can come back with recommendations on how we are going to implement the recommendations presented tonight, as opposed to beginning the Capital Improvement Fee January 1, 2006.

Councilman Dunn felt the community is well aware that the water system needs to be repaired and would support a few months of public education. Even though no one wants to see their water rates increase, he would support the Capital Improvement Fee be implemented as soon as possible.

Councilman Newman felt there are other ways to talk about reforming our water rate structure. For example, going to a uniform rate structure would be a much less painful rate

structure for residential customers. Some communities are looking at deeply discounting that first amount of water that families need for their most basic necessities to make sure that all customers can afford that amount of water they need to survive with. That could be an important part of looking at a rate structure that would serve our community well into the future.

Mayor Worley moved to amend the main motion to delete directing the City Manager to begin scheduling these recommendations into the budget for Fiscal Year 2006-07, and insert the direction for staff to come back to Council with a plan for public involvement and recommendations for a timeframe for implementation for both the Capital Improvement Fee and the rate restructuring. This motion was seconded by Councilwoman Bellamy and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

The amended main motion to accept the Brown and Caldwell Funding Needs for Sustainability Report and direct staff to come back to Council with a plan for public involvement and recommendations for a timeframe for implementation for both the Capital Improvement Fee and the rate restructuring carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

City Manager Jackson said that we will develop the impact of uniform rates on all customer classes and provide that to Council after the first of the year. We will also review the projects and what this capital money will be used for in some detail that will benefit this Council as well as the community. That will facilitate the kind of discussion Council will want to have after the first of year and then we can move at a pace that the Council is comfortable with – it doesn't have to wait until the budget process. He thinks Council will find that the end of June will come pretty quickly if you do a proper level of analysis and review with the community. Staff will move as quickly as this Council wants to move.

C. RESOLUTION NO. 05-215 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH SCHNABEL ENGINEERING SOUTH P.C., FOR UPDATING WATER RESERVOIR PLANS AND MAPS

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the Mayor to enter into a contract with Schnabel Engineering for updating reservoir operations and emergency action plans; and approval of a budget amendment, in the amount of $692,835, to provide funding for this project.

She said that the following are 10 year old plans – Operation and maintenance of reservoirs and dams; emergency action plans; flood inundation maps; and operations of flood gates at North Fork.

She said that the Water Resources and Engineering Department looked at old plans which required updating. The stakeholders involvement was solicited to create Request for Proposals (RFP) for professional services to update existing plans and also create flood inundation maps and a flood control management plan to minimize downstream flooding from operation of the flood gates at North Fork. The stakeholders group included Biltmore Village representatives, Town of Black Mountain, Buncombe County Emergency Management, RiverLink, local professional engineer and City staff, including Water Resources, Engineering, Planning, and City Administration.

The stakeholders group went over the draft RFP to ensure all concerns of group were covered in the proposal. The draft the RFP went through three changes before final version was acceptable to group and the final version was sent out to over 25 local, regional and national engineering firms. The stakeholders group selected Mr. Jim Augins and Mr. Michael Miller to

represent the group in the selection process; and (5) selection committee also consisted of City staff from Water Resources and Engineering Departments.

Ms. Ball briefly outlined the RFP and the selection process: (1) three firms submitted proposals; (2) selection committee was given copies of the proposals and asked to upgrade each on a number system of questions – based upon criteria in the RFP; (3) each committee member graded the three proposals and then met as a group to discuss; (4) committee agreed that one proposal did not meet the required standards requested in the RFP; (5) the other two firms were highly qualified and scoring by all committees members was very close; (6) the committee decided to bring both firms in for face-to-face interviews; (7) selection committee graded each firm on its presentation and answers to questions by each member of the committee, (8) the committee selected Schnabel Engineering South as the best firm for conducting these studies and plans for operations of the dams at North Fork and Bee Tree; (9) staff met with representatives from the engineering firm to establish cost and time schedule for each task; (10) cost is not to exceed $692,835; and (11) estimated completion for the entire project is October 2006 with modeling requirements by July 2006.

City staff recommends that Council approve (1) the request for the Mayor to enter into a contract with Schnabel Engineering South in the amount of $692,835 for reservoir and dam operation plans; and (2) the budget amendment to reallocate funds from the Water Fund equity account to cover the cost of this project.

Upon inquiry of Vice-Mayor Mumpower, Water Resources Director David Hanks felt that this action will be positive long-term.

Councilwoman Jones was pleased the City was being proactive in this matter and glad about how inclusive the process was for stakeholders.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-215. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 273

D. ORDINANCE NO. 3307 - BUDGET AMENDMENT TO UPDATE WATER RESERVOIR PLANS AND MAPS

Summary: See New Business Item "C" above.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3307. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 321

E. RESOLUTION NO. 05-216 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO CONTRACTS WITH LOCAL NON-PROFIT AGENCIES TO PROVIDE HOUSING FOR FAMILIES DISPLACED BY HURRICANE KATRINA

Ms. Charlotte Caplan, Community Development Director said that this is the consideration of (1) a resolution authorizing the City Manager to enter into contracts with local non-profit agencies to provide housing for families displaced by Hurricane Katrina; the costs of

which will be reimbursed by FEMA via the NC Division of Emergency Manager; and (2) the associated budget amendment, in the amount of $100,000.

The Asheville Chapter of the Red Cross has dealt with requests for assistance from over 500 individuals or families who have evacuated to our area as a result of Hurricanes Katrina and Rita. Of these, 332 had registered with FEMA by October 18 giving temporary addresses within Buncombe County – the fourth highest total for counties in North Carolina.

Housing is the #1 need reported by these evacuees and, to date, approximately 300 families have been provided with temporary shelter in hotels/motels, in conference centers such as Ridgecrest, and in apartments offered by private individuals. An estimated one-third of these have already moved back home to the Gulf States and a handful have moved into more permanent housing here. Over the next few weeks, as Red Cross payment for hotel accommodation runs out we expect that the remainder will either move back home, or seek more permanent housing in our area.

Staff has been in close contact with the non-profit agencies assisting these families – the Red Cross, Asheville-Buncombe Community Christian Ministry (ABCCM), the Affordable Housing Coalition (AHC), and the Housing Authority of the City of Asheville (HACA). A number of faith-based groups and individuals have donated temporary accommodation to ABCCM, and the Red Cross receives reimbursement directly from FEMA for the cost of hotel/motel accommodation for up to 60 days, but otherwise our local non-profits have used their own resources for intake, advice, and housing placements. They will not be able to support the cost of longer-term housing assistance without severely diminishing the assistance they provide to local residents.

We have contacted FEMA and NCEM to find out what federal assistance is available for local efforts and how to structure those efforts in a way that is consistent with FEMA rules for reimbursement. On October 17, we received detailed guidance from NCEM on FEMA's Interim Shelter Assistance program and on October 28 submitted the Interim Shelter Plan, created after consultation with the agencies listed above and with Buncombe County staff.

Through this plan, the City will be reimbursed for the cost of providing housing (not rent assistance) to evacuees for up to 12 months. The City will contract with ABCCM and AHC who will identify those in need of housing, lease suitable units, and place families in those units. We are also seeking retrospective reimbursement of housing expenses already incurred by non-profit providers but at this point we are uncertain whether or not that will be allowed.

It has not been possible to obtain a reliable estimate of the number of people who will remain in our area and seek assistance through the Interim Shelter Program nor for how long they will need it. Other types of FEMA and HUD assistance are available, though not to everyone. We are initially requesting budget authority for $100,000, which is sufficient to rent about 35 apartments for three months.

Every effort will be made to ensure that all expenses incurred by our non-profit partners are eligible for reimbursement by FEMA through NCEM. However, it is possible that our partners may, in good faith, incur expenses that FEMA will deem ineligible. We recommend that in such cases, after all other avenues have been explored, staff should have the discretion to use the City's Housing Trust Fund as a contingency fund to reimburse such good-faith expenses. It is extremely unlikely that such costs would exceed $5,000.

Advantages:

- Provides up to 12 months of housing for people displaced by Katrina
- Prevents homelessness

- Should be 100% reimbursed by FEMA
- Ensures that local non-profits can maintain services to local residents as well as helping Katrina evacuees.

Disadvantages:

- Scale of need is still uncertain – budget is only a rough estimate
- A small probability exists that some expenses may not be reimbursed, requiring a source of contingency funding (Housing Trust Fund recommended).

Staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into contracts with local non-profit agencies to provide housing for families displaced by Hurricane Katrina, which costs will be reimbursed by FEMA via the NC Division of Emergency Manager; and (2) the associated budget amendment, in the amount of $100,000.

Ms. Caplan noted that at November 15, 2005, worksession when this item was being discussed, FEMA issued a press release drastically changing the rules for the interim housing program. FEMA will now provide assistance for only three months, and only for leases entered into before December 1, 2005.

FEMA will continue to provide direct individual assistance to evacuees who are responsible for finding and paying for their own housing. However, there are some evacuees who have already used their initial rent assistance to pay excessive housing costs or for other urgent needs such as food, gas, or clothing for their families. There may be others who for one reason or another do not qualify for FEMA's direct assistance. These families are at risk of becoming homeless just as the coldest winter weather sets in.

In order to avert this risk and utilize FEMA resources through the Interim Shelter Assistance Plan to the greatest extent possible by November 30, she issued a press release urging all Katrina evacuees who are still in short term housing to contact the Affordable Housing Coalition immediately.

At this time, we are aware of 14 families who have been placed in short-term accommodation by the Red Cross or ABCCM, but we are also starting to receive calls from other people who made their own short-term arrangements but now need longer term help. We hope to be able to assist as many as 30 families before the November 30 deadline.

We have been assured by NCEM officials that the plan we submitted is acceptable and that, provided we adhere to FEMA program guidelines, the cost of providing housing to evacuees for three months will be reimbursed in full.

If we do not access this program, it is likely that the same families will eventually seek help either from the Affordable Housing Coalition or from homeless shelters, using funds earmarked for local needs thereby reducing the capacity of these agencies to serve local residents with critical housing needs.

Vice-Mayor Mumpower was concerned that we are not certain FEMA will reimburse the City and we have limited dollars. He doesn't think Asheville is an appropriate mecca for people seeking affordable housing, in that we are struggling to meet the needs of the people we have here. He understands that we are being accommodating to people that would like to be here, but that is not the same thing as wisely using our dollars.

Ms. Caplan responded to Councilman Newman about opportunities for displaced families to stay at Housing Authority facilities.

When Vice-Mayor Mumpower voiced concern about what would happen to the displaced families after 90 days, Ms. Caplan said that those receiving this transitional housing assistance must take responsibility for paying their own rent.

Vice-Mayor Mumpower was concerned that if after 90 days the displaced families don't have additional housing that the City will end up with accountability for something that the federal government has agreed is their accountability. Ms. Caplan said that she would strongly advise the ABCCM and Affordable Housing Coalition that the City of Asheville does not enter into any accountability for more than the first three months of rent.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 05-216. This motion was seconded by Councilwoman Jones.

Councilman Davis felt someone should have contacted the displaced families in our area to see what their future plans are.

Councilwoman Bellamy felt we should approve these actions and then deal with the issue of whether we get reimbursed or not with the proper individuals at FEMA. She suggested a resolution be sent to FEMA mandating that they reimburse the City for the appropriate funds.

After further discussion, Vice-Mayor Mumpower moved to call the previous question which motion carried unanimously.

The motion made by Councilman Newman and seconded by Councilwoman Jones carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 274

F. ORDINANCE NO. 3308 - BUDGET AMENDMENT FOR INTERIM SHELTER EXPENSES FOR FAMILIES DISPLACED BY HURRICANE KATRINA

Summary: See New Business Item "E" above.

Councilwoman Jones moved for the adoption of Ordinance No. 3308. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 22 – PAGE 323

G. RESOLUTION NO. 05-217 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT TO EXECUTE A LICENSE AGREEMENT WITH MOUNTAIN AREA INFORMATION NETWORK FOR AN ANTENNA AT 36 RESERVOIR ROAD

Real Estate Manager Ed Vess said that this is the consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding execution of a License Agreement with Mountain Area Information Network (MAIN) for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge. It has exceptional range for telecommunication with approximately 300° coverage from northeast to west to southeast. Two telecommunication

towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

MAIN has offered to enter into a license agreement for antenna space and related equipment on the tower known as the "U S Cellular Tower" which is the tower to the east with several large dish antennas attached. U S Cellular is the primary tenant on that tower and any antenna installations by others are subject to their approval. U S Cellular is agreeable to the installation by MAIN subject to a favorable tower analysis. A tower analysis is required by the license agreement to assure that the new installation does not interfere with existing installations and that the tower is structurally able to support the additional installation. MAIN will pay for and provide a tower analysis. The proposed License Agreement will enable MAIN to operate three (3) antennas at that site; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. MAIN will pay a License Fee of $7,200 ($200 per antenna per month) the first year with a 4% increase annually thereafter.

The request by MAIN has been reviewed by staff and the proposed equipment compared to existing installations to determine comparability. Currently we have three somewhat similar installations that are producing as follows:

Arch Communications	1 antenna	@ $350 per month
Cingular Communication	4 antennas	@ $287.50 per antenna per month
Morris Communications	3 antennas	@ $276.25 per antenna per month

The license fee proposed for MAIN is somewhat below market rate consistent with the rate approved for the Housing Authority of the City of Asheville by Resolution No. 05-92. Both MAIN and the Housing Authority provide public benefit services to lower income persons that are compatible with governmental function and/or sponsorship. A discounted rate for a non-profit providing such services as well as public safety and emergency response agencies seems reasonable and appropriate

Staff recommends that Council review discounted antenna license fees annually during consideration of appropriations to outside agencies.

Relationship to Broadband Initiative: Antenna rental requests are relatively simple transactions and will not materially affect any potential municipal broadband strategy. Specifically cellular and 900Mhz antenna rentals will not create interference with likely technologies to be used for broadband.

The following benefits will be realized from approval of this item:

- The City will receive revenue that it does not currently receive.
- Antenna space that is currently vacant will be utilized.
- MAIN will have improved capacity to provide low cost high speed wireless internet service to City residents.

Planning & Development and Information Technology staff recommend City Council adopt the resolution directing the City Clerk to publish a Notice of Intent regarding execution of a License Agreement with MAIN for an antenna at 36 Reservoir Road.

Councilman Dunn expressed concern that MAIN is being given a below market rate like the Housing Authority, noting that the Housing Authority puts all their money back into housing.

Councilman Newman spoke in support of MAIN stating that there is a compelling public interest function that they are performing that the other companies are not.

Vice-Mayor Mumpower said that he likes what MAIN is doing, but it is an obvious political entity.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 05-217. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 275

H. RESOLUTION NO. 05-218 - RESOLUTION AUTHORIZING THE EXECUTION OF AGREEMENTS WITH CP&L SETTLING LITIGATION REGARDING THE ANNEXATION OF THE LAKE JULIAN POWER PLANT, AND AMENDING THE 1994 AGREEMENT WITH CP&L REGARDING UTILITY FRANCHISE TAXES

City Attorney Oast said that this is the consideration of a resolution authorizing the execution of agreements with CP&L settling litigation regarding the annexation of the Lake Julian Power Plant, and amending the 1994 agreement with CP&L regarding utility franchise taxes.

In the 1940s, the State of North Carolina adopted a uniform method for assessing utility franchise taxes on certain regulated utilities, and making distribution of those revenues to N. C. municipalities. Prior to that time, utility franchise taxes varied from city to city, and Asheville, like many cities, had its own utility franchise tax. Under the State law, the local taxes were not entirely pre-empted, but there is language that provides that a local tax may not exceed the tax that was imposed as of January 1, 1947.

In the 1980s and early 1990s, the amount of utility franchise tax paid to the City by CP&L and Public Service Gas Company came into dispute, and the parties were headed toward litigation. In 1994, however, they reached an agreement whereby the amount paid by those utilities to the City was fixed. For CP&L, this amount was fixed at $659,418.16. Beginning in 1996, this amount is reduced by property taxes on CP&L's business property in the City. This agreement was enacted into law. The ratio of property / utility tax within this fixed amount varies from year to year. The property tax component – based on natural appreciation – is growing while the utility franchise tax component diminishes. When property tax liability equals or exceeds the fixed amount, CP&L pays the entire property tax, together with a utility franchise tax fixed at $12,153.22 annually (the 1947 level).

In 1989 and again in 2000, the City attempted to annex an unincorporated area on the south side of town which included the Lake Julian Power Plant. On both occasions, the City's annexation of this area was invalidated by the courts. On both occasions, the Lake Julian property has been difficult to "qualify" for annexation, due to its size and other characteristics.

Shortly after finalizing the 1994 agreement, the City and CP&L began discussions about the Lake Julian facility, including annexation and litigation issues. These discussions continued while the 2000 annexation attempt was being reviewed by the courts, and have continued since then. For its part, CP&L (now Progress Energy) uses few City services, is required by law to provide many such services (security, fire protection) itself, and its power generating activities are closely regulated by the federal and State governments. For these reasons, CP&L has resisted, and will continue to resist, annexation of the Lake Julian facility. The City recognizes this, but

also believes that Progress Energy benefits from the proximity of its Lake Julian facility to the City, that the location and availability of City services has value, and that the facility may therefore be fairly considered for annexation.

With this legal and historical background in mind, the City and Progress Energy, have developed a proposed agreement that will resolve these issues and terminate the litigation wherein the 2000 annexation was challenged, it will also foreclose future attempts to annex the Lake Julian facility, and the litigation likely to ensue, and the City will realize some revenue, based on the value of the facility.

Using a formula that incorporates Progress Energy's current City property tax liability, the amount of City property tax that would be due on the Lake Julian facility if it were annexed, and the utility franchise tax, Progress Energy would pay the City an amount that is more than they would pay if the Lake Julian facility were not annexed, but less than they would pay if it were. He reviewed with Council an illustration of how that amount would be computed for 2005, based on current valuation and tax rates. In consideration for an annual payment computed according to this formula, the City would not annex the Lake Julian facility, and the current litigation would be resolved.

The agreement contains provisions that cover what happens if the Lake Julian facility is ever "decommissioned" as a power plant, or if parts of it are ever sold off for other uses. The agreement ensures that Progress Energy will continue to pay its full property tax for all its property in the City (they could not legally do otherwise). The amount received by the City is subject to adjustment in every tax re-valuation year (beginning in 2006), and will increase if the value of the Lake Julian facility (which is fixed by the State) increases. If for some reason the value of the Lake Julian facility decreases, the payment received by the City in franchise fees and property taxes will never drop below the 2005 amount of $759,418.16, as established in the proposed agreement.

Because this agreement affects the City's legislative powers regarding annexation, and because it is an amendment of the 1994 agreement, it will need to be enacted into law by the N. C. General Assembly, as the 1994 agreement was. Under the proposed agreement, this must occur by November 1, 2008. Preliminary discussions with some members of the legislative delegation have been positive.

Considerations:

- Terminates an ongoing (and expensive) dispute about annexation
- Provides escalating revenue stream for the City, based on property values
- Payments will never drop below the 2005 level.
- City relinquishes its ability to annex Lake Julian
- Potential loss of increased tax revenue (including sales tax distribution)
- Precedent may be established
- City will not have to furnish urban services to the property
- Create potential for a "hole" in the City, but does not create a problem for service delivery to surrounding areas

If Council approves of the proposed agreement, adoption of the resolution is recommended.

Mr. Sipes, Regional Vice-President for Operations in Western North Carolina for Progress Energy, spoke in support of the agreement in that he feels it is a fair and equitable agreement for all concerned.

Councilwoman Bellamy voiced concern that we are binding future Councils and will need legislative approval to change it.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 05-218. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 276

I. RESOLUTION NO. 05-219 - RESOLUTION APPOINTING MEMBERS AND A CHAIR TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Councilman Newman moved to excuse Mayor Worley from participating in this matter. This motion was seconded by Vice-Mayor Mumpower and carried unanimously. At this time, Mayor Worley turned the meeting over to Vice-Mayor Mumpower and left the meeting

Vice-Mayor Mumpower said that the terms of Tom Bell and Duane Jarnecke, as members on the Alcoholic Beverage Control Board, expired on November 13, 2005.

At the City Council worksession on August 15, City Council instructed the City Clerk to prepare the proper paperwork to (1) reappoint Mr. Bell to serve an additional three year term, term to expire November 15, 2008; and (2) appoint Charles R. Worley to serve a three year term, term to begin December 7, 2005, and expire November 15, 2008. Both terms are until their successors have been appointed.

City Council also needs to appoint a Chair to the Board. Members are: Tom Bell, Barbara Field, Debora Holmes-Young, Ken Kaplan and Charles R. Worley.

Councilman Dunn expressed concern that the ABC Board is still in a reactive mode, not a proactive role. He felt that all current members on the Board should be held accountable and felt that if Council reappointed Mr. Bell, that the inactivity would continue. He supported Ken Kaplan for the Chairman position.

Vice-Mayor Mumpower thanked Councilman Dunn for bringing accountability to the ABC Board. As a result of that, one of the City's two new members became Chairman and they have appointed a new General Manager.

After Council spoke in support of their candidate for Chairman, Barbara Field received 1 vote, Ken Kaplan received 2 votes, and Charles Worley received 3 votes. Therefore, Charles R. Worley was appointed as Chairman of the ABC Board effective December 7, 2005, until his term expires on November 13, 2008, or until City Council appoints a replacement.

At this time, Mayor Worley returned to the meeting.

RESOLUTION BOOK NO. 29 – PAGE 289

J. RESOLUTION NO. 05-220 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Vice-Mayor Mumpower said that Mr. John Burchfield, representing the Central area, has resigned from the Citizens/Police Advisory Committee, thus leaving an unexpired term until June 30, 2008.

At Council's November 15 worksession, the City Clerk was instructed to arrange interviews for Ed Taylor and Beverly Jeter.

It was the consensus of Council to appoint Ed Taylor as the Central area representative to the Citizens-Police Advisory Committee to serve the unexpired term of Mr. Burchfield, term to expire June 30, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 - PAGE 290

VI. OTHER BUSINESS:

A. RESOLUTION NO. 05-221 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CIVIC CENTER LEASE AGREEMENT WITH THE AMERICAN INDOOR FOOTBALL LEAGUE

Civic Center Director David Pisha said that this is the consideration of a resolution authorizing the City Manager to book AIFL indoor football at the Civic Center.

The Civic Center has held discussions with officials of the AIFL indoor football league for some time. The purpose was to book one of their teams into the venue. The overall financial results accruing to the facility was an important consideration.

The league and the staff at the Center have agreed on terms of a contract that staff believes will provide an equitable basis for both parties upon which to proceed. The basic rent will be $3,750 per game. Basic staffing will be provided as part of the rent. The team will be allowed to sell advertising within the arena. The Civic Center will share in a portion of these proceeds. There are only seven home games in a season. They have requested office space within the venue.

The games will be played during the spring portion of the year when other Civic Center events are less. Interference with other actual events or possible event bookings should be kept to a minimum. No major electrical requirements or other major expenses are foreseen as part of the building's responsibility as encountered with other sports teams. Any specific football equipment needs will be the responsibility of the AIFL. The results are expected to prove profitable for the venue and it provides another type of event for the citizens of Western North Carolina. There does not appear to be any serious negative factors that would affect the Civic Center by booking this event. The initial term of the contract is for one year. This will give both parties the opportunity to access the market for this activity.

The staff believes that booking the event will prove successful. Members of the AIFL have met with the Civic Center Commission at their November 21, 2005, meeting. The Commission was also were positive about indoor football at the Center and concur with staff's recommendation.

City staff recommends City Council authorize the City Manager to sign a contract to book indoor football at the Civic Center.

At the suggestion of Vice-Mayor Mumpower, Mayor Worley felt that a $5,000 deposit would be reasonable amount to cover any loss expenses, if any should occur.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 05-221. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 291

B. ORDINANCE NO. 3309 – BUDGET AMENDMENT FOR REIMBURSEMENT FROM THE ASHEVILLE CLAIMS CORPORATION'S RESERVES TO PAY CLAIMS

Ms. Betty Coulter, new City's Risk Manager, said that this is the consideration of a budget amendment, in the amount of $250,000, from the Asheville Claims Corporation's (ACC) reserves to pay for higher than anticipated immediate and future claims.

The Asheville Claims Corporation is an entity established in 1993 with the charge of managing a self-insurance program and claims administration for the City of Asheville. The Corporation provides claims administration services within the limits established by City Council. The responsibility of the Corporation for administering claims and paying judgments shall also be applicable to claims against officers and employees of the City in accordance with Resolution No. 79-253 entitled "Resolution Relating to Claims and Judgments Sought or Entered Against City Officers or Employees. Although there are numerous matters in which the City can assert Governmental Immunity, there are instances when the City becomes liable for damages. This year has seen an unusually high number of claims where the City's liability could not be seriously contested, and damages have been substantial.

A ten year claims history indicates an average annual claims expense of $150,000, with the highest claims expense of $344,336 occurring in 1999-2000. It is projected that in the current year, claims expenses will exceed our average annual claims amount, thus requiring an additional appropriation of $250,000 to be funded with ACC reserves.

Pro:

- Approval of this amendment will allow us to pay current claims and avoid potential litigation, which could prove to be more costly

Con:

- Reduction of ACC reserves

City staff recommends City Council amend the general insurance and liability budget to increase the claims line appropriation by $250,000.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3309. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 325

C. CLAIMS

The following claims were received by the City of Asheville during the period of November 4-17, 2005: Wesley B. Allen (Police), Ed Hardin (Sanitation), Mike Harrill (Sanitation),

Kathleen McGuire (Streets) and Robert E. Harris (Water). These claims have been referred to Asheville Claims Corporation for investigation.

D. PRIMARY ELECTION RESULTS - CITY OF ASHEVILLE - OCTOBER 11, 2005 GENERAL ELECTION RESULTS - CITY OF ASHEVILLE, NOVEMBER 8, 2005

Attached hereto as Exhibit "A" is the abstract containing the number of legal votes cast in the Primary Election, City of Asheville, held on October 11, 2005. Also attached as Exhibit "B" is the abstract containing the number of legal votes cast in the General Election, City of Asheville, held on November 8, 2005.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilwoman Bellamy moved to direct the City Attorney to prepare a resolution to FEMA asking for them to reimburse the City of Asheville $100,000 after 90 days for the cost of providing housing (not rent assistance) to evacuees of Hurricane Katrina; and to receive a report from the City's Community Development Division on the accountability of the number of people the City of Asheville has helped. This motion was seconded by Councilman Davis and carried unanimously.

Mr. Peter Dawes questioned Council about where they draw the line on freedom of speech or profanity in and out of the Council Chamber.

At this time, Mayor Worley turned the meeting over to Vice-Mayor Mumpower and left the meeting. Mr. Reid Thompson spoke about the problems he has encountered with delivery trucks at Greenlife Grocery on Merrimon Avenue, in addition to the alleged violations of the Unified Development Ordinance regarding buffering.

At this time, Mayor Worley returned to the meeting. Mayor Worley thanked the citizens of Asheville for allowing him to serve as Mayor for the past four years. During his tenure, over a half billion dollars of economic development was added to the tax base; Asheville regained control of its water system, a move that will have a long lasting impact on the City's future; and Asheville saw substantial growth in its parks, greenways and recreation facilities, including the construction and dedication of the John B. Lewis Soccer Complex at Azalea Park. Again, he thanked City Council, staff and the citizens of Asheville for the opportunity to see Asheville prosper.

CLOSED SESSION

At 10:17 p.m., Councilman Newman moved to go into closed session in order to consult with an attorney employed or retained by the City Council about matters in respect to which the attorney-client privilege must be preserved, including potential litigation. The statutory authorization is contained in N. C. Gen. Stat. sec. 160A-318.11 (a) (3). This motion was seconded by Councilman Dunn and carried unanimously.

At 10:35 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:35 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday - December 6, 2005 – 5:00 p.m.

ORGANIZATIONAL SESSION:

Mayor-Elect Terry M. Bellamy welcomed everyone to the organizational session.

Mayor-Elect Bellamy stated that she submitted her letter of resignation as a Council member of the Asheville City Council effective December 6, 2005, in order to take her position as Mayor of the City of Asheville. This resignation results in an unexpired term until December of 2007.

Dr. Joseph C. Dunn led City Council in the Pledge of Allegiance, along with the he Asheville High School JROTC.

Mayor-Elect Bellamy then introduced Dr. Ann Hardman from the River of Life International Church, The Reverend James Walker from Biltmore Baptist Church, and Father Demetri Iliou from Holy Trinity Greek Orthodox Church who each gave an invocation.

The Honorable Gary S. Cash, Chief Judge of the Buncombe County District Court, administered the Oath of Office to the following:

Mayor Terry M. Bellamy
Council Member Robin Lynne Cape
Council Member Diana Hollis Jones
Council Member R. Carl Mumpower

RESOLUTION NO. 05-222 - RESOLUTION OF APPRECIATION FOR CHARLES R. WORLEY

Mayor Bellamy read the resolution.

Resolution No. 05-222 was adopted by acclamation.

Mayor Bellamy presented Mr. Worley with the resolution, a plaque, a picture of City Hall, his name plates and a City pen.

RESOLUTION BOOK NO. 29 - PAGE 292

RESOLUTION NO. 05-223- RESOLUTION OF APPRECIATION FOR JOSEPH C. DUNN

Mayor Bellamy read the resolution.

Resolution No. 05-223 was adopted by acclamation.

Mayor Bellamy presented Dr. Dunn with the resolution, a plaque, a picture of City Hall, his name plates and a City pen.

RESOLUTION BOOK NO. 29 - PAGE 293

ELECTION AND OATH OF OFFICE OF THE SEVENTH MEMBER OF THE ASHEVILLE CITY COUNCIL

Councilman Newman nominated Bryan Freeborn to fill the unexpired City Council term left vacant by Mayor Bellamy, as Mr. Freeborn received the 4th highest votes from the November 8, 2005, General Election. Councilwoman Cape seconded the nomination.

After hearing no more nominations, Mayor Bellamy closed the floor for nominations.

Mayor Bellamy called for a vote, resulting in Bryan Freeborn being appointed to serve the unexpired term of Mayor Bellamy until December 4, 2007, on a 4-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

City Clerk Magdalen Burleson administered the Oath of Office to Councilman Bryan Freeborn.

ELECTION OF VICE-MAYOR

Councilwoman Cape nominated Councilwoman Jones as Vice-Mayor of the City of Asheville. Councilman Newman seconded the nomination.

After hearing no more nominations, Mayor Bellamy closed the floor for nominations.

Mayor Bellamy called for a vote, resulting in Councilwoman Jones being appointed as Vice-Mayor on a 5-1 vote, with Councilwoman Jones abstaining from voting and Councilman Mumpower voting "no."

COMMENTS FROM MAYOR

Mayor Bellamy shared a few thoughts about the work off City Council over the next few years. She felt we needed to review our vision for Asheville's land use plan, development standards and annexation policies. Basic City services need to be a top priority for this Council. City Council must begin to look at ways we can be a player in helping create an environment where people live and work in the community, by (1) embracing the HUB project, the new regional economic development plan and see what part we can undertake to assist in developing a stronger and more inclusive economy; and (2) creating an affordable housing plan that gives clear direction for the inclusion of more housing for our low to moderate income individuals and families. She is committed to greater public involvement in developing the future of our water utility. In summary, she asked for the support of Council, the community, county officials, and state officials. It is her goal to actively partnership and have an active relationship with the community for the best of the entire community.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:05 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – December 13, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Erwin High School JROTC led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF PARKS & RECREATION STAFF FROM N.C. RECREATION AND PARK ASSOCIATION

Mayor Bellamy recognized Mr. Mike Waters, Executive Director of the N.C. Recreation and Park Association who presented Randy Shaw with the Young Professional Award, Ray L. Kisiah Sr., with an award for Hall of Fame Inductee, and Irby Brinson with the Fellow Award.

II. CONSENT AGENDA:

Councilman Mumpower asked that Consent Agenda Item "J" be removed from the Consent Agenda for discussion.

Councilman Davis asked that Consent Agenda Item "I" be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 22, 2005, AND THE ORGANIZATIONAL MEETING HELD ON DECEMBER 6, 2005

B. RESOLUTION NO. 05-224 - RESOLUTION ADOPTING THE 2006 SCHEDULED CITY COUNCIL MEETINGS

RESOLUTION BOOK NO. 29 – PAGE 294

C. ORDINANCE NO. 3310 - BUDGET AMENDMENT TO ACCOUNT FOR HOME PROGRAM FUNDS REPAID TO THE CITY BY TRANSYLVANIA COUNTY HOUSING DEVELOPMENT CORPORATION

Summary: The consideration of a budget amendment, in the amount of $108,610, to account for HOME Program funds repaid to the City by Transylvania County Housing Development Corporation.

In 2000 Transylvania County Housing Development Corporation (TCHDC) expended $108,610 of HOME Program funds on the acquisition of vacant land in Brevard for the

development of affordable housing. Due to the high costs of infrastructure construction, the project did not go forward. HOME program regulations mandate that if expenditures occur without the production of affordable housing units all funds must be returned to the U.S. Treasury. TCHDC sold the property and repaid the City. Upon receipt of the funds, the City repaid the Treasury and the funds were then added back into the City's available HOME funding. It is now necessary to amend the Fiscal Year 2006 Budget to recognize the availability of these funds. They have already been committed to HOME projects in the 2005 Annual Action Plan for CDBG & HOME funding.

This action complies with the City's Strategic Operating Plan to address the goals and objectives of the Housing Opportunities Focus Area

Advantage:

- Adoption of the Amendment will allow the City and the Asheville Regional Housing Consortium to expend the funds for eligible activities under the HOME Program.

Disadvantage:

- None

Community Development staff recommends adoption of the budget amendment to account for HOME Program funds repaid to the City by Transylvania County Housing Development Corporation.

ORDINANCE BOOK NO. 22 – PAGE 327

D. ORDINANCE NO. 3311 - BUDGET AMENDMENT FOR NEW SIDEWALK CONSTRUCTION USING FEE-IN-LIEU OF SIDEWALK CONSTRUCTION FUNDS

Summary: The consideration of a budget amendment, in the amount of $100,000, for the construction of new sidewalks using fee-in-lieu of sidewalk construction funds.

In 1999, City Council authorized allowing developers to pay a fee in lieu of constructing sidewalks for projects. Since that time, the City has collected over $322,000 in revenue from this fee. The City has used this money to build new sidewalks, match N.C. Department of Transportation grants, and make pedestrian improvements at intersections. Some of the projects that have been funded include sidewalk on Trinity Chapel, Hiawassee Street, Hilliard Avenue, Tunnel Road and pedestrian landings at the intersection of Wal-Mart and Hendersonville Road.

As mentioned above, to date the City has collected over $322,000 in fee-in-lieu of revenue, an amount which now exceeds the $300,000 approved budget authorization by $22,000. In addition, the City expects to receive another $78,000 in fee-in-lieu of revenue over the next year. This $100,000 budget amendment will appropriate the $22,000 in additional funds that have already been collected and put in place a budget for the $78,000 in revenue that is expected to be collected over the next year. Staff has earmarked these funds for priority sidewalk projects identified on the approved priority list. The specific locations include Hendersonville Highway, Fairview Road and Patton Avenue.

Consideration:

- The additional revenue will allow the City to install sidewalk in priority locations throughout the City.

This action complies with the City Council Strategic Operating Plan in Goal #3 in the focus area of Natural and Built Environment. Goal #2: Increased street and sidewalk connections. Objective #6 Evaluate funding options for increased needs for construction of sidewalks, greenways and street improvements while continuing to pursue additional local and outside funding sources for capital infrastructure improvements.

City staff recommends City Council approve budget amendment, in the amount of $100,000, for the construction of new sidewalks using fee-in-lieu of sidewalk construction funds.

ORDINANCE BOOK NO. 22 – PAGE 328

E. RESOLUTION NO. 05-225 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY ON BENT TREE ROAD TO SHERYL H. WILLIAMS

Summary: The consideration of a resolution authorizing the Mayor to convey land on Bent Tree Road to Sheryl H. Williams in the amount of $16,000.

On November 22, 2005, City Council authorized advertising for upset bids pursuant to a bid from Sheryl H. Williams for land on Bent Tree Road in the amount of $16,000. The advertisement was published on December 2, 2005, and no upset bids were received.

The land on Bent Tree Road was acquired by the City from Sunset Mountain Company, Inc. in 1954. It is an irregular shaped lot comprising 1.2 acre±. It is very steep and wooded and runs in a long and narrow north/south direction between and parallel to Bent Tree Road and Old Toll Road. It is zoned RS2, but the slope and shape render the lot unsuitable as a home site. The deed of conveyance to the City also restricts the property prohibiting any building or structure of any kind. The bid from Sheryl H. Williams, owner of property across the street, is in the amount of $16,000. Williams has provided an appraisal prepared by Mark Morris SRA dated September 29, 2005, estimating the market value of the property at $16,000. Williams proposes to acquire the property to maintain the lot consistent with the residential character of the neighborhood. She is aware of the deed restrictions and does not plan any construction.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

City staff recommends adoption of the resolution authorizing the Mayor to convey land on Bent Tree Road to Sheryl H. Williams in the amount of $16,000.

RESOLUTION BOOK NO. 29 – PAGE 295

F. RESOLUTION NO. 05-226 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 10, 2006, TO CONSIDER THE VOLUNTARY ANNEXATION OF A HABITAT FOR HUMANITY SUBDIVISION LOCATED OFF OF SAND HILL ROAD

Summary: The consideration of a resolution fixing the date of a public hearing on January 10, 2006, to consider the voluntary annexation of a Habitat for Humanity subdivision located off of Sand Hill Road.

Asheville Area Habitat for Humanity has petitioned the City for the annexation of one lot they own located off of Sand Hill Road containing approximately 18.24 acres. (The property described on the attached legal description is currently showing as three lots on the Buncombe County Tax Listings. It is to be combined into one PIN as it is all part of the same development.) This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

Pursuant to N. C. Gen. Stat. sec. 160A-31, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and it has been found that the petition meets the standards set forth in N.C. Gen. Stat. sec. 160A-31.

This property has been reviewed and approved by the City's Technical Review Committee for a single-family subdivision of 55 lots and Habitat is requesting annexation prior to the construction of the homes in the development.

The next step in this process is for City Council to fix the date for the public hearing on this matter. Should City Council decide to proceed with this request, the effective date for the annexation would January 31, 2006.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Allows the City to review and inspect the development of homes in the proposed subdivision.

Cons:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the resolution setting the date of January 10, 2006, to consider the voluntary annexation of a Habitat for Humanity subdivision located off of Sand Hill Road.

RESOLUTION BOOK NO. 29 – PAGE 296

G. RESOLUTION NO. 05-227 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE REIMBURSEMENT OF FUNDS TO BE EXPENDED FOR BUS SERVICE TO BLACK MOUNTAIN

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Black Mountain.

The NC DOT has tendered a contract to the Asheville Transit System in which the NC DOT will contribute funds for bus service to Black Mountain. The Asheville Transit System will operate said service.

Asheville Transit System will operate an intercity bus route between the City of Asheville and the Town of Black Mountain along US 70 with stops at the Asheville Mall, Riverbend

Marketplace, Veteran's Administration Hospital, and multiple residential areas. The service will operate five times a day, six days a week. All financing will be provided by the State (maximum of $159,619), the Town of Black Mountain ($13,500), Mountain Mobility ($5,443), and Fare Box Revenue ($13,438). The total budgeted cost is $192,000. The contract has a period of performance of 12 months - from July 1, 2005, through June 30, 2006, as well as to pass through funding to Mountain Mobility for the operation of their route in Black Mountain through the same date. These funds are currently programmed in the City budget.

This action complies with the Strategic Operating Plan in the Planning Focus Area- Goal #2-A Multi-modal Transportation System, leveraging outside funding sources

Pros:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville

Cons:

- There are no disadvantages to the City of Asheville.

City staff recommends adoption of the resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation for the reimbursement of funds to be expended for service to Black Mountain.

RESOLUTION BOOK NO. 29 – PAGE 300

H. RESOLUTION NO. 05-228 - RESOLUTION AUTHORIZING PURCHASE OF EASEMENT ALONG THE FRENCH BROAD RIVER FROM ASTON PARK HEALTH CARE CENTER INC. FOR THE HOMINY CREEK/AMBOY ROAD GREENWAY

Summary: The consideration of a resolution accepting a settlement offer from Aston Park Health Care Center Inc. for an easement along the French Broad River for Hominy Creek/Amboy Road Greenway.

The City of Asheville has received a Settlement Offer from Aston Park Health Care Center, Inc. (Aston Park) for an easement along the French Broad River for the sum of $20,000 for Hominy Creek/Amboy Road Greenway.

The Aston Park Health Care Center is located at 380 Brevard Road on property formerly owned by the City of Asheville that was known as Rhododendron Park. The property is situated on the west bank of the French Broad River adjacent to Hominy Creek Park. The Health Care Center sits on a high bluff above the river with a steep, rocky, bramble covered slope down to a narrow band of partially wooded bottom land along the river. This part of the property is in the flood plain and small portions of it are boggy. The proposed easement will follow a linear route along the river from Hominy Creek Park across this low lying portion of the Aston Park property to connect with other easements to provide a greenway connection between Hominy Creek Park to Carrier Park on Ambny Road. The easement will generally be about 30' wide by approximately 1,500' long and encumber 3.2 ± acres. The highest and best use for the Health Care Center property per the appraisal is its existing use as permitted by the current institutional zoning.

The property was appraised by Laurel Jeanne Peart, General Appraiser in collaboration with Benjamin T. Beasley, MAI. The appraisal was reviewed by Joseph F. Moore, General Appraiser who recommended the estimated value of the easement in the amount of $4,000. In response to the City's offer Aston Park provided a letter of opinion from Elbert L. Taylor, GRI estimating the value of the easement at $64,000. The City and Aston Park subsequently

engaged in good faith negotiations and as a result of those negotiations Aston Park has proposed a settlement of the compensation at $20,000.

The City's Real Estate Manager recommends the offer from Aston Park be accepted because it is a fair and reasonable offer considering the appraisal evidence. The general trend of real estate values for similar properties indicates that a settlement at a lower amount is not likely. The time and expense involved in further negotiation, in gathering value evidence and pursuing eminent domain would be substantial with a high risk of getting a less favorable result. Accepting this offer will resolve the issue of compensation and eliminate the need to consider eminent domain.

The positive aspects of the proposed acquisition are:

- The easement will be acquired on terms favorable to the owner as well as to the City.
- The savings realized in time and expense justifies the purchase price.
- It is a voluntary sale at a fairly negotiated price without the use of eminent domain.
- It will give the City control of a substantial portion of the easement area required for the greenway, which is crucial to retaining State funding for the project.
- It will move the process forward toward construction of the greenway.

There are no negative aspects.

Approval of the resolution will establish $20,000.00 as the just compensation for the property and accept the settlement offer from Aston Park for that amount.

The Planning & Development and Parks & Recreation staff recommend City Council proceed with the purchase of the easement for $20,000.00 and recommend accepting a settlement offer from Aston Park Health Care Center Inc. for an easement along the French Broad River for Hominy Creek/Amboy Road Greenway.

RESOLUTION BOOK NO. 29 – PAGE 301

I. RESOLUTION REGARDING FEMA REIMBURSEMENT FOR HOUSING SERVICES EXTENDED TO HURRICANE KATRINA EVACUEES

This matter was pulled from the Consent Agenda for further discussion.

J. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH MOUNTAIN AREA INFORMATION NETWORK FOR ANTENNAS AT 36 RESERVOIR ROAD

This matter was pulled from the Consent Agenda for further discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 05-229 - RESOLUTION REGARDING FEMA REIMBURSEMENT FOR HOUSING SERVICES EXTENDED TO HURRICANE KATRINA EVACUEES

Summary: The City of Asheville requests and expects to receive full reimbursement from FEMA, via the N.C. Division of Emergency Management, of the cost of providing housing in accordance with the approved interim shelter plan and published FEMA guidelines.

Community Development Director Charlotte Caplan responded to questions from Councilman Davis regarding the reimbursement procedure.

Councilman Newman moved to approve Resolution No. 05-229. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 -- PAGE 302

RESOLUTION NO. 05-230 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH MOUNTAIN AREA INFORMATION NETWORK FOR ANTENNAS AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Mountain Area Information Network (MAIN) for antennas at 36 Reservoir Road.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge. It has exceptional range for telecommunication with approximately 300° coverage from northeast to west to southeast. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

MAIN has offered to enter into a license agreement for antenna space and related equipment on the tower known as the "U S Cellular Tower" which is the tower to the east with several large dish antennas attached. U S Cellular is the primary tenant on that tower and any antenna installations by others are subject to their approval. U S Cellular is agreeable to the installation by MAIN subject to a favorable tower analysis. A tower analysis is required by the license agreement to assure that the new installation does not interfere with existing installations and that the tower is structurally able to support the additional installation. MAIN will pay for and provide a tower analysis. The proposed License Agreement will enable MAIN to operate three (3) antennas at that site; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. MAIN will pay a License Fee of $7,200 ($200 per antenna per month) the first year with a 4% increase annually thereafter.

The request by MAIN has been reviewed by staff and the proposed equipment compared to existing installations to determine comparability. Currently we have three somewhat similar installations that are producing as follows:

Arch Communications	1 antenna	@	$350 per month
Cingular Communication	4 antennas	@	$287.50 per antenna per month
Morris Communications	3 antennas	@	$276.25 per antenna per month

The license fee proposed for MAIN is somewhat below market rate consistent with the rate approved for the Housing Authority of the City of Asheville by Resolution No. 05-92. Both MAIN and the Housing Authority provide public benefit services to lower income persons that are compatible with governmental function and/or sponsorship. A discounted rate for a non-profit providing such services as well as public safety and emergency response agencies seems reasonable and appropriate

Staff recommends that Council review discounted antenna license fees annually during consideration of appropriations to outside agencies.

Relationship to Broadband Initiative: Antenna rental requests are relatively simple transactions and will not materially affect any potential municipal broadband strategy. Specifically cellular and 900Mhz antenna rentals will not create interference with likely technologies to be used for broadband.

The following benefits will be realized from approval of this item:

- The City will receive revenue that it does not currently receive.
- Antenna space that is currently vacant will be utilized.
- MAIN will have improved capacity to provide low cost high speed wireless internet service to City residents.

The Notice of Intent to enter into a License Agreement with MAIN was published on December 2, 2005, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

City staff recommends City Council authorize the City Manager to execute a License Agreement with Mountain Area Information Network for antennas at 36 Reservoir Road.

Councilman Mumpower felt the City of Asheville should not be subsidizing, regardless of the quality of the service, an organization that has political agendas.

Vice-Mayor Jones moved for the adoption of Resolution No. 05-230. This motion was seconded by Councilman Freeborn and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 303

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF 966 TUNNEL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING

ORDINANCE NO. 3312 - ORDINANCE TO CONDITIONALLY ZONE 966 TUNNEL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED OFFICE BUILDING

Mayor Bellamy opened the public hearing at 5:14 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone 966 Tunnel Road from RM-6 Residential Multi-Family Low Density District to Office District/Conditional Zoning for a proposed office building. This public hearing was advertised on December 2 and 9, 2005.

The subject property is located within the City limits on Tunnel Road just past the intersection of Tunnel with Governor's View Road. Surrounding properties are all zoned residentially (either RS-4 or RM-6) and contain single-family homes except for property to the west that contains a large church.

The applicants, Haydn and Terry Hasty, wish to rezone the property in order to convert the existing single-family home into an office. The conversion would include an addition of 910 square feet to a structure currently containing approximately 1,010 square feet. The building is designed to be residential in character. The applicant proposes the required number of parking spaces for the development – 7 with one handicapped space. The applicant meets or exceeds all of the City's landscaping standards. Access was initially proposed off of both Tunnel Road and Governor's View Road. However, the City's Traffic Engineer was not recommending a variance for this purpose of the dual access off onto Governor's View Road, because Governor's View Road is classified as a residential street. The applicant has agreed to revise their site plan to have a singular access from Tunnel Road. She felt this should be a condition if Council chooses to approve the conditional zoning.

At their meeting on October 17, 2005, the Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Planning and Zoning Commission. Prior to the Planning and Zoning meeting, the applicant submitted revised drawings addressing most of the comments made at TRC. One outstanding issue that was resolved between these meetings was whether or not access would be permitted onto Governor's View Road. The Traffic Engineer recommends only the access onto Tunnel Road, but full access for the following reasons: (1) There is no alternate full access; (2) We cannot realistically enforce such a driveway at this property; (3) Traffic volumes to the use are expected to be low, so left turns are not a major concern; and (4) This section of Tunnel Road is not over congested so left turns are not a major safety concern. The applicants have expressed their intent to comply with this condition (and all others) should the conditional zoning be approved.

At their meeting on November 2, 2005, the Planning and Zoning Commission considered this matter. The Commission recommended 5-1 to deny this project.

Condition Zoning Analysis:

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance (UDO). The revised site plan submitted for the Planning and Zoning Commission shows compliance or the intent to comply with all regulations.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The applicant has limited the parking provided on the site to that allowed under the UDO and has limited impervious surface to less than 50% of the site. All required landscaping is to be provided and stormwater provisions will be made.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The applicant is proposing considerable landscaping and other improvements to the subject property and has presented an office design that retains the residential character of the structure. Approval of this rezoning would involve the increase in activity associated with an office use that could be perceived as a nuisance and the value of adjacent properties could be negatively affected. This impact may be reduced due to the orientation of this property to the abutting roadways as opposed to many of the other residential properties in the area. The applicants have tried to address the major concerns of the residents in their design. They are willing to limit the signage on the property and to limit the use to offices and residences only.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The single-family home will not be removed but will be expanded making the structure larger than some, but not all, of the homes in the vicinity. It is designed to retain a residential appearance. The parking area is not typical of most of the neighborhood (with the exception of the church).

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The proposed development supports the goals of the 2025 Plan regarding compatible adaptive reuse but could be considered by some to not protect neighborhood viability in this reuse.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The proposed development is within close proximity to transportation facilities and other utilities appear adequate. The project area is located near major road facilities and other service centers.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The traffic to be generated by a small office facility is not expected to cause traffic congestion or traffic hazard. Additionally, traffic generated by this development will most likely only impact one residential lot in the area.

Pros

- Provides for the adaptive reuse of a vacant structure.
- Provides for office use in an easily accessible area.
- The scale and design of the proposed building is in keeping with the residential character of the area.
- The applicant is willing to address many of the neighborhood's concerns in the design of their project.
- Improves pedestrian amenities through the installation of sidewalks along Tunnel Road and payment of a fee-in-lieu for sidewalks on Governor's View Road.

Cons

- Allows for nonresidential development along a stretch of Tunnel Road that is predominately single-family and institutional in nature.
- Reduced potential for residential use (Office zoning does not preclude residential use but a residential component is not part of this application) on this lot.

- The parking lot will not be in keeping with the character of the area, except the parking found at the neighboring church.

For staff, making a recommendation for this proposal was a challenging one. While the immediate surrounding properties are primarily single-family in nature, there is a large institutional use on abutting property and commercial and office ventures immediately adjacent to the institutional use. It is for this reason and due to the size, design and use limitations of the proposed development that staff feels the benefits and detriment tests and issues to be evaluated in the spot zoning review can be balanced to find no spot zoning in this conditional zoning case. This analysis has been concurred by the City Attorney. Staff does, however, recommend the following additional conditions be placed on this development

- That all conditions of the TRC be met.
- That access be limited to Tunnel Road only
- That principal uses be limited to residential and office uses.
- That signage for the office be restricted to Tunnel Road and be limited to one sign, four square feet in size, non-illuminated.

At their meeting on November 2, 2005, the Planning and Zoning Commission recommended denial of this conditional zoning request (5-1).

Ms. Cogburn said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

Mr. Ron Sneed, attorney representing the applicants, spoke in support of the conditional zoning, in that the property is losing it's appeal and its usefulness as a home since it is on a busy highway, the uses under the present zoning are less attractive, marketability of the property since it is on Tunnel Road, and the property is about 20 seconds from one commercial strip to another commercial strip. He said that this development will not hurt property values in the neighborhood. He explained why there are no private restrictions on this property imposed by the Beverly Hills Company. He explained how the business will look like a home and will have low traffic. He urged Council to support this conditional zoning.

Ms. Terry Hasty, one of the owners of 966 Tunnel Road, spoke in support of the conditional zoning in that they will improve the safety of the property, which has been vacant for 3-4 years. They will be decreasing the noise from Tunnel Road to the Governor's View Road properties with their added buffering. Also, they will be constructing a sidewalk on Tunnel Road for safe passage. She reviewed with Council their traffic analysis for 2004-05, showing that a daily average (20-day working month), of only 3.22 cars in their parking lot.

Mr. Carleton Collins, architect for the project, spoke in support of the conditional zoning. He said they have tried to be sensitive in their design and reviewed with Council the building elevation pictures. He felt this would be a good fit into the community.

Ms. Laura I. Hale, Realtor with Keller Williams Professionals Realty, reviewed with Council a sales comparison chart of the property on 966 Tunnel Road, along with a market value analysis. She explained how the property values have increased consistently in the area.

Mr. Haydn Hasty, one of the owners of 966 Tunnel Road, spoke in support of the conditional rezoning and reviewed with Council the list of businesses that already surround Beverly Hills that operate in harmony with the residential neighborhoods. He noted that there are more cars and people that move out of the area businesses in one day, than move in and out of his business in one week. No harm from the current businesses.

The following individuals spoke in support of the conditional zoning for various reasons, some being, but are not limited to: other businesses are allowed along Tunnel Road and this should be no different; this type-business will be less intrusive than other allowable uses; the property seems less desirable for a residential component; the development will not cause traffic, noise or litter in the area; the development will do no harm to the residential community; the owners have made every effort to cooperate with the needs of the neighborhood; a consulting firm will fit in well into a residential area; and office uses are allowed throughout Asheville and they do not lower real estate values:

Owner of Pomodoros on Tunnel Road in East Asheville
Mr. Charlie Campbell, property owner at 960 Tunnel Road
Resident from Haw Creek
Ms. Dorothy Olson, resident at 968 Tunnel Road
Resident of Asheville

The following individuals spoke in opposition of the conditional zoning for various reasons, some being, but are not limited to: this will create an intrusion in the back-side of the property which abuts a residential neighborhood; the area is not a transitional area; homes on Governor's View Road are very small and affordable; when someone buys a home, they should be able to rely on the current zoning; to allow the conditional zoning will start to destroy the integrity of the residential neighborhood; City Council should listen to their appointees on the Planning & Zoning Commission who denied the project; since the developer originally proposed 20 parking spaces and scaled back to 8, where will the overflow parking be located; the property is located on a hill and blind curve and will be a dangerous place to exit; the conditional zoning of the property will result in an illegal spot zoning; approval will send a message that the will of the majority is ignored for the benefit of one entity, even though commercial and office space is plentiful outside of a residential subdivision; and the current property owners bought the property knowing it was zoned residential and it should remain residential:

Ms. Barber Melton, Vice-President of the Coalition of Asheville Neighborhoods
Ms. Diane Hankins, resident at 421 Governor's View Road
Ms. Debbie Applewhite, resident at 56 Fairway Way (presented Council with a definition of "Spot Zoning" from the Modern Real Estate Practice in North Carolina 2003 Edition)
A resident at 178 Beverly Road
Ms. Janet McPherson, adjacent property owner on Governor's View Road
Mr. William Lutz, resident in Beverly Hills
Mr. Moody, resident at 32 Fairway Drive
Ms. Judy Sexton, resident in Beverly Hills
Mr. Mike Cate, resident at 28 Fairway Drive
Mr. Tim Wagner, resident of Beverly Hills
Mr. Fred English, resident in Haw Creek
Mr. Richard Gartz, resident on Governor's View Road
Mr. Chris Pelly, President of the Coalition of Asheville Neighborhoods
Ms. Marilyn Storey, resident at 439 Governor's View Road

Mr. Lee Towery, resident in Haw Creek, spoke in support of the conditional zoning, but noted that the Board of Trustees at Grove Methodist Church opposed the conditional zoning.

Mayor Bellamy closed the public hearing at 6:23 p.m.

Councilman Brownie moved to approve the conditional rezoning of 966 Tunnel Road from RM-6 Residential Multi-Family Low Density District to Office District/Conditional Zoning for a proposed office building, subject to the following conditions: (1) That all conditions of the TRC be

met; (2) That full access be limited to Tunnel Road only; (3) That principal uses be limited to residential and office uses; and (4) That signage for the office be restricted to Tunnel Road and be limited to one sign, four square feet in size, non-illuminated. This motion was seconded by Councilwoman Cape.

Upon inquiry of Councilman Newman regarding regulating overflow parking on Governor's View Road, City Attorney Oast suggested a condition that says no use or event at the subject property will be allowed if that use or event generates more traffic than the parking lot on site can accommodate.

Councilwoman Cape suggested additional buffering in the rear of the property since the Governor's View Road access is being eliminated. Ms. Cogburn suggested a Type-A buffer just along the previous Governor's View Road access, with accommodations for a hidden path for pedestrian traffic.

In response to Councilman Mumpower, Ms. Cogburn tried to relay to Council the reasoning behind the Planning & Zoning Commission denial of the project.

At the request of Councilman Mumpower, City Attorney Oast explained that the ordinance requires each application for conditional zoning be evaluated in reference to the seven conditional use permit standards, but Council is not required to make findings in favor of all of the criteria in order to grant a conditional use request.

In response to Councilman Mumpower, Ms. Cogburn explained why City staff did not feel this conditional zoning was spot zoning.

When Councilman Mumpower asked for data regarding accidents on that portion of Tunnel Road, Ms. Cogburn said that the City's Traffic Engineer was not present and she did not have the traffic counts. However, she read from an e-mail from the Traffic Engineer that said "traffic volumes to the use are expected to be low, so left turns are not a major concern and that section of Tunnel Road is not overly congested."

In response to Councilman Davis regarding the limited number of parking spaces, Mr. Hasty said that when they do host a seminar their clients typically come in groups and car-pool.

In response to Councilman Mumpower, Ms. Cogburn said that if the property is sold and another office use came in, they would have to keep the same site plan, with no alterations to the building, the landscaping, or the ingress/egress onto Tunnel Road.

In response to Mayor Bellamy, Mr. Hasty said that as soon as they can get workable locks on the doors, he has every intention in removing the fence on the property.

When Mayor Bellamy questioned the lighting in the parking space area, Ms. Cogburn said that Council could add a condition that the lighting be kept on the property, so as not to bleed over into the residential component of the neighborhood.

Planning & Development Director Scott Shuford responded to a question from Councilwoman Cape, stating that this conditional zoning doesn't create a precedent situation of opening the door to more commercial zoning.

Councilman Newman and Councilwoman Cape accepted the following amendments to their main motion: (1) a Type-A buffer just along the previous Governor's View Road access, with accommodations for a hidden path for pedestrian traffic; (2) that the lighting be kept on the property, so as not to bleed over into the residential component of the neighborhood; and (3) no

use or event at the subject property will be allowed if that use or event generates more traffic than the parking lot on site can accommodate.

The amended motion by Councilman Newman and seconded by Councilwoman Cape to approve the conditional rezoning of 966 Tunnel Road from RM-6 Residential Multi-Family Low Density District to Office District/Conditional Zoning for a proposed office building, subject to the following conditions: (1) That all conditions of the TRC be met; (2) That full access be limited to Tunnel Road only; (3) That principal uses be limited to residential and office uses; (4) That signage for the office be restricted to Tunnel Road and be limited to one sign, four square feet in size, non-illuminated; (5) a Type-A buffer just along the previous Governor's View Road access, with accommodations for a hidden path for pedestrian traffic; (6) that the lighting be kept on the property, so as not to bleed over into the residential component of the neighborhood; and (7) no use or event at the subject property will be allowed if that use or event generates more traffic than the parking lot on site can accommodate, carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 331

At 7:00 p.m., Mayor Bellamy announced a short recess.

B. PUBLIC HEARING TO CONSIDER REZONING A PORTION OF 440 MONTFORD AVENUE FROM OFFICE DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3313 - ORDINANCE TO REZONE A PORTION OF 440 MONTFORD AVENUE FROM OFFICE DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 7:18 p.m.

Urban Planner Shannon Tuch said that this is the consideration of an ordinance to rezone a portion of 440 Montford Avenue from Office District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on December 2 and 9, 2005.

The property owners, Tim Schaller & Suzanne Kirby, are interested in subdividing the existing .92 acre parcel located in the Montford neighborhood to allow for single family residential infill development. Office zoning does allow single family detached homes as a permitted use and the lot could be subdivided to create two additional lots under the current zoning; however subdividing the existing lot under those standards would result in relocating the existing office use parking and would result in a heavier impact to the site. A recent amendment to the subdivision standards allows greater flexibility in subdividing residentially zoned property for single-family lots and would allow for a more sensitive design.

The rezoning proposal as presented would allow for up to two single family home lots while retaining the existing office use and zoning on the balance of the property. The residential portion of the property would be located at the rear of the site adjacent to other single-family uses, while the existing office use would remain fronting on Montford Avenue. Any new construction on these lots would require HRC review.

- The RS-8 zoning district is designed to establish and promote a suitable and high density single-family district where public infrastructure is sufficient to support such development.

- The purpose of the Office zoning district is to provide small scale office uses (or a mixture of office and residential use) adjacent to residential uses and to serve as a transition between residential and commercial areas.

At their November 2, 2005, meeting, the Planning & Zoning Commission voted unanimously to approve the rezoning request and forward the application to the Asheville City Council.

Pros

- Provides opportunity for compatible residential infill development

Cons

- Reduces opportunity for expanding the existing office use

Staff concurs with the Planning & Zoning Commission and recommends approval of the rezoning request for a portion of the property located at 440 Montford Avenue to be rezoned from Office to RS-8.

Mr. Tim Schaller, property owner, spoke in support of this rezoning that will have minimum impact on the neighborhood.

Mayor Bellamy closed the public hearing at 7:22 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3313. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 335

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 05-231 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXTEND AN EXISTING CONTRACT WITH BUNCOMBE COUNTY TO CONTINUE FIRE AND RESCUE DISPATCH SERVICES

Fire Chief Greg Grayson said that this is the consideration of a resolution authorizing the City Manager to extend an existing contract with Buncombe County Government in order to continue providing 911 emergency dispatch services for the Asheville Fire and Rescue Department.

On June 3, 2003, City Council gave staff direction to participate with Buncombe County in a joint 911 emergency communications center in approximately 2.5 years. On September 2, 2003, by resolution, City Council authorized the City Manager to execute a performance based contract with Buncombe County Government for dispatch of fire and rescue calls and continue dispatching police emergency calls as we were currently doing. This interim arrangement was to be in effect until a joint, consolidated 911 emergency communications center was constructed and operational – which was anticipated by January 1, 2006.

Due to a number of unexpected factors, Buncombe County has not yet been able to construct and make operational a joint consolidated 911 emergency communications center. The facility was originally planned for the new County Detention Facility Annex. However, conditions

were such that the County decided not to place the center in that building and seek another location. A number of alternative locations have been considered included several sites in the downtown Asheville area. A suitable alternative site was not found by Buncombe County in the downtown area. However, the County is now planning renovation and construction of a facility near Erwin High School.

In order to ensure continuity of emergency fire and rescue operations, Buncombe County has offered to continue all of the terms and conditions in the performance based contract from 2003 for interim 911 emergency dispatch services for the Asheville Fire and Rescue Department until such time that a proper facility can be constructed and made operational.

The current contract is set to expire on December 31, 2005. City staff recommends that the current contract with Buncombe County be extended for a one (1) year period until December 31, 2006.

The method of operation with Buncombe County providing fire and rescue dispatches directly at the public safety answering point (PSAP) has improved the city's fire and rescue response time standard of cover by approximately 5%. This current method of operation also earns approximately 25% higher credit under the communications component of the insurance rating services (ISO) versus a dispatch method involving a 911 call transfer.

Staff recognizes that more work needs to be done between the City of Asheville and Buncombe County once a communications center site is agreed upon and the design of the facility is complete. There are a number of operational issues that have not been able to be addressed because the center location has not yet been confirmed. Management of police emergency calls is the primary point of consideration.

Pros:

- The current contract is a "no financial cost" contract for the City of Asheville;
- The current method of operation has been working well operationally for Asheville Fire and Rescue;
- Improved standard of cover and improved insurance rating points versus the call transfer method for fire and rescue emergencies.

Cons:

- The extended contract would continue the agreement that the City of Asheville agrees not to establish its own Public Safety Answering Point (PSAP) as long as the county meets their contractual agreements.
- Because the city does not operate a PSAP, Police 911 emergency calls will continue to be transferred to Asheville Police Department for dispatch.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends that the City Manager be given authority to extend the current performance based contract with Buncombe County for fire and rescue 911 emergency communications dispatch services from the previous expiration date of December 31, 2005, until December 31, 2006.

EMS Director Jerry VeHaun explained the reason for the delay and hoped to begin construction in January, 2006.

Fire Chief Grayson responded to a question raised by Councilman Mumpower regarding the Police 911 emergency calls continuing to be transferred to the Asheville Police Department for dispatch.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 05-231. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 304

VI. OTHER BUSINESS:

Mayor Bellamy announced that starting at this meeting, citizens interested in speaking during the public comment period (not during scheduled public hearings), will be required to sign a "Sign Up" Sheet which is available outside the Council Chamber on the table and also next to the City Clerk. Speakers must complete the form and give it to the City Clerk prior to the public comment period. Speakers will be called on in order to which the forms were received. This will ensure that all comments heard will be followed up by appropriate City staff. She thanked the citizens for their cooperation in this change.

Councilman Mumpower thanked (1) the Seabees and others for their help in the first Top-A-Stop built at Pisgah View; and (2) the volunteers who participated in the clean-up day in and around Aston Park Towers.

On behalf of City Council, Councilman Davis expressed deep sympathy on the passing of Rick Maas.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English, resident of Haw Creek, felt that public comment should have been allowed on the nomination of the seventh member of City Council at City Council's December 6, 2005, organizational meeting.

Ms. Leslee Kulba, speaking on Freedom Works, Fishburne Communications, and The Libertarian Party of Buncombe County, presented City Council with "The Law – The Classic Blueprint for a Just Society" by Frederic Bastiat, as a reminder that America was founded on the principles of liberty and justice for all.

Closed Session

At 7:37 p.m., Councilman Mumpower moved to go into closed session for the following reason: To consult with attorneys employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, Reid Thompson, Board of Adjustment, and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 9:20 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:20 p.m.

Magdalen Bowlerson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – January 10, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

Ms. McLain R. Rose started the new year by singing the National Anthem.

INVOCATION

The Reverend Jim Abbott from St. Matthias Episcopal Church gave the invocation.

I. PROCLAMATIONS:

A UNITED WAY CAMPAIGN

Mr. David Bailey, representing the United Way, thanked the City of Asheville for the 2005 outstanding United Way campaign. The goal set by the City of Asheville was $85,000 and the City employees contributed $94,000. Mr. Bailey presented the City of Asheville with the Spirit of the Mountain Award. He spoke highly of the City of Asheville's Campaign co-coordinators Police Chief Bill Hogan and Marketing Communications Coordinator Laurie Saxton.

B. RECOGNITION OF FIRE DEPARTMENT EMPLOYEES

Mayor Bellamy recognized Fire Department employees Captain Steve Fridl, Firefighter Josh Walton and Engineer Brian Metts. These men responded to a call involving a 2-year old boy on Saturday, December 10, 2005, who had chocked on candy while shopping with his parents at the Mast General Store. These men were able to work with the child and obtain an open airway, as he was non-breathing and blue in color. The Emergency Medical Services staff arrived after they opened the airway and the child was transported.

On behalf of City Council, she commended them for their fine work!

II. CONSENT AGENDA:

Mayor Bellamy removed Items "B", "C" and "H" from the Consent Agenda for further discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 13, 2005

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH PEARCE, BRINKLEY, CEASE AND LEE ARCHITECTURE TO DEVELOP A MASTER PLAN AND CONSTRUCTION DOCUMENTS FOR THE W.C. REID CENTER FOR CREATIVE ARTS

This matter was pulled off the Consent Agenda for further discussion.

C. **RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH THE NATIONAL WEATHER SERVICES TO ACCEPT A GRANT FOR AN AUTOMATED FLOOD WARNING SYSTEM**

BUDGET AMENDMENT FROM THE NATIONAL WEATHER SERVICE FOR A GRANT FOR AN AUTOMATED FLOOD WARNING SYSTEM

These matters were pulled off the Consent Agenda for further discussion.

D. **RESOLUTION NO. 06-2 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE EASEMENT FOR ELECTRIC POWER DISTRIBUTION FACILITIES IN PACK SQUARE/CITY COUNTY PLAZA AREA**

Summary: The consideration of a resolution authorizing the City Manager to execute an easement allowing for the location / relocation of electrical power distribution facilities and lines.

In connection with the construction and renovation activities in the Pack Square / City County Plaza area, Progress Energy needs to reconfigure some of its power distribution facilities in the area. There is already a switchbox located in the grassy area at the southeast corner of the North Market Street and College Street intersection. A line runs underground from the switchbox to a manhole in the middle of that intersection. There is also an existing line running underground along Spruce Street (from Court Plaza to College). The transformer located on the southeast corner of Spruce Street and Court Plaza will remain where it is.

The proposed easement calls for moving the switchbox from its current location to the sidewalk along the south side of College Street, where it will be installed in a vault underground, and a new distribution line to be installed underground in College Street from Market to Spruce Street. A new transformer will be installed in front of the Police/Fire building. The easement will also recognize existing underground lines. This easement request has been reviewed by Public Works and Engineering, and no issues were identified.

Considerations:

- This work will result in utility structures being moved to an underground location
- This work will be performed by the PS/CCP area is under construction
- This should result in improved appearance
- There should be no interference with the use of the road or other utilities
- Existing lines will be reconfigured
- The City will receive no compensation (but usually does not for these utility installations in the right-of-way)

If Council approves of the easement, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 29 – PAGE 306

E. **ORDINANCE NO. 3314 - BUDGET AMENDMENT FROM THE N.C. DIVISION OF AGING AND THE LAND OF SKY REGIONAL COUNCIL FOR IMPROVEMENTS AT THE SENIOR OPPORTUNITY CENTER**

Summary: The consideration of a budget amendment, in the amount of $5,454, for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding for the Senior Opportunity Center.

Funds will be used for center improvements and for purchase of supplies and equipment that will enhance center operations and services.

Pro: Provide improvements, equipment and supplies that will enhance center operations and services specifically for the senior citizens who use the center daily.

Cons: - None noted

This action complies with City of Asheville Strategic Operating Plan. Focus Area: Partnership to improve critical services and infrastructure. Goal #2: Diversified and broadened revenue sources-develop alternative revenue sources that are available to address local needs.

City staff recommends City Council approve the budget amendment to establish a budget for center improvements, equipment and supplies for the Senior Opportunity Center.

ORDINANCE BOOK NO. 22 – PAGE 337

F. ORDINANCE NO. 3315 - BUDGET AMENDMENT FROM THE N.C. DIVISION OF AGING AND THE LAND OF SKY REGIONAL COUNCIL FOR IMPROVEMENTS AT THE HARVEST HOUSE

Summary: The consideration of a budget amendment, in the amount of $16,362, for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding for the Harvest House.

Funds will be used to install new floors throughout the first floor of the Harvest House. The current floors are old and deteriorated and have outlived their useful life. This update will make the Harvest House safer and more aesthetically pleasing.

Pros: - Achieves much needed repairs without using general fund dollars.

Cons: - None noted

This action complies with City of Asheville Strategic Operating Plan. Focus Area: Partnership to improve critical services and infrastructure. Goal #2: Diversified and broadened revenue sources-develop alternative revenue sources that are available to address local needs.

City staff recommends City Council approve the budget amendment to establish a budget to install new floors on the first floor of the Harvest House.

ORDINANCE BOOK NO. 22 – PAGE 339

G. ORDINANCE NO. 3316 - BUDGET AMENDMENT FROM A GRANT FROM THE U.S. TENNIS ASSOCIATION FOR RENOVATION OF THE ASTON PARK TENNIS CENTER

Summary: The consideration of a budget amendment, in the amount of $89,000, to recognize a grant award from the United States Tennis Association.

In June 2005, the City of Asheville applied for a grant from the United States Tennis Association to assist with the renovation of the Aston Park tennis facilities. The grant was recently awarded in the amount of $89,000.

Pros:

- Allows for the City to develop improvements to Aston Park without taxpayer investment.
- Completes the construction of the Irene and Dick Covington Tennis Center.
- Completion of the Center will allow for community use in the meeting space provided

Cons:

- None

City staff recommends City Council approve the budget amendment to increase the budget for the renovation of Aston Park.

ORDINANCE BOOK NO. 22 – PAGE 341

H. RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO APPLY TO THE N.C. PARKS AND RECREATION TRUST FUND FOR A GRANT TO ASSIST WITH THE RENOVATION OF REID CENTER

This matter was pulled off the Consent Agenda for further discussion.

I. RESOLUTION NO. 06- 4 – RESOLUTION AUTHORIZING THE MAYOR TO CONVEY WHATEVER INTEREST, IF ANY, THE CITY MAY HAVE IN THAT PORTION OF THE RIGHT-OF-WAY OF CRESTMONT AVENUE WHERE THE DWELLING LOCATED AT 80 BEVERLY ROAD ENCROACHES

Summary: The consideration of a resolution authorizing the conveyance of a non-warranty deed to Mary E. Kingston for the slight encroachment of her residential dwelling into the City's right of way of Crestmont Avenue.

Crestmont Avenue was platted in 1926 and the dwelling located at the corner of Beverly Road (80 Beverly Road) and Crestmont Avenue was built in 1934. There are three different right of way widths for Crestmont Avenue, 40 feet, 45 feet and 50 feet. The dwelling located at 80 Beverly Road encroaches approximately 2 feet at 2 separate points into the right of way of Crestmont Avenue and has been so encroaching since its construction in 1934. The current owner of the dwelling at 80 Beverly Road, Mary E. Kingston, has requested that the City quit claim any interest if any, the City may have in the areas of the encroachment. The reason for the request is that the areas of the encroachment are defects on Ms. Kingston title to the property, which impacts the marketability of the property. Additionally, there is a pending sale of the dwelling and the new prospective owner has conditioned the purchase on the encroachment defects being resolved prior to purchase.

City staff has investigated the request by reviewing the land records, plats and surveys and inspecting the property in question. Additionally, other appropriate affected departments have been informed about Ms. Kingston's request. There has been no opposition to the request. The City is not in need of the property where the encroachments are located.

The positive aspects of the conveyance by non-warranty deed are:

- It relieves the City of potential liability for the areas of encroachment
- The property owner is not required to obtain an encroachment agreement from the City
- Addition onto the tax roll of the small areas previously classified as City right of way

The negative aspects are:

- Irregular shaped right of way along that portion of Crestmont Avenue

City staff recommends that the City Council authorize the Mayor to convey by non-warranty deed the two (2) areas of encroachment as shown in Plat Book 10 at Page 95 of the Buncombe County Registry.

RESOLUTION BOOK NO. 29 – PAGE 308

J. RESOLUTION NO. 06-5 - RESOLUTION ACCEPTING THE BID FROM CAROLINA SPECIALTIES INC. AND AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA SPECIALTIES INC. FOR ROOF IMPROVEMENTS TO THE TRANSIT GARAGE

Summary: The consideration of a resolution accepting the bid from Carolina Specialties, Inc. and authorizing the City Manager to enter into an contract with Carolina Specialties, Inc. for roof improvements to the transit garage.

The City has received a federal grant to purchase construction services for roof rehabilitation to the transit garage. This project is part of a routine maintenance schedule with a total cost of $97,187.60. The project is funded by a grant from the Federal Transit Administration. The project is in the Capital Improvement Plan budget and the matching funds have been accumulated.

Pros:
- Rehabilitation of aging facility
- Leverage outside funding source to improve City facility

Con:
- The project will have no negative impact on any city operation or create any secondary operating or capital expenses.
- The neighbors may experience some construction noise for a few days during business hours as the rusted roof is removed and the new plates installed.

This action complies with the City Council's Strategic Operating Plan in the Planning Focus Area- Goal #2-A Multi-modal Transportation System, leveraging outside funding sources

City staff recommends City Council grant the City Manager authority to purchase the improvements funded by Federal Grant Number NC-90-X352-01.

RESOLUTION BOOK NO. 29 – PAGE 309

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 06-1 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH PEARCE, BRINKLEY, CEASE AND LEE ARCHITECTURE TO DEVELOP A MASTER PLAN AND CONSTRUCTION DOCUMENTS FOR THE W.C. REID CENTER FOR CREATIVE ARTS

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Pearce, Brinkley, Cease and Lee Architecture to develop a master plan and construction documents for the W.C Reid Center for Creative Arts based on City Council direction during the Fiscal Year 2005-06 budget process.

The City of Asheville Parks and Recreation Department is in the process of developing a master plan and construction documents for the W.C Reid Center for Creative Arts.

This municipal recreation center is the site of a former school on Livingston Street. The existing facility has served the community for many years with modest improvements to enhance its basic recreation services. For the facility to evolve into a more focused multi-disciplinary arts program, the building and grounds require building code, functional and aesthetic improvements. A master plan is required in order to manifest these improvements and will include extensive community input sessions and focus group sessions with various users of the facility. If consultant's master plan/design work is satisfactory, the consultant will be asked to implement the construction documentation phase immediately. A request for qualifications was issued to all local architects, and the selection process was conducted by a committee that consisted of members of the Parks and Recreation staff as well as a representative from the Reid Center Advisory Board. The project was bid out according to city standards that included the Minority Business Plan. The firm of Pearce, Brinkley, Cease and Lee Architecture was selected as the optimum firm during the course of this process. Funds are available in the current capital improvement budget for this phase of the development.

Pros

- The development of this project would greatly enhance the ability to provide unique, vital recreation services to the community.
- The improvements at the center will enhance its physical and programmatic relationship to the surrounding neighborhood.
- The center will be a local and regional attraction that will foster economic development.
- Continuity of master plan and construction documentation with one firm.

Cons

- The work is extensive and costly to develop this high quality center.
- The facility will require increased staffing and materials to maintain it via the operating budget.

City staff recommends that City Council authorize the City Manager to enter into a contract with Pearce, Brinkley, Cease and Lee Architecture in the amount of $103,350 to develop a master plan for the W.C Reid Center for Creative Arts with construction documentation to follow.

Upon inquiry of Councilwoman Cape, Mr. Brinson explained who they will look to for the focus group on the design of the Reid Center.

Councilman Newman moved to approve Resolution No. 06-1. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 305

RESOLUTION NO. 06-3 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO APPLY TO THE N.C. PARKS AND RECREATION TRUST FUND FOR A GRANT TO ASSIST WITH THE RENOVATION OF REID CENTER

Summary: The consideration of a resolution authorizing the Mayor to apply for and enter into an agreement with the N.C. Dept. of Environment and Natural Resources for a grant to assist with the renovation of the Reid Center.

The renovation of the Reid Center is identified as a priority by the Asheville Parks and Recreation Department comprehensive master plan, the Reid Center Advisory Board, by the neighborhoods surrounding the center, and by the community at large. The Reid Center in located in the heart of several neighborhoods and daily serves a high proportion of at-risk youth and teens who live in the neighborhoods. In addition to general recreation programs, Reid Center is planned to become one of Asheville's leading cultural art venues with an emphasis on the performing and visual arts.

The Parks and Recreation Department is in the second year of a three-year partnership with the Junior League of Asheville to implement a capital campaign to raise most of the $3 million needed to support renovation cost. The Parks and Recreation Trust Fund will be the first significant grant application as part of the capital campaign, and serve as seed money for future fundraising efforts.

The Parks and Recreation Department is requesting $500,000 in grant funds for renovation of the Reid Center from the North Carolina Parks and Recreation Trust Fund. The grant application requires a dollar for dollar cash match. The cash match is in the proposed Parks and Recreation Department's Fiscal Year 2006/2007 Capital Improvement Project budget.

Pros:

- Continue to make progress on the Parks and Recreation Department's strategic plan to renovate and improve the Reid Center.
- Respond to public demand to improve the Reid Center.
- Raise outside funds to support facility renovations and reduce reliability on City funds to support Capital Improvement Project cost.

Cons: - None noted.

This action complies with the City of Asheville Strategic Operating Plan. Focus Area: Partnership to improve critical services and infrastructure. Goal #4: Develop programs and policies to defeat street level drug problems and crime.

City staff recommends the City of Asheville apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund for $500,000 for renovation of the Reid Center.

Councilman Mumpower said that the Reid Center does good things and really makes a difference, however, he was concerned with the $3 Million needed for renovations and the $500,000 needed for a cash match.

Mr. Brinson responded to various questions and comments from Council. He explained that generally they have been good in securing funds to where 80% of what we bring in is raised from outside and 20% is the City's commitment.

In response to Vice-Mayor Jones' question if the $500,000 could be spread out over a 5-year period or if the match must be made in a lump sum, Mr. Brinson explained why the $500,000 could not be spread over multiple years. Vice-Mayor Jones urged Mr. Brinson to continually look for other ways to match the $500,000 so the General Fund would not be impacted so much.

Upon inquiry of Vice-Mayor Jones, Mr. Brinson said that the renovation of the Reid Center will be their number one priority in the Capital Improvement Plan because of the match potential to double their money.

In response to Councilwoman Cape, Mr. Brinson said that he would be happy to share with Council the Parks & Recreation Department's overall strategic plan.

In response to Councilman Newman, Mr. Brinson said that over the years the City has been aggressive with new park development and at this point he feels they need to stabilize and begin maintaining the facilities we currently have. He shared his long-term vision for the 11 community centers around the City.

Ms. Sophie Dixon and Ms. Cory White both spoke in support of the need for the renovation of the Reid Center.

Councilman Newman moved to approve Resolution No. 06-3. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 307

RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH THE NATIONAL WEATHER SERVICES TO ACCEPT A GRANT FOR AN AUTOMATED FLOOD WARNING SYSTEM

BUDGET AMENDMENT FROM THE NATIONAL WEATHER SERVICE FOR A GRANT FOR AN AUTOMATED FLOOD WARNING SYSTEM

Summary: The consideration of a resolution authorizing the City to enter into an agreement with the National Weather Service for a grant for an automated flood warning system consisting of four (4) rain gages and four (4) combination rain and stream gages, and an associated budget amendment in the amount of $103,955.

In October 2004, the City of Asheville applied for an $184,245 grant from the National Weather Service. This grant included the following: 1) Development of an Automated Flood Warning System which consists of four rain gages and four combination rain and stream gages, including equipment and installation; 2) Development of a Flood Response Plan; and, 3) Preparation of Public Outreach Materials, including public meetings to promote the Automated Flood Warning System and the Flood Response.

Ultimately, the National Weather Service awarded the City $57,620 to cover the purchase of four rain gages and four combination rain and stream gages. The City will bear the cost of installing these gages, which will be $46,335. The City will contract out the installation of the gages, and this expense will be paid for with revenues from the Stormwater Utility Fund. The North Carolina Flood Mapping Program has agreed to maintain these gages after they're installed so they can become a part of the United States Geological Services overall flood warning program. The exact location of these gages will be determined as part of the reservoir study. The gages should be installed by July 2006.

Considerations:

- The first consideration of this project is the cost the project. The grant is covering approximately 55% of the project cost.
- The grant does not cover the maintenance cost of the gages. John Dorman with the National Weather Service has agreed to pay these costs.
- The data from these gages will allow us to better prepare for flooding.
- The National Weather Services has indicated they would like to fund more projects for the City once this project is complete.

This action complies with the City Council Strategic Operating Plan in Goal #1 in the focus area of Natural and Built Environment. Goal #1: Enhance and preserve air and water quality through comprehensive efforts. Objective #D Improve water quality.

City staff recommends City Council authorize the City to enter into an agreement with the National Weather Service for an automated flood warning system consisting of four (4) rain gages and four (4) combination rain and stream gages, and adopt the associated budget amendment.

Ms. Ball responded to various questions/comments from Council regarding the need for the rain gages and why the data from the gages will produce a better, more precise, product for the inundation study.

After further discussion, Councilman Mumpower moved to continue this matter to the next worksession to allow Council more time to get a better understanding of the automated flood warning system. This motion was seconded by Councilman Davis and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE A HABITAT FOR HUMANITY SUBDIVISION LOCATED OFF OF SAND HILL ROAD

Mayor Bellamy said that the City and the property owner have requested this public hearing be continued until February 14, 2006. Therefore, Vice-Mayor Jones moved to continue the public hearing until February 14, 2006. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON MILLS GAP ROAD AND SWEETEN CREEK ROAD, KNOWN AS MILLS CREEK CONDOMINIUMS, FOR A 76-UNIT CONDOMINIUM DEVELOPMENT

ORDINANCE NO. 3317 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON MILLS GAP ROAD AND SWEETEN CREEK ROAD, KNOWN AS MILLS CREEK CONDOMINIUMS, FOR A 76-UNIT CONDOMINIUM DEVELOPMENT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:03 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of the issuance of a conditional use permit for property located on Mills Gap Road and Sweeten Creek Road, known as Mills Creek Condominiums, for a 76-unit condominium development.

The applicant is requesting a review of a master plan for a seventy-six (76) unit condominium development along with the associated private roads, open space, and required landscaping (Attachment to City Exhibit 3 – Location Map). The proposed development is located on 9.75 acres off of Mills Gap Road (Attachment to City Exhibit 3 – Aerial Map). One of the 76 units is an existing single family home that will be sold as a condominium cottage home while the rest of the units will be 2 story, attached condominiums of new construction and clustered in groups of 2, 3, and 4 units (Attachments to City Exhibit 3 – Preliminary Master Plan; Building Front and Rear Elevations). The property is within City limits and is zoned RM-16 Residential Multi-Family High Density. This property is subject to Hillside Development Standards.

Review of this master plan includes only a portion of the 2 subject properties proposed to be developed for residential uses. A subsequent 'Phase 2' is included in the master plan only to demonstrate a second access point to Sweeten Creek Road required for emergency access. This future phase will be developed separately under a different application and development standards based on the existing Commercial Industrial zoning.

This project was reviewed at the November 21, 2005, Technical Review Committee (TRC) meeting where the project was approved with a number of conditions. Revised plans were submitted addressing the majority of those conditions and were reviewed by the Planning & Zoning Commission at their December 7, 2005, public hearing. After comment and deliberation, the Commission recommended approval of the site plan review subject to:

- All outstanding TRC conditions are met.
- Applicant shall work with Traffic Engineer on establishing appropriate traffic calming measures to be installed along the proposed road (to control cut-through traffic).
- Applicant shall work with staff on flexible setback standards so that roads may be public.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The majority of the project area has an average natural slope of over 15% and is over elevation 2220 which renders the property subject to hillside development standards. Although fairly extensive, the amount of clearing and grading is not unusual for a project of this size where topography and other natural features present challenges to development. The applicant is proposing to preserve some small creek beds and existing vegetation around the cottage home and by doing so will remain in compliance with the hillside development standards. Landscape buffers and a small amount of tree preservation will provide some minor mitigation. The extent of clearing, grading, and retaining walls could be further mitigated by reducing the number of units and/or by massing the units in an alternative layout.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   There is a significant amount of literature that describes how work force housing does not negatively impact adjacent property values; developments of this size in the City do require a home owner's association that manages the common open space and typically has minimum site standards that control the deterioration that can contribute to a decrease in property values. These units will be individually owned units that, historically, inspire care and upkeep. In addition, the higher density development could serve as a buffer/transition area to the existing single family residences that could be impacted by the more intense uses permitted in the CI zoning district

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   This neighborhood appears to be a neighborhood in transition; currently there is an unusual mix of low, medium, and high density residential uses ranging from large single family homes on large lots to high density apartments. The character of the neighborhood appears to be transitioning from a more rural low density single family character to a more urban, higher density form. The proposed development is classified as a medium density project and will be an appropriate transition between the existing low and high density residential properties already existing in the area. The proposed density for the project is 7.8 units an acre, well below the 11.3 units per acre normally allowed under the existing zoning and hillside development standards. The homes are modest in size and grouped in relatively small clusters of 2, 3, and 4 units per cluster, each unit fronting on the new road and, again, will be an appropriate transition between the existing single family homes and multi-family apartment buildings.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The *Asheville City Development Plan 2025 (ACDP 2025)* describes a number of reasons why properties within the City limits remain underdeveloped or vacant, including topographical or other physical problems with the property resulting in prohibitive development costs under existing market (or zoning) conditions. The *ACDP 2025* encourages a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property to meet the increasing housing needs of the City of Asheville's work force population.

   This property, located on a major corridor, is already zoned to allow for a high-density residential development and is one of many development projects proposed for this growing area of the City.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The project area is located in clear and close proximity to major road facilities, interstate connections, service centers, and easily accessed employment centers. Technical review has not revealed any significant problems for future utility or emergency service to the development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The proposed project will include the construction of a new road connection between Mills Gap Road and Sweeten Creek Road. This new road will provide clear and safe access to the individual units, each of which will front on the new road. In addition, preliminary review by the City's traffic engineer does not reveal any significant concern over traffic loads generated by a development of this size.

Pros

- Provides the opportunity for residential infill development on a major corridor.
- Provides new road connection between two major roads.

Cons

- Requires extensive clearing and grading
- Proposed development does not reflect traditional neighborhood development patterns (i.e. lack of diversity in housing types)

Staff concurs with the Planning & Zoning Commission and recommends approval of the Level 3 site plan for the Mills Creek Condominium project.

Mr. Chris Eller, Civil Design Concepts, spoke in support of the development in that they have reservations on all the units, which are reasonably priced. Even though details are not finalized, they anticipate them being from the mid-$150,000's to the $180,000's.

After rebuttal, Mayor Bellamy closed the public hearing at 6:09 p.m.

Councilman Newman moved for the adoption of Ordinance No. 3317, granting a conditional use permit for the Phase I Mills Creek Condominium development, subject to the following conditions: (1) All outstanding TRC conditions are met; (2) Applicant shall work with Traffic Engineer on establishing appropriate traffic calming measures to be installed along the proposed road (to control cut-through traffic); and (3) Applicant shall work with staff on flexible setback standards so that roads may be public. This motion was seconded by Vice-Mayor Jones.

Councilwoman Cape was concerned about the cut-through traffic that might result from the proposed road. Ms. Tuch said that given the restraints of the existing lot, the proposed road is the most logical. Traffic Engineer Anthony Butzek also responded that the developer will need to submit plans showing traffic calming measures meeting standard adopted criteria for effective traffic calming projects and that involves setting a minimum and maximum spacing of the measures and using specified types of measures. The City will work with them on finalizing what those measures would be – typically a mix of speed humps and possibly some islands in this case.

In response to Councilman Davis about green space, Mr. Eller said that they have kept a good portion of the project undisturbed. It is passive green space now and they will leave it up to the homeowners to decide what, if anything, to put in there.

The motion made by Councilman Newman and seconded by Vice-Mayor Jones carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 343

C. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT OAK PARK ROAD AND SKYVIEW ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL ZONING TO PERMIT CONSTRUCTION OF TWO DUPLEX BUILDINGS AND THREE SINGLE-FAMILY HOMES

Mr. Gerald Green, representing the developer, stated that they had recently been informed that a valid protest petition had been filed and they wish for additional time within which to meet with the neighborhood to understand and possibly address their concerns. Therefore, Councilman Mumpower moved to continue the public hearing until February 14, 2006. This motion was seconded by Councilman Davis.

City Attorney Oast noted that if City Council continues the public hearing, the protest petition would remain valid and there would be no need for the neighborhood to file another one.

Ms. Patsy Brison, attorney representing some members of the neighborhood, spoke against the continuance in that the neighborhood has made special arrangements to be at this meeting and they are prepared to move forward. She said that last year the developer had expressed an interest in working with the neighborhood to address the concerns on this project, however, they didn't. She asked for Council to proceed with the public hearing.

Councilman Mumpower felt that since the protest petition was only validated on Friday or Monday, that it would only be fair to give the developer an opportunity to work with the neighborhood to address their concerns.

Councilman Newman felt that this is a slightly different proposal from what came before City Council last year and hoped that the developer and the neighborhood can work together.

The motion made by Councilman Mumpower and seconded by Councilman Davis to continue the public hearing to February 14, 2006, carried on a 6-1 vote, with Councilman Freeborn voting "no."

D. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF TWO LOTS RECENTLY ANNEXED KNOWN AS SOUTHRIDGE AREA TO BE ZONED HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3318 - ORDINANCE TO ZONE TWO LOTS RECENTLY ANNEXED KNOWN AS SOUTHRIDGE AREA TO BE ZONED HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:22 p.m.

Ms. Julia Cogburn, Urban Planner, said that this is the consideration of an ordinance to zone two lots recently annexed known as Southridge area to be zoned Highway Business District. This public hearing was advertised on December 30, 2005, and January 6, 2006.

The North Carolina State Legislature recently passed a bill adding properties on Airport Road to the corporate limits of the City of Asheville. This bill was enacted at the request of Southridge Associates, LLC, developers of the shopping area and outparcels at the intersection of Airport Road and Rockwood Road. The effective date of annexation for two of these parcels was September 30th of this year. These parcels are currently under the zoning jurisdiction of Buncombe County and are zoned "Employment" under their Limestone Township Ordinance. The two parcels for which initial zoning is proposed total 1.60 acres in size.

Other properties in the Airport Road area that are within the City's jurisdiction (such as the Holiday Inn Hotel) are zoned HB. Staff proposes the same zoning for these parcels.

Pros

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's Comprehensive Plan.

Cons

- None

The Planning and Development Staff recommends approval of this initial zoning. The City's Technical Review Committee, at its meeting on November 21, 2005, voted unanimously to recommend approval of this initial zoning, as did the Planning and Zoning Commission (6-0) at their meeting on December 7, 2005.

Mayor Bellamy closed the public hearing at 6:24 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3318. This motion was seconded by Councilman Davis.

Upon inquiry of Councilwoman Cape, Ms. Cogburn outlined the other zoning district options for the property, noting that the property owner did wish this property to be zoned Highway Business.

Councilwoman Cape was hopeful to start some dialogue about the City's overall economic impact of some of our development choices.

Mr. Bob Stultz, representing the developer of the property, said that their entire property is restricted by covenants and restrictions which are much more restrictive than the Highway Business District. They are aggressively marketing the property for a full-service restaurant.

City Attorney Oast cautioned Council that if the property is rezoned, any use permitted in that zoning district can be built on the property.

Upon inquiry of Councilman Freeborn, Planning & Development Director Scott Shuford said that he would submit to Council some information on what the key characteristics are for each of the different zoning districts for Council to refer to in the future.

The motion made by Councilman Mumpower and seconded by Councilman Davis carried unanimously.

E. **PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PORTIONS OF RECENTLY ANNEXED PROPERTIES KNOWN AS GROVE PARK COVE TO BE ZONED RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT**

ORDINANCE NO. 3319 - ORDINANCE TO ZONE PORTIONS OF RECENTLY ANNEXED PROPERTIES KNOWN AS GROVE PARK COVE TO BE ZONED RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 6:40 p.m.

Ms. Julia Cogburn, Urban Planner, said that this is the consideration of an ordinance to zone portions of recently annexed properties known as Grove Park Cove to be rezoned RS-2 Residential Single-Family Low Density District. This public hearing was advertised on December 30, 2005, and January 6, 2006.

The City of Asheville has recently completed the voluntary annexation of portions of two lots located off of Patton Mountain Road. These areas are currently in the Beaverdam Township of Buncombe County and are zoned low-density residential. The areas are part of a larger tract of land that has been reviewed and approved for a seventeen (17) lot subdivision to be known as Grove Park Cove. The entire tract is approximately 30 acres in size. The portions to be annexed are 3.51 acres in size. The portions of the property currently within the city limits are zoned RS-2 Residential Single-Family Low Density District.

Pros

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use.

Cons

- None

The Planning and Development staff recommends approval of this initial zoning. The City's Technical Review Committee, at its meeting on November 21, 2005, voted unanimously to recommend approval of this initial zoning. At a meeting on December 7, 2005, the Planning and Zoning Commission unanimously (6-0) recommended approval as well.

Mayor Bellamy closed the public hearing at 6:42 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3319. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 351

At 6:45 p.m., Mayor Bellamy announced a short recess.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. **RESOLUTION NO. 06-6 - RESOLUTION OF SUPPORT FOR THE HUB PROJECT PLAN**

Mr. Sam Powers, Economic Development Director, said that this is a review of the HUB Project and for Council to consider a resolution providing policy direction.

Mr. Powers reviewed the economic development strategies and the benefits of the Office of Economic Development.

The multi-cluster HUB Project is a coordinated effort by public, private and nonprofit participants to create sustainable economic development strategies for Buncombe County.

As follow-up to the recent presentation given to City Council at the October 18, 2005, Council worksession, County Manager Wanda Greene met with City Manager Jackson and several City staff to discuss the HUB Strategic Goals relevant to the City of Asheville. The City's Economic Development Advisory Committee ("EDAC") has also received an overview of the HUB Project and has been given an opportunity to provide comment.

Mr. Chuck Tessier, Chair of the Economic Development Advisory Committee, spoke in support of the strategic goals and thanked Council for the opportunity to comment.

Mr. Powers then summarized the following 17 strategic goals responding to Council's questions/comments as each goal was discussed:

1. *To establish a Community and Economic Development Authority to leverage Buncombe County's unique assets to attract, create and expand business opportunities while improving the well-being of our citizens.*

   The County Manager indicated the preliminary plan calls for a 30-35 member Authority, with two members from the City of Asheville. City staff indicated to Ms. Greene that City Council may have an interest in the final authority structure, including an increase in the proportion level of city representation on the board, given that 60% of projects in the HUB plan are in the City.

   Mayor Bellamy felt that a good portion of the plan is in Asheville and suggested City have more input in the governance of the Authority with more seats than two.

   Councilman Davis agreed with Mayor Bellamy and felt we had fairly minor seating on the board.

   Councilwoman Cape felt the Authority should include members from the alternative health field and small businesses.

   Councilman Mumpower felt the proposed Authority is a good beginning and too many people at the table would not be functional. In addition, the Authority is a planning effort to us to go in a better direction.

   Vice-Mayor Jones suggested the City have 5 designations in the open at-large seats. She felt this planning effort is the beginning of an entity that will have authority.

   Councilman Newman said that if the City endorses this project, the City will need to determine how much to invest in staff time and financial resources.

   Councilman Freeborn also agreed that Asheville should have more than 2 seats on the Authority.

2. *To expand our community organizing capability to ensure that both urban and rural communities throughout Buncombe County can play an active role in their future development.*

   The City may contribute to achieving this goal by continuing our aggressive Community Oriented Government format. This effort includes but is not limited to: community neighborhood walks, community council meetings, citizens academy, developer's forum, and numerous community meetings on an on-going basis. The City's Office of Economic Development ("OED") & Minority Affairs can provide leadership in reaching under-represented neighborhood populations.

3. *To implement inter-related strategies, that combines our unique assets and existing initiatives, and bring about synergy for implementation.*

   The shared vision for riverfront development, downtown, Broadway corridor, Biltmore corridor/medical center, Biltmore Village, West Asheville, are all specific action steps that the City will take to meet the Strategic Goal.

   Visioning and comprehensive planning efforts of the City, such as Asheville 2025 and Council strategic goal setting, serve to further this goal. The City Council is scheduled to conduct 2006 strategic planning efforts with enhanced public involvement and financial forecasting.

   Vice-Mayor Jones wanted there to be recognition of the investment of Asheville taxpayer dollars in these examples and that Asheville be given the credit for the models we started. She felt this is not a regional plan but a geographical part of Buncombe County.

4. *To foster public, private and nonprofit investment in the development of strategic elements of the HUB project.*

   Public investment requirements for the HUB project are unknown at this time. The City investment for such purposes in outside agency appropriations for Fiscal Year 2004 - 2005, was $140,000 and in Fiscal Year 2005 – 2006 $100,000. Future funding could be considered in the City's budget process.

   Discussion surrounded the level of monetary contribution after a clearer sense of how the plan will be executed.

5. *To work with existing industry in the preservation of productive manufacturing operations and target manufacturing niches that build on our unique assets.*

   The County Manager indicated that the Economic Development Commission ("EDC") would like to take the lead on this. Our contribution to this goal would come through the desired level of involvement in the EDC.

6. *To complete the build-out of broadband and high performance computing and storage infrastructure.*

   There may be significant opportunities for partnerships between the City, the county, and other agencies (notably the Education and Research Consortium with its fiber optic network) for initiatives such as broadband. The City has various assets to bring to bear including proven radio tower sites and site management; the County has a functional free wireless network covering outdoor downtown. Potential partnerships could improve and expand upon this type of service. The City's Information Technology Department has

been actively studying the possibilities for City-wide broadband service and the HUB Project could be a vehicle for achieving build-out.

7. *To utilize the world's largest environmental database to lure federal government and private meteorological agencies and companies to Western North Carolina.*

   This will require coordination at all levels of government with federal government staff and elected officials taking the lead. The EDC is also actively interested in leading and promoting this goal. This also ties in with goal number 6.

8. *To establish a Digital Media Center as a public, private, nonprofit partnership to spur growth and development of our existing multimedia industry.*

   MAP, URTV, and EDC are identified as taking the lead with city and county continuing to collaborate in a supportive role.

9. *To build the Western North Carolina Center for Technology Commercialization into a technology hub for research and development.*

   Asheville-Buncombe Technical College may be the lead on this effort, which will build on tech transfer with other regional Universities such as UNC-Asheville, WCU, and ASU.

10. *To utilize the existing technology infrastructure and the desirability of our location, to promote economic development options in the public, private and nonprofit sectors for secure data storage and retrieval.*

    The EDC and ERC have expressed a desire to coordinate this goal in a lead role.

11. *To build the "Asheville Brand" as an international identity for our people, culture, products, and services.*

    The Tourism Development Authority ("TDA"), with its hotel occupancy tax, is positioned to lead in international marketing. City leaders rightfully should be consulted by TDA and HUB in the process of branding "Asheville."

    Discussion surrounded Asheville being consulted in not only the process as the "branding" moves forward, but also the elements that make the brand strong in quality.

12. *To further develop the region as a center for rejuvenation of the mind, body and spirit.*

    Further discussion from within this innovative field will determine the appropriate lead organization(s) on this goal.

13. *To establish Asheville as a national center for integrative medicine which combines conventional therapies with complementary and alternative therapies.*

    Mission Hospital has expressed interest in taking the lead on this goal.

14. *To strengthen cultural development through orchestrated public, private, and nonprofit sector collaborations.*

    Staff suggests that the Asheville Area Arts Council as a possible lead organization within this richly diverse field. The City's Division of Cultural Arts can provide valuable collaboration on cultural development initiatives within the City.

15. *To establish design centers that market handmade objects and ensure the capacity for their production in multiples.*

    Handmade in America and Southern Highland Crafts Guild may take the lead on this goal. The resources of the Blue Ridge National Heritage Area can be strength in development of this goal.

16. *To investigate "customization" as a market trend that could position traditional industries and craftspeople in their marketplaces.*

    This goal is tied to number 15. The EDC will also help take lead in promoting business development and expansion.

17. *To establish a service provider system to support business development and retention.*

    Further discussion will determine the lead organization(s) on this goal. The NC Dept. of Commerce and EDC (Chamber) have Retention and Expansion specialists in place currently, and AB Tech, ESC, Job Link, and Work force Development Boards are networked already. The City OED will provide support and collaboration, including support to minority and underserved populations.

City staff's recommendation is inclusive of comments received by your Economic Development Advisory Committee members. Staff recommends that City Council support the concepts and goals of the HUB project. Additionally staff recommends that the County Manager be provided a list of the goals along with the recommendation of each goal in which the City will be in a position to provide leadership and/or collaboration.

Discussion surrounded Councilman Davis' disappointment that the Civic Center was not included as one of the goals, in that this is a great opportunity for the region to come together and do things that we can't do alone.

The Executive Director of Mountain Micro Enterprises spoke in favor of the HUB Project. He felt this was a good blueprint on how to spend our economic development money. He said the 36% of the Buncombe County workforce is employed by small businesses of 20 employees or less and these small businesses grew their workforce about 11% over the last 4 years. Businesses over 20 employees had no net increase in their employment. He felt Council should focus on small businesses because this is how we grow our economy.

Mayor Bellamy asked that Mr. Chuck Tessier, Chair of the Economic Development Advisory Committee, take Council's recommendations to the group forming the HUB Project and then find ways for City Council to begin actually implementing the Project.

Mr. Fred English felt the HUD Project had too many goals and the City will not be able to support it financially. He felt the City should concentrate on factory jobs in our area.

Mr. Grant Millin, President of Public Fuel Cell, spoke about how the HUB Project should be a results-oriented plan.

Ms. Kyle Ross had no problem with the City representation of the Authority if more people will stand behind them giving them their ideas.

Councilman Mumpower moved to approve Resolution No. 06-6, with the following amendments: (1) That the City Council is supportive of the concepts of the HUB project's goals and the City desires to be actively engaged in the HUB project; and (2) City Council directs that

the City staff report and the summation of City Council comments be incorporated into a response letter to the County Manager outlining areas in which the City is best positioned to provide leadership and/or collaboration. This motion was seconded by Councilman Davis.

Councilman Newman felt that the plan contains a lot of good things that are already happening in the community. However, he was concerned that there is no focus because there is so much in the plan. Because the City has a small amount of resources set aside for economic development, he felt we should be really focused on how we use them. His concern is we are getting involved in something where the small amount of resources we do have are going to end up being not very focused at all.

Councilman Mumpower felt that our participation does not preclude us doing whatever we want to for economic development. We are not making a monetary commitment, other than manpower on a limited basis. He felt this is a work in progress and believed they need a commitment from the City.

Councilwoman Cape liked the ability to leverage what funds we do have with other players and that we start working together and not just be dependent on our funds. We will be building relationships that can be mutually beneficial.

Councilman Davis agreed with Councilwoman Cape in that we will be able to leverage what small resources we have and he doesn't think they are expecting the City to step forward and sign on to everything. He felt it would be worth Council's while to learn more about the project.

Vice-Mayor Jones felt encouraged with the endorsement of the small business community.

Councilman Freeborn liked the idea that the plan is not focused on one thing. He felt we need to have diversity for sustainability.

Councilman Newman hoped that once the Authority is formed, that the ultimate goal will be to be efficient with our resources, as we currently have the Economic Development Advisory Committee, the Buncombe County Economic Development Commission, etc.

The motion made by Councilman Mumpower and seconded by Councilman Davis carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 310

B. RESOLUTION NO. 06-7 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A CONTRACT WITH EMA, INC. AND MRO SOFTWARE INC. TO PROVIDE AND IMPLEMENT A COMPUTERIZED MAINTENANCE MANAGEMENT SYSTEM

ORDINANCE NO. 3320 - BUDGET AMENDMENT FOR A COMPUTERIZED MAINTENANCE MANAGEMENT SYSTEM

Water Resources Director David Hanks said that this is the consideration of a resolution authorizing the Mayor to enter into a contract with EMA, Inc. and MRO Software, Inc. to provide and implement a Computerized Maintenance Management System (CMMS) for the water utility, and approval of a budget amendment, in the amount of $476,307, to provide funding for this project.

446

The Water Resources Department has a need for a CMMS to accurately track the maintenance and performance of assets and the costs associated with maintenance, repair, and replacement. The City's current Enterprise-Wide Software System, HTE, cannot perform to the needs or expectations of the Department. A new CMMS is a critical piece of the on-going Asset Management Program the Department has been working on for over two years.

The benefits of implementing a full-featured CMMS include:

- Better maintenance management including lower maintenance costs, reduced equipment downtime, less overtime for unplanned maintenance, and extended equipment life
- Ability to do analysis of asset performance data such as replacement planning, failure analysis, and reliability centered maintenance
- Improvements in work flow, data flow, and customer service

It is anticipated that this program will be fully implemented in the Water Resources Department by August 31, 2006. This is considered to be a pilot program that can easily be expanded to allow all City operational departments to better track maintenance and performance of assets. It has an excellent Call Center feature that will allow the City's Customer Services Division to respond to customer requests in a more timely manner. A Request for Proposal (RFP) was released on July 18, 2005, and six firms in the Water and Wastewater industry responded. A selection team was formed that included representatives from the Customer Services Division, Information Technology Department, all divisions of the Water Resources Department, and our consultants Brown and Caldwell. The selection process took two months and included demonstrations, telephone interviews, on-site client interviews, and client reference checks.

After extensive deliberation, EMA, Inc. was selected to install, configure, convert data, and integrate a CMMS based on MAXIMO software provided by MRO Software, Inc. The cost is not to exceed $476,307.

There is sufficient funding for this project in the Water Major Capital Projects. Staff is recommending that funding for Annexation 2001 Improvements (Lake Julian Area) be reprogrammed to fund this important project. The Annexation 2001 was settled out of court by action of City Council on November 22, 2005. A budget amendment will close Annexation 2001 and establish funding for a CMMS.

PROS:

- A CMMS will enable the Water Resources Department to more accurately track the maintenance and performance of its assets thus minimizing costs and increasing operational efficiency in the long term.
- Once the CMMS is implemented in the Water Resources Department, it can be expanded and used by all City operational departments to track field work orders, such as storm drains, street paving, and parks maintenance, etc.

CONS:

- The cost of this project is a factor; however, sufficient funding is available for this important project by reprogramming funds from an obsolete Annexation Project.

City staff recommends City Council approve the request for the Mayor to enter into a contract with EMA, Inc. and MRO Software, Inc. to provide and implement a Computer Maintenance Management System as well as approve a budget amendment to provide funding for this project.

Discussion surrounded Mr. Hanks responses to various questions/comments from Council, some being, but are not limited to: will we realize any savings in staff reduction; how will other departments be able to utilize the data; does the company have references with other entities in North Carolina; explanation of the funding; is this system similar to what the Metropolitan Sewerage District uses; is the payback in personnel cost savings or lower capital costs; and will there be on-going costs.

Councilman Mumpower expressed his personal difficulty with the amount of money for the system, at a time when we are in financial jeopardy with limited infrastructure monies. He was concerned that we are pursuing something convenient and efficient at a time we should concentrate on necessity, until there is a clearer vision on where we are going.

Councilwoman Cape was concerned with spending this amount of money, especially when we have so much infrastructure to work on and the City is in the middle of a lawsuit.

Information Services Director Jonathan Feldman spoke in support of this system and felt Council needed to look at this in terms of being a large organization servicing 10's of thousands of people with a 5-year payback period.

City Manager Jackson understands that Council's interest is improving the infrastructure. This is an investment that should be made on behalf of the people who are pay the water rates. This is a basic tool that they need to see is in place so that their money is being used wisely. He felt we do not have a well-maintained water system at this point. He sees this as a system that every penny we put into it we want to spend wisely and where it is needed the most. The goal here is not to do less maintenance, but to do more and position ourselves so that the time and the deployment of our people resources and our capital dollars get the job done. The payback is in having a better managed system that is a better investment of a ratepayers dollars.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 06-7. This motion was seconded by Councilman Freeborn and carried on a 5-2 vote, with Councilwoman Cape and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 311

Councilman Newman moved to approve Ordinance No. 3320. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Councilwoman Cape and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 353

C. ORDINANCE TO INCREASE TAXICAB FARE MILEAGE CHARGE FROM 25-CENTS PER 1/10TH MILE TO 28-CENTS PER 1/10TH MILE

Mayor Bellamy announced this that item will be discussed at a later date.

D. DISCLOSURE STATEMENT REQUIRED BY HUD FOR MAYOR BELLAMY

City Attorney Oast said that he has prepared a statement for Mayor Terry Bellamy, requesting waiver of a conflict that arises under HUD regulations because she is an elected official of a recipient agency of CDBG funds, and works for a corporation that participates in CDBG activities (Mountain Housing Opportunities). According to the interpretation of the

applicable regulations by HUD officials in the Greensboro office, the conflict arises by the mere fact of her employment, not as the result of any particular activity, and a waiver must be obtained in order for Ms. Bellamy to continue working in her professional and elected capacities.

Ms. Bellamy would still be subject to applicable provisions of North Carolina law that prohibit self-dealing or voting on matters that affect her financial interest. As with other conflict situations, a determination as to how these statutes apply will have to be made on a case-by-case basis. For example, Ms. Bellamy might not be able to participate in Council consideration of funding allocations where MHO was one of the competing agencies, but she would be able to vote on adoption of the City's annual budget.

The law requires that these conflicts be publicly disclosed, and this is usually done at Council meetings, so that it will appear in the minutes. This was done initially in 2000, following Ms. Bellamy's election to Council in 1999, but the HUD Greensboro office has suggested that it be done again. The statement is as follows:

"Under North Carolina law, all members of City Council, including the Mayor, are precluded from voting on matters in which they have a financial interest or that involves their own official conduct. They are also prohibited from entering into contracts with the City. Further, recent amendments to the zoning enabling laws have expanded and clarified the issue of council member conflicts of interest with respect to land use decisions. Under State law, a Council member may not only not participate in the vote on matters in which they have a financial interest, they may not attempt to influence the vote.

Where an employee of an agency that receives funds from the U. S. Department of Housing and Urban Development (HUD) becomes a member of the governing board of a unit of local government that makes decisions regarding those funds, federal regulations require the additional step of reporting the situation to HUD, and requesting an opinion as to whether that employee's governmental service is consistent with the intent of the regulations. Such opinions are routinely requested, and exceptions are made as appropriate.

Mayor Terry Bellamy is an employee of Mountain Housing Opportunities, an organization that receives funds from HUD, through the City of Asheville. Although she is not directly involved in any HUD-funded activities, her election to Council in 1999 and as Mayor in 2005 triggers the application of the regulation requiring us to seek an exception. Our review – including analysis of the regulation, conversations with HUD officials, Ms. Bellamy and other officials at MHO – has indicated that Ms. Bellamy, because of the nature of her job, is not in a position to benefit directly from the receipt of HUD funds by MHO. Even so, as Mayor and a member of Council, State law would preclude her from voting on any matters that directly affected MHO. Following Ms. Bellamy's election to Council in 1999, we sought and obtained an exception from HUD, allowing Ms. Bellamy (then Ms. Whitmire) to act as a Council member and maintain her employment with MHO.

On the advice of HUD officials, we propose to write to HUD to request an opinion as to the continued application of the HUD regulation to Ms. Bellamy in her new role as Mayor, and, depending on that opinion, request an exception or some other action by HUD that will permit Ms. Bellamy to serve as Mayor while working at MHO.

This is brought to your attention now because public disclosure is one of the prerequisites of requesting the opinion from HUD. Unless Council has questions or an objection, the City Attorney's office will send out the appropriate correspondence to HUD to inquire about and, if necessary, to secure the exception as soon as possible."

VI. OTHER BUSINESS:

Vice-Mayor Jones announced the upcoming board and commission vacancies.

Councilman Davis updated City Council on the City Center Task Force's meetings and invited the public to their public input session on January 18, 2006.

Mayor Bellamy announced City Council's annual retreat on January 20-21, 2006.

The following claims were received by the City of Asheville during the period of November 18 – December 15, 2005: Jeff Joyce (Fire), Jont Johnson (Water), Randi Glover (Streets), Enterprise Rent-A-Car (Streets), Sharon Alexander (Transit), Michael Cherco (Sanitation), Pat Kelly (Water), Thomas F. Williams (Police), BellSouth (Water) and Homes America (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Kyle Ross urged City Council to commit to community policing.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:22 p.m.

Magdalen Bowerson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – January 17, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

BELE CHERE REPORT

Mr. Irby Brinson, Director of Parks & Recreation provided information regarding the community and economic impact of Bele Chere, and shared the results of a survey administered by Western Carolina University. In addition, he sought direction concerning the following three policy matters:

(1) Should Bele Chere continue to be located downtown? Or should it be moved to an alternate location (e.g., the riverfront area)?

Staff has investigated the possibility of relocating Bele Chere to the river district. In the future, staff will look to do an event similar to Bele Chere in the River District to help revitalize that area.

Pros:

- Relocation of Bele Chere could complement plans to revitalize the river district.
- The river itself as a backdrop for the festival.
- There is some support in the community for the move.

Cons:

- Traffic control would be difficult. There are concerns about I-240 flow, impact on nearby neighborhoods, and ambulance and railroad access.
- There are very few places in the area that could be used for parking. Visitors who might attempt to park along I-240 would create a safety hazard.
- Access to the event would be difficult for those involved, including city staff, volunteers, vendors, suppliers and entertainers.
- There are security/safety concerns in the area. Visitors not familiar with the area could find themselves in an unsafe location. The river running directly behind the location requires a constant water rescue component.
- Additional infrastructure concerns include lighting, electricity, few sidewalks, narrow streets, and many overhead utilities and poles.
- Return visitors from outside WNC have a history with the downtown location.

Staff's recommendation, after conferring with other City departments, including Fire, Police and Traffic Engineering, is to keep Bele Chere downtown.

After Council discussion, it was the consensus of City Council to not relocate the Festival to the River District.

(2) Should Bele Chere keep and/or expand gated event(s)?

Pros:

- The gated concert in 2005 generated more than $80,000 in new revenue and was deemed a success by the media.
- Festival staff estimates that producing a gated event on both Friday and Saturday in 2006 could produce more than $200,000 in event revenue.
- A survey has indicated a desire for big-name entertainment; a gated event is the most affordable way to meet this need.

Cons:

- Increased administration to sell tickets and handle cash; this was handled largely by volunteers in 2005.
- There were some community concerns last year about change; these may have been dispelled now.

Staff's recommendation, along with the 2006 Bele Chere board of directors, is to add a second evening gated event for 2006.

After Council discussion, it was the consensus of City Council to add a second evening gated event for 2006.

(3) Should Bele Chere keep the family-friendly (no beer sales) focus for Sunday?

The last year that beer was sold on Sunday during Bele Chere was 1998; Sunday sales made up 15% of beer sales that year, and produced $13,000. The WCU survey shows a significant increase in Sunday attendance since 2000, however; this higher attendance likely makes up for any lost revenue from beer sales. Sunday attendance increased from 45% of respondents in 2000 to 61% in 2005.

Staff's recommendation is to keep the family-friendly focus, and not sell beer on Sunday.

After Council discussion, it was the consensus of City Council to keep the family-friendly focus, and not sell beer on Sunday.

Throughout the presentation, Mr. Brinson responded to various questions/comments from Council, some being, but are not limited to: explanation of the $60,000 contributed to area non-profits; what is the economic impact on downtown businesses; what is the economic balance of local vs. out-of-town vendors; what were some of the problems or issues that occurred at Bele Chere this year and how did the City deal with those; do the expenditures include staff time; did the gated event add to the cost of the expense; was the gated event a success; concerns of competition with the local club scene; need to make sure local bands and artists are included; do we advertise in outside markets; what is the overall increase in attendance from the 2000 festival to this year's festival; was staff turnover an impact on the festival; where are the options to change the festival if not at City-County Plaza; and explain the sponsorships with the beer distributors.

Upon inquiry of Vice-Mayor Jones about a relationship with the Tourism Development Authority (TDA), Mr. Brinson explained that the TDA has made it clear that until their guidelines are changed, their funds can only be used for construction projects. Vice-Mayor Jones wondered if this new Council could begin conversation with the TDA to see if their guidelines can be modified. Councilman Newman agreed in that maybe the TDA could contribute some of its advertising money.

Councilman Mumpower felt there are better places the City can put the $250,000 other than a community party that does good things. He said the City has been talking about paring

that down for years. He doesn't think the City should be in the business of being a provider of alcohol, directly or indirectly.

MIGRATION FESTIVAL RECOMMENDATION

Mr. Irby Brinson, Director of Parks & Recreation, said that City Council has been asked to endorse the Migration Event Festival, which includes permission for the installation of approximately 100 butterfly-shaped banners in the Central Business District (CBD), for a period of 16 days beginning February 25 through March 12, 2006.

At the direction of the Mayor, Council members Mumpower and Freeborn recently met with Brian Bock, President of Foundation Endowment, Inc., along with David Starkey, General & Artistic Director, Asheville Lyric Opera, to consider this proposal. At the conclusion of this meeting, City Council approved the request for this item to receive consideration at the January 17 worksession. In the interim, City staff met with Mr. Bock and Mr. Starkey to understand the scope of the project in relation to the City's current Banner policy. It is our understanding that they intend to meet all of the requirements of the Banner Policy and pay for the installation and removal of the Butterfly Banners, which will be approximately $3,000.

After a short discussion, Councilman Davis moved to waive the rules and take formal action on this matter at this meeting. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Mumpower moved to endorse the Migration Event Festival as a co-sponsored event with the City of Asheville. This motion was seconded by Vice-Mayor Jones and carried unanimously.

QUARTERLY FINANCIAL REPORT

Finance Director Ben Durant summarized the City's quarterly financial report. He gave an overview by stating that (1) Asheville continues to live within its means; (2) Fund balance will see a slight decline; (3) continued fuel and energy conservation efforts are necessary; and (4) staff recommends no major mid-year budget additions.

He reviewed the Council the following (noting that the revised budget does not include $1.1 Million adjustment for Sullivan Acts):

Fiscal Year 2005-06 Adopted Budget	$74,357,126
Additions:	
Amendment for County Park Facilities	503,936
Prior Year Encumbrances	820,071
2005 Annexations	318,044
Insurance Claims	250,000
Outside Legal Expenses	50,000
Burton Street Demolition	9,565
Fiscal Year 2005-06 Amended Budget	$76,308,742

Mr. Durant reviewed the General Fund revenue highlights as follows: (1) City has received $1.2 Million in one-time revenue from sale of property; (2) approximately 90% of property tax revenue will be received in January; (3) sales tax revenue running 3.2% above last year, will exceed budget by $369,173; and (4) overall, General Fund revenues will exceed budget by a net of $273,623.

General Fund expenditure highlights include: (1) overall, departments will save approximately $1.1 Million through targeted savings plans, normal attrition and other operating savings; (2) these savings combined with $273,623 in total revenues over budget will nearly offset $1.43 Million in budgeted use of Fund Balance; and (2) projected actual use of Fund Balance = $89,945. He then reviewed with Council the Fund Balance, which year-end estimate is 22.8%.

Mr. Durant then summarized the year-to-date and year end projections for the City's seven enterprise funds (Water, Civic Center, Transit, Parking, Festivals, Golf and Stormwater)..

Mr. Durant responded to various questions/comments from Council regarding the financial report, including, but not limited to: what kind of services do we contract with Biltmore Forest; what is the user-fee process; how high has our Fund Balance been in recent years; is data available for the seven enterprise funds similar to the General Fund; and why has there been a decrease in the Powell Bill funds.

Mayor Bellamy said that this topic will be discussed further at the Council's annual retreat.

CITY-OWNED PROPERTY REDEVELOPMENT FEASIBILITY

Planning & Development Director Scott Shuford summarized with Council selected City-owned properties and the redevelopment potential for each. He explained the following methods of sale or transfer: (1) private negotiation and sale; (2) advertisement for sealed bids; (3) negotiated offer, advertisement and upset bids; (4) public auction; (5) exchange; and (6) Request for Qualifications (RFQ)/Request for Proposals (RFP). He said that (1) it is important that the transfer of public property be transparent to the public; (2) it is important that the public get fair value for transferred property; and (3) it may be important that property transfers accomplish broader public goals than simply getting the highest price.

The selection criteria for reuse or redevelopment include: possible workforce housing site; potential for significant tax base enhancement; consistent with City plans or policies; opportunity to guide low impact development; and potential to promote a smart growth development pattern.

He then described the redevelopment options; sample projects; development challenges and opportunities; and possible method(s) of transfer on the following City-owned properties:

- Asheland Avenue (1.1 acre)
- Old Asheland Avenue (1.8 acres)
- East Riverside Park Area (9.8 acres)
- Memorial Field Area (16.2 acres)
- Martin Luther King Jr. Boulevard Area (3.3 acres)
- Circle Street Area (1.2 acres)
- Public Works Area (12.5 acres)
- City Hall Parking Lot (2.5 acres)
- Beaucatcher Reservoir Area (10.3 acres)
- Parks Maintenance Facility (3.6 acres)
- Bus Transit Center on Coxe Avenue (0.6 acres)
- 29 Haywood Street (0.18 acres)
- Transit Facility - West Haywood Street (3.5 acres)
- Civic Center
- Haywood Street Parking Garage Properties
- East side of S. Charlotte Street

- Morrow Street Area

He offered the following recommendations: (1) to direct staff to refine report for specific council action; (2) direct staff to expand scope to all City-owned property for inclusion in report; and (3) direct staff to prepare long-range facilities management plan, including an evaluation of how properties might be transferred without affecting City operations.

Suggested next steps would include (1) a City-owned property report: (a) suggestions for priority properties; (b) suggestions regarding bundling properties for RFQ/RFP; and (c) timeframe: within 60 days; and (2) a facilities plan: (a) may require a consultant; and (b) timeframe – return with a suggested approach.

Councilman Newman supported proceeding with looking for pieces of property that obviously there is a better use for that property. He also suggested meeting with Buncombe County to see if they have some property in the downtown area that can possibly be a joint partnership.

Councilwoman Cape didn't support piecemeal development but liked the idea of bringing together downtown property owners and Buncombe County to start talking about a cohesive planning effort.

In response to how much staff time was involved in preparing this report, Councilman Mumpower felt that going forward, it might be helpful that if Council has requests for information from staff to get some idea what the impact it would be on the staff, and that the staff time be translated into action.

Councilman Freeborn felt that in term of long-range planning, the City should talk with Buncombe County in order to possibly combine some efforts. In the short-term, he agreed with Councilman Newman to look at obvious pieces of property that do not involve significant infrastructure changes.

Councilman Davis felt that the City needs to be cognizant of the areas around the properties that the City already owns. In order to plan for the future, we need to be pro-active.

Mayor Bellamy wanted to make sure that as we move forward that the process that we put in place, for whatever we do, is inclusive of public input from those impacted neighborhoods at the forefront. In addition, she wanted an affordable housing component to be included in any project brought forward.

Councilwoman Cape felt the City could generate substantial revenue if we give our developments some heights in certain areas. In addition, that would reduce the impact on the neighborhoods and the other areas around the Central Business District. The Downtown Commission and other public interest groups involvement might result in a development vision of what we want to hold and save and where we want to focus this development energy in a way that will be constructive and unified.

Mr. Shuford said that he will focus his next report so that we do identify the opportunity costs if we take different actions, move forward on the catalytic project opportunities, and develop some neighborhood level of communication about the potential development of the sites. He said that perhaps a facilities management plan will help us with some of the issues raised by Councilman Davis regarding being strategic about property acquisition.

At 4:54, Mayor Bellamy announced a short recess.

TRANSIT COMMISSION REPORT

Transit Services Director Bruce Black said that the Transit Commission had its retreat in August of last year. The Commission discussed several options for increasing ridership. It recommended that all options be emphasized but that one in particular be pursued at this time. It also reviewed the financial issues coming up in the next fiscal year, and recommended expanding the conceptual horizons of public transportation to include other forms of transport.

The option felt to hold the most promise to increase ridership is based on a model from Olympia, Washington. This program charges employers and institutions who agree to the program a reduced rate based on the average per trip revenue from the preceding year. This can be combined with an incentive to promote use of the bus by charging a declining per trip fare as the number of trips increases through the year.

The financial future for transit involves a significant deficit created both by increasing costs (particularly fuel), historically flat revenues, and the loss of federal operating revenues due to population growth and a quirk in the census methods of determining Urbanized Areas of over 200,000 Population. The combination of these items will produce a deficit of $150,000 to $190,000 this fiscal year and over $700,000 next fiscal year.

There are various things that can be done to offset some of these expenses. Among the options are (1) the implementation of an Olympia based corporate fare model in the 2007 Fees and Charges Manual; (2) increasing the transit fares from 75-cents to $1.00; (3) wrapping the bus; (4) cut service; (5) partner with other local governments to explore consolidated services and funding; and (6) aggressively implement transportation demand management program, specifically ride share and emergency ride home programs.

City staff seeks direction for policy direction on the following items: (1) the implementation of an Olympia based corporate fare model in the 2007 Fees and Charges Manual; (2) increasing the transit fares from 75-cents to $1.00; (3) proposal to wrap the bus service; (4) service cuts; (5) partner with other local governments to explore consolidated services and funding; and (6) aggressively implement transportation demand management program, specifically ride share and emergency ride home programs.

Councilman Newman said that he, Vice-Mayor Jones, Councilman Freeborn prepared the following proposal to create a more effective Asheville Transit Network. He explained three overarching goals for 2006: (1) to broaden the funding formula for transportation in Asheville, forming our current "parking (garage) fund" into a Transportation Demand Management Fund; (2) implementing a Transit Innovative pilot project; and (3) create a new Transportation Demand Management Commission.

Regarding the creating a multi-modal transportation fund, he said that currently all the proceeds generated by street parking (about $800,000), parking tickets (about $500,000), and from parking lots and garages (about $1.2 Million) is earmarked exclusively to build new parking decks. All of these dollars are put into what we call our "Parking Fund" but which should really be called our "Parking Garage Construction Fund." They propose converting this into a fund that can be used for multi-modal transportation purposes rather than just to build more parking decks. They suggest earmarking funds generated by parking tickets to transit. This would generate about $500,000 for transit innovations and serve level improvements. Arguments for creating a Transportation Demand Management Fund include: (1) creating a more viable transit network will free up some parking by allowing some people to travel downtown without their car; (2) additional revenue can be created to build more parking capacity by increasing the fees we charge to park in them. Monthly rental rates can be bumped up and the "first hour free" policy can be reduced to half an hour or 20 minutes; and (3) the debt service on the Rankin, Wall Street

and Civic Center decks will soon be paid off, freeing up additional funds to invest in new parking facilities.

Regarding the implementing a Transit Innovative pilot project, he said they believe it makes sense for the City to implement a 12-month "transit innovation pilot project" starting in July of 2006. The criteria for selecting a pilot project is (1) to better serve the needs of citizens in Asheville who rely on the transit system for mobility; (2) to significantly increase the number of riders on the Asheville transit system, which will (a) reduce congestion on streets and highways; (b) reduce pressure to build costly and ugly new parking facilities; (c) improve air quality; and (d) build public confidence that transit can be a viable part of the overall transportation system; (3) to build partnerships in the community, including partnerships with the business community, schools, neighborhood organizations, and local governments, to create a more efficient transit network; and (4) to serve as a part of an overall progressive community strategy to reduce poverty in Asheville (in this case, by lowering transportation costs on low income families). Elements of a proposed pilot project include (1) a 12-month pilot project beginning July 2006; (2) 90-day fare-free promotion period at outset of the project, cost = $150,000; (3) unlimited access for employers/universities – revenue neutral or gain; (4) enhanced monthly/annual passes for individuals – assume a loss of $50,000, could be more or less; (5) extend hours of service in the evening – cost = $150,000 - $200,000; (6) assuming an increase of 25% in overall ridership – increases the fare box by $100,000; (7) total cost = approximately $250-300,000 (assuming there is a 25% increase in ridership, Asheville's future funding from the State of NC would increase by over $100,000 per year. So, this program could continue in subsequent years at a cost of $150-250,000 compared to Asheville's current system); and (8) provide increased security at the downtown transit center.

Regarding the creation of a new Transportation Demand Management Commission, they propose the creating of a new citizens commission that will advise the City Manager and City Council on public policy matters related to parking community transit, bike and pedestrian matters. Currently, the City has an official Transit Commission. There is also an ad hoc Bicycle and Pedestrian Task Force, although this group is not a commission of the City of Asheville. In order to create an effective multi-modal transportation strategy for the future of Asheville, we need to look at these issues in a holistic fashion.

During discussion, Mr. Black responded to various questions/comments from Council, some being, but are not limited to: explanation of the projected impact of reduced federal funding and increased operating costs; explanation of the projected annual deficit at current levels of service; and any proposals to make up the funding losses.

Upon inquiry of Councilman Mumpower, Mr. Black explained that some of the forces we are working against include topography, utility patterns, demographics, and the reclassification by the Census Bureau.

Councilman Mumpower felt that the facts presented say that this is a time for caution and we are about to see our level of subsidy to provide service be dramatically impaired by forces beyond our control. He was concerned that some of the goals presented come with the need for expensive dollars. He would be interested in seeing solid data from models of that have been successful. He also felt it would be a mistake to "raid" the Parking Fund which has had a lot of demonstrated success in this community. The way others have set the Parking Fund up was an enterprise fund where the people who park downtown pay for the parking facilities.

Councilman Davis agreed with Councilman Mumpower to some degree. He said this is the first time it's come before Council and he felt we need to move ahead with caution. He said we have made tremendous commitments to merchants who have invested lifetimes into making the downtown successful and he felt it would be a tragic mistake to make a transit system work

on the backs of taking parking away. He asked for the number of people who are currently riding the bus, how many we realistically expect to be riding if we increase the routes, and the amount we can realistically expect to grow these fares by proceeding with this proposal. Again, he would be interested in discussing the proposal presented, but with caution.

Councilwoman Cape was open to these ideas and how we move people around in the community. She thinks this is a good first step.

Vice-Mayor Jones spoke in support of the proposal and felt that the time is right to start thinking innovatively.

Councilman Freeborn spoke in support of the proposal and felt that there are ways that Council can look at this in a smart and economical way.

Mayor Bellamy said that this topic will be discussed further at the Council's annual retreat.

At 5:49 p.m., Mayor Bellamy announced a recess.

DOWNTOWN PARKING PLANNING

City Engineer Cathy Ball updated City Council on the status of the proposed garage, including the due diligence, the concerns about the proposed location, and costs.

She gave a brief overview of the costs as follows: Land – purchase price was $2.6 Million; Design, Project Management, Property Acquisition - $1.6 Million; and Opportunity Costs of resale of land, redevelopment of land, and public/private partnerships.

Transit Services Director Bruce Black then updated City Council on the downtown parking needs. By 2018, the study shows a deficit of 3700 spaces north of Hilliard. He explained that (1) growth of demand projected 138 spaces/year – daily growth; (2) growth of demand projected over 1998 to 2005 – 966 spaces (using a 20-year average); (3) growth of use from 1998 – 2005 – 2,664; and (4) growth of use from 2002 to 2005 – 1,105. Using charts, he then reviewed with Council the current conditions in the decks, current need added, affect of alternative modes, the year 2010, he year 2010 with alternate modes, controlling for permits, and addition of alternate modes.

Staff requested Council direction on (1) the Haywood Parking Garage; (2) to pursue and update feasibility of other alternatives; and (3) an exit strategy.

There was considerable discussion by City Council as Ms. Ball and Mr. Black responded to various questions/comments from Council, some being, but are not limited to: how many parking spaces would be lost to take off one layer of the proposed deck; what need has been shown for the parking south of Pack Square; do we have the ability to add onto the height of the Rankin Avenue Parking Garage; are there any private sector efforts regarding parking taking place; why are some of the alternative sites not feasible; has the City considered paring down the proposed parking garage in front of the Civic Center and creating satellite parking; is the City subsidizing the Parking Fund; is the City able to develop the property in that area that they have already bought; if we exit this project, how much will the City lose; and how many businesses have started up in the downtown area last year.

Councilwoman Cape suggested looking at alternative sites rather than the proposed Haywood Street Parking Garage. She would be interested in looking at utilizing the space in a way that would not be in competition with the Grove Arcade but will bring families downtown.

Councilman Davis, liaison to the Asheville Downtown Commission, said that the Commission is concerned about the lack of parking in the downtown area.

In response to Councilman Davis, City Attorney Oast briefed Council on the letter received from the Basilica regarding the purchase of the property across from the Civic Center.

Councilman Davis spoke in favor of looking at some of the parcels nearby the Civic Center.

Vice-Mayor Jones understands there is a parking need, but the community has many needs. She would like to pursue an update for other alternative parcels, with her first preference being the BellSouth lot.

Councilman Freeborn said that our downtown is striving and people are opening up businesses despite the parking need. He is supportive of moving forward with additional parking facilities downtown only if the City expands their other transportation modes as well.

Councilman Newman favors sitting down with the private sector and looking for partnership alternatives to build parking downtown. He didn't think we should stop our planning, but look at alternative sites. He felt awkward in giving direction on this issue without any public input. He did support moving forward and reiterated the need for a citizens commission to work on transportation demand issues.

Councilman Mumpower supported looking at alternative sites. He felt Council gave their word to the Grove Arcade merchants to provide additional parking and the City should continue to look in that direction.

At the request of Vice-Mayor Jones, City Attorney Oast said that he would provide Council with the contract the City entered into with the Grove Arcade regarding parking.

Mayor Bellamy this is the first opportunity this seated Council has had an opportunity to hear a report on the status of the parking garage, and after direction is given to staff, then the public will be involved. She said there was (1) not consensus for the Haywood Street Parking Deck to continue in its current form; (2) consensus to look at alternative sites; and (3) not consensus for an exit strategy.

SIGN ORDINANCE AMENDMENT

City Attorney Oast said that this is the consideration of an ordinance establishing a process for the removal of temporary illegal signs.

The proliferation of small, temporary advertising signs adjacent to or within the right-of-way of streets and roads – "snipe" signs – in addition to being an eyesore, affect the safety of persons using the roads, either by blocking line of sight or by distracting motorists.

The City's sign regulations are contained in the zoning ordinances. The enforcement provisions of the zoning ordinance are not effective to deal with transitory violations of the nature presented by snipe signs: by the time the notice of violation process is complete, the signs and the reasons for them are frequently gone. While Sec. 7-18-5 provides for the summary removal of nuisance signs, this requires a determination that the particular sign is a nuisance.

What the proposed ordinance does is make a legislative finding that a certain type of sign tends to distract or obstruct the vision of motorists and create visual clutter, affecting the public health and safety in a negative way, and is therefore a nuisance. The ordinance authorizes the

City's code enforcement officers to remove those signs, and provides a "post-removal" process for the responsible parties to challenge the notice of violation or citation, and retrieve their signs. The ordinance also allows the code enforcement officer to dispose of signs that are not retrieved.

This ordinance is somewhat consistent with Buncombe County's recently adopted ordinance providing for the removal of signs in the right-of-way. Since the width of a street or road right-of-way can vary unpredictably, the proposed ordinance for the City applies within 30 feet of the traveled portion of a road.

Considerations:

- Defines what a snipe sign is
- Declares such signs to be nuisances
- Establishes expedient process for removal
- Provides a process for challenging violation

If Council approves of the ordinance, adoption of it is recommended.

As discussion occurred, City Attorney Oast responded to various questions/comments from Council, some being, but are not limited to: would this apply to political signs; will a community education effort be undertaken; is the City planning on providing areas where flyers can be posted; and can flyers be put in business windows.

It was the consensus of Council to educate the public on what types of signs fall under this ordinance and to provide venues (billboards, kiosks, etc.) on where people can advertise.

Mayor Bellamy asked that the record show that City Council received this information and instructed the City Manager to place this item on an upcoming City Council agenda.

REVIEW OF CONDITIONAL ZONING PROCESS AND ITS APPLICATION TO THE SMOKY PARK HIGHWAY WAL-MART

City Attorney Oast highlighted some important differences in the processes of conditional use permits (which we use), conditional use zoning (which we used to use) and the conditional zoning (which we now use).

Planning & Development Director Scott Shuford explained the appropriate considerations for conditional zoning requests and how the public hearing should be handled as follow:

- Conditional zoning is a legislative process, not quasi-judicial like the conditional use permit process. As such, it does NOT require sworn testimony and ALLOWS outside-the-meeting communication.
- Conditions may be imposed but require agreement by developer; in the event that the developer does not agree, the proposal can be denied.
- Conditions must have some identifiable relationship to the impact created by the development, as identified in "an officially adopted comprehensive plan or other plan …[or to]… impacts reasonably expected to be generated by the development or use." (quoted language is from newly amended statute). The impacts identified should be based on factual rather than anecdotal information and should not be speculative, and they should be specific to the project. Acceptable areas of consideration for conditions on conditional zoning ordinances—primarily in connection with major developments but applicable to any scale depending on context-- include, but are not necessarily limited to:
    - Height and setback
    - Buffers, landscaping, and open space

- Traffic impact mitigation, such as turn lanes, traffic calming, and similar measures
- Operational issues that create noise, such as loading, dumpster service, etc.
- Economic impact on small business
- Stormwater management
- Building scale and appearance
- Provisions for demolition or reuse of the building after proposed occupant vacates
- Site lighting
- Retaining wall height and design
- Extent of grading
- Natural feature preservation
- Adequacy of support infrastructure like water or sewer services
- Multimodal access – pedestrian, bike and transit
- Any conditions set forth in the City's ordinances

Public Hearing Process

- Two public hearings are required – one before the Planning and Zoning Commission and on before the City Council
- The Planning and Zoning Commission public hearing is scheduled for February 1
- Typical public hearing procedures include the following steps in the listed order:
  - Staff presentation
  - Opening the public hearing
  - The developer is given a reasonable amount of time to present his/her case (the Planning and Zoning Commission has suggested a 30-minute limit)
  - Groups are given 10-minutes; individuals have 3-minutes; different times may be allowed in the Council's discretion
  - Closing the public hearing
  - Council questions and discussion
  - Motion and action
- In managing the public hearing, the goal is fairness. Council may:
  - Set some limit on the duration of public comment (Council rules provide for one hour exclusive of staff presentation and Council discussion, but this may be extended to ensure fairness)
  - Request speakers to not repeat information previously presented
  - Request speakers to confine remarks to issues associated with development impact
  - Limit applause or other outbursts
  - Ask questions of speakers or staff

Although this is not a quasi-judicial process, Council members should wait until all the information has been received before making a decision. In complex cases involving conditions that are technical or require careful wording, continuing the matter to allow for drafting to be completed is always an option.

Conditional zonings are adopted in the form and manner of zoning map amendments; the protest petition procedure contained in North Carolina statutes and in the City Code applies to most conditional zoning requests.

There was considerable discussion on what other type of considerations could be considered for a conditional zoning request, i.e. pollution, wages, impact on the local economy, is the business creating the quality of jobs our community wants, etc.

In response to Councilman Freeborn, Mr. Shuford felt that the appropriate time for City Council to request an economic impact statement would be soon so that staff could relay that concern to the developer who would have time to address that issue at the Planning & Zoning Commission hearing.

After discussion, it was the majority of Council's direction to have staff bring forward to Council some recommendations on requiring that developers provide an economic impact statement on small businesses on all future conditional use permit applications for projects.

Upon inquiry of Councilman Newman, Mr. Shuford said that his staff does not have the background to do an economic development analysis and would need to hire an outside consultant. Therefore, it was the majority of Council's direction to ask staff to prepare a report on the cost and scope of work needed for the City to have an economic development analysis performed. Council will then determine whether to move forward on that study or not.

Discussion then surrounded the rules for the public hearing on the Smoky Park Highway Wal-Mart. It was the majority of Council's direction City staff disseminate the following rules after the Planning & Zoning Commission hearing on February 1, 2006: (1) the developer and organized groups be allowed a total of one hour; (2) the public comment period be limited to two hours; (3) encouraging people to contact City Council with their comments via phone, e-mail, fax, letters, meetings, etc.; (4) sign-up sheet with people directly affected by the development be allowed to speak first and then City residents being allowed to speak next; and (5) single e-mail address for citizens to write their comments to entire Council.

UDO AMENDMENT REVIEWS

Setback Requirements for Outdoor Storage and the Temporary Outdoor Display of Products

Deletion of the Number of Seats "Cap" for Theaters in the Urban Village District

Deletion of Planned Unit Development Zoning Overlay District

Due to the lateness of the hour, it was the consensus of Council to forego the briefings and meet with staff prior to the public hearings if they need clarification before the scheduled public hearings on January 24, 2006.

REPORT ON FLOOD MANAGEMENT

Vice-Mayor Jones reported on the Asheville-Buncombe Flood Reduction Task Force. She said that she has been working with Buncombe County Commissioner David Gantt on this initiative, which purpose is to establish a regional approach in developing a long-range plan based on best practices models to protect our floodplains/floodways and manage our watershed. Such a plan should integrate objectives of flood control, transportation, economic development, land use and community planning, recreation and environmental preservation.

The objectives would be (1) to study strategies to reduce future flood levels in the Swannanoa Watershed during heavy rain episodes; (2) to study strategies to minimize the economic, environmental and social impacts and the risk to human life when floods occur in the future; (3) to analyze whether current development patters are affecting the severity of flooding during heavy rain events; (4) to review the current flood studies underway and access the feasibility of developing a dynamic and predictive capability to keep abreast of those variables that affect future flood potential; (5) to make recommendations to the local governments on these matters; and (6) to act as a citizen advisory board for stormwater utility issues, as needed.

She said the structure would be that this is a citizen task force, to be comprised of individuals with technical expertise in this topic. Buncombe County will appoint five members; Asheville City Council will appoint five members; and Black Mountain Town Council will appoint two members. Staff support will be made available to facilitate the work product, if necessary. And, staff will be available to present background information to the commission, if requested.

She said the timeline (which can be extended if needed) is six months to report back to the elective bodies – the Buncombe County Commissioners, Asheville City Council and Black Mountain Town Aldermen.

She said that a defined scope of work is being proposed to initiate the commission. A similar effort may follow for Hominy Valley.

After a short discussion, Vice-Mayor Jones said that she would meet with Commissioner Gantt and discuss Council's concerns and work with City Attorney on an ordinance to bring back to City Council for consideration.

APPOINTMENT OF METROPOLITAN PLANNING ORGANIZATION/TRANSPORTATION ADVISORY COMMITTEE MEMBERS

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, moved to waive the rules in order to take formal action at this meeting in order to facilitate the appointment of the Metropolitan Planning Organization/Transportation Advisory Committee (TAC) members. She explained that the current boards and commissions appointments are scheduled for the Council's retreat on January 20-21, 2006. Historically we have done the appointment process at a worksession. Unfortunately the first organizational meeting of the TAC occurs on January 19, 2006, and she feels we will serve the community best if we can have both our representatives at the table from the start. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Vice-Mayor Jones said that is one of the two members of City Council on the TAC, however, she will not be seeking reappointment in that others have expressed an interest to serve on that Committee. City Council will need to appoint two regular members and two alternate members to that Committee.

Councilman Mumpower said that historically people are removed from boards based on attendance or failure to perform in an effective manner. During his four years of service on the TAC, he worked hard to act in terms of balance and he felt this process is an effort to set up the committee for people who share a fixed agenda to tilt the participation of this very important board in their direction. He felt this was a political agenda and was uncomfortable in proceeding in this fashion. He stressed that this is changing policy without deliberation.

Councilman Davis spoke in support of Councilman Mumpower remaining on the TAC in that he has represented Asheville well and there is no reason to replace him.

Mayor Bellamy spoke in support of Councilman Mumpower's dedication to the TAC and would support his reappointment.

After Mayor Bellamy called for a vote, Councilman Newman received 6 votes; Councilman Freeborn received 4 votes; Councilman Davis received 3 votes; Councilwoman Cape received 3 votes; and Councilman Mumpower received 3 votes. Therefore, Councilman Newman and Councilman Freeborn were appointed as the City's regular representatives to the MPO/TAC. When asked who was interested in the alternate positions on the TAC, Councilwoman Cape and

Councilman Davis expressed an interest. Therefore, Councilwoman Cape and Councilman Davis were appointed as the City's alternate representatives to the MPO/TAC.

BOARDS AND COMMISSIONS:

Vice-Mayor Jones outlined a process in which she felt would streamline the process, in that they had received approximately 140 applications for 27 vacancies. Councilman Mumpower spoke against this process in that he felt it was too far away from the established process. After a brief discussion, Vice-Mayor Jones determined to proceed with the appointment process used in the past.

It was the consensus of City Council to (1) interview Jonathan Glover, James Sheeler and Cheryl Johnson for alternate positions; and (2) reappoint Richard Fort and Robert Middlemas as regular members on the Board of Adjustment.

It was the consensus of City Council to (1) interview Rev. Keith Ogden, Veronica Sotolongo and Martha Brown for a vacancy; and (2) reappoint Michael Burkhead to the Asheville-Buncombe Community Relations Council.

It was the consensus of City Council to (1) interview Guadalupe Chavarria, Michael McDonough, Kitty Brown, Sherry Luft, Larry Johnson and Daniel Sanders for a vacancy; and (2) reappoint Pat Whalen to the Asheville Downtown Commission.

It was the consensus of City Council to interview Becky Anderson, John Payne, Phillip Ray Gibson, Kenneth Brown, Matthew Raker, Neil Newberry, Smithson Mills, LaVoy Spooner, Lewis Lankford and Kimberly Hodges for vacancies on the Economic Development Advisory Committee.

It was the consensus of City Council to interview Paul Ford, Jeff McMickens, Mary Robertson, C. Joy Thigpen and Jessica Erwin Leaven for vacancies on the Asheville-Buncombe Fair Housing Commission.

It was the consensus of City Council to (1) interview Glen Locascio, Starr Silvis, Sarai Rightmyer, Dawa Clark and Marc Hunt; and (2) reappoint Linda Giltz and David Tuch to the Asheville Greenway Commission.

It was the consensus of City Council to delay appointment on the Metropolitan Sewerage District Board of Directors until City Council's annual retreat.

It was the consensus of City Council to appoint Barbara Hodgson to the Noise Ordinance Appeals Board.

It was the consensus of City Council to (1) interview Terry Taylor, Kenn Kotara, Kristin MacLeod, Janiece Meek and Bill Branyon; and (2) reappoint Bill Fishburne and Dana Irwin to the Public Art Board.

It was the consensus of City Council to (1) interview Richard Koerber, Hartwell Carson, Starr Silvis, Donna Clark, Bob Gale and Bill Branyon; and (2) reappoint Bill Jones to the Asheville Tree Commission.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:30 p.m.

Magdalen Bowleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Friday – January 20, 2006 – 11:30 a.m.
Saturday – January 21, 2006 – 8:00 a.m.
W.C. Reid Recreation Center

City Council Retreat

Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Friday, January 20, 2006 – 12:10 p.m.

City Council each identified what their expectations would be of this retreat.

Ms. Belinda Odom, Human Resources Director, and Mr. Lewis Isaac, Training Coordinator, reviewed with Council their Myers-Briggs profile, explaining how their managerial type is based on their personality type. Council discussed the implications of the Myers-Briggs information.

Discussion then surrounded ground rules for the meeting.

Mayor Bellamy then reviewed with Council the Committee structure, their rules and appointments. She said that Council committee are to be policy review and discussion arms of the City Council, providing an opportunity to explore the implications of policy alternatives and the policy development process; and to serve in ad advisory capacity to the Council as a whole on reviewing policy matters referred to them; informing and educating the Council on existing city programs and issues and other such matters as the committee deems appropriate. In reviewing issues, the committees are expected to anticipate the full range of considerations and concerns related to the various policy questions. When participating on committees, members are expected to temper their role as policy advocates in order to fully evaluate all the alternatives. The City Council committees shall not become involved in the administration of City government. Each committee has a chairperson and an agenda. Mayor will be an ex-officio member to each Committee.

- Budget and Finance Committee
  Purpose: The Budget and Finance Committee's area of interest includes Annual Budget Process, Capital Improvement Programming, Financial Reports, Taxes, Fees, Assessments, and Infrastructure Finance.

  Councilman Newman, Chairman
  Councilman Mumpower
  Councilman Freeborn

  Staff: Ben Durant

Matters relating to the illegal use and possession of narcotics and drugs, intergovernmental relations, cooperation with law enforcement and fire and rescue, and emergency management agencies, as well as educational and research organizations, involved with control and prevention of illegal traffic in and use of narcotics and drugs.

Councilman Mumpower, Chairman
Councilman Davis
Councilman Freeborn

Staff: Jeff Richardson

- Land Use and Economic Development Committee
  Purpose: To recommend policies to support our long-range vision and comprehensive planning goals. Areas of focus include: develop policies to enhance the employability of Asheville residents, Planning, Land Use, Development Services, General Plan Amendments, Subdivisions, Engineering, Annexations, Building Code/Inspection, HUB strategies and Land Development Code.

  Examples of Work Plan:

  1. Development Process Improvements
     a. Development Application Process and Service Extension Requests
     b. Departmental Organization and Workflow Improvements
  2. Land Development Code Amendments
     a. Infill and Redevelopment Code Changes
     b. Smart Growth Zone Specific Incentives
     c. Environmental Recommendations
     d. Transportation Recommendations
  3. Master Planning Tools
     a. Master Planning Guidelines/Design Standards
     b. Smart Growth Map
     c. Smart Growth Incentive Matrix
     d. Neighborhood Planning Process Recommendations (in collaboration with Housing & Neighborhood Development Committee)
  4. Non-Substantive Revisions to Land Development Code ("Plain English" Version)

  Councilman Davis, Chairman
  Vice-Mayor Jones
  Councilwoman Cape

  Staff: Jeff Richardson

- Housing and Neighborhood Development
  Purpose: To enhance the quality of life in Asheville and the livability of neighborhoods by providing policy recommendations to Council on all matters relating to the creation and maintenance of housing within the City, including public housing and affordable private housing; all matters relating to the alleviation of homelessness and services provided to homeless individuals within the City.

  Vice-Mayor Holly Jones, Chairman
  Councilwoman Cape
  Councilman Newman

  Staff: Gary Jackson

Discussion surrounded the policy committee structure. Mayor Bellamy requesting Council's feedback by Friday, January 27, 2006. However, in general, Council expressed willingness to try this policy structure for one year after Mayor Bellamy clarifies some areas of concern.

As a result of Council concerns, City Attorney Oast said that he would review the duties and responsibilities of the ex-officio member.

Discussion and appointments were made for the City Council liaison and mandatory seats for Council on the various boards and commissions.

Ms. Kim Hibbard, Associate General Counsel at the N.C. League of Municipalities, reviewed with Council the open meetings and public records laws.

As a result of discussion on public records, City Attorney Oast said that he would investigate the issue of e-mails under the public records law.

There was considerable discussion regarding Council worksessions, from holding another worksession, to the types of presentations given at worksessions. As a result of that discussion, it was the consensus of Council to (1) continue holding the worksessions on the third Tuesday of each month at 3:00 p.m. with no public comment being taken; (2) move the worksessions from the First Floor North Conference Room to the Council Chamber; (3) televise the worksessions live; and (4) brief powerpoint presentations by City staff with no hard copies being distributed. City staff will develop an informational sheet on how to make a presentation before City Council.

After discussion, it was the consensus of Council to limit public comments on public hearings to one hour with developers on conditional use permits and conditional use zonings being limited to 20-30 minutes (exclusive of the one hour).

Resulting from a discussion about Council adding items to the agenda, it was the consensus of Council that one Council member could add an item to an upcoming agenda by contacting the Mayor at least two weeks in advance (if possible) of the requested meeting agenda. It would also be a good idea to advise the City Clerk of the requested item and date as well.

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, explained how she will be reviewing the entire board and commission process, including, but not limited to, the interview process; looking at current boards for effectiveness and asking their recommendations for consolidation, etc.; reappointments; policy on County residents; etc.

At 5:35 p.m., Mayor Bellamy thanked City Council for their input and recessed the retreat until the following morning at 8:00 a.m.

Saturday, January 21, 2006 – 8:00 a.m.

Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Assistant City Manager Jeff Richardson outlined the community forum summary's top focus areas: development and growth; employment, local business and economic development opportunities; natural environment and public/alternative forms of transportation; public safety and drug issues; housing opportunities; and education and youth.

He then summarized the City department's operational objectives: enhanced citizen and customer service through improved processes and procedures; capital improvements; organizational development/professional training/performance-based compensation; and internal and external communications.

City Councils Strategic Operating Plan summary included: economic development; housing opportunities; planning; sense of place, heritage and arts; partnerships to improve critical services and infrastructure; natural and built environment; and community building.

Chief Financial Officer Ben Durant summarized the financial forecast for Council, noting that his forecast is without any shift in policies or priorities. Mr. Durant responded to various questions from Council regarding the impact of the dissolution of the water agreement. Discussion surrounding working on a relationship with our legislators to share our concerns.

With the assistance of Mayor Bellamy, facilitator Paul Godfrey led Council through a process to develop a set of goals. Each Council Member explained the following goals that were important to them:

Councilman Mumpower

- Strengthen our emphasis on enforcing existing laws and regulations over adding new ones
- Water – stay the course – request immediate open negotiations with County Commissioners and state legislators
- Remain revenue neutral during this reevaluation year
- Maintain our fund balance in terms of percentages and dollar amounts
- Give consideration to a cottage housing adjustment to the UDO for all residential zoning district
- One stop permitting and a continued balanced prioritization of serve over regulation
- Continued and strengthened drug intervention/prevention and public safety initiatives – we are making headway
- Public safety – salary adjustments to fit current market realities
- Stop the paper chase – development realistic plans that emphasize execution over fantasy
- Renew efforts to consolidate the County and City parks departments – search for other opportunities
- Initiate a "Keep It Clean – Take the Screen" drug screen program in the City – Council can start it
- Change our charter and discontinued non-partisan elections in the City – such no longer realistically exists
- Concentrate on our core service over benefits as we apply our limited resources
- Bring to embrace public safety as an economic impact tool – "Asheville – The safety city in America"
- Public and Film Artist of the Year
- Bathroom kiosks downtown
- Remain considerate of the historic indicators demonstrating that the free market is more adequate than planners, regulators and government intervention in affecting our future – a free market provides a self-correcting system that we cannot easily duplicate

Councilman Freeborn

- Riverfront Development
  - sequencing of infrastructure needs, e.g., water, roads. Etc.)

- Transportation
  - all transportation tools in one toolbox, e.g., parking, transit staff, MPO coordinator, transit planner, traffic planner, etc.
  - evaluate how we can use current budget to issues
  - improvement communication between transit staff
  - expand their scope
- More Planning & Development staff

Councilman Newman

- Asheville too expensive
  - water, taxes, etc.
- Find common ground with regional partners
- Share water services with Buncombe County under equitable outcome
  - fix infrastructure
  - fair rates
  - extension of lines
  - reimburse Asheville when applicable
- Regional cooperation agreement with Buncombe County
  - new tourism-based revenue sources to renovate Civic Center; build work-force housing consolidation of services
- Community transit
- Parking Fund conversion
- Broaden mission of Transit Commission

Councilman Davis

- Develop finite plan for Civic Center
- Begin working toward a more equitable pay plan for public safety
- Continue looking at UDO changes and development issues for Central Business District
  - to include emphasis on Eagle/Market Street area by trying to foster private/ public partnership.
  - emphasis on gateway corridors
- Stay on course on water issues
- Educational forum on what our development guidelines mean
- Presentation by City staff on the Joint Planning Area and what that means to the City in terms of the Water Agreement
- Basic City services
  - cleaning streets, sidewalks, litter
- Revisit the 2025 Plan

Councilwoman Cape

- Economic Development in Central Business District and Riverfront area
  - look at long-range development plans (30 years out with mixed use)
- Support HUB Plan
- Stay on course regarding water
- Energy efficiency (look at our own energy situation to find ways to conserve and save money
- Environmental impact
- Development Transportation Plan for DOT and look at transportation in a broad way

Vice-Mayor Jones

- Implementation of City-County Flood Task Force
- Remain revenue neutral
- Support revisions to the UDO that will produce more sustainable development and environmental stewardship and protection
- Balance building regional relationships while standing up for Asheville's needs
- Identify other sources of revenues for our Asheville's needs
- Facilitate a public/private partnership for affordable issues (housing, transit health insurance)
- Citizen involvement
- Let City Manager do his job
- Become a model of wellness

Mayor Bellamy

- Enhance basic City services
- Increase police presence in high crime neighborhoods
- Additional staff in the Planning & Development Department
- Develop a plan for completing neighborhood plans
- Support Civic Center Task Force recommendations
- Develop a workforce housing plan
- Develop new policies for Housing Trust Fund
- Implement the HUB project
- Improve water infrastructure and implement a uniformed rate
- Systematically address unfinished business, with the first being the Eagle/ Market Street Plan
- Implement the City's motto
- General obligation referendum for development needs

Mayor Bellamy then asked for Council to narrow down their goals:

Councilman Mumpower:

- public safety
- maintaining our current commitments

Vice-Mayor Jones:

- remain revenue neutral
- affordability initiatives with public/private partnerships (Affordable Housing Plan, Hope 6, cottage housing)

Councilman Davis:

- design forum for public and developers explaining the UDO
- Eagle/Market Street Development Plan
  (noting the Civic Center and pay for public safety is already in the process)

Councilwoman Cape:

- environmental energy advisory committee
- development model of neighborhood plans

Councilman Freeborn:

- transportation reorganization
- riverfront development

Councilman Newman:

- seek common ground on water and other common issues
- streamline planning

Mayor Bellamy:

- basic City services
- support of HUB project

Mayor Bellamy announced the following other topics:

- Reopen water discussions while staying on course
- Charter changes
  - Partisan/Non-Partisan Election
  - Filling 4th Council Seat
- Downtown
  - Update of the Downtown Social Issues Task Force
  - Public Toilets
  - Kiosks
- Survey youth services and additional opportunities

City Manager Jackson said that at the next worksession he would bring back to Council a 6-month plan on what City staff can realistically do.

Mayor Bellamy discussed the best way for Council to communicate with one another.

At the request of City Manager Jackson and after discussion, City Council reaffirmed their Strategic Operating Plan guidelines. Also resulting from the discussion, the following longer-term goals were established which will be discussed at Council worksessions:

- Departments Capital Improvement Plans
- Multi-year business plan
- Revisit the 2025 Comprehensive Plan
- Consider reaching underserved citizens in the downtown area
- TIF opportunities and how to use the full economic development tools

Additional topics discussed included:

- What opportunities are out there for revenue and feelings about re-hiring a lobbyist
- Strategy for the City to engage our state legislators
- City-owned properties issues
- Communication with our state delegation and other agencies in the community
- Open Meetings Law regarding policy committees
- Work hard to separate personal from philosophical differences
- Regular meeting with Buncombe County Commissioners and State legislators
- Visits with Congressman Taylor and Senator Burr and Senator Dole
- Regular updates from Buncombe County School Board

At 11:45 a.m., Mayor Bellamy adjourned the Council retreat.

Magdalen Bourbon
CITY CLERK

Jerry M. Bellamy
MAYOR

BUNCOMBE COUNTY

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Air Force JROTC from Roberson High School led City Council in the Pledge of Allegiance.

INVOCATION

Ms. Sandra Smith from Holy Ground gave the invocation.

Mayor Bellamy asked for a moment of silence for Chief Warrant Officer 3 Mitch Carver who was recently killed in Mosul, Iraq, while serving his country.

CHANGES TO THE AGENDA

At the request of Councilman Davis, a report from the Civic Center Task Force will be added under New Business.

Mayor Bellamy announced that there will be no discussion at this meeting regarding board and commission appointments.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 10, 2006, AND THE WORKSESSION HELD ON JANUARY 17, 2006**

B. **RESOLUTION NO. 06-8- RESOLUTION MODIFYING THE 2006 CITY COUNCIL MEETING SCHEDULE TO INCLUDE A SPECIAL WORKSESSION (FOCUSING ON GUIDING POLICIES AND GOALS FOR THE WATER SYSTEM) ON TUESDAY, JANUARY 31, 2006, AT 5:00 P.M. IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE, N.C.**

RESOLUTION BOOK NO. 29 – PAGE 312

C. **RESOLUTION NO. 06-9- RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE ORIGINAL AGREEMENT WITH THE N.C. STATE RURAL ECONOMIC DEVELOPMENT CENTER DATED APRIL 26, 2005, FOR A SUPPLEMENTAL GRANT TO UNDERTAKE STORMWATER IMPROVEMENTS IN THE BILTMORE VILLAGE AREA**

2

Summary: The consideration of a resolution authorizing the City Manager to amend the original agreement, dated 4/26/05 with the N.C. State Rural Economic Development Center, for a supplemental grant to undertake stormwater improvements in the Biltmore Village Area; and the accompanying budget amendment, in the amount of $80,000.

The City was successful in obtaining grant funds totaling $740,000 for planning and implementation of the River Redevelopment Plan. The Rural Center recently approached us with an additional grant opportunity that would enable the replacement of stormwater piping in Biltmore Village to alleviate street flooding during minor storm events (<10-year storm events), a high priority for area merchants. The current amendment is to accept a supplemental Phase III grant of $80,000 that will be used for these stormwater improvements in the Biltmore Village area.

Staff is continuing the public involvement process for the River Redevelopment Plan, most recently meeting with RiverLink's executive board. Future meetings to be scheduled include another, follow-up meeting with Biltmore Village merchants and a general meeting with River area stakeholders.

Pros:

- Provides a funding source for plan implementation of much need stormwater improvements that were indicated as a priority by the merchants in Biltmore Village.

Cons: None noted.

City staff recommends City Council adopt the resolution authorizing the City to amend the redevelopment planning grant agreement with the Rural Economic Development Center, and to also approve the budget amendment, in the amount of $80,000.

RESOLUTION BOOK NO. 29 – PAGE 313

D. ORDINANCE NO. 3321 - BUDGET AMENDMENT FOR A SUPPLEMENTAL GRANT TO UNDERTAKE STORMWATER IMPROVEMENTS IN THE BILTMORE VILLAGE AREA

Summary: See Consent Agenda "C" above.

ORDINANCE BOOK NO. 22 - PAGE 355

E. RESOLUTION NO. 06-10 - RESOLUTION APPOINTING A MEMBER TO THE NOISE ORDINANCE APPEALS BOARD

Summary: The consideration of appointing a member to the Noise Ordinance Appeals Board.

Ms. Sieglinde Anderson has resigned from the Noise Ordinance Appeals Board, thus leaving an unexpired term until July 1, 2006.

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to arrange the proper paperwork to appoint Barbara Hodgson to serve the unexpired term of Ms. Anderson, term to expire July 1, 2006, and then to serve a full 3-year term, term to expire July 1, 2009, or until her successor has been appointed.

Staff recommends City Council appoint a member to the Noise Ordinance Appeals Board.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT NORTH MARKET AND WOODFIN STREETS, KNOWN AS 60 NORTH MARKET STREET, FOR A PROPOSED MIXED-USE RESIDENTIAL-CONDOMINIUM WITH STREET LEVEL COMMERCIAL DEVELOPMENT

ORDINANCE NO. 3322 - ORDINANCE TO GRANT A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT NORTH MARKET AND WOODFIN STREETS, KNOWN AS 60 NORTH MARKET STREET, FOR A PROPOSED MIXED-USE RESIDENTIAL-CONDOMINIUM WITH STREET LEVEL COMMERCIAL DEVELOPMENT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:08 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for property located at North Market and Woodfin Streets, known as 60 North Market Street, for a proposed mixed-use residential-condominium with street level commercial development (Attachment to City Exhibit 3 – Location Map).

The application seeks approval for a mixed-use building containing 75 residential units and 6,000 square feet of commercial space on an 'L-shaped' parking lot adjacent to the Thomas Wolfe House and the Renaissance Hotel (Attachment to City Exhibit 3 – Aerial Map). The project is somewhat complicated in that the proposed building has at least 4 public facades and no rear façade, making each façade unique and important. The project seeks to provide two storefront spaces along the two major street frontages. The façade facing the Thomas Wolfe House

4

provides townhomes at the ground level that are accessed directly from the sidewalk provided along the property edge. To reduce the scale next to the Wolfe House historic site, the building is scaled back to two stories at this corner with the Spruce Street sidewalk. The building façade along Market Street is nine stories and the façade along Woodfin Street is seven stories (City Exhibit 4 – Building Elevations). The building edge along the Spruce Street sidewalk (facing the Renaissance Hotel) is also seven stories tall including the on-site parking structure. All parking needs of the building residents and employees of the commercial spaces will be provided in this garage. The elevations provided with the submittal illustrate the facades of the building. The perspective drawings and streetscape photos are also helpful in evaluating the scale of the structure and the relationship to the Thomas Wolfe House. The proposed building would not be the largest building in the vicinity since the Renaissance Hotel is 12 stories tall. The Altamont Hotel Apartments (at eight stories) are adjacent to the Woodfin Street façade. The proposed building would be built up to the sidewalks (0' setback) along the Market Street and Woodfin Street frontages. The building would also be built to the edge of the property line along the Spruce Street sidewalk. Along the property adjacent to the Wolfe House as noted before, the project provides townhome units. The building is setback at least 20 feet from this side property line. In addition, because the Wolfe House provides a setback from its property line, the building edge will be about 40 feet from the front of this side of the proposed building. There are no required side setbacks in the CBD. Having the town homes use along this side could provide activity along this edge and avoid undesirable nighttime activity in the vicinity of the Wolfe house.

The 2025 Center City Plan encourages and anticipates additional residential growth in the Central Business District. Over the past decade, many downtown buildings have been renovated into condominium residential units. The older stock of existing buildings is almost exhausted for renovation and now the construction of new buildings on infill lots will become more common. The use of infill lots for new development fulfills one of the goals of Smart Growth by encouraging this development where the infrastructure is already in place to serve the growth. As noted in the City Development plan, residential development in downtown is the cornerstone of downtown economic health and strengthens the vitality of the City Center. New construction must include high quality design as noted in the Downtown Design Guidelines and the Center City Plan. The proposed building was reviewed and approved by the Downtown Commission. They noted that the design reflected the context of the surrounding area and the design was sensitive to this relationship along each side. The Downtown Commission also noted that the project scale was appropriate for the area because of the surrounding land uses and the challenging context of the Thomas Wolfe House. The Downtown Commission requested that the project come back for review of building materials. This review and approval was completed on 1-13-06 at the regular meeting of the Downtown Commission.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. City Council must determine that the project meets the following conditions:

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project will meet applicable building codes. The project is not expected to endanger public health or safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The site is a surface parking lot with some trees located in a previously developed area of downtown. The project may be considered to be compatible with the surrounding area.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The project is expected to add value to this area of downtown and is not expected to injure the value of adjoining properties.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** This condition is probably the most talked about one regarding this proposal. The developer has worked to make the project fit with the character of the surrounding area by amending the layout of the building, design and materials used. The proposed building is not the largest building in the area or the tallest. The project is also in scale with the context of the Central Business District guidelines. The developer has reduced the height of the building to two stories at the corner it shares with the front of the Thomas Wolfe House. This is expected to improve the scale and compatibility with the Wolfe House. The neighborhood has never been a static place in time and this is witnessed by the large variety and scale of buildings covering a 120-year time period. With these ideas in mind, the project is thought to meet this standard.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** Redevelopment proposed for in-fill lots in the city center such as this one, is encouraged by the comprehensive plan and complies with smart growth plans adopted by the City.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The project is appropriately located for infrastructure needs and services. None of these items are expected to be a problem for this proposal.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The project is not expected to create a traffic hazard or cause undue traffic congestion.

Pros

- Residential development in the CBD reinforces the vitality of the downtown area.
- The proposal supports the Smart Growth goals of the city.
- The project may provide more eyes on the Wolfe House and may protect it from future vandalism.
- The proposed building provides a setback from the property line shared with the Thomas Wolfe House and steps down in size to two stories at the corner closest to the Wolfe House.

Cons

- The proposal changes the face of the neighborhood surrounding the Thomas Wolfe House (possibly a pro).
- Some views to and from the Wolfe House may change depending on vantage point.

At their December 7, 2005, meeting, the Planning and Zoning Commission voted 6-0 to recommend approval of the proposal with TRC conditions added as conditions. Staff concur with this recommendation.

Mr. Gerald Green, representing the developer, spoke in support of the project. He said that (1) approximately 12 meetings have been held with Steve Hill, Manager of the Wolfe House Memorial, and Becca Johnson, with the State Historic Preservation Office, to discuss the proposed building and site design; (2) more than 12 meetngs have been held with the Asheville

Downtown Commission members, and Commission Design Committee to review and discuss the building design; (3) the developmetn team met with staff of the City of Asheville and Housing Authority to discuss the proposed dvelopment and its impact on the Authority's apartments in the Altamont Hotel. The development has been endorsed by Housing Authority Director Gene Bell; (4) the sidewalk located adjacent to the Wolfe Memorial and providing pedestrian access from Market Street to Spruce Street will be enhanced as part of the project. The sidewalk is located on the property of the developer and there is no requirement to maintain it. However, the develoepr understands the important of the sidewalk. It will be enhanced with additional landscaping and townhomes will front on it, giving it a residential edge and enlivening it; (5) the development will bring more people to this area of downtown, enhancing the existing business and residential uses in the area; (6) the residents of the proposed development will provide security for the Thomas Wolfe House Memorial; and (7) the proposed structure is in sacle with the buildings in the area (Altamont Hotel, Renaissance Hotel, Patla-Straus Legal Buildling) (Applicant Exhibit 1).

The following individuals spoke in support of the project:

The President of the Asheville Community Theatre
Mr. Scott Best, attorney for the Asheville Community Theatre
Mr. Alan Ditmore

After rebuttal, Mayor Bellamy closed the public hearing at 5:32 p.m.

Councilwoman Cape voiced her concern about the safety and pedestrian amenities along the parking areas.

Upon inquiry of Councilman Freeborn, Mr. Green stated that they would be open to rooftop gardens, but a green roof would be cost prohibitive.

Councilman Mumpower moved for the adoption of Ordinance No. 3322, granting a conditional use permit for a new building known as 60 North Market Street subject to the TRC conditions being met. This motion was seconded by Councilman Newman.

Councilman Freeborn suggested an amendment to the motion to icnlude a requirement for rooftop gardens. After a brief discussion, Councilman Freeborn felt if there was no support for the amendment, he would withdraw his suggestion.

Upon inquiry of Councilwoman Cape, Mr. Green explained the screening of the air conditioning.

The motion made by Councilman Mumpower and seconded by Councilman Newman carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 357

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTIES ON HUDSON AND RICH STREETS, IDENTIFIED AS HUDSON STREET COTTAGES, FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED COURTYARD COTTAGE COMMUNITY CONSISTING OF SINGLE-FAMILY AND DUPLEX UNITS

ORDINANCE NO. 3323 - ORDINANCE TO CONDITIONALLY ZONE PROPERTIES ON HUDSON AND RICH STREETS, IDENTIFIED AS HUDSON STREET COTTAGES, FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED COURTYARD COTTAGE COMMUNITY CONSISTING OF SINGLE-FAMILY AND DUPLEX UNITS

Mayor Bellamy opened the public hearing at 5:42 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to conditionally zone properties on Hudson and Rich Streets, identified as Hudson Street Cottages, from RM-8 Residential Multi-Family Medium Density District and RM-16 Residential Multi-Family High Density District to RM-16 Multi-Family High Density District/Conditional Zoning for a proposed courtyard cottage community consisting of single-family and duplex units. This public hearing was advertised on January 13 and 20, 2006.

Mr. Esselstyn said that this review concerns two lots located near the corner of Hudson Street and Rich Street in West Asheville. The northern lot is currently zoned RM-16, while the southern lot is zoned RM-8. The applicant seeks conditional zoning for the both lots to RM-16 to enable the development of an infill housing project on both lots. If the conditional zoning is approved, the applicant would combine the two parcels into a single lot having a total area of approximately 0.6 acres. The most significant grade change on the property is near the southern edge where the land slopes down from Rich Street toward the central part of the lot.

The petition for a rezoning at the corner of Hudson and Rich streets was originally submitted as a straight rezoning, and came before the Planning & Zoning Commission as such on October 4, 2005. The Commission, at that meeting, recommended that the petition be resubmitted as a conditional zoning so that a concept plan could be considered. The applicants followed that recommendation, providing the concept plan to be considered today. He noted that the plans he presenting are plans which the applicant provided to him this morning. Council members may notice some small differences between these plans and the plans provided in their packets. He said he would describe each of these modifications in detail.

The proposed development would consist of six cottages and one duplex structure—a total of eight units. The applicant intends for the units to be sold individually as condominiums, with a requirement that at least six of the eight be owner-occupied. Parking would be provided with a combination of surface parking and garages underneath the duplex unit, accessed through three driveways connecting to Hudson Street.

The applicant, after discussion with the Engineering Department, is proposing construction of a sidewalk along the Hudson Street frontage, with a continued sidewalk connection extending north to State Street. This sidewalk extension would substitute for the construction of sidewalk along Rich Street.

Multi-family and single family dwellings are permitted uses in the RM-16 district. The proposed number of units conforms with the density standards for the district. The combined habitable area of the residences would be approximately 8,600 square feet. The cottages would each contain two habitable stories, while the duplex would provide one habitable story over garages.

A combination of vegetation and fence screening meeting type B buffer requirements is shown and appears to satisfy the standards.

Surrounding zoning is RM-16 (High Density Multi-Family) to the north and northeast, and RM-8 to the northwest, west, southwest, south, and southeast. The zoning to the east is a mix of RM-8 and RM-16. The adjacent residential areas are mostly single-family homes or vacant residential lots. The closest duplex appears to be at the corner of Hudson and State, about 350 feet away. The average lot size in the area is roughly 0.23 acres.

It appears this parcel was originally zoned RM-8 partly to be consistent with the zoning of the other parcels facing Rich Street. On the east (opposite) side of Hudson Street, Yale Avenue is the dividing line between the RM-8 and RM-16; an extension the center-line of Yale Avenue across Hudson Street intersects with the line dividing RM-8 from RM-16 on the west side.

At their November 21, 2005, meeting the Technical Review Committee, after concerns were expressed about the adequacy of the parking layout shown, made a decision to review revised plans at the December 5 informal meeting. At this December 5 meeting, the concept plan was approved with a few conditions added to the original staff report by the Engineering Department.

These revised plans were provided to the Planning and Zoning Commission ("Commission") for their review prior to their December 7, 2005, meeting. At that meeting, the Commission considered the concept plan including one small change to a driveway and voted unanimously to recommend approval of the conditional zoning. The plans seen by the Commission are the same as the ones Council received in their packets.

Prior to the *first* Commission meeting (considering the *straight* rezoning), Planning staff had received communications from multiple neighbors who were concerned about the rezoning. A number of neighbors spoke in opposition to the straight rezoning at the October Commission meeting. Since the concept plans have been submitted for the *conditional* zoning, he has heard from three neighbors who were mostly interested in more information about the conditional zoning process and the concept plans. Two neighbors spoke in opposition at the Technical Review Committee ("TRC") meeting, primarily concerned about traffic and compatibility. At the December 7, 2005, Commission meeting, one neighbor spoke in opposition to the project, and one in favor. In advance of that meeting, the applicant sent mailings to neighboring property owners, posted plans on a web site, and held a neighborhood meeting at the site. Since that meeting, he has received one email about the process, but no other communications expressing an opinion on the project.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards. Staff's review indicates that all seven standards are met as proposed in the conceptual site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements (pending final approval from the TRC which will be decided before the P&Z meeting). The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The proposed use is compatible with the

surrounding natural features and topography. The garage parking takes advantage of a change in slope.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** Staff does not expect that the proposed use would have anything more than a minimal impact on property values, and expects that the impact could just as likely be in a positive direction as negative.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The proposed project would be in harmony with these characteristics of the area. While the layout differs from any existing residential development in the immediate area, staff feels that the cottages' design would be complementary to the neighborhood.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** One of the adopted Smart Growth Land Use Policies in Asheville's City Development Plan 2025 states that compatible, higher density residential infill development should be encouraged. Another policy in this list states that traditional neighborhood development patterns should be recognized and encouraged. A conditional zoning to allow the proposed project would be in keeping with the Strategic Operating Plan's objective of encouraging higher density infill development. With the concept plan, it can be said that the proposed use would generally conform to these plans and policies.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The project's location near State Street ensures access to transportation facilities and other services. Transit route 9 serves the area. In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Pros

- Proposed project would be compatible with the higher-density zoning to its north.
- Higher density infill development is consistent with both the City's Comprehensive Plan and Strategic Plan.
- Cottages' architecture, as shown in elevations, would be in harmony with older neighborhood structures.

Cons

- History of some neighborhood opposition to higher density.

Staff's review indicates that all seven standards for conditional use permits are met as proposed in the conceptual site plan.

Mr. Esselstyn then identified the differences in the plans being shown now and those received earlier by City Council. A number of these changes were prompted by the applicant's decision since early December to pursue the use of solar energy to heat hot water for the units. Solar water heating panels would be installed on the roofs of each of the building. The applicant explains that the following five modifications were made to optimize the capture of the sun's

energy: (1) The elevation drawings of the units now include depictions of solar hot water panels added to the roofs. These were not shown on the earlier plans. He noted that the drawings suggest that the panels would be flush with the roof and not visible from the side, but the applicant acknowledges that the exact angle of the panels has not yet been determined, and their surface may extend a small distance away from the roof surface; (2) The style of the roofs shown in the plans is a gable style, rather than the modified pyramid-hip style illustrated in the previous color plan. The gable allows a larger south-facing surface for the solar panels; (3) The orientation of the northwest and southwest units has been rotated to have the long axis pointing east-west, again for solar gain. Five trees (other than those on the patio) are no longer shown on the interior of the site. The applicant states that these are not shown because the optimal locations have not been determined. The applicant states that it is their desire and intent to include trees that would provide shade in the summer, lose their leaves to allow sun in the winter, and not interfere with the panels. They did not want to show them in a location that would turn out to hinder these goals; (4) The applicant also wishes to specify that the arrangement of the street trees may be modified from what is shown. Working within the requirements of the ordinance, they may shift the trees to concentrate the shade away from the solar panels, while still complying with planting requirements; and (5) The next change was prompted by the applicant's desire to protect the root structure of the 30" caliper tree at the north of the site: The northwest cottage unit has been shifted towards the western edge of the property, away from the trunk of the tree.

Mr. Esselstyn said that the remaining four changes are not related to tree preservation or facilitation of solar heating: (1) The plans given to Council included floor plans and elevations for 2-bedroom cottage units. The revised plans show all the cottages as the 3-bedroom variety; (2) One earlier elevation showing the carriage house indicated a split in the height of the ridge line. The revised elevations for this building do not include this split; (3) Similarly, earlier elevations for some buildings showed masonry chimneys on the exterior walls. The amended plans do not include any chimneys. The applicant states that they may still wish to add chimneys if a buyer desires a wood-burning stove, but that the units' default design is without one; and (4) The previous floor plans for the carriage-house included a shared "community space." The applicant has removed the community space from that floor plan, citing complications with access issues and drafting of condo association documents.

Staff feels that these modifications received today do not affect the fundamental character of the proposed project and stands by its recommendation. However, staff does recommend that the inclusion of five trees on the interior of the site (which has been stated as a desire of the applicant) be added as a *required* condition.

Staff recommends approval of the Conditional Zoning based on the submitted concept plan subject to the conditions listed in the TRC staff report.

Mr. Gerald Green, member of the project's development team, spoke in support of the project which he feels will compliment the growth in west Asheville.

Mayor Bellamy closed the public hearing at 6:04 p.m.

Mr. Green responded to Councilwoman Cape's concern about the materials for the parking surface.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3323 to conditionally zone properties located on Hudson and Rich Streets from RM-8 and RM-16 to RM-16/Conditional

Zoning based on the submitted conceptual plan and subject to (1) the Technical Review Committee's conditions being met and (2) the inclusion of five trees on the interior of the site. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 362

C. PUBLIC HEARING TO CONSIDER REZONING A PORTION OF 430 MCDOWELL STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

Mayor Bellamy said that today she received a letter from Gerald Green, representing the applicant, which states "On behalf of the Asheville Day Nursery, we would like to request that City Council remand our project back to the Technical Review Committee in order to revise our application from a straight rezoning request to a conditional zoning request. A change in our application will allow us to gain input from the neighborhood and provide them with a project specific development and proposed use of the property." Therefore, Vice-Mayor Jones moved to remand this item back to the Technical Review Committee. This motion was seconded by Councilman Mumpower and carried unanimously.

City Attorney Oast said that a valid protest petition had been filed on this matter, however, since the applicant will be going back to the Technical Review Committee, the protest petition will need to be re-filed.

D. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES LOCATED ON CHARLOTTE HIGHWAY (5 HEMPHILL STREET) FROM COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 3324 - ORDINANCE TO REZONE PROPERTIES LOCATED ON CHARLOTTE HIGHWAY (5 HEMPHILL STREET) FROM COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Bellamy opened the public hearing at 6:06 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone properties located on Charlotte Highway (5 Hemphill Street) from Community Business I District to Community Business II District. This public hearing was advertised on January 13 and 20, 2006.

The subject properties are located on Alt US 74 (Charlotte Highway) east of the Blue Ridge Parkway and the interchange of US 74 with I-40 and I-240. The property at 5 Hemphill Road currently contains a residence (Buncombe County tax listings indicate three dwellings) and has a small pond located on the site. The portion of the other subject property is currently vacant and is moderate to steeply sloping.

The property is bordered on all sides by residentially zoned property, except to the south where the property along Charlotte Highway is unzoned as the City's extraterritorial jurisdiction terminates at this lot.

The land uses in the area are mostly single-family in nature in all directions. However, to the south, following a vacant parcel that is being cleared, there is a commercial use (a monument company) and across the Charlotte Highway is located the Fernwood Mobile Home Park.

The applicant, Kitzi Ruth Miller Bocook, is seeking the rezoning to afford potential developers greater flexibility in design. The major difference between the CBI and CBII zoning classifications is the size of structures that can be placed on site. There are a few differences, as well, in the uses allowed in the zoning districts. Developing the smaller parcel with a large structure would present many challenges without combining this property with additional land. The challenges would come in meeting all parking and landscaping required when developing with a large structure.

Community Business II zoning does allow for residences, so no nonconforming situation is created with this rezoning.

At a meeting on December 7, 2005 the Planning and Zoning Commission recommended the approval of this rezoning to City Council (5-1).

Pros

- The property is located on a major (five lane) thoroughfare very near to the intersection of this thoroughfare with the interstate highway system.
- The rezoning would allow greater development flexibility on the subject parcels.

Cons

- The property is bordered on all sides by residentially zoned and used properties, except to the south where there is no zoning. This rezoning would allow for a larger commercial development next to these residential properties.
- Meeting all development regulations for a larger structure would be challenging on the smaller parcel.

Mayor Bellamy closed the public hearing at 6:09 p.m.

Councilwoman Cape explained how she could not support this rezoning in that she didn't want to perpetuate another sprawl for a large scale development.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3324. This motion was seconded by Councilman Davis.

Upon inquiry of Councilman Mumpower, Ms. Kitzi Bocook, property owner, stated that she is requesting this rezoning to maximize the value of her property.

Upon inquiry of Councilman Newman, Planning & Development Director Scott Shuford explained the Planning Department's vision for this area. He would have preferred a project come through as conditional zoning, but is recommending approval given the development pattern in the area, topography of the property and the size of the parcels.

The motion made by Councilman Mumpower and seconded by Councilman Davis carried on a 5-2 vote, with Councilwoman Cape and Councilman Freeborn voting "no."

E. PUBLIC HEARING TO CONSIDER REZONING SEVERAL PROPERTIES ALONG SMOKY PARK HIGHWAY AND RUTHERFORD ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:22 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to rezone several properties along Smoky Park Highway and Rutherford Road from RM-16 Residential Multi-Family High Density District and Community Business II District to Highway Business District. This public hearing was advertised on January 13 and 20, 2006.

The subject properties are located in the City's extraterritorial jurisdiction (ETJ) and were zoned CB-II during the ETJ expansion that occurred in 2001. A property owner of two vacant parcels has requested that the City look into the zoning of this 27.5 acre area. The property would be very difficult to develop because the majority of the property is in the 100-year floodplain area. Any development of the property that is close up to the street, under the current zoning, would be expensive because of the need to elevate the buildings to get out of the 100-year floodplain. It is an area that has largely been previously developed, so the development that would occur there would be a redevelopment type of activity. He used a chart to show what the difference is in the CB-II District and the Highway Business District, noting the big differences are the parking requirements and the structure sizes. Because of the 100-year floodplain issue, the setback of the building is important to the redevelopment of the property. He would be more comfortable if there was an intervening zoning district that allowed parking to be located in the front of the zoning, than Highway Business District, but that is pretty much the one that would make sense for the area. Although the City doesn't have something that would limit the amount of development, but anything greater than 100,000 square feet will have to come to City Council for review and approval.

The Planning and Zoning Commission directed staff to perform an expedited zoning study for this area on September 7, 2005.

The property owner requested a rezoning from CB-II (Community Business II) to HB (Highway Business). Staff analysis indicates that HB is a better fit with the existing land uses in the area and with the existing zoning pattern of the area.

- The Community Business-II zoning district is established to provide areas for medium-to-high density business and service uses serving several neighborhoods. The Community Business II District is designed to be located primarily along minor and major thoroughfare streets that serve multiple residential neighborhoods.

- The Highway Business district is established to address the needs of commercial development along major thoroughfares where automobile use is prevalent and a wide range of commercial uses is permitted. Due to the dominance of the automobile, a primary objective within this district is to preserve the traffic capacity of the thoroughfare.

Pros

- Corrects some non-conforming uses.
- Recognizes the properties' orientation to a major thoroughfare – Smoky Park Highway.

Cons

- Could increase traffic on Smoky Park Highway.
- HB is less compatible with surrounding residential development.

The Planning and Zoning Commission recommended approval of this request on December 7, 2005, by a vote of 6-0. Staff also recommends approval of this rezoning.

Mr. Alan Ditmore spoke in support of the rezoning.

Mayor Bellamy closed the public hearing at 6:28 p.m.

Upon inquiry of Councilman Freeborn, Mr. Shuford explained that whatever use is allowed in the Highway Business District would be permitted.

Mr. Shuford responded to various questions from Council, some being, but are not limited to: why the developer would not seek a variance from the Board of Adjustment; what would the developer have to do to be able to build in the floodplain; what does a variance do for marketability of the property; is this rezoning short-sighted in terms of flooding;

Mr. Chad Pierce, Stormwater Services Manager, responded to Council's questions/ concerns regarding the floodway and flood fringe areas.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved to deny the rezoning of several properties along Smoky Park Highway and Rutherford Road from RM-16 Residential Multi-Family High Density District and Community Business II District to Highway Business District given the floodplain issues and design constraints. This motion was seconded by Councilwoman Cape.

Councilman Newman said that if the property owner would like to propose a more intensive level of development, he would be open to consider that.

Councilman Davis said that the reality is that there are multiple properties involved and requesting variances is not the clean way to develop the property. He felt that this stretch of highway is a highway business type area and would support rezoning the property.

Councilman Mumpower felt the City is laying a heavy hand on this property owner and was concerned of the message this sends.

Councilwoman Cape felt Council's responsibility is for the overall planning and to have continued sprawl along that highway concerns her.

In response to Councilman Freeborn, Mr. Shuford said that if the property were developed, the buildings could front on Rutherford Road and parking would be allowed in the rear of the buildings.

Mayor Bellamy felt that since the study was performed at the request of the Planning & Zoning Commission and would support their recommendation.

The motion made by Councilman Newman and seconded by Councilwoman Cape to deny the rezoning request carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "yes."

F. **PUBLIC HEARING TO CONSIDER REZONING PROPERTIES LOCATED AT 16 FORSYTHIA LANE FROM COMMUNITY BUSINESS II DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT**

ORDINANCE NO. 3325 - ORDINANCE TO REZONE PROPERTIES LOCATED AT 16 FORSYTHIA LANE FROM COMMUNITY BUSINESS II DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 6:56 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to rezone properties located at 16 Forsythia Lane from Community Business II District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on January 13 and 20, 2006.

16 Forsythia is a split-zoned parcel that was initially included in Smoky Park Highway/ Rutherford Road zoning study. As this property's access is from a residential street (as opposed to Rutherford Road or Smoky Park Highway), staff recommends deleting this parcel from the study area and rezoning it to RM-16, the same as the other residential property in this area. The aerial illustrates this situation; it shows the development of the parcel with a single manufactured home with access off Forsythia Lane.

- The Community Business-II zoning district is established to provide areas for medium-to-high density business and service uses serving several neighborhoods. The Community Business II District is designed to be located primarily along minor and major thoroughfare streets that serve multiple residential neighborhoods.

- The RM-16 zoning district is intended to provide a full range of high density multi-family housing types along with limited institutional, public and commercial uses appropriate within high density residential areas. It is intended that this district be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the demand generated by high density residential development.

Pros
- Corrects split-zoned situation.
- Recognizes the properties' orientation to a residential street.

Cons
- None noted.

The Planning and Zoning Commission recommended approval of this rezoning on December 7, 2005, by a vote of 6-0. Staff also recommends approval of this rezoning proposal.

Mayor Bellamy closed the public hearing at 6:58 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Cape moved for the adoption of Ordinance No. 3325. This motion was seconded by Councilman Mumpower and carried unanimously.

G. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CLARIFY SETBACK REQUIREMENTS FOR THE OUTDOOR STORAGE AND DISPLAY OF PRODUCTS

ORDINANCE NO. 3326- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CLARIFY SETBACK REQUIREMENTS FOR THE OUTDOOR STORAGE AND DISPLAY OF PRODUCTS

Mayor Bellamy opened the public hearing at 6:58 p.m.

Director of Development Services Joe Heard said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) for the purpose of adding setback requirements for outdoor storage and the temporary outdoor display of products. This public hearing was advertised on January 13 and 20, 2006.

This proposed ordinance was drafted in response to numerous requests from local businesses and property owners about having standards that address outdoor storage and displays. In the past, the Planning & Development Department has used an interpretation similar to the proposed amendment to allow these types of activities. While evaluating these issues, staff determined that outdoor storage (materials, containers, outdoor displays) should be classified as a more permanent activity that is usually housed within a building. Therefore, staff felt that it was reasonable to use building setbacks as the most appropriate standard. However, temporary outdoor displays of merchandise were deemed to be more in keeping with promotional activities and could be located wherever parking or vehicular areas are allowed (behind the required landscaped areas).

Pros –

- This amendment creates enforceable allowances for businesses to provide outdoor storage and displays.
- This amendment takes a reasonable approach by allowing more permanent storage and displays to be consistent with building setbacks, but allowing the temporary display of products (which typically require greater visibility) to be located closer to the front of a property.

Cons –

- In the past, several citizens have voiced concerns about the appearance of outdoor displays.
- Certain businesses may not want to have any limitations placed on these activities.

The Planning and Zoning Commission recommended approval of these code amendments on November 2, 2005, by a unanimous vote of 6-0. Planning staff recommends approval of the proposed ordinance amendment as well.

Mayor Bellamy closed the public hearing at 7:00 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Cape moved for the adoption of Ordinance No. 3326. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 22 - PAGE 369

H. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE NUMBER OF SEATS "CAP" FOR THEATERS IN THE URBAN VILLAGE DISTRICT

ORDINANCE NO. 3327- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE NUMBER OF SEATS "CAP" FOR THEATERS IN THE URBAN VILLAGE DISTRICT

Mayor Bellamy opened the public hearing at 7:01 p.m.

Planning & Zoning Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to delete the number of seats "cap" for theaters in the Urban Village zoning district. This public hearing was advertised on January 13 and 20, 2006.

This code amendment would delete the number of seats "cap" for theaters in the Urban Village zoning district. When the Urban Village District was first established, a 200 seat cap for theaters was established consistent with several other zoning districts. The Urban Village District may contain development intensity second only to the Central Business District so having this limitation for projects that receive master plan approval by City Council seems unnecessary.

The proposed ordinance would eliminate this cap and allow City Council to approve theaters of larger size as part of their overall approval of an Urban Village master plan.

On December 7, 2005, the Planning and Zoning Commission unanimously recommended approval of the proposed code amendment by a vote of 6-0. City staff recommends approval of the proposed code amendment as well.

Mayor Bellamy closed the public hearing at 7:02 p.m.

Upon inquiry of Vice-Mayor Jones, Mr. Shuford explained that there is no Urban Village District in the City that has a theatre in it and if the developer wanted to add one, it would have to come back to City Council for review.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3327. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 376

At 7:04 p.m., Mayor Bellamy announced a short recess.

I. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE PLANNED UNIT DEVELOPMENT ZONING OVERLAY DISTRICT

ORDINANCE NO. 3328 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE PLANNED UNIT DEVELOPMENT ZONING OVERLAY DISTRICT

Mayor Bellamy opened the public hearing at 7:33 p.m.

Development Services Director Joe Heard said that this is the consideration of an amendment to the Unified Development Ordinance to delete the Planned Unit Development Zoning Overly District. This public hearing was advertised on January 13 and 20, 2006.

The City of Asheville's Unified Development Ordinance, when drafted in the 1990's, established a Planned Unit Development (PUD) Overlay District in order to "promote innovative design in development by providing for flexibility in site design that permits a mixture of housing types and the combination of housing with other uses such as neighborhood shopping centers and offices." This overlay district as a mechanism for promoting flexible development has only been applied for five (5) times in approximately eight (8) years. Largely, the lack of use of this planning tool, can be attributed to more recent additions to the UDO that also give flexibility to an applicant in the design and density of their project. These include conditional zoning (and conditional use zoning before it) and the conditional use of density bonuses for residential districts.

Due to the lack of use of this tool and the availability of less complicated mechanisms for flexible development in Asheville's jurisdiction, it is proposed in this ordinance that the PUD Overlay District be dropped from the UDO.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment deletes from the UDO a little used and complicated planning tool.
- Deleting this provision will clear up some conflicts between the PUD standards and those of other sections of the UDO, such as the hillside regulations.

Cons-

- The Planned Unit Development Overlay District has had application, although limited, in the past seven years. Deleting this takes away an available development option.

The Planning and Zoning Commission recommended approval of this code amendment on July 6, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Mayor Bellamy closed the public hearing at 7:35 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3328. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 371

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 06-11 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH THE NATIONAL WEATHER SERVICES TO ACCEPT A GRANT FOR AN AUTOMATED FLOOD WARNING SYSTEM

ORDINANCE NO. 3329 - BUDGET AMENDMENT FROM THE NATIONAL WEATHER SERVICE FOR A GRANT FOR AN AUTOMATED FLOOD WARNING SYSTEM

Mr. Chad Pierce, Stormwater Services Manager, said that this item was reviewed by Council on January 10, 2006, however, it was continued until the February 21, 2006, worksession in order to give Council an opportunity to better understand the system. That education has taken place and therefore the matter is being brought back to Council at this meeting.

He said that following the January 10, 2006, Council discussion, City staff was able to determine that the consultant for the reservoir study felt that the data collected from the rain gages would improve the accuracy of the inundation model. The sooner the gages are installed the more potential we have for collecting more data. Additionally, the Fire Chief has expressed strong support for having the gages installed prior to the hurricane season. Fire Chief Grayson said that similar gages on the French Broad River and at the Biltmore Avenue Bridge were extremely helpful during the September 2004 floods.

The grant includes 4 rain gages, 4 combination and stream gages and all the necessary software to support the real time monitoring process. The consultant for the reservoir study will make a recommendation for the location of these gages in March 2006. These gages will be on the Swannanoa River with the possibility of one being located on Hominy Creek. The cost to the City will be $46,335 for the installation of the gages and base station. This money will come from the Stormwater Enterprise. The total cost of the project is $103,955. The North Carolina Flood Mapping Program has agreed to maintain these gages.

City staff recommends City Council authorize the City to enter into an agreement with the National Weather Service for an automated flood warning system consisting of 4 rain gages and 4 combination rain and stream gages, and adopt the associated budget amendment.

Mayor Bellamy said that members of Council have been furnished with copies of the resolution and ordinance and they would not be read.

Councilman Mumpower felt this was in excess and the return doesn't justify this level of money. He felt this is more of a procedural problem than a technical problem.

Upon inquiry of Councilwoman Cape, Mr. Pierce said that the base station will be in the City's Emergency Response Center and staff will have immediate access to the information.

In response to Councilman Freeborn, Mr. Pierce said that if we don't proceed with this action, we will not be able to have the same level of accuracy in the inundation model. Additional our emergency planning during a flood event or dam breach will not be as accurate.

Mr. Pierce responded to Councilman Mumpower's question about how will this be different from what we have now, other than the automation.

Councilman Newman felt a simpler, less expensive option, might be better for the City.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-11. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Newman and Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 29 – PAGE 315

Vice-Mayor Jones moved for the adoption of Ordinance No. 3329. This motion was seconded by Councilwoman Cape and carried on a 5-2 vote, with Councilman Newman and Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 22 – PAGE 373

V. NEW BUSINESS:

A. MERRIMON AVENUE ZONING STUDY PROCESS AND SCHEDULE

Planning & Development Director Scott Shuford said that due to concerns about development patterns and developer interest, the Planning and Zoning Commission and City Council have directed staff to perform a zoning study of Merrimon Avenue. A citizens' group, the Merrimon Avenue Study Group, has formed and held a meeting on January 17 to get community ideas. Staff feels the work of this group is very important in generating public input and ideas and applauded their efforts.

Staff has been requested to expedite the zoning study, making the work of the Study Group even more critical. We are proposing to disseminate a survey to Merrimon property owners and to property owners in the immediate (walking distance) vicinity of Merrimon Avenue. The information we receive from the survey and from the Study Group will enable staff to rapidly develop a zoning proposal for community consideration. We are interested in Council's ideas about the survey questions and whether you feel we need to add anything. Our suggested timeline is provided below.

Survey Mail-Out:	February 1, 2006
Survey Responses:	By February 15, 2006
Survey Results:	February 22, 2006
Draft Zoning Proposal:	February 28, 2006
Review Draft Proposal:	March 1 – Planning and Zoning Commission Meeting – Informal discussion
	By March 15 – Merrimon Avenue Study Group
	By March 31 – Merrimon community meeting
Public Hearings:	April 6 – Planning and Zoning Commission (tentative)
	April 25 – City Council (tentative)

Mr. Shuford said that Ms. Hedy Fischer, from the Merrimon Avenue Study Group, used a somewhat different survey than the one he sent to Council. The main differences include an added question about walking and more examples for types of development. He said that he was entirely comfortable in modifying the survey his Department produced to include the information in Ms. Fischer's survey. An advantage to using the same survey as used at the community meeting is that the basis for comparison between the Study Group's survey and ours will be the same.

Mr. Shuford asked for Council's direction on the following: (1) Does the survey appear to provide Council with the relevant information they need to identify public concerns and issues regarding Merrimon Avenue zoning?; and (2) With the understanding that the above timeline dates for public hearings are tentative depending on community response to the zoning proposal, is Council comfortable with the timeline and process proposed by staff?

Ms. Hedy Fisher explained who the Merrimon Avenue Corridor Study Group consists of and why they formed. She reviewed with Council survey results from 63 people that showed why

people use Merrimon Avenue, with 56% surveyed showing they used it as access to their residence and 4% using the transit stops. The Study Group met and there was considerable discussion about transportation issues, including roadway cross-section (possible widening, possible 3-lane configuration), sidewalks, multimodal issues like bike lanes, potential for park and ride, signal coordination, and congestion management. They requested Council to consider a temporary (6-month) conditional use overlay on Merrimon Avenue until the zoning study could be completed.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: might this type of survey be a potential model for other areas to use;

With regard to a temporary conditional overlay use, City Attorney Oast said that the law on conditional zoning, and conditional use permits and districts say that those may only be applied to property upon petition of the property owner. City Council using that tool unilaterally is not an option.

Councilman Davis felt the survey needed to include property and business owners along the whole length of the corridor.

Councilwoman Cape questioned if there are other tools City Council can use to achieve the same goals requested by the Study Group. City Attorney Oast responded that the law does contain a process for a moratorium, but that in itself would take close to 3 months because of the fairly lengthy process. It also may be possible to put the property under some sort of transition overlay that would provide that only projects of a certain size can only be built with a conditional use permit and that size could be something less than the Level III sizes that we have now. He's not sure that either of these tools would be satisfactory for Council on this. He would investigate other tools available.

Councilman Mumpower voiced concerns about stopping people from developing their property.

Mayor Bellamy felt the survey area should be expanded because Merrimon Avenue is a major corridor and many people use it. Therefore, Mr. Shuford said that the survey will be put online, but people will have to download the survey and mail it back.

In response to Mayor Bellamy's concern and suggestion about adding a statement regarding the possible road configuration, Mr. Shuford suggested a cover letter be included with the survey explaining the scope of the survey, with a disclaimer that Merrimon Avenue is a N.C. Dept. of Transportation road.

Vice-Mayor Jones moved to approve the timeline and process of the Merrimon Avenue Zoning Study as proposed by City staff. This motion was seconded by Councilwoman Cape.

Upon inquiry of Councilman Mumpower, Mr. Shuford felt it would take approximately $1,500 for a study of this sort.

Mr. Shuford responded to Councilman Mumpower by saying that even though Merrimon Avenue has not changed significantly in the past ten years, he feels that there will be an increased interest for redevelopment of that corridor in the future.

In response to Councilman Newman, Mr. Shuford explained Planning staff will utilize the information compiled.

The motion made by Vice-Mayor Jones and seconded by Councilwoman Cape carried on a 6-1 vote, with Councilman Mumpower voting "no."

It was the consensus of City Council to allow the City Attorney an opportunity to look for available tools to achieve the goal requested by the Study Group.

B. ORDINANCE NO. 3330 - BUDGET AMENDMENT TO COVER EXPENSES IN THE FESTIVALS FUND FOR THE REMAINDER OF FISCAL YEAR 2005-06

Parks & Recreation Director Irby Brinson said that this is the consideration of a budget amendment, in the amount of $120,000 from the fund balance of the General Fund to cover expenses in the Festivals Fund for the reminder of Fiscal Year 2005-06.

During production of the 2005 Bele Chere, staff encountered dramatic cost increases in entertainment expenses that were not anticipated when the Fiscal Year 2005-06 budget was developed for the Festivals Fund. Entertainment expenses were approximately $100,000 higher than they were for the 2004 Bele Chere. Staff also anticipates that entertainment expenses for the 2006 Bele Chere will be higher than in earlier years.

In order to offset the $100,000 in higher cost from the 2005 Bele Chere and provide funding for 2006 Bele Chere expenses that will be incurred prior to the end of the 2005-06 Fiscal Year, the Festivals Fund budget needs to be increased by $120,000. Based on prior year revenue collections in the Festivals Fund, staff does not anticipate that Festivals revenue in the current year will be sufficient to fund this budget increase. Therefore, staff is recommending that $120,000 in fund balance be appropriated from the General Fund and transferred to the Festival Fund to cover these expenses. As a result of this amendment, projected year-end Fund Balance will drop a nominal amount, from 22.8% of general fund expenditures to 22.6%.

This funding would directly correlate to City Council's goals of livability and vibrancy as related to the strategic plan.

Pros:

- Information was shared with Council at the 1/17/06 worksession in the quarterly report and the Bele Chere report regarding issues surrounding this request.
- Amendment will prevent an over-expenditure of the festivals fund (which is a violation of state statue), as well as provide sufficient funding to secure entertainment for future gated events.

Cons:

- The city must contribute $120,000 from its fund balance to support a non-emergency use.

City staff requests City Council adopt a budget amendment appropriating $120,000 to the Bele Chere expense line items.

Throughout discussion and noted concern, Mr. Brinson answered various questions/comments from Council, some being, but are not limited to: the City needs to be more cost effective in what they pay for entertainment; what was the entertainment costs last year; is this the first year Council had to appropriate additional funds mid-year; and are there better ways for the City to book events.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3330, appropriating $100,000 to the Bele Chere expense line items. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 375

CIVIC CENTER TASK FORCE REPORT

Councilman Davis, Chair of the Civic Center Task Force, updated City Council on the Task Force's progress and some obstacles facing them. In summary, he explained to Council the need for an economic impact study, which will be a useful tool in moving forward. If Council supports the study, the Task Force would contact with Western Carolina University for $12,000.

Councilman Davis moved to appropriate $12,000 from the Civic Center funds for an economic impact study on the Civic Center. This motion was seconded by Mayor Bellamy.

Considerable discussion surrounded the scope of the study, the need for another study on the Civic Center, other studies performed regarding the Civic Center, the mechanism to continue to access that data, and the results showing the regional aspect of the Civic Center.

The motion made by Councilman Davis and seconded by Mayor Bellamy carried on a 6-1 vote, with Councilman Mumpower voting "no."

In response to Councilman Newman, Councilman Davis said the Task Force will bring forward to Council a series of options for City Council to consider.

VI. OTHER BUSINESS:

Councilman Mumpower announced a For Our Kids event on Saturday, January 28, 2006, at Deaverview Apartments.

The following claims were received by the City of Asheville during the period of December 16, 2005 – January 12, 2006: Stacey Ferguson (Police), Bill Sprouse (Water), Adam Wells (Water), Henry Loewer (Sanitation), Bob Rhea (Police), Judy Johnson (Water) and Allstate Insurance Company (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Leslee Kulba briefly commented about Council's board appointment process.

Mr. James Judd showed Council an analysis of Maxwell Street with regard to Greenlife Grocery's use of that residential Maxwell Street.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:09 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – January 31, 2006 - 5:00 p.m.

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower (was excused from the meeting at 6:59 p.m.); Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Bellamy asked for a moment of silence to recognize the passing of Mrs. Coretta Scott King.

Mayor Bellamy announced that the purpose of this special meeting is to review the water system policies and begin discussing guidelines for the operating of the water system. Council will discuss policy areas including capital improvements, rates, growth and development, and other important issues linked to the water system; and to obtain citizen input on the water system and how it should be operated. The process will start, but not end, tonight. She urged citizens to contact Council via e-mail, fax, phone, meetings, etc. to voice their opinions. Council will also be discussing policy guidelines within the framework of the current state law, including Sullivan Acts I, II and III. Asheville has filed a lawsuit against the State of North Carolina because City Council believes that the State overstepped their constitutional authority. The State has bound Asheville with laws that do not apply to any city across this state. Council believes it is the City's right and obligation to challenge that constitutionality of those laws. In addition, those laws have a tremendous impact on Asheville citizens with a $3.5 Million burden on our citizens. As the lawsuit moves forward, Council will involve the citizens in an open environment as to the status of the legal actions. City Council is open, willing, and looking forward to working with Buncombe County for a win/win approach to issues related to the water system. The type of policy decisions Council is considering tonight are principles that ensure the soundness of the system, and the healthy and affordable delivery of water, regardless of the lawsuit that is filed against the State or negotiations of Buncombe County.

City Manager Jackson reiterated Council's guiding principle being to provide reliable, safe and affordable water to all customers throughout the region. He explained the following policy areas which guidance is sought: capital investment; rate structure, growth & development, financial policy, and governance models.

City Manager Jackson supported Mayor Bellamy's statement in that the following Sullivan Acts considerations are not being discussed at this meter: water service as a condition of annexation; rate differentials (based on location or use); equity value of assets; inter-fund transfers/tax equity payments; regional Parks & Recreation Authority; or the Civic Center.

City Manager Jackson said the first policy area of capital investment. He explained that infrastructure reinvestment is needed to assure sustainability, noting that reinvestment is a critical need. He said the water system is well managed and financially stable. The funding for short- and long-term infrastructure needs must include compliance issues at the water plants. He used a chart, which showed $57 Million needed over the next seven years.

He said that options presented to Council include (1) a capital improvements fee ("CIP fee") which would be dedicated specifically toward addressing that $57 Million need; (2) an overall rate increase; or (3) revenue bonds for large projects. He reviewed with Council a chart on the impact of the CIP fee on current water bills for single-family residential, multi-family apartments; small businesses; commercial/hotels; and industrial (all depending on the meter

size). The increase for single-family residential customers, which make up 94% on the water system, with the CIP fee would be $3.50 per month.

City staff's recommendation on how we should fund reinvestment to support Council's objective of assuring system sustainability would be to direct City staff to proceed with developing a plan to implement a CIP fee in the Fiscal Year 2006-07 budget; and to develop a public education campaign to launch between now and June 2006.

Another policy area needing guidance surrounds the rate structure. City Manager Jackson explained the following options for rate structures: declining block (which Asheville uses), uniform rate, flat rate minimum usage, and inclining block. Using a chart, he explained that the uniform rate is more widely used. He reviewed with Council a chart showing the current water bill vs. proposed water bill under the uniform rate. Residential customers currently pay $39.84 bi-monthly and under the proposed uniform rate they would pay $31.80 bi-monthly.

City staff's recommendation on what rate structure would result in Council's objective of achieving affordable and equity across customer classes would be to direct City staff to develop a plan for implementing a uniform rate structure where customers pay the same rate based on usage in the Fiscal Year 2006-07 budget; and to include a public education campaign to inform customers.

The policy guidance sought in the area of growth and development includes the water line extension policy. He said line extension policies can promote quality, compatible growth. The policy should include defining parameters for where lines are extended and what size lines are installed. It should also include a long-range master plan for water system growth. He explained the sustainable growth policy and how successful growth management takes a commitment to good planning and a commitment to high standards. He explained how economic development incentives can play a key role in growth and development.

City staff's recommendation on how can we structure policies to promote sustainable development independent of annexation would be to direct City staff to research and develop a Water Line Extension/Incentives Policy and Water Line Standards and Specifications consistent with the City's Smart Growth Policies in order to encourage sustainable development; and to schedule these documents for Committee review in March, 2006.

Regarding the financial policy, he reviewed with Council what policies we should establish to support sound financial management and best practices. With regard to policies for appropriate financial margins, City staff recommends Council direct staff to develop specific priorities for debt service coverage ratios and operating reserve levels; and to have staff bring recommendations to the Committee in March, 2006. With regard to policies for debt issuance, City staff recommends using debt financing for major improvement projects and pay-as-you-go funding for smaller repairs and refurbishment. Regarding policies for regular financial reporting, City staff recommends providing Council with enhanced detail on the Water Fund in the quarterly financial reporting report.

City Manager Jackson explained the governance models for the top 20 North Carolina water producers, those being 17 having municipal systems (Charlotte-Mecklenburg Utilities is operated by the City of Charlotte – largest in the state); 2 have a city council appointed commission; and one (in Orange County in Chapel Hill) has a regional water/sewer authority.

He reviewed with Council what governance model is most likely to support City Council's priorities. The more likely model is a municipal system with regional advisory board; or a new regional water and/or sewer authority with a major role for Asheville. The less likely model would

be a municipal system; or a new regional water and/or sewer authority with a minor role for Asheville.

The following individuals spoke on various water issues, some being, but are not limited to: what is the status of the CH2M Hill study done several years ago; system should be run like a regular business; money should be put aside for maintenance; a portion of the stormwater run-off money should be invested into the water system; water system needs to pay for itself; water bills are currently too high; additional fees or raising fees will cause a hardship on fixed income persons; there should be incentives for people who conserve; with the newest water treatment plan being 50% under-utilized, has anyone considered selling water to the surrounding municipalities; need for a true regional water authority; cost to repair pipes is high because of age of pipes; need for a sound and healthy water system; Asheville taxpayer has paid for entire water system; City receives no room tax and has to pay for all non-betterment costs; revenues are low and costs are high; elements should be reviewed from previous Council proposal; assess rates fairly for all; need a fair rate cap; get rid of the declining block rate structure; City should own it's own system; need to control growth; City needs a paradigm shift; make water fund a top priority; the MSD sewer system is a successful model; municipal system is a good model; hospitals would take a big hit, but they don't pay property taxes; encourage conservation by a water-saving rate structure, which will increase revenues for the City; option on bill to round up to the nearest dollar and that money go to a fund to help supplement low income residents; stop subsidizing commercial users; look at using wastewater to supply industrial users; develop and implement a comprehensive water program; consideration of a surcharge for homes that are above a certain elevation; need maintenance and repair of system and all revenues should be put back into fixing the system; wrong to use water in a political way (annexation); need to fix existing system before talking about extending the water lines; consider water as a basic service; every winter customers have water interruptions; how is serving people in the Black Mountain area more expensive since the large lines come from Black Mountain and Bee Tree area; will any written comments be available for public review; Asheville's finest hour was to terminate the water agreement; and will there be additional public hearings on this matter:

Mr. Fred English
Mr. Bob Smith
Mr. Walter Plaue
Ms. Hazel Fobes
Ms. Leni Sitnick
Mr. Steve Aceto
Mr. Kevin Hogan
Ms. Gracia O'Neill
Mr. Sam O'Rourke
Ms. Leah Karpen
Mr. Colin Robertson
Ms. Leslee Kulba

Capital Investment – Rate Structure

During discussion, Water Resources Director David Hanks responded to various questions/comments from Council, some being, but are not limited to: is the CIP fee more or less progressive compared to a uniform rate structure; if we institute the CIP fee recommended by City staff, how much would that generate and would that adequately address our capital improvement needs on an annual basis or would we have to institute annual increases to meet future demands; would the revenue generated from this CIP fee adequately service debt on a bond for capital improvements; what percentage do most utilities use for bond debt vs. pay-as-you-go debt; has the City researched the basic rights to water base rate and how would that affect our overall revenue; if we had raised rates annually as recommended in the early 90's

Brown & Caldwell study, we would not be faced with this CIP fee; have we given thought to what effect the CIP fee would have on existing commercial accounts and the large water users from an economic standpoint; had we had a different rate structure during the drought, we wouldn't be in this position; need to look for ways to utilize water as an economic development tool to create jobs, but we tweak our rate structure without caution, we will place some of the eroding manufacturing jobs at risk; need to develop a rate structure that gives people some ability to control their water rate through utilization; has staff researched any pressure zone rate structures with a surcharge to higher elevation customers; creation of a policy, regardless of how the Sullivan Act process turns out, that the City will not divert money from the water system; have only water charges on our water bills and let MSD collect their own sewer charge; and does MSD reimburse the City for their sewer charges on our water bill.

City Manager Jackson said that he would investigate what the possibilities are about segregating the water and sewer charges.

Councilman Mumpower asked to be excused from the meeting due to illness. Prior to leaving, he said that it makes sense not to divert money from the water system, but the City taxpayers have paid for the water infrastructure, watersheds, and other components, and the reason why some of the money is diverted is because we own the assets. The City taxpayer continues to pay double the tax rate of the county water users and others. He could support keeping the diversion to a minimum or to limit it or to set some fair equitable payment for that ownership of the water asset. In addition, he hoped Council will enter, or attempt to enter, into open, public negotiations with Buncombe County and the State representatives on a near-term basis to see if we can work out a compromise that is fair to all parties.

After each Council member spoke about their thoughts on capital investment and the rate structure and after a brief discussion, it was the majority of Council's direction to direct City staff to proceed with developing a plan to implement a CIP fee in the Fiscal Year 2006-07 budget; to develop a public education campaign to launch between now and June 2006; to further explore a plan for implementing a uniform rate structure where customers pay the same rate based on usage in the Fiscal Year 2006-07 budget and to include a public education campaign to inform customers; to further explore ways to address the component of people who conserve water, and the basic right to water issue; look at balancing the CIP fee regarding industry as it relates to jobs; research the cost of a surcharge for higher elevation customers and how that would be factored into the uniform rate; research a plan for transitioning the manufacturing sector; and provide additional research on a policy where 100% of the water funds are used to fix the water system.

City Manager Jackson said that he would report back to Council in March with a set of financial management criteria that will help guide in developing the next budget.

At 6:59 p.m., Councilman Freeborn moved to excuse Councilman Mumpower from the meeting due to illness. This motion was seconded by Councilman Davis and carried unanimously.

At 6:59 p.m. Mayor Bellamy announced a short recess.

Growth and Development

Councilman Mumpower cautioned City Council to be very careful about the language we use when we approach people outside our boundaries regarding infrastructure planning issues to create the kind of growth that Asheville believes is best.

After each Council member spoke about their thoughts on growth and development and after a brief discussion, it was the consensus of City Council to direct City staff to research and

develop a Water Line Extension/Incentives Policy and Water Line Standards and Specifications consistent with the City's Smart Growth Policies in order to encourage sustainable development.

Financial Policy

After a brief discussion, it was the consensus of Council to direct City staff to develop an educational program surrounding the City's financial policy, to include, but not be limited to: fund balance information, how the enterprise funds work, bonds, etc. Vice-Mayor Jones noted that the educational component on the stormwater fee should continue even though the City has implemented that fee. Councilman Freeborn felt that our government channel is an excellent tool to be used in educating the public.

It was the consensus of Council to direct City staff to use debt financing for major improvement projects and pay-as-you-go funding for smaller repairs and refurbishment.

It was the consensus of Council to direct City staff to provide Council with enhanced detail on the Water Fund in the quarterly financial reporting report.

Governance

Councilman Newman hoped Council would be open to looking at the municipal system, as well as the potential for a more regional form of governance, probably not scenarios that would include transfer of ownership of assets, but maybe regional forms of government that may include lease of assets and things like that.

Councilman Freeborn favored the municipal system with a regional advisory board. He felt we need to include a cross-section of users.

Vice-Mayor Jones was open to either the municipal system with a regional advisory board or a new regional water and/or sewer authority with a major role for Asheville, but she would like to be able to present options in a dialogue with the Buncombe County Commissioners and our State legislators.

Councilman Davis supported Vice-Mayor Jones' idea to sit down with the Buncombe County Commissioners and our State legislators, because it is important that they recognize the City of Asheville is part of Buncombe County and Buncombe County is part of the districts they represent. He explained why he felt the water system should remain a municipal system. However, he would also support a municipal system with a regional advisory board.

Councilwoman Cape also supported the municipal system. However, she liked the idea of a regional advisory board. She is not opposed to working towards an authority with a major role for Asheville, but would have to be some compelling reason for her to support that.

Councilman Newman said that when we talk about the water system as part of our discussions with Buncombe County, we should say that Council's first choice would be to run the system as a municipal system, but that we are also open to the possibility of having a regional water system. We also need to explore the costs and benefits of merging water and sewer and having an objective non-political process to study whether or not that makes sense.

There was a discussion how the City can disagree with the County on the water system, but still work them on other opportunities, such as the Civic Center, parks & recreation facilities, the HUB Project, etc.

In response to Mayor Bellamy, Vice-Mayor Jones explained the aspects of rates, governance and growth management that she would be open to discuss during negotiations.

Vice-Mayor Jones and Councilman Newman felt it was important to meet with the Buncombe County Commissioners and State legislators to seek a fair, out-of-court settlement regarding the Sullivan Acts that all parties can live with. Councilman Newman suggested letting the County know that it is Council's preference to have a municipal run water system, but that we would be open to exploring ideas around regional water governance system with a major role for Asheville, respecting the fact that we own the assets and that we are the majority of the customers.

After each Council member spoke about their thoughts on the different governance models, City Manager Jackson said that he has a reading on where the Council is and how to represent their policy direction. In addition, those that we would negotiate with now have a better reading on what opportunities there might be to re-open discussions.

At 8:17 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Bampson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – February 14, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Jan B. Davis

PLEDGE OF ALLEGIANCE

The JROTC Cadets from Enka High School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Freeborn asked for 2 minutes of silence.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 2006 AS "BLACK HISTORY MONTH"

Mayor Bellamy read the proclamation proclaiming February 2006 as "Black History Month" in the City of Asheville.

II. CONSENT AGENDA:

At the request of Councilwoman Cape, Consent Agenda Item "A" was removed from the Consent Agenda for discussion.

Mayor Bellamy asked that Consent Agenda Items "K" and "M" be removed from the Consent Agenda for individual votes.

At the request of Councilman Mumpower, Consent Agenda Items "L," "N," and "O" were removed from the Consent Agenda for discussion and/or a separate vote.

A. APPROVAL OF THE MINUTES OF THE RETREAT HELD ON JANUARY 20-21, 2006; THE FORMAL MEETING HELD ON JANUARY 24, 2006; AND THE SPECIAL MEETING HELD ON JANUARY 31, 2006

This item was removed from the Consent Agenda for an individual vote.

B. RESOLUTION NO. 06-12 - RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE TO REFLECT THE CITY COUNCIL WORKSESSIONS, WHICH ARE THE THIRD TUESDAY OF EACH MONTH AT 3:00 P.M., WILL BE HELD IN THE COUNCIL CHAMBER ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE, N.C.

RESOLUTION BOOK NO. 29 – PAGE 316

C. RESOLUTION NO. 06-13 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE EXISTING CONTRACT WITH GREEN LIGHT ELECTRIC INC. FOR TRAFFIC SIGNAL MAINTENANCE

Summary: The consideration of a resolution authorizing the City Manager to amend the existing agreement with Green Light Electric, Inc., to continue maintenance of traffic control devices through September 20, 2007, in the amount of $69,000.

In 2001, City staff determined that maintenance activities for traffic signals including preventative maintenance could be more efficiently accomplished through a combination of in-house activities and work contracted to the private sector.

The contract for traffic signal maintenance includes:

- Preventative maintenance consisting of annual inspection of all traffic signals and replacement or repair of deficient components;
- Maintenance activities to ensure compliance with federal and state requirements, and to protect public safety with the provision of a safe, dependable traffic signal infrastructure;
- Periodic replacement of signal components including poles, span wire, and signal heads;
- Upgrades to existing signals such as replacement of signals with LED technology to reduce burned out bulbs and power consumption, or the addition of pedestrian signals;
- Emergency response and timely repairs in cases of equipment damaged by crashes, weather, or other unforeseen occurrence.

Bids were solicited in 2002 for the contract. Green Light Electric, Inc.'s bid was the lowest, with the 2nd lowest bidder approximately 67% higher. Green Light Electric, Inc. was authorized for the work in 2003, and reauthorized in 2004 and 2005, and has performed acceptably during each contract period.

Ongoing maintenance of traffic signals is required to comply with State and federal standards and to maintain a safe and efficient infrastructure. Annual preventative maintenance identifies issues before they become problems and endanger the traveling public.

Pros:

- Maintenance of traffic signals is necessary to ensure public safety.
- Green Light Electric, Inc.'s fees are very competitive.

Cons: None noted.

Staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc. for preventative maintenance of traffic control devices.

RESOLUTION BOOK NO. 29 – PAGE 317

D. ORDINANCE NO. 3331 - ORDINANCE AMENDING THE TERMS OF SERVICE ON THE PUBLIC ART BOARD FROM 4-YEAR TERMS TO 3-YEAR TERMS

ORDINANCE BOOK NO. 22 - PAGE 377

E. RESOLUTION NO. 06-14 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Summary: Councilman Joe Dunn is no longer a member of the Asheville City Council and therefore, a vacancy exists for an ex-officio non-voting City Council member. Therefore, Councilwoman Robin Cape is hereby appointed to serve as the non-voting City Council member on the Citizens/Police Advisory Committee.

RESOLUTION BOOK NO. 29 – PAGE 318

F. RESOLUTION NO. 06-15 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE CRIMESTOPPERS BOARD OF DIRECTORS

Summary: Mayor Terry Bellamy has resigned as a member of the Asheville-Buncombe Crime Stoppers Board, thus leaving an unexpired term until June 30, 2008. Therefore, Councilman Carl Mumpower is hereby appointed as the City Council representative on the Asheville-Buncombe Crimestoppers Board, to serve the unexpired term of Mayor Bellamy, term to expire on June 30, 2008, or until his term on City Council ends, whichever occurs first.

RESOLUTION BOOK NO. 29 – PAGE 319

G. RESOLUTION NO. 06-16 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE FILM COMMISSION

Summary: Councilman Carl Mumpower has resigned as a member of the Asheville Film Commission, thus leaving an unexpired term until November 1, 2007. The vacancy left by Councilman Mumpower must be filled by a member of the Asheville City Council, and Councilwoman Robin Cape is currently a member of the City Council.

Therefore, Councilwoman Robin Cape is hereby appointed, as a member of the Asheville Film Commission, to serve the unexpired term of Councilman Mumpower, term to expire November 1, 2007, or until her term on City Council ends, whichever occurs first.

RESOLUTION BOOK NO. 29 – PAGE 320

H. RESOLUTION NO. 06-17 - RESOLUTION APPOINTMENT A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

Summary: The term of Cathy Ball, as a member of the Metropolitan Sewerage District Board of Directors, expired on January 19, 2006. City Council wishes to appoint a member of the City Council to the Metropolitan Sewerage District Board of Directors to ensure that the City's interests, as expressed through the Council, are represented on the Board Therefore, Councilman Brownie Newman, 4 Arborvale Road, Asheville, N.C., be and he is hereby appointed, as a member of the Metropolitan Sewerage District Board of Directors, to serve a three year term, term to expire January 19, 2009, or until his term on City Council ends, whichever occurs first.

RESOLUTION BOOK NO. 29 – PAGE 321

I. RESOLUTION NO. 06-18 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Summary: Mayor Terry Bellamy has resigned from the ex-officio non-voting member on the Buncombe County Tourism Development Authority, thus creating a vacancy for a City Council representative. Therefore, Vice-Mayor Holly Jones is hereby appointed as the ex-officio non-voting City Council representative on the Buncombe County Tourism Development Authority to serve a term according to the length of her Council term of office.

RESOLUTION BOOK NO. 29 – PAGE 322

J. RESOLUTION NO. 06-19 - RESOLUTION APPOINTING A MEMBER TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Summary: Ms. Gerry Kovach, representative of the Buncombe County Schools on the Educational Access Channel Commission, resigned, thus leaving an unexpired term until June 1, 2008. The Superintendent of Buncombe County Schools has requested Mr. Stan Alleyne, Director of Communications, replace Ms. Kovach.

Therefore, Mr. Stan Alleyne, Director of Communications, is hereby appointed as a representative of Buncombe County Schools, to serve the unexpired term of Ms. Kovach, term to expire June 1, 2008, or until his successor has been duly appointed.

RESOLUTION BOOK NO. 29 – PAGE 323

K. RESOLUTIONS MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 3RD ANNUAL EARTH DAY FESTIVAL; THE MOUNTAIN SPORTS FESTIVAL; THE FIRST ANNUAL ASHEVILLE JAZZ FESTIVAL; THE 4TH OF JULY CELEBRATION AND FIREWORKS; THE CITY OF ASHEVILLE TENNIS TOURNAMENT; THE BELE CHERE FESTIVAL; THE ASHEVILLE GOOMBAY FESTIVAL; THE FIESTA LATINA FESTIVAL; THE ASHEVILLE GREEK FESTIVAL; THE ASHEVILLE DOWNTOWN ASSOCIATION EVENTS; THE 10TH ANNUAL BREWGRASS FESTIVAL; AND THE ASHEVILLE GRIZZLIES HOME GAMES

This item was removed from the consent agenda for an individual vote.

L. RESOLUTION URGING THE 2006 GENERAL ASSEMBLY TO ENACT LEGISLATION AUTHORIZING A BOND REFERENDUM TO INCREASE CONSERVATION SPENDING IN NORTH CAROLINA BY $200 MILLION PER YEAR

This item was removed from the consent agenda for discussion and/or a separate vote.

M. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CERTAIN GRANT AGREEMENTS WITH MOUNTAIN HOUSING OPPORTUNITIES INC.

This item was removed from the consent agenda for discussion and/or a separate vote.

N. RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO WHOLESALE WATER AGREEMENTS WITH THE TOWN OF BILTMORE FOREST, TOWN OF BLACK MOUNTAIN AND THE WOODFIN WATER AND SEWER DISTRICT

This item was removed from the consent agenda for discussion and/or a separate vote.

O. RESOLUTION APPROVING A LIST OF CO-SPONSORED EVENTS FOR 2006

This item was removed from the consent agenda for discussion and/or a separate vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES AND/OR DISCUSSION

APPROVAL OF THE MINUTES OF THE RETREAT HELD ON JANUARY 20-21, 2006; THE FORMAL MEETING HELD ON JANUARY 24, 2006; AND THE SPECIAL MEETING HELD ON JANUARY 31, 2006

Councilwoman Cape noted an error in the January 20, 2006, City Council retreat minutes. The correct Committee make-up for the Land Use and Economic Development Committee is Councilman Davis, Chair, Vice-Mayor Jones and Councilwoman Cape. The correct Committee make-up for the Housing and Neighborhood Development Committee is Vice-Mayor Jones, Councilwoman Cape and Councilman Newman.

Vice-Mayor Jones moved for the adoption of the minutes of the retreat held on January 20-21, 2006, as amended, the formal meeting held on January 24, 2006, and the special meeting held on January 31, 2006. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION NO. 06-20 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 3RD ANNUAL EARTH DAY FESTIVAL

RESOLUTION NO. 06-21 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL

RESOLUTION NO. 06-22 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FIRST ANNUAL ASHEVILLE JAZZ FESTIVAL

RESOLUTION NO. 06-23 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 4TH OF JULY CELEBRATION AND FIREWORKS

RESOLUTION NO. 06-24 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CITY OF ASHEVILLE TENNIS TOURNAMENT

RESOLUTION NO. 06-25 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BELE CHERE FESTIVAL

RESOLUTION NO. 06-26 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GOOMBAY FESTIVAL

RESOLUTION NO. 06-27 - RESOLUTION ALLOW FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGE AND/OR UNFORTIFIED WINE AT THE FIESTA LATINA FESTIVAL

RESOLUTION NO. 06-28 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GREEK FESTIVAL

RESOLUTION NO. 06-29 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION EVENTS

RESOLUTION NO. 06-30 - RESOLUTION ALLOW FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 10TH ANNUAL BREWGRASS FESTIVAL

RESOLUTION NO. 06-31 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES HOME GAMES

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at several 2006 Special Events.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events:

- 3rd Annual Earth Day Festival, scheduled for April 15, 2006, at Martin Luther King, Jr. Park, is a celebration committed to raising awareness of the environment and what every person can do to help maintain and improve our world.
- The Mountain Sports Festival, scheduled for May 5-7, 2006, at Carrier Park, is an event to draw attention to the vast opportunities in Asheville as a destination for adventure sports.
- The 1st Annual Asheville Jazz Festival will be a live concert, and will showcase several local jazz talents. It is scheduled for June 10, 2006, at Martin Luther King, Jr. Park.
- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area. This event will be held at Martin Luther King, Jr. Park in 2006.
- The City of Asheville Tennis Tournament Picnic, scheduled for July 20 & 21, 2006, at Aston Park, is a hospitality picnic for the spectators and players.
- For many years, the Bele Chere Board, in cooperation with the Asheville Parks and Recreation Department, has produced Bele Chere to bring both citizens and visitors to the Downtown area. This year the request is being made for July 28-29, 2006.
- The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 26-28, 2006, in the Eagle/Market Street area of downtown Asheville.
- Fiesta Latina is fundraiser for the Hispanic traditions in Asheville. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held on September 16, 2006, at Martin Luther King, Jr. Park.
- The Asheville Greek Festival is a unique celebration of Greek heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 22-24, 2006, at Martin Luther King, Jr. Park.
- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville Parks and Recreation the Downtown After Five series to bring both citizens and visitors to the downtown area. This year Downtown After 5 will be held on May 19, 2006, June 16, 2006, July 21, 2006, August 18, 2006, and September 15, 2006, with the stage located at Battery Park Ave. and O.Henry Street.

- The 10th Annual Brewgrass Festival, which is a benefit for the Big Brothers/Big Sisters program, has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption on September 30, 2006, at Martin Luther King, Jr. Park.

- The Asheville Grizzles are a semi-professional sports team that seek to serve alcohol at their home games throughout the summer at Memorial Stadium.

City staff recommends City Council adopt the resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2006 Special Events: 3rd Annual Earth Day Festival on April 15, 2006; Mountain Sports Festival on May 5-7, 2006; Downtown After 5 events on May 19, June 16, July 21, August 18, and September 15, 2006; 1st Annual Asheville Urban Jazz Festival on June 10, 2006; Fourth of July Celebration on July 4, 2006; 75th Annual City of Asheville Open Tennis Championships on July 20-21, 2006; 29th Bele Chere Festival on July 28-20, 2006; GoomBay! Festival on August 26-28, 2006; Fiesta Latina Festival on September 16, 2006; Asheville Greek Festival on September 22-24, 2006; 10th Annual Brewgrass Festival on September 30, 2006; and the Asheville Grizzlies home games at various dates throughout the summer.

Councilman Newman moved for the adoption of the resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at several 2006 Special Events. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 vote, with Mayor Bellamy voting "no."

RESOLUTION URGING THE 2006 GENERAL ASSEMBLY TO ENACT LEGISLATION AUTHORIZING A BOND REFERENDUM TO INCREASE CONSERVATION SPENDING IN NORTH CAROLINA BY $200 MILLION PER YEAR

Summary: The Land For Tomorrow Coalition is seeking approval of a resolution of support to place a $200 Million bond referendum on the ballot for November, 2006, for the purpose of protecting land for the future of North Carolina.

The Land for Tomorrow Coalition was founded by a number of non-profit organizations including American Farmland Trust, Conservation Fund, North Carolina Public Interest Group, North Carolina Recreation and Park Association, and Trust for Public Land. Additional partners continue to sign on for this initiative. The goal of the Coalition is to increase public awareness of the need to protect additional land and historic places that are critical to the quality of life in North Carolina. According to information provided by this Coalition, North Carolina lost 2.8 million acres of open space over the last 20 years and is projected to lose an additional 2.4 million in the next 15 years. A few years ago, the North Carolina General Assembly passed its million-acre initiative to strive to protect as much open space as possible. In order to meet this initiative, this Coalition

estimates that it will take an additional $200 million annually over the next five years. This money would be spent in a number of different areas including stream bank and flood plain protection, working farms, urban forests, local and state parks, and historic places.

Currently, the Coalition is working towards developing contacts and committees in each of the hundred counties in North Carolina. Lou Bissette has been appointed as the lead chairperson for the Buncombe County Committee, and his committee is dedicated to educating our local delegation on the value of this program, getting the Bill introduced and approved to place on the referendum, showcasing local needs, and building support for the bond referendum in November if approved. Staff with the Parks and Recreation Department has been involved in this process for the past several months, and our North Carolina association is taking an active role in the Coalition. The desire of the Coalition is to have each local governing board approve a resolution supporting the introduction of this Bill and to ultimately approve the bond referendum.

PROS:

- Protection of valuable land for future generations
- Improve water and air quality
- Assist in control of property damage due to flooding
- Protection of historic property and scenic vistas

CONS:

- Tremendous amount of funds necessary to make this initiative successful
- Requires approval by State legislators to place on ballot in November

This initiative addresses many issues established by the Natural and Built Environment Focus Area in the Strategic Plan.

Staff recommends City Council approve the resolution in support of the Land For Tomorrow initiative.

Councilman Mumpower was resistant for the City of Asheville getting involved in investing our efforts where we have little control. Since Asheville doesn't have direct responsibility for this, he would not be supporting the resolution.

Councilman Newman said that he is enthusiastic about this initiative, however, this resolution does fall outside the policy scope of agenda items Council considers on national/state/regional issues.

Councilwoman Cape moved for the adoption of this resolution. This motion was seconded by Councilman Freeborn.

There was a brief discussion about Council's policy not to address policy issues if they don't have a unique relevance to Asheville.

Councilwoman Cape was not aware that a policy of that type existed, however, she felt this will affect Asheville directly. There is a lot of land around our community that is very important to our economic and health of our community and trying to find the money in our community alone to do it will be difficult. There is a movement across the state to recognize the importance in the overall health and felt it would be fair to lend a voice of support to that effort.

Mayor Bellamy said that traditionally Council has expressed their individual support to these type efforts through their own council position by writing letters, talking with people, etc.

After Mayor Bellamy said that the federal legislative agenda item is scheduled for the February 21, 2006, worksession, Councilman Newman suggested a final decision on this matter be deferred until we can look at it within the context of what our legislative agenda will be and what we want our representatives to support for us.

Councilwoman Cape withdrew her motion and Councilman Freeborn withdrew his second, with the understanding that the issue will be discussed in a manner.

Councilman Mumpower moved to postpone the matter indefinitely. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 vote, with Councilwoman Cape voting "no."

RESOLUTION NO. 06-32 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CERTAIN GRANT AGREEMENTS WITH MOUNTAIN HOUSING OPPORTUNITIES INC.

Carl Mumpower moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Jones and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones

Summary: The consideration of a resolution authorizing the City Manager to execute certain grant agreements with Mountain Housing Opportunities, on behalf of the Mayor.

The City's Action Plan for using Community Development Block Grant and HOME funds in Fiscal Year 2006 included allocations for several programs operated by Mountain Housing Opportunities, Inc (MHO). Grant agreements for such funding are normally executed by the Mayor. However, Mayor Bellamy is an employee of MHO and, to avoid any appearance of a conflict of interest, it is preferable for such grant agreements with MHO as have not already been executed by the former Mayor, to be executed by the City Manager.

A full disclosure statement for Mayor Bellamy was published at the January 10, 2006, Council meeting.

Advantages:

- Avoids any appearance of conflict of interest due to Mayor Bellamy's employment with MHO.
- Allows MHO to continue to use CDBG and HOME funds for its affordable housing programs.

Disadvantages: None

Staff recommend approval of the resolution authorizing the City Manager to execute certain grant agreements with Mountain Housing Opportunities, on behalf of the Mayor.

Councilman Freeborn moved for the adoption of Resolution No. 06-32. This motion was seconded by Councilwoman Cape and carried unanimously.

At this time, Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

RESOLUTION BOOK NO. 29 – PAGE 360

RESOLUTION NO. 06-33 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO WHOLESALE WATER AGREEMENTS WITH THE TOWN OF BILTMORE FOREST, TOWN OF BLACK MOUNTAIN AND THE WOODFIN WATER AND SEWER DISTRICT

Summary: The consideration of a resolution authorizing the Mayor to enter into wholesale water agreements with the Town of Biltmore Forest, Town of Black Mountain and the Woodfin Water and Sewer District.

The Water Resources Department has provided wholesale water to these government agencies through contracts executed by the Towns and District with the former Regional Water Authority of Asheville, Buncombe and Henderson. The new contracts change the name of the water provider from the Regional Water Authority to the City of Asheville. Other aspects of the contracts are the same for each governing board. These contracts were developed and designed to meet the water needs of each local government entity. The current wholesale consumption rate is $0.81 per CCF (748 gallons of water) and $184.00 per 10,000 gallons of capacity required by each government.

PROS:

- These wholesale contracts provide revenue to the City water system while providing a human right need of water to area governments that currently do not have adequate water supplies for their customers.
- This is regional cooperation to provide water to adjoining municipalities and water district.

CONS:

- There are no cons, these contracts have been in place for many years and are proof of good intergovernmental relationships and regional cooperation.

Staff recommends City Council approve the request for the Mayor to enter into wholesale water contracts with the Town of Biltmore Forest, Town of Black Mountain, and Woodfin Water and Sewer District.

Upon inquiry of Councilman Mumpower, Water Resources Director David Hanks said that most of these wholesale agreements have been in effect for sometime and through these agreements it was built in that any overall rate increases that the City had, as far as their rate structure, would apply also to these wholesale customers. During the budget, as Council goes through all the rate structures, is the time that we look at the rates for the wholesale agreements.

When Councilman Newman asked what would happen if Council changes to a uniform rate structure, Mr. Hanks said that when they started looking at the uniform rate structure, they did not include the wholesale customers because basically they started out at a negotiated rate with that class of customer. He personally felt the City should continue to do that.

Mayor Bellamy said that Council will go into detail about this when the Water budget is discussed.

Councilman Mumpower moved for the adoption of Resolution No. 06-33, with the understanding that City Council will be re-visiting this issue sometime during our budget deliberations. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 361

RESOLUTION NO. 06-34 - RESOLUTION APPROVING A LIST OF CO-SPONSORED EVENTS FOR 2006

Summary: The consideration of a resolution approving a list of co-sponsored events, which will provide authorization for in-kind support by the City.

Several years ago, the Parks and Recreation Department developed a matrix to assist in determining the minimum requirements for an event to be considered for co-sponsorship. This matrix includes specific points given for such areas as economic development, out of town spending, whether the event is designed for raising funds for local charities, or whether the event increases cultural awareness and understanding. A total of 34 events were approved last year resulting in a cost of approximately $100,000. This year the number has been reduced to 27 and the cost to the city is approximately $80,000.

Pros:

- Generates in excess of $10 million dollars for the local economy
- Provides additional quality cultural programming and diversity
- Allows fundraising opportunities for charities
- Expands and enhances special events and festivals to the City

Cons:

- The city's financial contribution is $80,000.
- Events contribute to decline on infrastructure and equipment provided to the organizers.

The Asheville Parks and Recreation Department recommends City Council approval of the list for co-sponsored events in 2006.

Councilman Mumpower complimented staff on making a good faith effort to pare down the number of co-sponsorships, however, he didn't think that the City should be investing tax dollars for these types of activities.

Councilman Newman suggested that going forward the City review the matrix used to evaluate potential co-sponsored events. He felt that the community development criteria is strong and feels appropriate for the City to be involved in. However, he didn't think this was the best place to spend the City's limited funds for economic development.

Mayor Bellamy recommended the Fees & Charges Committee and the Parks & Recreation Department look at developing a policy to define our criteria addressing why Asheville is involved with co-sponsorships. In addition, when that policy is reviewed, she recommended staff have the true costs of providing in-kind services, and then Council can use this year to benchmark to see where we are so that we make good policy going forward.

Councilwoman Cape moved for the adoption of Resolution No. 06-34. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 362

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE A HABITAT FOR HUMANITY SUBDIVISION LOCATED OFF OF SAND HILL ROAD

Mayor Bellamy said that this public hearing was originally scheduled for January 10, 2006; however, City staff and the property owner asked that the public hearing be continued until this date. That request was granted. However, on February 14, 2006, City staff, along with the concurrence of the applicant, requested the public hearing be continued until March 14, 2006. Therefore, Councilman Freeborn moved to continue this public hearing until March 14, 2006. This motion was seconded by Vice-Mayor Jones and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT OAK PARK ROAD AND SKYVIEW ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL ZONING TO PERMIT CONSTRUCTION OF TWO DUPLEX BUILDINGS AND THREE SINGLE-FAMILY HOMES

Mayor Bellamy announced that this public hearing was originally scheduled on January 10, 2006, however, the developer had requested a continuance to this date. Mr. Gerald Green, representing the developer, stated that they had recently been informed that a valid protest petition had been filed and they wish for additional time within which to meet with the neighborhood to understand and possibly address their concerns. That request was granted.

Mayor Bellamy opened the public hearing at 5:44 p.m.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property and since Councilman Davis is not at the meeting, it will require a unanimous vote.

Ms. Shannon Tuch, Urban Planner, said that this is the consideration of conditionally zoning property located at Oak Park Road and Skyview Road from RS-2 Residential Single-Family Low Density District and RS-4 Residential Single-Family Medium Density District to RM-6 Residential Multi-Family Low Density District/Conditional Zoning to permit construction of two duplex buildings and three single-family homes. This public hearing was advertised on December 30, 2005, and January 6, 2006.

She said this is a request to conditionally rezone 3 lots located off of Oak Park Road and Sky View Place. The subject properties total almost 1 ½ acres, of which approximately 1/3 is zoned RS-2 with 2/3 of the property being zoned RS-4. There is also a small sliver of RS-8 zoned property located here along the frontage of Oak Park Road.

The subject property is surrounded by RS-2, RS-4, and RS-8 zoned property supporting a mix of single and multi-family uses with the majority of multi-family uses located down-slope of the subject property and the majority of the single family uses being located upslope. The one glaring exception is a 3-story apartment building that currently exists just north of the property on the high end of the site.

The site currently supports a non-conforming garage that will be removed to make way for new construction of a mix of housing types. The proposed mix and number of units has gone through a variety of iterations over the course of the last 18 months, in truth, it's gone through a variety of iterations in the last few hours. There have been many changes to the project and there has also been significant discussion over the natural steep nature and the topography of the property and our hillside development standards, and how those standards apply to that property.

She then reviewed with Council how staff calculates the hillside development standards. First, the hillside standards apply to Level 1, 2, and 3 projects so for residential projects this generally includes multi-family developments and subdivisions. It does not get applied to single family and two family dwellings. As the property currently exists, they could build two single-family homes or two duplexes and not be subject to the hillside development standards. This property may also be able to be subdivided and the subdivision would examine hillside standards, so, maybe you could subdivide the lower property and get one single-family home, one duplex, and one duplex at the top of the property. This proposal, however, is for a multi-family development so the entirety of the property would be subject to hillside standards. As of late afternoon today, it appears as though the average natural slope information (just about 30%) provided to her by the applicant supports five units. She said the average natural slope information is critical. The neighborhood had hired an independent engineer to review that and came up with an average natural slope of 40%, which comes out at a much lower density of 1.4 units per acre – resulting in two units. There would be no point in rezoning the property because you can get more than two units under the current zoning. She said that she did sit down with a scale and measured it and it does appear that the property, just measuring it by hand, is somewhere between 30-40%.

She said if the project is approved for five units, it will be reviewed by the Technical Review Committee (TRC) and at that final TRC meeting, City staff will need to see detailed hillside calculations. It is City staff's recommendation that those calculations be done by a certified professional and be stamped and sealed. The figures she received had not been stamped and sealed.

She said the original application showed 2 duplex units on the lower part of the property to be accessed off Oak Park Road and the 3 single-family units to be accessed off of Sky View Park. Understanding that there had been an error made in the hillside calculations did submit a revised plan earlier today. That revised plan showed six units instead of seven units – removed one of the single-family homes at the top. Later today, after calculating, staff realized the hillside standards did not support six units. Again, if five units are approved, the project will have to go back to the TRC to be evaluated in a more detailed form for compliance with all the technical standards.

The duplex unit will be 2 stories and approximately 2000 square feet per unit with a similar footprint. The single-family structures will be 3 stories and also approximately 2000 square feet with a comparatively smaller footprint, between 700-800 square feet. Also associated with the project is additional landscaping required for parking lot, street buffer, street tree, and landscape buffers along with tree preservation shown on the proposed Master Plan.

There has been some discussion on the on-street parking proposed for the 3 single-family homes. The on-street parking is shown to be on private property. The applicant had expressed an interest in creating these on-street parking spaces because it is what results in a lower impact to the property. However, all on-street parking spaces are deemed public spaces. The Planning & Zoning Commission recommended that the on-street parking be built to City standards but that 2 spaces per unit be dedicated for private use for the proposed single-family homes. Staff remains concerned over the dedication of on-street parking for private use, both from a precedent standpoint but also from a maintenance and enforceability standpoint. Being concerned that this would set a difficult precedent and create maintenance and enforceability problems, she spoke with the City's Traffic Engineer and the Director of Engineering over the possibility of creating a new standard for hillside properties that would allow the creation of private on-street spaces under certain circumstances and under certain standards. Although willing to consider an alternative, both the Traffic Engineer and Director of Engineering felt that the creation of an alternative would be extremely problematic and they were very concerned over what this kind of standard would result in. As such, staff must respectfully disagree with the Planning &

Zoning Commission's recommendation and asks that the Council consider the on-street parking to remain and recommend that a condition be added that all 11 on-street parking spaces be dedicated for public use.

The Technical Review Committee (TRC) reviewed this project at their November 7, 2005, public meeting and approved the project with conditions. A revised plan has been submitted addressing a number of those technical comments.

The Planning & Zoning Commission also reviewed this project at their December 7, 2005. It was approved for seven units, but it was approved under RM-6 -- because at that time it was staff's understanding was that RM-6 would support the seven units. At that public hearing where there was substantial public comment in opposition of the proposed project. Public concern focused primarily on existing problems with stormwater runoff and traffic congestion due to narrow streets and a proliferation of on-street parking. Additional concerns over an increase in density and the size and character of the duplexes were also raised. After all public comment was heard and deliberation ended, the Commission made a positive recommendation (6-1) that the project be approved with the following conditions:

- All outstanding TRC conditions must be addressed.
- Development on the site will achieve zero stormwater runoff.
- All trees with a caliper size of 8" and larger must be preserved.
- The on-street parking shown on Sky View Place shall be designed to City of Asheville standards; however, 6 of the proposed 11 spaces will be dedicated for private use by the residents of the proposed single-family homes.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The site area is an unusual combination of very mild and easily developed property with an equivalent amount of very steep terrain that is significantly more challenging to develop. The applicant has responded appropriately with the larger buildings and parking lot being located in the mildly sloped areas where less grading would be required. The steeper portions of the property are being developed with single-family structures that have a comparatively small footprint that will accommodate the existing terrain more sensitively and require less disturbance than the average single family home. The use of retaining walls is also shown to help minimize the total disturbed area.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The proposed development will be in character with the development patterns already existing on the hillside and will also be

architecturally attractive and consistent with the older Craftsman style homes of the area. The applicant has also stated that they intend to utilize 'green building' techniques for appropriateness and energy efficiency. This development is not expected to negatively affect adjacent property values.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** It is a relatively typical scenario to find the size of single-family home sites increase with the rise in terrain and an increase in grade; as slopes become steeper, lots become larger. The larger lots perched higher on the hillside are typically developed at a low density due to physical challenges and development costs. Understandably, lower lying properties are commonly developed at a higher density where development costs are not as restrictive. Oftentimes, between the relatively flat low lying properties and the relatively steep hillside properties are pockets of "transition" properties. The subject area appears to be located in just such a transition zone with a proposed density classified as Medium Density. The existing development on the hillside currently supports several similar pockets of medium density development as well as individual lots that would be classified as high density and low density. The scale of the larger duplexes is not out of scale with many of the larger single-family homes in the area as well as the existing multi-family structures. The proposed single family homes are taller (3 stories) than many of the single family homes in the more traditional lower lying neighborhood but are not out of place with many of the homes perched on the hillside designed to be sensitive to the terrain while still providing ample living space. Lastly, the character of all the proposed structures would be compatible with the architecture and materials of the more historic Craftsman style homes in the area and throughout Asheville.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The *Asheville City Development Plan 2025 (ACDP 2025)* describes a number of reasons why properties within the City limits remain underdeveloped or vacant, including topographical or other physical problems with the property resulting in prohibitive development costs under existing zoning (by limiting density and a sufficient return given the market for the property's development). The *ACDP 2025* proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property. One way to accomplish this goal is to apply existing zoning tools to encourage higher density residential infill development. A Conditonal Use Rezoning is one such tool that would allow this property to be developed at a higher density than the current zoning would allow. In addition, the same section of the comprehensive plan that discusses the need for residential infill development also outlines the need for this new construction to be of a quality that preserves, protects, and enhances existing neighborhoods. The proposed development utilizes a sensitive building approach, design, and materials that will blend in with the existing hillside neighborhood.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** This proposed development is within close proximity to alternative transportation and is located near major road facilities, interstate connections and other service centers with Charlotte Street & I-240 only ¼ mile away and within walking distance. In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed use splits access to the project area on two road frontages and will safely distribute traffic to roads with a higher capacity. The heaviest use to the site, 4 multi-family units, will be able to utilize an existing driveway (that will be improved) that empties onto Oak Park Road, a very short distance from the intersection of Baird Street which is part of the City's gridded road system. The 3 single family home lots located on Sky View Road are easily accessed from Town Mountain Road. In addition, all units will have the maximum number of off-street parking spaces allowed to prevent the need for any on-street parking. Lastly, the proposed use has been reviewed by the City's traffic engineer who has determined that the number of units and their access does not pose an undue or dangerous traffic hazard.

In summary, staff has determined that, with revision to the site plan – reducing the project to five units - that the project does meet those minimal standards and recommends approval with the following conditions: (1) all outstanding TRC conditions being met; (2) development on the site will achieve zero stormwater runoff (for the 2 and 10 year rain events); (3) all trees with a caliper size of 8" and larger must be preserved; (4) Changes to the proposed site plan be reviewed at final TRC to comply with all applicable City technical standards; and (5) a complete and comprehensive set of detailed hillside calculations be submitted for review at TRC and that these calculations be prepared by a licensed professional and be stamped and sealed.

Mr. Alan Laibson, property owner, said that the current information shows that the property will support five units. His preference for those units would be one duplex and the three single-family units (one single-family unit he will actually be living in). Or, he would propose two duplexes and one single-family home (which he would live in). But, he would proceed with whatever Council feels the best. Since the last meeting, he retained an engineer who developed a plan for zero water run-off. All surfaces will be pervious and they will proceed with green construction. One thing that might be problematic with building 5 units, instead of 6 units, is the photo-voltaic roofs because it may not be cost effective. He does understand that final approval it is subject an independent evaluation as far as the actual slope. If that is greater than they anticipated, then they will have to go back to the drawing board.

Mr. Daryl Rantis, architect, spoke in support of the conditional zoning and explained why he felt the hillside ordinance should be reviewed for change.

The following residents spoke in opposition to the conditional zoning for various reasons, some being, but are not limited to: green-building should not overshadow other aspects of responsible development; if rezoned, it will set a precedent for development of properties to which the hillside ordinance is applicable and will condone increased density on steep slopes and in areas above 2200 feet; providing City services is disproportionately expensive and increased density will exacerbate the financial strain on the City; Brooks & Medlock Engineering has concluded that the parcels are extremely steep with a natural slope of approximately 40.8%; narrow steep winding roads do not lend themselves to increased density nor can they be efficiently and effectively navigated by service vehicles or emergency vehicles; entrance to Sky View Place is dangerous due to site distance and speed; a portion of PIN No. ...2232 is owned by a different property owner and as a result of that, the calculations may change; lots are zoned appropriately due to their steepness and adjacency to single-family dwellings; traffic will be increased on narrow existing roads that contain a lot of pedestrian traffic; density should be decreased due to the topography of the site; run-off will be increased by impermeable surfaces of paving and buildings; excessive trees will be removed if developed as currently proposed; duplexes are almost double of most of the houses in the area; building more is not an argument for smart growth; cars and garbage trucks will have difficulty navigating around the site; and area is very unstable:

Ms. Elizabeth Ann Wyndelts, resident on Oak Park Road
Mr. Mark Ellison, resident on Furman Avenue
Mr. Bill Chase, resident on Oak Park Road
A resident on Furman Avenue
Ms. Barbara Hiller read a letter from Mary Parker
A resident on Oak Park Road
Mr. Shannon Fields resident on Oak Park Road (submitted petition containing 58 signatures)

Ms. Patsy Brison, attorney representing some members of the Oak Park/Charlotte Street neighbors, submitted to Council an e-mail from the neighborhood's engineer, Norman Divers from Brooks & Medlock Engineering, showing that 40.8% is the slope calculation. She has still not seen a report from the engineer for the applicant. The other calculation not mentioned to Council is that the acreage shown is improper. Part of the application acreage is owned by Ms. Wyndelts. In addition, there is the right-of-way for Sky View that is part of this upper track shown on a recorded plat that should not be included in the density calculations. That further reduces any acreage subject to any type of development. We think you should deny this request and let whatever is allowed under the current zoning to prevail. We also believe that it would be inappropriate to delegate to TRC the decision on the number of units allowed under conditional zoning. In addition, with so many changes and so many questions about what can be allowed under the conditional zoning request, she didn't think Council can approve this. The applicant has had months to make this decision and to submit proper calculations. This matter should be decided tonight and be denied.

At 6:25 p.m., Mayor Bellamy closed the public hearing.

Upon inquiry of Councilwoman Cape about what the property owner can do on the property under the hillside standards, Ms. Tuch said that there are essentially two major lots -- one zoned RS-4 and one zoned RS-2, both appear questionably to be subject to the hillside development standards. As each lot exists now, they can be developed for single-family and possibly two-family dwellings. In theory, the bottom lot could be subdivided in half. Based on the information provided to her late today, the bottom lot would support 2 units. For a single-family and if a two-family dwelling were allowed, they would not have to comply with the hillside standards and we don't have very strict stormwater standards.

Ms. Tuch responded to various questions/comments from Council, some being, but are not limited to: explanation of the hillside calculation formula; is the hillside formula used in other projects; how much would it cost for the licensed engineer to stamp and seal their document; and what will happen if the two engineering documents come back different.

There was discussion concerning the time necessary to obtain the pivotal information on the natural slope calculations.

Councilwoman Cape questioned what the vision is for our community and what the best choice is for this piece of property.

Mr. Lalbson responded to a comment about a portion of PIN No. ... 2232 being owned by a different person. He stated that the portion of property was actually surveyed and is part of his property.

Regarding the question about the right-of-way, Ms. Tuch said that it is unusual to have a property line, which encompasses the road; however, it has been our department's. interpretation that that is private property and it considered part of the lot if it is not a dedicated right-of-way.

Councilman Mumpower moved to continue this matter until February 28, 2006, to allow City staff the opportunity to review the signed and sealed engineering reports on the natural slope calculations so a definite decision could be made on the number of units allowed for this project. This motion was seconded by Vice-Mayor Jones.

Ms. Brison said that UDO states that there are requirements for every application that fits within the hillside regulations. This applicant has known since last year that this did fall within hillside regulations and that when the application is made, not months later, that the average natural slope calculations be included. The neighborhood has made many trips to City Council and the Planning & Zoning Commission on this issue and felt that a decision should be made tonight.

Mr. Chase urged City Council to not continue this matter again and to leave the zoning as it currently stands.

Mr. John Ingle, resident on Weaverville Highway, questioned whether City Council would invalidate the Brooks & Medlock Engineering report, after it was sealed and stamped, just because of the method he used to calculate them.

Ms. Wyndelts urged City Council to proceed with taking action at this meeting. She didn't think it was wise for a City staff member to validate the engineering reports.

Mr. Laibson said that up to now, it was his understanding that the engineering report was not required to be certified. He said that they have had the report for the last 18 months, but it is being challenged now and they are willing to get an independent source in to get it resolved.

The motion to continue made by Councilman Mumpower and seconded by Vice-Mayor Jones carried on a 5-1 vote, with Councilman Freeborn voting "no."

At 6:58 p.m., Mayor Bellamy announced a short recess.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT AND MASTER PLAN FOR B.B. BARNS, LOCATED AT 3377 SWEETEN CREEK ROAD

ORDINANCE NO. 3332 - ORDINANCE TO AMEND THE CONDITIONAL USE PERMIT AND MASTER PLAN FOR B.B. BARNS, LOCATED AT 3377 SWEETEN CREEK ROAD

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 7:07 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Director of Development Services Joe Heard submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Heard said that this is the consideration of an amendment to a conditional use permit and Master Plan for B.B. Barns, located at 3377 Sweeten Creek Road (Attachments to City Exhibit 1 – Location Map and Aerial Map).

The applicant is requesting an amendment to the Conditional Use Permit associated with the Conditional Use Rezoning from RM-16 to CB-II for the B.B. Barns Retail Center located on Sweeten Creek Road. The rezoning and site plan approval for a mixed-use type development was approved by City Council in October of 2000.

This request involves changes to the design and layout of buildings proposed for Phase II and Phase III of the master plan. The site plan presented to Council in October 2000 portrayed a mixed use development with one large building designated for the garden center with several smaller scale buildings that would consist of complimentary type uses (offices, artist studios, retail sales, café, deli's) and possibly multi-family uses. (Attachment to City Exhibit 3 – Conceptual Master Plan). The site plan was approved by City Council with the direction that detailed building elevations and site design be reviewed and approved by the Technical Review Committee (TRC).

On February 17, 2003, the TRC approved a detailed master plan, building elevations for the site and issued a permit to begin Phase One. (Attachment to City Exhibit 3 – Site Plan Approved by TRC and Elevations Approved by TRC) Staff felt that the plans presented, although slightly different than what Council had approved, clearly met the intent of the approval of a "neighborhood friendly" mixed-use development. The master plan includes a total of four buildings; the largest building is located in the center of the site and is reserved for the predominant use of the development including the B. B. Barns greenhouse and retail center. Three smaller-scale buildings similar in size with the B.B. Barns center are located along Rosscraggon Road with parking internal to the site. A greenway path, in lieu of the standard sidewalks, was constructed along both Rathfarnham Road and Rosscraggon Road, along with enhanced landscape buffers and display gardens.

The building elevations that TRC approved for the development illustrate unique architectural design elements that visibly reduce the overall scale and mass of the structures allowing the development to be more in context with the neighborhood. Such features include varied rooflines with decorative gable treatments, the prominent use of windows and doors, and a stair tower element centered around an attractive courtyard.

The revised master plan proposes the following changes to the building(s) layout and design. (Attachments to City Exhibit 3 – Proposal Amendment to Site Plan; Phase II – Ace Hardware; Phase III elevations) (City Exhibit 4 – Colored Photo of Phase I).

- Phase II includes construction of a 13,500 square foot Ace Hardware store that will connect to the existing B.B. Barns retail center. This building will replace the mixed use building of approximately 10,500 square feet that was approved for retail sales, a cafe and office space; and the 3,912 square foot, 3 tenant retail building.

- The elevation of the Ace Hardware building (Attachment to City Exhibit 3 – Phase II – Ace Hardware) illustrates a box-type structure with a single entrance point and covered storage area. This area is shown on the site plan to be enclosed with chain link fencing.
- Site work will include the paving of the existing gravel parking area, parking lot landscaping, and placement of a dumpster along side of the Ace Hardware building adjacent to Rosscraggon Road. Additional landscaping is proposed alongside the Ace Hardware store and dumpster area.
- Phase III includes construction of a two-story building with a footprint of approximately 7,800 square feet with parking located on the corner of Sweeten Creek Road and Rosscraggon Road. This building replaces a one –story retail center with a footprint of 7,820 square feet that was to be located at the corner of Sweeten Creek Road and Rosscraggon Road with parking to the side of the building. The change in the location of the building and parking results from the discovery of underground utilities.
- The elevation presented for the construction of the Phase III building (Attachment to City Exhibit 3 – Phase III elevations) illustrates a two-story multi-tenant building with varied rooflines and gable treatments, multiple window and door openings on each level of the facade, and use of higher quality building materials.

On January 18, 2006, the TRC approved the revised master site plan with conditions.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO) and must find that all seven (7) standards for approval of the conditional use are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The site is currently developed. Some minor grading may be necessary for the placement of the building foundation(s) and construction of the parking area necessary for this phase of the development. This however, should not disturb the existing perimeter landscaping or other site related features that were required during the permitting of Phase I. In addition, a separate grading, drainage, and erosion control plan will be required before additional site work can begin.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** This site is already being used for commercial purposes and was approved as a mixed-use development that would integrate with the surrounding area. It is not expected that further development of the site would substantially injure the value of adjoining or abutting properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** This project was approved as a small-scale, mixed-use development. The

uses proposed under this application are limited to lower impact uses that would be complimentary to the primary use (garden center).

Staff is mainly concerned with the proposed building elevations presented for Phase II-Ace Hardware Store. The original application provided aesthetically pleasing buildings that, although similar in size (square footage) to what is proposed, incorporated distinct architectural elements that visibly reduced the overall appearance of the development making it more compatible and in context with the size of structures found within the neighborhood.

The elevation presented for Phase II, does not appear to meet the intent of Council's original approval of an aesthetically pleasing small-scale, retail development. The proposed elevation displays a box type structure charecteristic of the type of development found primarily along commercial corridors.

The new building (Ace Hardware store) when attached to the existing B. B. Barns retail center and greenhouse will have a total footprint of more than 28,000 square feet. Once constructed, this building will block the view of the distinct architectural characteristics of the B. B. Barns façade when viewed from Rosscraggon Road.

Although the application proposes the use of additional landscaping to soften the scale of the building, staff feels that the exterior building façade should be architecturally enhanced to be more compatible and sensitive to the surrounding neighborhood and to also preserve the "neighborhood-friendly" quality of the development.

Simple architectural elements such as the inclusion of window and door openings, varied rooflines or treatments, or a mix of building materials could assist in visiably reducing the overall mass of the structure.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** This project was initially reviewed under the City's 2010 plan which called for low density residential development, mainly in the areas outside of the City Limit. Existing development patterns, however, included high density residential development in the area.

The ***Asheville City Development Plan 2025*** plan projects Sweeten Creek Road as a Gateway Boulevard where a mix of residential and commercial uses would be suitable for development. The plan emphasizes the need for "compatible" infill development that enhances, protects and preserves the character of existing neighborhoods.

The elevation presented for Phase II, does not appear to meet the intent of Council's original approval of an aesthetically pleasing small-scale retail development. The proposed elevation displays a box type structure charecteristic of the type of development found primarily along commercial corridors. Staff feels that the elevation could be architecturally enhanced to be more compatible with and sensitive to the surrounding neighborhood.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been

reviewed by the City's Technical Review Committee, which found that adequate services and facilities are available for the proposed development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** As required by City Council, a Traffic Impact Analysis (TIA) is being reviewed for this Phase of the development. It is not expected that the TIA will call for major improvements to the site.

Pros

- Further development on the site will provide additional shopping venues that will contribute to the area.

Cons

- Proposed elevation is not in character with the neighborhood.
- Proposed building does not relate to the street.
- Additional landscaping proposed to soften the view of the building from adjoining residential uses could be viewed as isolating the development from the neighborhood.

Staff continues to be in support of the concept of this project and feels that the development can be a positive contribution to the neighborhood and surrounding area. We, however, feel that the building elevation proposed for Phase II (Ace Hardware store) of the project is likely to detract from the character of the neighborhood.

Staff would recommend that the master site plan be approved with the condition that the building elevation be revised to include enhancements such as window and door openings, landscaping applied to the walls of the structure, a deck surrounding the exterior of the building, etc. The intent is to disquise the plain appearance of the proposed metal building, making it more in keeping with the original approval and more compatible with surrounding development.

Mr. John Fisher, architect, spoke in support of the amendment to the conditional use permit and Master Plan outlining in detail the project timeline from October 2000 – January 2006 (Applicant Exhibit 1).

Mr. Ned Gibson, property owner, spoke in support noting how B.B. Barnes has tried to be sensitive to the neighborhood, in addition to building a public greenway on their property. He urged Council to approve the request with limited conditions.

Mr. Barney Bryant, property owner, spoke in support of the project in that they are a small business that will employ up to 30 people.

After rebuttal, Mayor Bellamy closed the public hearing at 7:36 p.m.

Mr. Heard responded to various questions/comments from Council, some being, but are not limited to: where is the buffering on the north side of the property; should Sweeten Creek Road be described as a commercial corridor and what does Planning staff foresee for that Road in the future.

Councilwoman Cape felt this is a very residential area and felt the City needs to be sensitive when we insert commercial into a residential area. She encouraged B.B. Barnes to be residentially-friendly.

52

Councilman Freeborn felt this was the type of commercial project needed in our neighborhoods.

Councilman Newman moved for the adoption of Ordinance No. 3332, amending the conditional use permit and Master Plan for property located at 3377 Sweeten Creek Road. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 378

D. PUBLIC HEARING RELATIVE TO AMEND THE CITY'S 2005 CONSOLIDATED ACTION PLAN

RESOLUTION NO. 06-35 - RESOLUTION AMENDING THE CITY'S 2005 CONSOLIDATED ACTION PLAN

Mayor Bellamy opened the public hearing at 7:45 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a grant request from the Affordable Housing Coalition of Asheville-Buncombe County (AHC) for $15,000 in Community Development Block Grant (CDBG) funds to coordinate implementation to the 10-year Plan to End Homelessness. This public hearing was advertised on February 3 and 10, 2006.

The 10-year Plan to End Homelessness in Asheville and Buncombe County was adopted by both City Council and the County Commission in January 2005. It sets out guiding principles and implementing steps to end chronic homelessness by 2015 and greatly reduce the numbers of other homeless people. The Plan is at www.ashevillenc.gov/planning/homelessness.pdf

The Plan's first recommendation is to designate a lead entity which "will coordinate implementation of the plan and be accountable to the community, homeless service providers, and local government." It identifies AHC as the most suitable agency to take on this role.

Progress under the 10-year plan is being made on several fronts by different agencies, e.g. implementation of the HMIS, construction of new units for the homeless, and grant applications for supportive services. However, other implementing steps have lagged, particularly in the area of linking people to housing and supportive services when they leave institutions, a key to preventing homelessness.

AHC is requesting $15,000 from the City to hire, train, and supervise an appropriately qualified project coordinator to work with service providers on the implementation of the Plan. The County has already committed $15,000 to this project.

AHC's projected outcomes for the first six months would include:

- Local implementation of the HMIS system (currently being rolled out statewide);
- Creation of an Advisory Committee representing key stakeholders;
- Constructing the shared protocols necessary to ensure integration of services;
- Creating relationships with foundations, churches and businesses to help with continued funding;
- Planning future implementation steps, identifying barriers to progress and solutions;
- Reporting progress to the City, County and community.

These steps appear to provide a realistic program of work and AHC has submitted an appropriate budget for the program.

Funds are available to meet this request from unanticipated CDBG loan pay-offs.

A public hearing is required before Council approves a new CDBG program and has been duly advertised to take place at this Council Meeting.

Pro's

- Provides resources and impetus for continuing implementation of the 10-year Plan
- Will lead to creation of new coordinating mechanisms
- Emphasizes City's continued commitment to ending homelessness
- Leverages matching County funds

Con's

- Continued funding in 2006-07 will be more difficult, due to federal CDBG cuts

The Housing and Community Development Committee reviewed the application at its meeting on January 23, 2006, and recommended approval of the grant. Staff concurs in this recommendation.

Mr. Fred English spoke against the action in that foreclosures are happening more frequently.

Mayor Bellamy closed the public hearing at 7:47 p.m.,

Councilman Mumpower agreed that Council needs to do something with our homelessness issue, but we are behaving in a less than responsible manner in reacting to that situation, instead of trying to make meaningful change. He acknowledges that we need a plan, but doesn't think this is the plan. There are better plans out there and we definitely need an intervention facility in this community. He thinks this plan will distract us for some meaningful opportunities to make a difference for the homeless. It will provide housing, but you cannot provide housing for chronic substance abusers without being in great danger of creating an entitlement initiative unless there is some substantial structure to help them address those addictions, and the structure does not realistically exist in this plan.

Councilman Newman said that this concept is taking some of the cutting edge ideas that are effective around the county to meaningfully reduce chronic homelessness. He felt this is a good business model and has the potential to make a real positive reduction in chronic homelessness in Asheville.

Councilman Freeborn asked if we use this money for this particular project, will it impair us for providing other areas that could be significantly more of an investment for us. Ms. Caplan said that the allocation of CDBG funds for the following year will come before Council and you will have the opportunity to approve or amend that plan. At this point we do have money in contingency and it is available for this mid-year request.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-35. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no".

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. CONSIDERATION OF WAIVER OF ONE-YEAR WAITING PERIOD FOR ZONING ACTION ON PROPERTY AT 109 N. LIBERTY STREET

An e-mail has been received by the City Clerk from the property owner on February 14, 2006, requesting continuance of this matter until the February 28, 2006, formal meeting.

Mr. Joe Heard, Development Services Director, said that the owner is attempting to provide documentation to City staff that there were seven units on the property since 1970. If that is the case, then there would be no need to pursue the rezoning because they would be grandfathered in, and there would be no need for Council to consider waiving the one-year waiting period.

Upon inquiry of Councilwoman Cape, Mr. Heard said that the owner was aware of the restriction on the property when it was purchased.

Councilman Mumpower moved to continue this matter until February 28, 2006. This motion was seconded by Councilman Newman and carried on a 4-2, with Vice-Mayor Jones and Councilman Freeborn voting "no".

B. RESOLUTION NO. 06-36 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE JOINDER TO DEED OF TRUST FOR PACK PLACE REFINANCING

City Attorney Bob Oast said that this is the consideration of a resolution authorizing execution of a Ground Lessor's Estoppel Certificate and Amendment to Ground Lease related to refinancing of Pack Place.

The complex of buildings known as Pack Place is the result of redevelopment efforts undertaken by the City in the early 1980's. Part of the complex is occupied by various public or quasi-public uses (Diana Wortham Theatre; Art Museum); some of it is occupied by private interests, including the parking deck garage and the retail uses along Eagle Street. The City owns the land underlying the parking deck and retail uses, and leases it to a developer who, pursuant to a Master Agreement and Master Lease entered into in 1988 (herein "Lease"), is to construct the improvements on the property. Under the Lease, the permanent improvements become the property of the City at the end of the Lease term, which is 99 years. The Lease is non-renewable. During this term, the lessee operates the project and receives the income from it. The City is the "Ground Lessor" or "Lessor," and the developer is the "Tenant" or "Lessee."

It was contemplated from the beginning of this project that the Tenant would require substantial financing for the improvements, and would pledge the improvements (and its interest in the Lease) as security for the financing. Accordingly, the Master Lease contains provisions that require the City, as Lessor, to execute certain documents and provide certain assurances to enable the Tenant to secure financing or refinancing. This is applicable to the garage / retail part of the project.

As noted above, the underlying property belongs to the City, and at the end of the Lease, so will the improvements. With this in mind, the Lease provides that any refinancing will not subject the City to "personal liability" in case of the Tenant's default on the loan (i.e., the City's

assets are not at risk). Since the "security" for the financing in such situations is the leasehold interest (including the right to operate the project), the documents the Landlord typically executes in such situations give the Lender certain substantive rights in the leased premises, such as the right to step in and operate the project, make or complete improvements, market and re-lease the premises, and dispose of insurance proceeds in case of property damage (or compensation in case of condemnation). These documents amount to a third-party agreement, bringing the Lender into the transaction. Such documents also typically include an estoppel certificate, which is essentially a statement that the Tenant is not in default under the lease. In 1988, in order to facilitate the initial financing for the project, the City entered into a "Ground Lessor's Consent and Lease Modification," similar to the documents now under consideration, that implemented many of the third-party rights and considerations described above. These were expressly made as amendments to the Master Lease. The financing at that time was through the Bank of Scotland.

In connection with a proposed refinancing of the project, with Delaware-based Column Financial, Inc. as the Lender, the Tenant, Pack Square Investors II, LLC, has requested the City to enter into a "Ground Lessor's Estoppel Certificate and Amendment to Ground Lease" (herein "Proposed Amendment"). This Proposed Amendment is not substantially different from the document that the Council agreed to in 1988, and is normal in commercial real estate financing transactions of this nature. Essentially, the Lease has already been amended to incorporate most, if not all, of the terms contained in the Proposed Amendment, and Council's agreement to the Proposed Amendment will amount to little, if any, more than allowing a new lender to step into the transaction. Some Council members may remember that this project was refinanced in December of 2004 in connection with its sale to the current owner, and the City joined in the deed of trust in order to facilitate that transaction. Because that financing was not anticipated to be long-term, no documentation other than the deed of trust and estoppel certificate was required. The proposed refinancing with Column Financial is anticipated to be more permanent, and a more comprehensive form of the estoppel from the City is now being requested.

The Proposed Amendment that the City is being asked to enter into will, among other things: (1) require the City to provide notice to the Lender in case of a default by the Tenant, or some other failure to perform obligations under the Lease; (2) allow the Lender to step into the shoes of the Tenant in case of a default; (3) allow the Lender to enter into a new lease with the City in case of a pre-term termination of the Lease; (4) permit the lender to apply the proceeds of any insurance (resulting from damage to the premises) to paying off the loan (this does not relieve the tenant of its responsibility to repair and maintain the premises). The City has the option under the Lease, whenever there is a refinancing, to purchase the premises (buy out the remainder of the Lease by purchasing the improvements). The Proposed Amendment expresses the City's waiver of that option, and I am aware of no interest in exercising it. The Proposed Amendment also contains an estoppel certificate, which is straightforward and similar to the ones that have been issued in the past; by themselves, estoppel certificates do not usually require approval by the Council.

It is important to note again that the revisions to the Lease contained in the Proposed Amendment were already made, in very similar form, in connection with the initial financing in 1988, and do not represent a material change in the City's position with respect to the transaction or the project. In essence, the Proposed Amendment allows a new lender to enter the transaction on the same terms as the previous lender.

Considerations.

- Proposed Amendment does not materially change the City's position from previous financing.
- Proposed amendment is not unusual in transactions of this nature.
- Lease requires City to execute documents as reasonably required to facilitate financing.
- City's assets are not at risk.

- Proposed Amendment gives lender some substantive rights in the transaction.
- Proposed amendment creates some affirmative responsibilities to City to provide notices to Lender.

If Council consents to the estoppel certificate and amendment, adoption of the resolution is recommended.

At the request of Mayor Bellamy, City Attorney Oast said that he would provide Council information on how much is the City paying on debt service on Pack Place and when will it be complete.

When Councilwoman Cape asked if Pack Place pays property tax, City Attorney Oast said that he believed they do pay taxes for the non-public parts.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-36. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 365

C. RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE DOWNTOWN COMMISSION

RESOLUTION APPOINTING MEMBERS TO THE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION

RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE GREENWAY COMMISSION

RESOLUTION APPOINTMENT MEMBERS TO THE PUBLIC ART BOARD

RESOLUTION APPOINTMENT MEMBERS TO THE ASHEVILLE TREE COMMISSION

Due to the absence of Councilman Davis, and at the request of Vice-Mayor Jones, Councilman Mumpower moved to continue all "New Business" appointments until Tuesday, February 28, 2006. This motion was seconded by Vice-Mayor Jones and carried unanimously.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of January 13-26, 2006: Neil Dubois (Transit Services), BellSouth (Water), Shirley Fox (Sanitation), Timothy Cheek (Streets), Kathy Kelley (Streets), Norfolk Southern (Water) and Judy Martin (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English briefly commented about benefits for domestic partners.

Closed Session

At 8:07 p.m., Councilman Mumpower moved to go into closed session for the following reasons:: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The location of the property is Amboy Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, and to consider and give instructions to the attorney concerning the handling or settlement of a claim. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 8:34 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Vice-Mayor Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:34 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – February 21, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

FOLLOW-UP FROM CITY COUNCIL'S RETREAT

Review Draft Action Plan for Council's 6-Month Goals

Assistant City Manager Jeff Richardson reviewed with Council the draft 6-month strategic goals, action items and timeframes as follows: support and move HUB Plan forward; Eagle-Market redevelopment; Riverfront redevelopment; development comprehensive housing opportunities plan; launch Unified Development Ordinance education series; development neighborhood & corridor plans with citizen participation; streamline planning services to spend more time on top priorities; review 2025 Comprehensive Plan, review and implement Downtown Social Issues Task Force recommendations; downtown public restrooms; downtown kiosks; improve/enhance basic City services and customer service; work with regional partners on water service and other regional issues; continue commitment to public safety priorities; create an Environment & Energy Conservation Advisory Committee; reorganize and integrate transportation staff from various City departments; and development public outreach strategy to communicate City Council's strategic goals.

Upon inquiry of Councilman Mumpower, Mr. Richardson said that complaint procedures are a part of the action item under improving/enhancing basic city services and customer service. He said that he would add it as an individual action item.

Councilman Mumpower suggested combining the following three action items, under "continue commitment to public safety priorities" into one: (1) first police academy graduates; (2) second police academy graduates; and (3) third police academy begins. In addition, other general policy discussion was the Police Chief's continued efforts toward community policing and his officers interfacing with neighborhoods in a very intentional way trying to create lines of relationship. Also, our Drug Suppression Unit is operating at less strength now than it was a year ago and the Police Chief has a strong desire to get the Unit up to the level it is funded to where they can maximize their impact on our hard drug interdiction. He wondered if supporting our hard drug interdiction effort should be highlighted in this document.

City Manager Jackson said that this is a specific effort to hit those efforts that the Council wanted to see measurable, visible change in a 6-months period. There is a longer list of longer-term items from Council. Some of the Police Chief's desires call into the longer-term vision category. City staff is preparing to bring the longer-term list to Council at their March worksession.

Councilwoman Cape said that the Economic Development Advisory Committee want to be involved in the riverfront redevelopment dialogue and want to make sure that staff is well aware of the NC DOT Parkway Project that is surfacing around Amboy Road.

When Councilman Newman expressed concern of the amount of staff time involved to address the revisions to the 2025 Plan, Planning & Development Director Scott Shuford said that

he will provide Council with some written background that may be enough to get a more comprehensive direction from Council.

Vice-Mayor Jones suggested rephrasing item no. 2 under "Housing Opportunities" to include accessory apartment funding for the Housing Trust Fund.

Councilman Newman felt that some time urgency items include some of the transportation issues and about how we move forward with some kind of parking project in the downtown.

Upon inquiry of Councilman Newman, City Manager Jackson said that the Civic Center will be added to the 6-month strategic goals.

Community & Education Efforts

Public Information Officer Lauren Bradley said that the purpose of this briefing is to outline action items associated with an outreach plan for increasing citizen awareness and understanding of City Council's Strategic Operating Plan. The intent of the city's outreach is to educate citizens about Asheville's goals and priorities while also involving them in ongoing opportunities for citizen involvement and participation. The plan also addresses communications efforts internal to the organization.

She described the following action items, along with the timeframes for completion: update report and develop campaign message; newspaper insert; web site; cable channel program; bus signs; posters; quarterly updates; group presentations including breakfasts with the Mayor; targeted efforts; boards & commissions assembly; feedback forums and focus groups; citizen academy; intranet posting; and employee orientation and training.

She explained while most action items are low or no cost efforts, some items (including developing a newspaper insert, hosting a boards and commissions assembly and posting bus signs), represent additional, unplanned outreach costs. Two action items, group presentations and the boards and commissions assembly, require the Mayor's and Coty Council's participation. With these considerations in mind, Asheville can achieve greater citizen awareness and opportunities for involvement in the City's Strategic Plan with this organized and enhanced effort. As such, staff recommends that City Council direct staff to work with the City Manager to secure funding in the current budget to proceed with the outreach plan this spring.

Review of Council Committee Structure & Process

Mayor Bellamy said that Council Committees are to be policy review and discussion arms of the City Council, providing an opportunity to explore the implications of policy alternatives and the policy development process; and to serve in an advisory capacity to the Council as a whole in reviewing policy matters referred to them; informing and educating the Council on existing City programs and issues, and other such matters as the committee deems appropriate. In reviewing issues, the committees are expected to anticipate the full range of considerations and concerns related to the various policy questions. When participating on committees, members are expected to temper their role as policy advocates in order to fully evaluate all the alternatives. The City Council Committees shall not become involved in the administration of City government. Each committee has a chairperson and an agenda. She then reviewed the following:

Revenue and Finance Committee

- Fees & Charges
- Debt issues

- Alternative revenue sources

Chair Councilman Newman, Councilman Mumpower and Councilman Freeborn.
Staff is Chief Financial Officer Ben Durant.

►The Revenue and Finance Committee's area of interest includes the annual budget process, capital improvement programming, financial reports, taxes, fees, assessments and infrastructure finance.

Public Safety

- Community relations & accountability
- Intergovernmental Relations
- Performance standards & professionalism, innovation/best practices
- Diversity

Chair Councilman Mumpower, Councilman Davis and Councilman Freeborn.
Staff is Assistant City Manager Jeff Richardson

►To recommend public safety policy direction in areas of interest including: police, fire, EMS, and emergency management services. Matters relating to the illegal use and possession of narcotics and drugs, intergovernmental relations, cooperation with law enforcement and fire and rescue, and emergency management agencies, as well as educational and research organizations, involved with control and prevention of illegal traffic in and use of narcotics and drugs.

Housing & Neighborhood Development

- Programs & incentives
- CDBG
- Outside agency grants

Chair Vice-Mayor Jones, Councilwoman Cape and Councilman Newman
Staff is Assistant City Manager Jeff Richardson.

►To enhance the quality of life in Asheville and the livability of neighborhoods by providing policy recommendations to Council on all matters relating to the creation and maintenance of housing within the City, including public housing and affordable private housing; all matters relating to the alleviation of homelessness and services provided to homeless individuals within the City.

Planning & Economic Development

- Planning & land use
- Annexation
- Design Standards
- Public/private partnerships
- Transportation

Chair is Councilman Davis, Vice-Mayor Jones and Councilwoman Cape
Staff is City Manager Gary Jackson

►To recommend policies to support our long-range vision and comprehensive planning goals. Areas of focus include: develop policies to enhance employability of Asheville residents, master planning of land uses, transportation, etc., development policies and processes, building codes

and development standards, annexation policies/goals/ objectives, economic development strategies and incentive policies (HUB).

Discussion occurred regarding topics slated for each Committee, resulting that the outside agency grants will be moved from the Housing & Neighborhood Development Committee to the Revenue & Finance Committee. Councilwoman Jones felt it might be good to explore outside agency grants under the Revenue & Finance Committee this year and then revisit it to see if it should go to the Housing & Neighborhood Development Committee next year.

After discussion, Mayor Bellamy removed neighborhood plans from the Housing & Neighborhood Development Committee into the Planning & Economic Development Committee.

Mayor Bellamy's recommendation was that the committees establish a regular meeting time and place and meet once a month. The monthly worksessions will include a standing item for committee chairs to report on their activities and plans. This will allow Council members who are not on a committee to receive periodic updates and to provide input about timing and other process concerns. In addition, minutes of the meetings will need to be prepared and distributed following each meeting. Her preference would be for the committees to establish a six to twelve month work plan at their initial meetings. This would establish a plan of action and schedule for addressing key issues. The work plans could then be reported at the subsequent full Council worksession, and all Council members may offer input.

Upon inquiry of Councilman Mumpower about intergovernmental relations, Mayor Bellamy explained she envisioned that in terms of how we can best make sure that we are working with other organizations to ensure our community is safe. It is specifically from a public safety standpoint.

Councilwoman Cape was interested in getting a more managed sense of our emergency planning.

At the request of Vice Mayor Jones, it was the consensus of Council to rename the Housing & Neighborhood Development Committee to the Housing & Community Development Committee.

Review Process for Council Additions to Agenda

Discussion surrounded ways to let Council know of upcoming agenda items prior to the Friday before the Tuesday meeting and the process for Council to add items to the agendas. As a result of that discussion, Mayor Bellamy asked Council members to notify her when they wanted to add an item to an agenda, but to leave it to her discretion on which agenda the item would be placed.

2006-07 BUDGET PLANNING

Update on the Financial Forecast

Chief Financial Officer Ben Durant updated City Council on the current status of the budget and financial forecast.

***Budget Status*:** Based on departmental revenue and expenditure estimates, the Fiscal Year 2006-2007 projected budget is currently out of balance by **$2.43 million,** which reflects a structural imbalance between revenues & expenditures created by termination of the water agreement. This figure represents staff's estimates of the cost to continue existing programs and services. It does not include any new or enhanced services related to new strategic initiatives.

Revenue Assumptions: Overall, general fund revenues are projected to grow by less than one percent. This lack of growth in the overall revenue base is the result of the following factors:

1) Removal of $1.2 million in one-time land sale proceeds from next year's revenue base.

2) Net loss of $952,300 in intergovernmental revenue due to General Assembly actions prohibiting the transfer of water fund revenue to the general fund.

3) Removal of $707,132 in appropriated fund balance from the revenue base.

The projected budget also assumes adoption of a revenue neutral property tax rate. This means that the tax rate will be adjusted downward to produce the same revenue (plus normal growth) on higher valued property as was generated by the higher tax rate on lower values prior to revaluation. An exact revenue tax rate will be determined once final revaluation numbers are provided by Buncombe County. Staff is analyzing the impact of revaluation on different parts of the City and will bring that information to Council in the upcoming weeks.

Sales Tax Revenue. Sales tax revenues are distributed in Buncombe County using the *property tax formula*. The dollar amounts of property taxes levied by the County and each city in the county are added together. The proportion of the total levy that each unit bears in relation to the total amount establishes the proportion of total countywide sales tax revenue that is distributed to each unit.

In 1994, Asheville's proportion of the total county-wide property tax levy was **22.12%.** Thus, Asheville at that time received 22.12% of the total count-wide sales tax revenue.

Over the 12-year period, the County's tax base growth has outpaced the City's. As a result, Asheville now makes up **21.47%** of the total countywide property tax levy, (less than in 1994) and consequently receives 21.47% of the total countywide sales tax revenue. If Asheville were currently receiving the same percentage of the levy that it received in 1994, the city would receive an estimated **$450,000** in additional sales tax revenue in FY 2006.

The City's property tax base relative to the County's and its impact on sales tax revenue has important implications for growth and tax rate policies that should be considered in evaluating the overall City budget.

Expenditure Assumptions: The projected budget includes an average three percent merit increase for all employees, plus a one-percent cost of living adjustment. Salaries are currently budgeted at 100% of cost, with no allowances made for attrition savings. Overall, salaries are projected to grow by **4.26%** due to the merit and cost of living package and other salary adjustments.

The overall operating budget for the general fund is projected to increase by **6.68%** due primarily to normal inflationary increase plus unavoidable cost increases in the area of fuel, natural gas and construction materials.

Debt Service costs are decreasing slightly due to the retirement of some debt and capital reserve costs are showing a **2.95%** increase due to funding several planned capital projects and vehicle replacements.

City staff recommends City Council review key financial trend information to serve as a guide in the upcoming policy discussions regarding the property tax rate and the budget. Ben –

In response to Mayor Bellamy's question about a tax rate for City residents that include the recycling fee, stormwater fee and water CIP fee, Mr. Durant said that that will be part of the internal management review. Staff will be looking at various options, e.g., ways to enhance revenues and ways to restructure the budget so that the beneficiaries of the service are paying for the cost as opposed to the general public that may not be receiving those services.

Councilwoman Cape noted that at least property taxes can be deducted, but extra fees cannot.

Mr. Durant responded to a question from Councilwoman Cape about sales tax.

Status of Compensation Study

Human Resources Director Belinda Odom said that per City Council direction, the Human Resources Department has been working over the last several months in conjunction with Fox Lawson and Associates, a compensation consulting firm. This work will culminate in the presentation of a compensation policy analysis and recommendations to City Council on March 21, 2006. Specifically: Salary surveys and analysis has been compiled; City of Asheville current compensation policies and practices have been studied by the consulting firm; Department Director's have communicated their specific compensation challenges directly to the consulting firm; Employee focus groups were conducted, gathering input from employees across all departments and levels in the organization. This information was shared with the consulting firm; Draft organizational recommendations are currently being reviewed by Human Resources and the City Manager's office; and additional work is being completed by the consulting firm currently in preparation for their presentation to Council on March 21, 2006.

In response to Vice-Mayor Jones, Ms. Odom said that the consultant will have recommendations that are non-monetary and will also give Council some options and within each option will be associated fees.

Upon inquiry of Mayor Bellamy, Ms. Odom said that this study will take into consideration the request from the Police and Fire Departments.

Direction for Additional Budget Worksession Topics

Chief Financial Officer Ben Durant said that he recommends that during worksessions in March and April, Council consider and include the following key issues on their agenda: March - Overview of the current Compensation Plan; and Transit/Parking Fund. April - Growth Issues; Planning Department Staffing; Parks & Recreation (financial status of new facilities); and Festivals Fund.

FURTHER CONSIDERATION OF WATER UTILITY ISSUES

Financial Management Policies

Chief Financial Officer Ben Durant said that the purpose of this report is to recommend key financial management policies to guide the financial management of the City's Water System.

1) Financial Position: It the City of Asheville's goal to improve the financial position of the Water System in order to meet or exceed the average financial performance of water systems in North Carolina cities with populations over 50,000. He showed a chart showing currently, Asheville's financial performance and how it compares with its peer cities in the areas of current ratio; net income as percent of revenue; days cash on hand; and debt to equity ratio.

2) Debt Issuance: The City of Asheville will use debt financing for major improvements projects and pay-as-you-go funding for smaller repairs and refurbishment.

3) Cash Reserve Policy: The City of Asheville will have a target cash reserve range between $11.8 and $16 million over the next six years. This range is based on having reserves equivalent to three months of estimated maintenance and operating costs, plus one-year's worth of annual pay-as-you-go capital funding.

City staff recommends City Council adopt the aforementioned policies with adoption of the Fiscal Year 2006-2007 annual operating budget and capital improvements program.

Mr. Durant responded to several questions/comments from Council, some being, but are not limited to: what is meant by current ratio; is cash on hand different from cash revenue; does debt to equity ratio include the recent refunding and how will that impact the ratio; do you anticipate bonds being issued; how much cash on hand and investments does the Water Enterprise Fund contain; what is the amount we need to maintain in the Enterprise Fund; and what criteria does the Local Government Commission use in determining how much we should have in the Enterprise Fund.

Upon inquiry of Mayor Bellamy, Mr. Durant said that he would provide Council with information on the recent refunding of bonds.

Mayor Bellamy would like to see some policies created around cost-sharing maybe over a 5-year period with developers when they develop within the City limits.

Discuss Next Steps for Rate Analysis

Water Resources Director David Hanks said that City staff continues to review and refine water rate analysis in an effort to advise city council on all relevant variables pertaining to rate structure and CIP needs, so as to provide for the long term viability of the water system.

Based on City Council's January 31, 2006, special public meeting to further discuss the future of the water system, city staff continues to work on the following items:

- Analysis of residential and commercial water rate structure
- Analysis of CIP needs and set aside CIP fee
- Analysis of wholesale water contracts
- Analysis of rate policies and incentives to encourage smart growth and economic development
- Analysis of minimum usage rate (water as a basic human right)
- Analysis of water line extension policies

Staff recommends City Council consider directing City staff to take water rate analysis through the City Council's Revenue and Finance Committee at the March, 2006 regularly scheduled meeting.

Councilman Mumpower said that there is some indication that under the proposed rate structure that there might be some potential to reduce water rates for some customers. One discussion is about the minimum usage rate that encourage conservation, but more importantly provides fixed income people an opportunity to control their water rate by controlling usage. He personally feels strongly about that. However, he does have a concern about going to a new rate structure to increase rates for commercial customers. There was some hint that we might be able to, if we went to that system, reduce rates broadly for City residences. At a time when our system

is struggling for dollars and infrastructure, that this might be a great time to say that we want to find ways to hold the line and certainly address the fairness issue and rate differential issue between the County and the City. But, to set up a policy that provides for dramatic rate reductions across the board for a large percentage of City residents at this time, with the weaknesses in our infrastructure and the need for regular dollars, he would discourage that. The new rate structure may make sense, but this is not a time to create false hopes or illusions or to step back from our revenue picture.

There was discussion from Council about the uniform rate structure, an analysis of the Water Department's operational fund for an emergency situation, and an analysis of the MSD charge being separated from the City's water bill.

At the request of Mayor Bellamy, Mr. Hanks said that he would obtain information on MSD's rate structure from when they first took over the system to the present. Vice-Mayor Jones said that she is open to taking the MSD charge off of the City's water bill.

At 4:53 p.m., Mayor Bellamy announced a short recess.

FEDERAL LEGISLATIVE PROGRAM

Review Priorities & Discuss Lobbying Effort

Economic Development Director Sam Powers said that this report provides a summary of six potential federal funding requests for submittal to congressional staff for possible inclusion in Fiscal Year 2007 appropriations bills, as well as a request for federal legislation dealing with federal appropriations to the city's transit system.

Over the past three years Congressman Taylor, Senator Burr, and Senator Dole have been successful in helping the City receive over $5 million in appropriations to fund city transit bus acquisition, drug interdiction, parks improvements, river redevelopment, and pedestrian improvements. The City had utilized a Washington, DC firm, Ball Janik LLP, to assist the city in providing the necessary project information to congressional staffers to include in the many federal appropriations bills. Ball Janik also provided advice and counsel in matters of federal legislation affecting the City. The city did not renew its contract with Ball Janik when it expired in 2005. Fiscal Year 2007 appropriations/legislative requests are currently being developed and the City needs to submit any requests for potential federal assistance to congressional staff by March 1, 2006. Additionally the WNC Caucus, a coalition of local governments, educational institutions, and COG's submit collective funding requests on behalf of regional entities in the 25 counties of the caucus service area.

City staff has identified seven projects as potential submissions for assistance: Bus Acquisition Pilot Project, Green Building Fire Station, Traffic Signal Preemption, Driving & Firearms Simulator and Driving Range Upgrade, Thomas Wolfe Project, Reid Center, and Public Service Radio Improvements. Additionally, staff has indicated a desire to have current legislation affecting transit funding allocations to the city changed from its current status. He reviewed the project descriptions for each of the seven projects.

Staff is seeking policy recommendations on the seven projects and potential legislation, to be in position to submit to congressional staff and the WNC Caucus by March 1st. Additionally, staff recommends reconsideration of the contract with Ball Janik LLP, to provide representation to the City on the appropriations/legislative requests selected by Council.

Councilman Newman was not supportive of the Thomas Wolfe Cabin restoration. He felt the project budget was too high. Superintendent of Parks Jim Orr explained what is included in the Thomas Wolfe Project.

When Councilman Newman inquired about detailed plans for the "green" building fire station enhancements, City Manager Jackson responded that as we move forward staff will provide Council with a more detailed fact sheet.

Upon inquiry of Councilman Newman, Superintendent of Parks Jim Orr said that there was some interest from the original grouping of people they spoke with from the state and federal government that the Reid Center was a possible option.

Councilman Mumpower raised several concerns about our legislative requests. At a time of extraordinary deficits at our federal level, he had a hard time with asking for federal appropriations. He said the Reid Center does need some improvements, but questioned the high project budget. He has a concern about the need for two hybrid buses. He felt this would be a time for core enhancements, not things that would be nice, good or desirable. A green building for our fire station would be nice. He personally would feel comfortable with the firing range upgrade, but he has questions about the driving & firearms simulator. He believes an upgrade to our public safety radio system makes sense, but is the project budget is extraordinarily high. No doubt the Thomas Wolfe Cabin needs work, but again, with our unprecedented federal deficits he could not support that request. He would support the transit system classification.

Councilwoman Cape felt that if you look at the list of federal appropriations, Asheville is pretty low in list of money coming back to our community. She felt it is crucial that we ask for some of these things as a unified body. To ask for some of the federal money that we spend in federal taxes to come back to our community is really reasonable to do. She didn't want Council to see this as a hand-out but as a hand-back for some of the things that we are trying to do for our community and that is very broad. In terms of the green fire station, we have to start building more energy efficiently in order that we can save costs in the future.

Vice-Mayor Jones was overall supportive of most of the requests, except for the Thomas Wolfe Cabin. She felt this is not really asking for any dollars, but a fairness issue. She did hope that Council will do some prioritization of these requests. Her first priority would be the transit system classification.

Councilman Newman explained why he felt that the transit system classification should be the number one priority of Council.

Councilman Davis spoke in support of keeping the Thomas Wolfe Cabin restoration as a legislative request. He felt Council would be making a terrible mistake to not at least try to save the house as it is a significant piece of our community.

Upon inquiry of Councilwoman Cape, Mr. Powers said that staff has identified projects that they believe will fit into one of the different appropriation bills and it would be a policy decision on how many projects should be submitted.

Discussion then surrounded reconsideration of the contract with Ball Janik LLP, to provide representation to the City on the appropriations/legislative requests selected by Council. Mr. Powers felt this is not a replacement for interaction with our elected officials, but gives us the ability to add value to what the Ball-Janik staff does.

When Councilwoman Cape asked how much money came back to our community that was directly related to Ball Janik's efforts, Mr. Powers said over the past three years, it was over $5 Million, of which $4 Million was for Pack Square.

Councilman Mumpower felt it was deceptive to give Ball Janik accountability for the $5 Million. Four million was developed by Congressman Taylor and his staff very intentionally. They went after that without any involvement in substance from our lobbyists. In addition, the $350,000 for Memorial Stadium was pushed by Congressman Taylor and Senator Burr. He could not support spending $60,000 for a buffer between Council and the elected officials.

Vice-Mayor Jones and Councilman Newman both supported contracting with Ball Janik, but on a very focused outcome for the transit legislation.

Upon inquiry of Councilman Davis, Mr. Powers said that he would contact Ball Janik to see what the contract price would be for a limited scope contract and/or for other legislative items.

Mayor Bellamy said that this matter will be brought forward to Council at their next formal meeting to decide which, if any, items should go forward on the legislative agenda, along with consideration of a contract with Ball Janik for legal representation.

ASHEVILLE DRUG COMMISSION HIGHLIGHTS

Councilman Mumpower reported to Council the progress of the Asheville Drug Commission. Their priorities are learning, focusing, acting together on our hard drug issues. They have active action committees on education, treatment, enforcement, judicial reform and other issues. He explained some of their current activities, including: (1) a "Judicial Reform" Seminar on March 28, which will allow leaders an opportunity to see the difficulties faced by our judicial system; (2) a "Best Drug Interdiction Practices" Seminar also on March 28; (3) the Drug Reward Program intended to go after middle and upper level hard drug dealers. The Reward Program has been modified to now include a $500 reward for the arrest of a dealer with 2 oz. or more and a $2,000 reward for the arrest of a dealer with 1 or more lbs. of crack or meth; and (4) the Find a Better Way Monthly Poster Series, which is an education effort to say Asheville and Buncombe County are fighting back against our hard drug problem and to limit the number of new recruits as dealers and users. He showed Council the 3 posters for this year noting they will be distributed in convenient stores, public housing, restaurants, schools, etc. He thanked the Jeff Goss Agency for assisting with the posters and for the Citizen-Times for printing the posters. They will be persistent and tenacious in fighting hard drugs in Asheville and Buncombe County, and try to help our neighbors across the state do the same thing.

Councilman Mumpower responded to various questions/comments from Council, some being but are not limited to: how successful has the Reward Program been to date; what safety measures are there for people who turn in dealers; and how is this Commission tied into other efforts of Council, e.g., panhandling, graffiti, chronic homeless.

Mayor Bellamy suggested one way Council can partner with the Drug Commission's endeavor is through the Council's Public Safety Committee. She also suggested smaller hand posters that would enable her to hand out when she visits schools.

At 5:52 p.m., Mayor Bellamy announced a short recess.

RESOLUTION NO. 06-37 – RESOLUTION AMENDING POLICY GOVERNING CITY COUNCIL APPOINTMENTS

Vice-Mayor Jones said that Boards and Commissions Committee reviewed the rules on boards and commissions. They basically made the rules reflect what Council is already doing, with some expansions. She reaffirmed (1) the rule that appointees to boards and commissions shall be residents of the City of Asheville, unless otherwise specified or provided for by law, ordinance, or Council action establishing said board or commission ...; (2) that efforts are made to represent the diversity that we have in our community ....; and (3) reappointment to a second term is not automatic and will be based on circumstances to be determined by City Council in each individual case. The Committee brought forward a new qualification (which Committee members have differing opinions) which is "In matters where a board has independent governing authority (by law, by agreement, or other enabling authority), and where not prohibited by law, at least one of the City's appointees shall be a current member of the City Council. Such an appointment allows Council to be a part of deliberation and decision-making on matters of regional importance that impact the City of Asheville." She asked that Council waive the rules and take action at this meeting.

Councilman Mumpower spoke against waiving the rules and taking action at this meeting. Since some of the changes do have substance, he felt action should be taken at a formal meeting allowing for public comment. He questioned how crucial it is to have a City Council member on some of the boards and commissions; however, he doesn't have a strong resistance to the new amendment. He is concerned though about adopting the new language and applying it to existing members of our boards and commissions. Those existing members came in with an effort to serve and to use this component to remove them and put a Council member on is discourteous and disrespectful.

Councilwoman Cape has reviewed the minutes of June 15, 2004, and felt it was clear that it was the consensus of Council to have a City Council member on the Airport Authority.

Vice-Mayor Jones said that the ABC Board appointment of former Mayor Worley is different than the appointment of former Councilman Dunn to the Airport Authority, in that Council knew Mayor Worley was not going to be on Council anymore.

Councilman Davis had no problem with the new amendment, but takes exception with making it retroactive.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved to waive the rules and take formal action on amending the Rules on Boards and Commissions. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilwoman Cape moved to adopt Resolution No. 06-37. This motion was seconded by Councilman Newman.

After discussion initiated by Mayor Bellamy about which boards the amendment would apply, Mayor Bellamy suggested an amendment to the new language to read as follows: "in matters where a governmental board has independent governing authority ...).

Councilwoman Cape and Councilman Newman accepted the amendment.

Ms. Leslee Kulba encouraged City Council to not make this action apply to existing members.

The amended motion made by Councilwoman Cape and seconded by Councilman Newman carried on a 5-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 366

RESOLUTION NO. 06-38 – RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Vice-Mayor Jones said that in Resolution No. 04-142 appointing former Councilman Joe Dunn to the Airport Authority, it specifically states that "City Council wishes to appoint a member of the City Council to the Airport Authority to ensure that the City's interests, as expressed through the Council, are represented on the Authority, and Councilman Dunn is currently a member of the City Council." She felt that at the time the resolution was adopted, former Councilman Dunn was aware of Council's wishes.

Councilman Newman moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Cape.

Councilman Mumpower disagreed in that the minutes do not reflect a policy decision change. In terms of the resolution, it does not state anything about removing the Council member. He urged Council not to remove former Councilman Dunn from the Airport Authority, noting that Council has never removed a Council member in the past.

Councilman Newman moved that in order to be consistent with our past and current policies that we replace former Councilman Joe Dunn with a current member of City Council on the Airport Authority. This motion was seconded by Councilwoman Cape.

Ms. Leslee Kulba urged City Council to not take formal action at a worksession and to allow public comment at a formal meeting.

Vice-Mayor Jones said it was unfortunate that Council is focusing this issue on former Councilman Joe Dunn. She stated the action now is to have a Council voice on the Airport Authority, not so much as removing someone.

Mayor Bellamy was interesting in serving on the Airport Authority, but asked for Council to delay action until June 30, 2006, when there will be two opportunities for appointment.

Councilman Dunn supported the delay in appointment.

The motion made by Councilman Newman and seconded by Councilwoman Cape to replace former Councilman Dunn with a current member of City Council on the Airport Authority, and seconded by Councilwoman Cape carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn, Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

When Councilman Newman moved to appoint Mayor Bellamy to the Airport Authority, she declined and he withdrew his motion.

Councilman Newman moved to appoint Councilman Freeborn to the Airport Authority. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Vice-Mayor

Jones, Councilwoman Cape, Councilman Freeborn, Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 - PAGE 371

GREEN-BUILDING & GREEN ENERGY ISSUES

Public Works Director Mark Combs said that in a February 7th email to the Mayor, Councilwoman Cape provided six key questions related to green building and energy issues for discussion at this worksession.

To facilitate the upcoming Council discussion, staff listed each question and provided historic, background or discussion points for your review.

Question 1: What activities has the City implemented, or is planning to implement, to encourage energy savings in municipal buildings?

- In 1996 an energy audit was conducted by reviewing the City's electrical billing rate and adjusting the structure (to save money).
  - The audit found that the City was paying a very high commercial rate
  - The City successfully negotiated a lower corporate rate which resulted in an annual savings of $20,000.

- In 1999, the City collaborated with Land of Sky Regional Council (Waste Reduction Partners) to produce an environmental sustainability report for City buildings such as City Hall, Municipal Building, Public Works, Fleet and many smaller facilities. Staff implemented:
  - Fluorescent lighting with electron ballasts and T8 lamps were installed for an annual savings of $12,000;
  - Uniform temperature settings were established for buildings;
  - Regular HVAC maintenance (filter replacements, etc) for higher efficiency; which resulted in $10,000 annual savings
  - Flush-valve adjustments on routine basis for $1,000 in annual savings;
  - Replacement of thermostats which more efficiently control heating and cooling
  - Fleet Management spent $26,000 on high efficiency lighting.

  Other recommendations from Waste Reduction Partners will require capital resources. $185,000 has been proposed in the FY 06-07 budget to fund these projects.

Question 2: What has the City implemented, or is planning to implement, regarding clean vehicles and use of cleaner fuels?

- In 2000, City Council adopted an Alternative Fueled Vehicle (AFV) Policy "...to consider and alternative fuel vehicle program for public fleets... in promoting cleaner air..."

- With the co-sponsorship from Missions Hospitals, Inc. and Buncombe County, in December 2000 the City applied for a mobile source emission grant to construct a fast-fill compressed natural gas (CNG) fueling station.

- In 2003 the State awarded $400,000 for the construction of the CNG Station (completed in November, 2005).
  - There will be eight (8) CNG vehicles in operation by March 2006.

- Other AFV's include:
  - 5 GEM Electric vehicles
  - 5 Ford Escape Hybrids
  - 3 electric (replaced gas units) service equipment
  - Since the implementation of the policy, City Departments have to date downsized 70 vehicles with smaller vehicles

- Administrative Policy (July, 2004) "New and Replacement of Fleet Vehicles and Equipment states:

  1.3 The Fleet should be sized for optimal use;
  1.7 The City is committed to the use of alternative fuel vehicles and will evaluate their use for vehicle replacement.

- Since the implementation of the Policy, to date City Departments have 'down-sized' 70 vehicles in the fleet.

- For the FY 06-07 Capital Improvement budget, staff has identified 16 AFC's for potential purchase. Incremental costs for such vehicles will be approximately $135,000 more than conventional vehicles.

Fuels

- The City currently purchases low-sulphur diesel and gasoline via State Contract.

- Ultra-low-sulphur diesel fuel will be mandated for all users in January, 2007.

- The City currently owns and operates a fast-fill CNG Station
  - CNG is "...the pathway to hydrogen technology" and fuel cells
  - Natural gas is produced domestically, is less expensive than gasoline (currently) and is ultra-clean

- Bio-diesel was evaluated in 2004 for potential use
  - Higher costs were the primary consideration (for not implementing)
    - Additional costs (Transit only): $39,000/yr.
    - Outside Agencies (MSJ, others): $14,500/yr.
    - Other City Departments: $42,700/yr.
  - Staff has focused financial resources for CNG and hybrid vehicles (incremental costs = 25%)
  - 35% of City and 53% of outside vehicles are 1993 and older. Bio-diesel fuel can cause seal failures in older engines.

- Staff continually evaluates new and emerging AFV technology developments for feasibility in emergency/service-based fleet operations.

Question 3: How can Asheville follow-up on the Mayor's resolution regarding global warming?

- Former Mayor Charles Worley signed a "Mayors Climate Protection Agreement" at a U.S. Conference of Mayors event in October 2005. The resolution is related to the 'Kyoto Protocol' which is a February 2005 international agreement to address climate disruption. The goal is to reduce emissions 7% below 1990 levels by 2012.

  The resolution listed the following measures to reduce warming pollutants:

- Reduced energy bills
- Green space preservation
- Air quality improvements
- Reduced traffic congestion
- Improved transportation choices
- Economic development/job creation through new energy technologies

The resolution is based on the International Council for Local Environmental Initiatives (ICLEA) 'Cities for Climate Protection Campaign' (CCP). The term 'Cool Cities' is used by the Sierra Club to describe this initiative.

Initiating a comprehensive CCP campaign would require the cooperative efforts of surrounding local governments, clean air agencies, and allied organization, industry and the public at-large. The ICLEA provides extensive detailed implementation strategies.

Question 4: What are policy options to assure future municipal buildings are constructed or renovated using green building and energy saving practices?

- City Council has the authority to adopt such policies as long as they do not conflict with applicable building code standards on any of the General Statutes regarding building construction or renovations.

Question 5: Are the City's policies regarding purchase of clean vehicles and clean fuels up to date?

- Yes. City Staff is an active member of the Clean Air Campaign and stay up to date on current and emerging technology. Because the City provides crucial public safety and sanitary services to the community, new and emerging technology must be ultra-reliable, be repairable in a short time, have a redundant fuel source and be cost effective.

Question 6: Are there opportunities to incentivize green building in the private sector?

- Yes. The Planning Department identified four strategies which might work in this community.
  1. Promote public education through:
  a) Architects, builders, developers, contractors and general public about benefits of green building;
  b) Recognition process to celebrate green building successes;
  c) The City's website; and,
  d) Brochures and printed materials.
  2. Educate and train Building Safety and plan reviewer staff to be "ambassadors" to green building.
  3. Eliminate disincentives for green building materials and practices via City codes and development review processes.
  4. Promote green building concepts via smart growth planning practices.

Councilman Newman asked if there any analysis that looks at if we spend the money now to implement the energy saving things, how that will affect our future utility bills. Mr. Combs said that he would provide that information to Council.

Councilman Newman would be supportive of the City investing more in the near-term and in a more comprehensive way to implement energy saving retrofits for our City buildings. In addition, attention should be given to construction of new City buildings as well.

Councilwoman Cape questioned if there are some partnerships we can make that help us make the decision about what kind of savings we can realize with implementing energy saving measures.

Councilman Newman felt the City should take a leadership role in green building and would support adopting a policy that says if the City is constructing a new building that we will make it a priority to use green building practices.

City Manager Jackson agreed that the City should be a leader in that area. If we have the opportunity, it's affordable and the Council funds it, we should hire qualified architects that have the experience and skills to lead us in that direction.

Mayor Bellamy said it was important for her to get a comprehensive package on the costs associated with green building.

Councilwoman Cape would like a range of opportunities for green buildings as well. There are a lot of incremental things we can do that will allow us to be more responsible energy users. She asked for information on how we can step in this progressively and how do we make adjustments that are realistic to our budget.

Councilman Mumpower said that there are times when green building can make sense, but it is extremely expensive and hoped that Council is very measured about exploring ideas.

Councilman Newman felt that another public policy aspect is how Asheville can follow-up on former Mayor Worley's resolution on climate protection. He questioned how Asheville can continue to be a voice for that solution.

City Manager Jackson said that Asheville has begun planning for some sort of environmental management plan. Asheville has been involved with the Regional Council of Government in promoting cleaner vehicles and promoting the CNG fueling station. It is those kinds of projects that will make our region and our community a leader in what is a real international threat. He felt that participating in an intergovernmental solution is the ultimate answer.

Councilman Freeborn felt this was a good direction for Council to proceed, noting that green building isn't necessarily cost prohibitive.

CLOSED SESSION

At 7:12 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville and the State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To consider the qualifications, competence, performance, character, fitness, conditions of appointment, or initial employment of an individual prospective public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Councilman Freeborn and carried unanimously.

At 10:02 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

74

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:02 p.m.

Magdalen Bourisson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – February 28, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Color Guard from Charles D. Owen High School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 14, 2006, AND THE WORKSESSION HELD ON FEBRUARY 21, 2006**

B. **RESOLUTION NO. 06-40 - RESOLUTION AUTHORIZING THE METROPOLITAN SEWERAGE DISTRICT TO MAKE IMPROVEMENTS ON A SANITARY SEWER LINE AND ASSOCIATED MANHOLES WITHIN ROGER FARMER PARK IN WEST ASHEVILLE AND GRANTING A PERMANENT ASSOCIATED EASEMENT**

Summary: The consideration of a resolution authorizing the Metropolitan Sewerage District ("MSD") to make improvements on a sanitary sewer line and associated manholes within Roger Farmer Park in West Asheville and granting a permanent associated easement.

During the past six months the MSD has been working with the City of Asheville regarding a sanitary sewer project within Roger Farmer Park. The current line is located in the left field portion of the middle baseball field within this park. MSD would like to improve this line that is in disrepair with minimum impact to the property and its programmed activities. Staff is in accord with the improvements and the construction timeframe prior to the baseball season.

Pros:

- The development of this project would greatly benefit the health and well being of the community the system serves.

Cons

- A portion of the ballfield will be temporarily unavailable during the winter months.

The Parks and Recreation Department staff recommends the approval of the improvements as proposed by the Metropolitan Sewerage District in Roger Farmer Park along with the associated permanent easement.

RESOLUTION BOOK NO. 29 – PAGE 373

C. RESOLUTION NO. 06-41 - RESOLUTION AUTHORIZING THE METROPOLITAN SEWERAGE DISTRICT TO MAKE IMPROVEMENTS ON A SANITARY SEWER LINE AND ASSOCIATED MANHOLES WITHIN WEST ASHEVILLE PARK AND GRANTING A PERMANENT ASSOCIATED EASEMENT

Summary: The consideration of a resolution authorizing the Metropolitan Sewerage District ("MSD") to make improvements on a sanitary sewer line and associated manholes at West Asheville Park and granting a permanent associated easement.

During the past six months the MSD has been working with the City of Asheville regarding a sanitary sewer project within West Asheville Park. The current line is located in the right field portion of the baseball field within this park and within lawn areas to the south. MSD would like to improve this line that is in disrepair with minimum impact to the property and its programmed activities. Staff is in accord with the improvements and the construction timeframe prior to the baseball season.

Pros:

- The development of this project would greatly benefit the health and well being of the community the system serves.

Cons

- A portion of the ballfield will be temporarily unavailable during the winter months.

The Parks and Recreation Department staff recommends the approval of the improvements as proposed by the Metropolitan Sewerage District in West Asheville Park along with the associated permanent easement.

RESOLUTION BOOK NO. 29 – PAGE 374

D. ORDINANCE NO. 3333 - BUDGET AMENDMENT TO ACCOMMODATE CONTRIBUTIONS TO THE TOP-A-STOP PROGRAM

Summary: The consideration of a budget amendment, in the amount of $3,025, to accommodate contributions to the Top-a-Stop program.

The Asheville Transit System has received contributions from the Committee to Re-Elect Dr. Carl Mumpower for the Top-a-Stop program. The program consists of creating topped stops such as the one below for the benefit of transit riders. Although the labor is voluntary, some materials may need to be purchased and a contribution has been made to the city to help defray any costs that might be incurred in the implementation of this program. These might also include modifications to plans or contracting for footers. A budget amendment is sought in order to receive these funds.

This action complies with the City Council Strategic Operating Plan in Goal 2, Objective A, Task #2: Leverage outside funding to achieve multiple Transportation goals where possible.

Pros:

- Increased shelter for citizens and riders
- Increased number of shelters at no significant expense to the city.

Cons:

- None

City staff recommends City Council amend the budget to accept the tendered contribution.

ORDINANCE BOOK NO. 22 – PAGE 383

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT OAK PARK ROAD AND SKYVIEW ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL ZONING TO PERMIT CONSTRUCTION OF TWO DUPLEX BUILDINGS AND THREE SINGLE-FAMILY HOMES

Urban Planner Shannon Tuch said that on February 14, 2006, the Asheville City Council voted to continue consideration of the Oak Park residential development project due to some conflicting calculations required for the appropriate application of the Hillside Development Standards. Consideration of this proposal was continued to the February 28, 2006, meeting, allowing the applicant due time to:

- Obtain more detailed and accurate digital survey information
- Allow a licensed civil engineer to re-calculate the average natural slope (using digital information)
- Have staff verify the calculations provided by the civil engineer

In the intervening week, the engineer for the project, Mr. Mike Lovoy, P.E., was able to obtain an electronic version of the most up-to-date survey information for the properties in questions and did re-calculate the average natural slope. The results of this analysis revealed an average natural slope of 30.6%. The chart used to calculate density is very sensitive and even a very small difference in average natural slope can make a significant difference in allowable density. Although this number is very close to the previously considered 30% discussed at the February 14th public hearing, it is not sufficient to support the 5 units proposed and results in a total of 4.44 units, rounded down to 4 units maximum. In comparison, an average natural slope of 30% results in a maximum of 4.59 units, rounded up to 5 units maximum. Staff has not had the opportunity to review this new information; however, given the information provided by the civil engineer, the applicant, Mr. Alan Laibson, has submitted a letter requesting to withdraw this application from consideration.

Lastly, staff was able to confer with Mr. Norman Divers P.E. who had performed the calculations on behalf of the neighbors in opposition of the project and confirmed that he had only the hard copy site plan to use when performing his calculations. Mr. Divers did say that he did not have issue with certifying the work he had done but wanted to emphasize that this certification would be relative to the information that had been provided to him, and would expect that another professional who had access to electronic survey information would result in numbers different from his own. Mr. Divers' lack of digital survey information is likely to be the most significant cause for the difference between the two calculations. There also appears to have been some differences in lot area calculations where in one instance, a road and/or driveway was excluded and in another it was included in the total area calculations, this would result in a smaller deviation but, when combined with the other factors, would have contributed to the overall variation.

She said that staff is working toward a procedure where staff will be responsible for hillside calculations to avoid problems of this sort in the future.

On February 21, 2006, an e-mail was received from Mr. Alan Laibson which read as follows: "At this point I would appreciate it if you could withdraw us from the next City Council meeting on February 28th. After the final hillside calculations were completed the density available to us would have been a little shy of what would be needed for 5 units. So, based on that we are going to resubmit to P & Z our application for consideration for a change to RM 8 (which was our original application) which along with the new hillside calculations would insure us of the 5 units we would like to build. We wish to thank both you, the Tech review members, P & Z and City Council for your help and consideration in this interesting journey. My wife and I still believe deeply in the project as one that the city could be proud of and other builders can consider in further green and energy efficient construction."

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 138 SPRINGSIDE ROAD FROM INSTITUTIONAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED 84-UNIT RENTAL COMMUNITY WITH DENSITY BONUS FOR AFFORDABLE HOUSING PROVISION

ORDINANCE NO. 3334 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 138 SPRINGSIDE ROAD FROM INSTITUTIONAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY DENSITY DISTRICT/CONDITIONAL ZONING FOR A PROPOSED 84-UNIT RENTAL COMMUNITY WITH DENSITY BONUS FOR AFFORDABLE HOUSING PROVISION

Mayor Bellamy opened the public hearing at 5:02 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to conditionally zone 138 Springside Road from Institutional District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for a proposed 84-unit rental community with density bonus for affordable housing provision. This public hearing was advertised on February 14 and 24, 2006.

She said the project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes "new zoning tools" (Conditional Zoning and Density Bonus incentive) to create a sustainable high-density residential development within the City Limits. Although, transit service is not currently available on Springside Drive, the site is located within one mile of transit service along Hendersonville

Road. The development also proposes a drop-off area that can be utilized for an independent shuttle service.

This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2005-2010. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs

This project utilizes the Conditional Zoning process and the Density Bonus provision as an incentive in providing a higher density infill development as outlined under Housing Opportunities, Goal #3.

In December 2005, the petitioner, Shelter Development, LLC, submitted an application for the review of a Conditional Zoning for a 3.02 acre parcel from INST (Institutional District) to RM-16 CZ (Residential Multi-family High Density/Conditional Zoning) and for a master plan approval subject to a 200% density bonus for the construction of an 84-unit senior housing development and it's related parking and other site features.

The project site is located within the City limits just off of Springside Road. Two single-family residences, one vacant and one occupied, currently exist on the site. Properties surrounding the property include: Buncombe County Schools, specifically TC Roberson, zoned Institutional to the south and west; a high density multi-family apartment complex, zoned Institutional to the east; single family dwellings zoned RS-4 and RM-6, and Cedar Forest Condominiums, zoned RM-6 to the north.

The applicant is requesting a rezoning to RM-16 CZ in order to qualify for a density bonus that would allow 84 units. Under the current Institutional zoning district, at 16 units per acre, a total of 48 units would be permitted. With a rezoning to the RM-16 zoning district and with an added 200% density bonus, a total of 106 units would be permitted. The applicant is proposing 84 units, at a density of approximately 28 units/acre.

The development on the site proposes a 4-story building with a 21, 486 square foot footprint. The project will consist of 49 one-bedroom apartments, and 35 two-bedroom apartments. The building is oriented towards the street with pedestrian connections to the proposed sidewalk along Springside Road and to the walking trail provided as an amenity to the residents. A 70-space parking lot and required bicycle parking is located behind the building towards the rear of the lot. Landscape buffers, parking lot landscaping and open space is being provided to meet the City's standards.

The building elevation illustrates traditional design with exterior features reminiscent of arts and crafts style architecture. Details include: an open porch area, gabled rooflines with moderate to deep overhangs, changes in building materials between floors, and double-hung windows. The exterior building materials and colors shown on the elevation (brick veneer and vinyl siding) may be enhanced to include stonework detailing in place of brick materials.

Based on the proposed plans and elevations provided by the applicant, staff feels that the project qualifies for a 200% density bonus by providing an exceptional development through:

- Affordable housing: <u>all</u> units within the development are proposed at a rate *below* the City's maximum affordable rental rate, meeting the needs of those (specifically seniors) with a household income of less than 60% of median income.

- Higher quality building design (see elevation details above)
- Enhanced landscaping: additional landscape materials and an increase in the size of plant materials above the City's Standard requirement will be provided.
- Project amenities: walking trails, benches, garden area with gazebo

On Wednesday, January 18, 2006, the Asheville Technical Review Committee (TRC) reviewed the proposed master plan and recommended approval of the project subject to the conditions outlined in the staff report. These conditions will be addressed upon submittal of detailed site plans to the TRC.

On Wednesday, February 1, 2006, the Asheville Planning and Zoning Commission reviewed the project and voted unanimously to recommend approval of the project subject to the TRC conditions and conditions recommended by staff.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The project site consists of two single-family dwellings that will be demolished in order to construct the proposed development. Although the property in its current state is relatively flat, grading of the site and removal of existing vegetation will be necessary in order to meet the stormwater and erosion control requirements and overall development of the site, as proposed.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The proposed development is reasonably compatible with the surrounding uses and is not expected to injure the value of adjoining or abutting property.

   The building is to be designed with enhanced architectural features and is likely to have a positive affect on adjoining and abutting properties. In addition, landscape buffers are proposed around the perimeter of the site, which will assist in mitigating any negative impacts the development may have on the surrounding area.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** Although the proposed development is of greater scale and (to a degree) of greater density than the existing development in the area, the project proposed is no larger than what would be allowed under the current Institutional zoning. The proposed use appears to be reasonably compatible with the uses surrounding the site and with the established zoning in the area. (A rezoning to RM-16 is considered a "down-zoning" from Institutional district.)

Additionally, the building is to be designed with enhanced architectural features that are likely to contribute to the character of the neighborhood. Landscape buffers are proposed around the perimeter of the site, which will assist in mitigating any negative impacts the development may have on the surrounding area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes "new zoning tools" (Conditional Zoning and Density Bonus incentive) to create a sustainable high-density residential development within the City Limits. Although, transit service is not currently available on Springside Drive, the site is located within 1 mile of transit service along Hendersonville Road. The development also proposes a drop-off area that can be utilized for an independent shuttle service.

   This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2005-2010. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's Technical Review Committee, which found that adequate services and facilities are available for the proposed development. While transit service is not currently provided on Springside Road, the site is located within a mile of several bus stops along Hendersonville Road. The development also proposes a drop-off area that can be utilized for an independent shuttle service.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The City's Traffic Engineer has reviewed the proposal and has determined that there are no traffic issues created by this project nor is a traffic impact analysis warranted.

Pros

- This project utilizes Conditional Zoning and the density bonus provision in order to provide an exceptional development project through affordable housing, enhanced site and building design, and project amenities.
- The project makes a significant contribution to meeting the need for affordable rental housing in the City of Asheville.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to smart growth, infill and sustainable development.
- Provides an opportunity for infill residential development on underdeveloped property.

Cons

- City transit does not currently provide service along Springside Road.
- The proposed new building is of a larger scale than buildings currently found in the immediate area.

82

Staff recommends approval of this request with the conditions outlined by the Technical Review Committee and the following added conditions:

1. All site lighting shall be equipped with 90 degree cutoff features and be directed away from adjoining properties and streets; and
2. All existing vegetation to be retained shall be clearly indicated and dimensioned on the site plan.
3. In order to ensure the validity of the density bonus granted for provision of affordable housing and to ensure that the units remain affordable for a reasonable period of time, rents shall be maintained in accordance with federal and state Low Income Housing Tax Credit (LIHTC) regulations for at least 15 years after first occupancy. Documentary evidence of LIHTC participation shall be submitted as part of the file prior to the issuance of the Certificate of Occupancy.
4. At the request of the owner, a condition will be added to the project that should the tax credits or other sources of financing, for the proposed development of the senior citizen residential community not be approved by 10/31/06, the zoning of the property shall, upon request by the property owner, revert to the original Institutional zoning classification. The request by the owner for the reversion of the zoning shall be provided in writing to the Director of the Planning and Development.

Mr. Gerald Green, representing the developer, stated that this project will fit well into the community in that it is affordable housing for the elderly. The rents will range from approximately $400-600 a month. They are not subsidized rents. They are able to keep the rents so low through tax credits and other means of reducing construction costs. A community meeting was held and they addressed their concern of traffic. He urged Council to support this project.

In response to Councilwoman Cape about the preservation of trees, Mr. Green said that the City standards mandate a 5-foot utility strip between the street and the sidewalk. They are trying to have the sidewalk meander among the trees keeping the trees up close to the street, but that depends on the grade and other elements.

Mayor Bellamy closed the public hearing at 5:11 p.m.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3334, to conditional zone 138 Springside Road from Institutional District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for a proposed 84-unit senior housing development with density bonus for affordable housing provision, subject to the conditions outlined by the Technical Review Committee and the following added conditions: (1) All site lighting shall be equipped with 90 degree cutoff features and be directed away from adjoining properties and streets; (2) All existing vegetation to be retained shall be clearly indicated and dimensioned on the site plan; (3) In order to ensure the validity of the density bonus granted for provision of affordable housing and to ensure that the units remain affordable for a reasonable period of time, rents shall be maintained in accordance with federal and state Low Income Housing Tax Credit (LIHTC) regulations for at least 15 years after first occupancy. Documentary evidence of LIHTC participation shall be submitted as part of the file prior to the issuance of the Certificate of Occupancy; and (4) At the request of the owner, a condition will be added to the project that should the tax credits or other sources of financing, for the proposed development of the senior citizen residential community not be approved by 10/31/06, the zoning of the property shall, upon request by the property owner, revert to the original Institutional zoning classification. The request by the owner for the reversion of the zoning shall be provided in writing to the Director of the Planning and Development. This motion was seconded by Councilwoman Cape and carried unanimously.

C. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO REVISIONS TO THE URBAN VILLAGE DISTRICT

ORDINANCE NO. 3335 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO REVISIONS TO THE URBAN VILLAGE DISTRICT

Mayor Bellamy opened the public hearing at 5:11 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to revise several sections of the UDO relating to the Urban Village District. This public hearing was advertised on February 17 and 24, 2006.

This code amendment has been developed to accommodate issues raised in the review of the Biltmore Park Town Square Urban Village zoning request. The amendment:

- Adjusts the height requirement to allow taller structures to be considered
- Clarifies the calculation of the "cornice height" setback requirement for structures taller than four stories
- Provides for exceptions to door and window opening requirements to accommodate LEED or other energy efficiency code compliance requirements
- Clarifies driveway and service alley requirements
- Clarifies off-street parking and loading requirements
- Makes minor stylistic changes

Staff feels these adjustments and clarifications represent improvements to the function and intent of the ordinance and provide the Planning & Zoning Commission and City Council with additional flexibility to review projects for green building compliance.

On February 1, 2006, the Planning and Zoning Commission unanimously recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mr. Shuford said that the most substantial change is adjusting the maximum height allowed from 80 feet to 150 feet; however, he stressed that City Council will have the opportunity to set that height in each Urban Village District in the approval of the Master Plan.

Ms. Katheryn McCarten, resident in Biltmore Park, questioned how many stories would be allowed for a height limit of 150 feet, Also she urged Council to keep the definition at 80 feet and that City Council be allowed to adjust the height on an individual basis.

Mayor Bellamy closed the public hearing at 5:20 p.m.

There was Council discussion about the 150 feet height limitation with Mr. Shuford stating that some places in Asheville might be appropriate for 150 feet, whereas, other areas it would be inappropriate. Again, Council will have the ability to set that height in each Urban Village District. He explained that heights of buildings must be on the Master Plans and only City Council can waive those heights. City Attorney Oast also noted that the 150-feet is the maximum allowed but City Council can approve something lower.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3335. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 388

D. PUBLIC HEARING TO CONSIDER REZONING PROPERTY AT SCHENCK PARKWAY, SCHENCK CRESCENT EAST AND WATERSTONE ROAD FROM CENTRAL BUSINESS DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT AND TO REVISE THE MASTER PLAN TO INCLUDE THE REZONED PROPERTIES

ORDINANCE NO. 3336 - ORDINANCE TO REZONE PROPERTY AT SCHENCK PARKWAY, SCHENCK CRESCENT EAST AND WATERSTONE ROAD FROM CENTRAL BUSINESS DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT AND TO REVISE THE MASTER PLAN TO INCLUDE THE REZONED PROPERTIES

Mayor Bellamy opened the public hearing at 5:35 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone property at Schenck Parkway, Schenck Crescent East and Waterstone Road from Central Business District and RS-8 Residential Single-Family High Density District to Urban Village District and to revise the Master Plan to include the rezoned properties. This public hearing was advertised on February 17 and 24, 2006.

The current request under review is to rezone almost 20 acres to Urban Village District and gain approval for an additional 155 residential units, 50,000 square feet of office space, 200,000 square feet of commercial space and another 50,000 square feet for other uses. The majority of the property under review is currently zoned Central Business District with a small portion zoned RS-8.

During a rezoning request for urban village, the developer generally provides a site master plan and overall build-out numbers. This allows City Council to consider the total impacts of the project at the time of the rezoning. After this initial approval all subsequent reviews for portions of the project and master plan are reviewed as Level II projects that are handled by the Technical Review Committee. The TRC will ensure that all of the development codes will be met during the plan submittal phase.

A traffic impact analysis (TIA) is being completed for this project at this time. A TIA is required at the time the project comes forward for Level II review as defined in the Urban Village District. With the road widening at Long Shoals Road currently taking place, it is expected that the development will not over burden the transportation system. Limited changes may be recommended to the number of turn lanes in specific areas in the Biltmore Park development.

Urban Village ordinance requirements will receive specific study and thorough review as each phase is submitted for permitting. In general, though, the master plan portrays a network of streets that are intersected by cross streets at relatively close intervals. As described in the Urban Village District, block length and sidewalk widths appear to meet development standards. Two parking garages are proposed as a part of this rezoning request, which will be added to three other approved parking garages. At least 17 new structures are shown on the plan with a major building being a large movie theater. In addition to the theater, a hotel is proposed for a location with views from and near the interstate. The hotel is proposed to be a twelve-story

structure and would be by far the tallest building proposed for the urban village development. Most of the other structures proposed will be 4 stories. The scale of the hotel height may be mitigated by the fact that is not at the heart of the urban village but out to the edge. On-street parking and street trees line each street. Several public plaza spaces are shown on the master plan. Even though the exact number and length of each block or number of buildings is not reviewed specifically one can get a sense of the 'grain' of the urban village project by reviewing the master plan. If the current proposal is approved, the Biltmore Park Urban Village will have approval for 475 residential units, 550,000 square feet of commercial space, 250,000 square feet of office space and 200,000 square feet of other non-commercial space. Some smaller amount of this is already built out at this time.

The small section of the urban village expansion is currently zoned RS-8 along Schenck Crescent East. There has been considerable public comment for this section of the proposal. Nearly two acres of land fronting on the street (that is also north of the creek) would be added to the urban village. The creek will become the dividing line from village area and the Heathbrook section of Biltmore Park. The buildings proposed for this area will be between 2 and 4 stories and three of the four buildings will be mostly residential buildings with below grade parking. A portion of the creek edge is protected with a conservation easement. The area of the parcel that is on the south side of the creek is not a part of this proposal. The main concern seems to be the potential loss of the vegetative buffer.

The Urban Village District is established to create mixed-use higher density development that is economically vital and pedestrian oriented. Urban Village guidelines encourage vibrant streets that offer a full range of commercial and office uses as well as a variety of housing types. Project densities are not limited except by master plan approval.

The Central Business District is established to reinforce the downtown as the urban center of Asheville and Western North Carolina, encouraging private and public investment which will preserve the Central Business District as the primary retail, office, hotel, institutional, cultural and entertainment center of our community. The CBD designation was applied to Biltmore Park because it was the best fit for the type of mixed-use project that they were seeking. The Urban Village district was developed after that initial zoning to CBD. In the areas of Biltmore Park that are currently zoned CBD, there is no residential density maximum or building height limits.

This developer is seeking to make some amendments to the wording of the Urban Village District to allow specific items portrayed in this proposal. The items affect height maximums, maximum size of the movie theater use and extending the time frame when the parking garages may be phased in and surface lots phased out. The current master plan will be subject to and require this wording amendment approval.

At the Planning and Zoning meeting, a comment came up that on-street parking was now prohibited along portions of Schenck Crescent East. The person who commented felt that the traffic speeds had increased since then and made the street and intersections unsafe. In the Urban Village area there is generally a requirement to provide on-street parking along streets in the village. However this zoning requirement must be considered with safety in mind. The village should provide on-street parking unless traffic safety is compromised. This can be reviewed on a street-by-street basis. The Planning & Zoning Commission recommended that the parking issue be looked at and perhaps be re-established on the street. He suggested City staff should have the opportunity to review the geometry of the street and make sure it will be safe.

Pros

- Mixed-use development is a positive trend for south Asheville
- The existing urban village will benefit from additional development and investment in the site

- The Biltmore Park neighbors will have nearby neighborhood amenities within walking distance.
- The rezoning to UV provides a clearer expectation of project build-out than the existing CBD zoning provides.

Cons

- Roadway noise may affect more people as the vegetative buffer against the interstate highway is removed.
- The development as proposed may attract regional patronage which may intensify the use (a potential plus)
- The proposed hotel will become an area landmark because of its height (a potential plus)

At their February 1, 2006 meeting the Planning and Zoning Commission recommended approval of the rezoning request and the amendment to Master Plan with the conditions that on-street parking be added back along Schenck Cresent East and that a sidewalk be provided along Columbine Road between Schenck Crescent East to the Heathbrook area and the project approval is contingent on the approval on the urban village wording amendment being approved.

Mr. Paul Szurek, Chief Financial Officer for Biltmore Park, spoke in support of the rezoning and amendment to the Master Plan. He reviewed how the project achieves an outstanding example of smart growth and new urbanism beginning with connectivity of this project with the surrounding neighborhood.

Mr. Larry Zinser, architect, reviewed with Council the project in detail describing the reasoning behind the hotel location and parking deck. He noted they have a very rich streetscape for a pedestrian friendly environment.

Mr. Charlie Hume, President of the Biltmore Park Homeowners Association, felt that south Asheville has had a tremendous amount of development over the last year. The residents of Biltmore Park are concerned about the increase of traffic and along with that comes speeding. To proactively address that, they have worked with the City's Traffic Engineer to install a traffic calming plan, which is presently being voted on by the homeowners. The cost is approximately $54,000 for a total of 24 speed humps and Biltmore Park has offered to contribute $10,000 for that project. He said that there is a nothing in the City's budget to address traffic calming issues. In addition to the cost, there is the issue of police enforcement to deal with speeding issues. He felt that with the large increase in the City's tax base from this development, he asked Council to budget money for these large traffic impact types of projects and review how the police will be involved in trying to enforce the existing speed limit.

A man voiced concern over the height of the hotel on the property. He said residents live there because of the mountain view and a building over 4-5 stories should not be allowed. He felt that people going to the movie theatre will go through the main street artery and it is not designed to accommodate thousands of cars.

Mayor Bellamy closed the public hearing at 6:05 p.m.

Upon inquiry of Councilwoman Cape, Mr. Szurek said that Schenck Parkway, which is a City-maintained street, is designed for four lanes. However, it is not stripped for 4 lanes because current traffic levels do not justify stripping it for 4 lanes. They have had a traffic study performed and with very minor modifications they feel that at full build out all of the significant intersections in this project, on Long Shoals and on I-26 will be operating at acceptable levels. He explained how their site plan is drawn up to disburse traffic as much as possible.

When Councilwoman Cape asked about the hotel height, Mr. Szurek said that the hotel is on the lower slope near the intersection and they are requesting the hotel height be 9 stories.

At the request of Councilman Mumpower, City Traffic Engineer Anthony Butzek had performed a preliminary review of the Traffic Impact Analysis and it does verify that the streets are adequate to accommodate the traffic with some traffic improvements at the intersection of Long Shoals Road that would be made a condition of the Master Plan approval. He will ask the developer's traffic engineer to look at the numerical impact of traffic in the neighborhood. Traffic is distributed within the development and Schenck Parkway is designed to handle much more traffic than it is carrying today. He said that the traffic calming project he is working on with the neighborhood is a separate project and will go forward with or without this project.

Mr. Butzek responded to questions from Council with regard to speed humps and the speed limits in the area. He did not recommend a lower speed limit than 25 mph on this typical residential street.

Upon inquiry of Councilman Freeborn, Mr. Glines said that all infrastructure improvements will be borne by the developer. In addition, Mayor Bellamy noted that they anticipate a $130,000 Million increase to the City's tax base within five years.

Councilman Mumpower moved to rezone property located at Schenck Parkway, Schenck Crescent East and Waterstone Road from Central Business District and RS-8 Residential Single-Family High Density District to Urban Village District. This motion was seconded by Councilwoman Cape and carried unanimously.

Regarding the height of the hotel, City Attorney Oast pointed out that City Council is not prescribing a maximum height in terms of feet.

Councilman Newman moved to approve the amended Master Plan for the Biltmore Park Urban Village with the conditions that (1) the sidewalk be extended from the urban village area to Heathbrook Circle; (2) City staff consider the issue of on-street parking along Schenck Crescent East; and (3) the height of the hotel be limited to 9 stories. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 399

E. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO PERMIT CREMATORIES AS AN ACCESSORY USE TO FUNERAL ESTABLISHMENTS IN LOWER INTENSITY DISTRICTS AND A PRINCIPAL USE IN MORE INTENSE ZONING DISTRICTS

ORDINANCE NO. 3337 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PERMIT CREMATORIES AS AN ACCESSORY USE TO FUNERAL ESTABLISHMENTS IN LOWER INTENSITY DISTRICTS AND A PRINCIPAL USE IN MORE INTENSE ZONING DISTRICTS

Mayor Bellamy opened the public hearing at 6:27 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to permit crematories as an accessory use to funeral establishments in lower intensity districts and a principal use in more intense zoning districts. This public hearing was advertised on February 17 and 24, 2006.

Presently, the UDO contains limited references to crematories. Staff has relied on an interpretation that, except where allowed as uses of right (River District), crematories are only permitted as accessory uses to funeral establishments. This proposed amendment is intended to

set fair and reasonable standards for these uses in the City of Asheville. In drafting this proposal staff has consulted with the NC Board of Funeral Services and a working group of local funeral directors. The proposed ordinance would allow crematories as a principal use in more intense zoning districts (INST, HB, RB, CI, IND) and an accessory use to funeral establishments in other districts where they are allowed (OB, CB-I, CB-II, CBD). In all cases, crematories would be required to comply with current standards set by the WNC Regional Air Quality Agency, NC Board of Funeral Services, and NC Crematory Authority.

The Commission members noted the fact that the State standards only applied to the cremation of human remains, not to pet cremation services, and specified that the ordinance only apply to "crematories for human remains".

Pros –

- The ordinance would set clear standards relating to crematories for human remains.
- The ordinance would ensure that crematories comply with applicable state and regional standards.

Con –

- The amendment would increase the number of areas where crematories are permitted as a use of right.

The Planning and Zoning Commission recommended approval of these code amendments on January 4, 2006, by a unanimous vote of 6-0. City staff recommends approval of the proposed ordinance amendment, as well.

Mayor Bellamy closed the public hearing at 6:30 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3337. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 402

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. CONSIDERATION OF WAIVER OF ONE-YEAR WAITING PERIOD FOR ZONING ACTION ON PROPERTY AT 109 N. LIBERTY STREET

Development Services Director Joe Heard said that on Friday, February 24, 2006, an e-mail was received requesting this matter be removed from Council consideration.

B. RESOLUTION NO. 06-42 - RESOLUTION AWARDING CONTRACT TO BRANTLEY CONSTRUCTION COMPANY INC. FOR CONSTRUCTION OF THE OLD HAYWOOD FIRE STATION AND THE ROCKY RIDGE ROAD FIRE STATION, AND AUTHORIZING CITY MANAGER TO EXECUTE CONTRACT

Fire Chief Greg Grayson said that this is the consideration of a resolution authorizing the City Manager to execute the award of bid to Brantley Construction Company Inc. for construction of the Old Haywood Road Fire Station and the Rocky Ridge Road Fire Station.

For more than six years, two fire station facilities have been in the planning phases for City government. In previous budget approvals, City Council has already authorized $4,825,000.00 for fire station construction. In addition, Council authorized purchase of two specific properties on which to locate the stations. Also, Council awarded an architectural services contract for the stations to the firm of Stewart, Cooper, Newell. Staff has advertised and held public informational community meetings concerning the new station design. Significant input was taken from citizens as well as neighboring property owners to the selected sites.

Bid proposals for construction of the stations were received in January and have been thoroughly evaluated by our architectural firm. The lowest responsible bidder was identified as Brantley Construction Company, Inc. of Canton, NC. Brantley's bid amount for both stations was $4,553,296.00. Brantley has demonstrated their ability to build fire stations for other cities. The cost per square foot of construction is approximately $166.00 per square foot. Bidding the two stations together has resulted in significant savings for the city, as other similar fire station projects in our state are being bid at over $200.00 per square foot.

With Council approval, construction of the stations will begin in April, with completion expected in the first quarter of 2007. Additional costs associated with full implementation of these two stations will be identified through the Fiscal Year 2006-07 budgetary process.

Both of these stations are fulfilling commitments made through previously approved annexation services plans. The City of Asheville has not built a new fire station since the 1970's. Each of these two fire stations will also provide needed work space for the Asheville Police Department.

Each of these stations will have a number of energy efficient "green building" features. However, the approved budgetary funding from past fiscal years coupled with operational time constraints complicate these projects from being LEED (green building) certified facilities. Council will be presented with the option of funding Fire Station 12 in the Sand Hill Road area as a LEED certified building. At this time, construction of Fire Station 12 is planned to be a part of the Fiscal Year 2007-08 fiscal year budget requests from the Asheville Fire and Rescue Department.

Pros:

- The city's standard of cover for provision of emergency services will improve with the addition of these two facilities. Emergency response times will be reduced – lives and properties will be saved.
- Council's previous commitments to approved annexation services plans will be honored.
- The two stations will significantly aid the city in being evaluated by the Insurance Services Office (ISO) to help homeowners and business owners keep their property insurance at a minimum cost.

Cons:

- None identified at this time.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends City Council authorize the City Manager to execute the award of the fire station construction bid to Brantley Construction Company, Inc. in the amount of $4,553,296.00.

Fire Chief Grayson and Mr. Ken Newell responded to various questions/comments from Council, some being, but are not limited to: what the actual bid amount includes; information relative to the contractor; staffing and rolling stock for the two new stations; what does the bidding process consist of and are local contractors encouraged to bid; are both of the stations supported through prior annexation plans; is there space in the stations for a community gathering place; what is the shelf life of the buildings; and why are all the costs uniform across the bid sheet.

Chief Financial Officer Ben Durant explained the financial part of the project in that we will not be impacted by $1 Million next year because we are financing these fire stations. The true impact to the budget will be the annual debt service costs, which will go up by about $80,000.

Upon inquiry of Councilman Newman about ways to reduce the cost of the project, Fire Chief Grayson said that steel construction and concrete costs are the major expenses. Mr. Newell said the only way to reduce the cost of the facilities would be to change some significant visual appearances, e.g., lose masonry on the outside of the building and get metal liner panels which would not blend in well with either of the neighborhoods and the cost savings for that would be fairly insignificant to the total cost.

Upon inquiry of Mr. Fred English, Fire Chief Grayson said that the property on old Haywood Road was acquired in 2000 and the property on Rocky Ridge Road was acquired in 2006.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-42. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 375

At 6:57 p.m., Councilman Mumpower moved to go into closed session for the following reason: To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 7:25 p.m., Vice-Mayor Jones moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

C. ORDINANCE DECLARING "SNIPE" SIGNS TO BE NUISANCES, AND AUTHORIZING REMOVAL

City Attorney Oast said that this is the consideration of an ordinance establishing a process for the removal of temporary illegal signs.

The proliferation of small, temporary advertising signs adjacent to or within the right-of-way of streets and roads -- "snipe" signs – in addition to being an eyesore, affect the safety of persons using the roads, either by blocking line of sight or by distracting motorists.

The City's sign regulations are contained in the zoning ordinances. The enforcement provisions of the zoning ordinance are not effective to deal with transitory violations of the nature presented by snipe signs: by the time the notice of violation process is complete, the signs and the reasons for them are frequently gone. Sec. 7-18-5 of the UDO already provides for the summary removal of some nuisance signs. This ordinance more clearly defines what a nuisance sign is, more clearly sets out the public health and safety concerns, and more clearly defines the particular areas where such signs are of primary concern.

What the proposed ordinance does is make a legislative finding that a certain type of sign tends to distract or obstruct the vision of motorists and create visual clutter and road hazards, affecting the public health and safety in a negative way, and is therefore a nuisance. The ordinance authorizes the City's code enforcement officers to remove those signs, and provides a "post-removal" process for the responsible parties to challenge the removal and retrieve their signs. The ordinance also allows the code enforcement officer to dispose of signs that are not retrieved.

This ordinance is somewhat consistent with Buncombe County's recently adopted ordinance providing for the removal of signs in the right-of-way. Since the width of a street or road right-of-way can vary unpredictably, the proposed ordinance for the City applies within 30 feet of the traveled portion of a road. This ordinance was initially presented on January 17. Based on comments received, it has been revised to modify the notice and hearing requirement, and to better define the characteristics that make such signs objectionable as nuisances.

Considerations:

- Defines what a snipe sign is
- Declares such signs to be nuisances
- Establishes expedient process for removal
- Provides a process for challenging violation

If Council approves of the ordinance, adoption of it is recommended.

There was considerable discussion by Council of what types of signs would be covered by the ordinance, specifically yard sale signs and lost dog signs. City Attorney Oast said those signs can be placed on store-fronts or kiosks, but not on telephone poles.

At the request of Council, City Attorney Oast said that he would look at some provisions to possibly creating a yard sale permit that will permit someone to put up some signs. That provision could include that the sign has to be taken down within 12 hours.

Ms. June Patterson, founder of Stop the Signs, said that she has worked on this ordinance for over 2 years and yet has anyone to say that this issue is not important. These signs contribute to litter and traffic problems. Regarding the yard sale signs, she feels the point is moot because Asheville doesn't have adequate enforcement. What the new ordinance does is give City employees the ability to pick up a sign instead of going through a 30-day process to remove a sign.

Mr. Ashton Walton stressed that snipe signs are clearly a nuisance. Regarding yard sale signs, after they are removed, the nails and staples stay in the pole and Progress Energy crews can be injured when they climb the poles. People who place and leave up these signs have no regard for scenic beauty or safety.

When Councilman Newman asked if the City can permit someone to tack a sign on a Progress Energy pole, City Attorney Oast said no, but he can look into authorizing yard sale signs if they are not in the right-of-way.

Councilman Mumpower voiced concern about the abuse of political signs and asked the City Attorney for clear direction. City Attorney Oast said that political signs are not considered snipe signs but are addressed in the sign ordinance, which permits them for a limited period of time.

Councilman Mumpower asked what the realistic manpower ability is to pull up the signs. City Attorney Oast responded that the staff is out of the Planning & Development Department and the Director has proposed some additional manpower to handle this.

Councilman Mumpower asked the City Attorney to report back to Council giving them a specific enforcement plan and some realistic sense of what we can do to have a meaningful impact on snipe signs.

City Attorney Oast responded to questions from Vice-Mayor Jones regarding different signs in the community. City Attorney Oast said that this ordinance is trying to address he proliferation of advertising signs out on commercial highways. The problem that we have is that it is difficult to make content-based distinctions, so we have tried to define snipe signs in such a way that it is pretty clear what is intended to be covered by it.

Councilman Newman is supportive of getting rid of the advertising signs, but wondered if we are getting rid of some other signs along the way that we weren't thinking about.

Councilwoman Cape wondered what type of commitment the City is willing to make for public areas and kiosks for advertising. In addition, she wondered if we can enlist some volunteers from Quality Forward to help with sign removal.

Councilman Newman moved to continue this matter in order to give the City Attorney an opportunity to address some of Council's concerns. This motion was seconded by Councilman Mumpower and carried unanimously.

Ms. Christine Logan, Code Enforcement Officer, explained that the biggest offenders are commercial message signs that are posted in the right-of-way and that do not have a permit.

It was the recommendation of Mayor Bellamy, and the consensus of Council, to have the City Council Public Safety Committee review this ordinance prior to it being brought back for Council consideration.

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH WOOLPERT INC. FOR REVISIONS TO THE STORMWATER, EROSION CONTROL AND FLOODPLAIN ORDINANCES

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to execute a contract with Woolpert Inc. in the amount of $89,161.50 to assist the City of Asheville in updating the Stormwater, Floodplain and Erosion Control Ordinances.

Due to the flooding events of September 2004, changes in State laws and requirements of Federal regulations, the City of Asheville is in the process of revising the Stormwater, Floodplain and Erosion Control Ordinances.

The process for making these updates includes reviewing the latest trends in the field, examining growth and land use patterns in the City and gathering input from the community. The reason staff is requesting hiring a consultant to perform these services include the following:

- The Consultant offers professional expertise in the stormwater, floodplain and erosion control fields;
- The Consultant has experience in working with similar municipalities in North Carolina;
- Staff resources are limited. It would be difficult to allot enough staff time to makes these updates in a timely manner. We have a deadline of July 1, 2006 to have the Stormwater Ordinance updated;

Staff developed a request for professional services for this project. We received three proposals. Staff reviewed these proposals and determined that Woolpert Inc. was the most qualified for this project.

Revisions to these ordinances will address City Council's strategic goals by improving the quality of our water. This goal is stated in the focus area of Natural and Built Environment.

Considerations

- Cost is within acceptable limits for the scope of the work.
- The money for this project is currently budgeted.
- The consultant will be working with the stakeholders group to make recommendations to Council.

City staff requests that City Council authorize the City Manager to sign a contract with Woolpert Inc. in the amount of $89,161.50 to assist the City of Asheville in updating the Stormwater, Floodplain and Erosion Control Ordinances.

Upon inquiry of Councilman Davis, Ms. Ball said that the City is working diligently with the other agencies involved to not duplicate services. In fact, we have found that we have opportunities to share a lot of information.

In response to Councilman Mumpower, Ms. Ball said that the outcome of this contract will result in a revised stormwater ordinance, which has to be revised to meet the federal mandate; a revised floodplain ordinance that will revisit what development the City allows in the floodplain; and a revised erosion control ordinance to address changes at the state level. She feels the ordinances interact with each other so much, it is very hard to make changes to one of the ordinances that doesn't impact the other one.

When Councilman Mumpower asked if there are existing models throughout the state, Ms. Ball said that there are other ordinances that are available, but because our topography is very different from the rest of the state, she didn't think we could readily take one of the off-the-shelf ordinances and make it work in Asheville.

Councilman Mumpower agreed that stakeholder input is important, but felt the has the capability of obtaining that input. He wondered if the City could hire the consultant on a smaller scale to tailor an existing off-the-shelf ordinance.

Upon inquiry of Councilman Freeborn, City Manager Jackson explained why the Engineering Department staff cannot handle this project in-house.

Ms. Ball said that she will meet with the consultant and talk to them about ways that to revise the scope and what capabilities we have in-house to do some of the work.

Councilwoman Cape suggested talking with Warren Wilson College to arrange a partnership.

E. RESOLUTION NO. 06-43 - RESOLUTION ESTABLISHING THE FEDERAL LEGISLATIVE AGENDA FOR FISCAL YEAR 2007

Economic Development Director Sam Powers said that this report follows up on the City Council worksession of February 21, 2006.

Over the past three years Congressman Taylor, Senator Burr, and Senator Dole have been successful in helping the City receive over $5 million in appropriations to fund City transit bus acquisition, drug interdiction, parks improvements, river redevelopment, and pedestrian improvements. Fiscal Year 2007 appropriations/legislative requests are currently being developed and the City needs to determine if it wishes to submit any requests for potential federal assistance, with a deadline for submittal to the congressional staff and the WNC Caucus by March 1, 2006.

City staff has identified the legislative remedy for the transit system as well as seven projects as potential submissions for assistance: Bus Acquisition Pilot Project, Green Building Fire Station, Driving & Firearms Simulator and Driving Range Upgrade, Thomas Wolfe Project, Reid Center, Public Service Radio Improvements, and Signal Preemption for Emergency Response.

Staff is seeking policy recommendations on setting a federal legislative agenda for Fiscal Year 2007 to be in position to submit to the congressional delegation and staff and the WNC Caucus by March 1, 2006, if Council so desires.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Newman moved to approve the Fiscal Year 2007 legislative agenda to include the Bus Acquisition Pilot Project; Green Building Fire Station; Driving & Firearms Simulator and Driving Range Upgrade; Reid Center; Public Service Radio Improvements; and Signal Preemption for Emergency Response, specifically making the census definition of our metropolitan area and the implications that will have on our local federal transportation funding our No. 1 priority. This motion was seconded by Vice-Mayor Jones.

Councilman Davis felt Council should include the Thomas Wolfe Cabin in our federal agenda for $350,000 to see if there is money earmarked for that type of project. He said the cabin is the City's responsibility and we should take the responsibility for preserving this significant piece of property.

Councilman Mumpower felt the legislative agenda is an exercise in political excess that talks more about what is nice than what is necessary. He was strongly against participating in that type of excess.

The motion made by Councilman Newman and seconded by Vice-Mayor Jones carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Davis moved to include $350,000 to the federal agenda for the Thomas Wolfe Cabin and that if no funds are available that City staff look for an alternate plan to realistically fix the cabin. This motion was seconded by Councilwoman Cape.

Upon inquiry of Councilman Newman, Councilman Davis explained the significance of the Thomas Wolfe Cabin.

Councilwoman Cape felt the City has made a huge investment in Azalea Park and the Cabin is equally important to the Park area.

The motion made by Councilman Davis and seconded by Councilwoman Cape carried on a 5-2 vote, with Councilman Mumpower and Councilman Newman voting "no."

RESOLUTION BOOK NO. 29 – PAGE 378

F. RESOLUTION AUTHORIZING THE CITY MANAGER TO RETAIN THE SERVICES OF BALL JANIK

Economic Development Director Sam Powers aid that this report follows up on City Council worksession of February 21, 2006. City staff was directed to contact Ball Janik to determine the firm's interest, ability, and fee structure to assist the City in working with the congressional delegation and congressional staff members in revising legislation dealing with federal appropriations to the City's transit system and/or for submitting any potential federal funding requests for Fiscal Year 2007. City Council is requested to provide policy direction to City staff in this matter.

For the past three years the City has utilized a Washington, DC firm, Ball Janik LLP, to assist the City in providing the necessary project information to congressional staffers to include in the various federal appropriations bills. Ball Janik also provided advice and counsel in matters of federal legislation affecting the City. The City did not renew its contract with Ball Janik when it expired in 2005. The City's transit system's service area has been reclassified as an urbanized area of over 200,000 in population due to changes in census boundaries. This reclassification has significant adverse affects on future operations of the system, and the City has considered seeking legislative remedy to the situation. Fiscal Year 2007 appropriations/legislative requests are currently being developed and the City needs to determine if it wishes to utilize Ball Janik to work with the congressional delegation and congressional staff in support of the City's federal legislative agenda.

Ball Janik has indicated that it can represent the City in pursuing the legislative remedy to the transit system reclassification and/or funding requests and a proposal for services for these elements. Ball Janik proposes a monthly retainer of $2,500 (compared to the previous retainer of $5,000 per month) which will enable them to aggressively pursue an Asheville-specific legislation fix on the transit flexibility issue, and will also them to monitor, on an ongoing basis, legislative issues of interest to the City.

Councilman Newman moved contract with Ball Janik on a monthly retainer of $2,500 to focus on the highly technical issue regarding transit. This motion was seconded by Councilwoman Cape.

Councilman Mumpower felt Asheville has a committee structure that can potentially address this and make the kind of things happen that we want to without the cushion between Council and our representatives. He committed working with Councilman Newman to meet with Congressman Taylor and his staff to passionately pursue the transportation issue.

Upon inquiry of Councilwoman Cape, Transit Services Director Bruce Black explained the decrease of funding each year regarding the transit system.

Councilman Newman explained the highly technical aspect of the transit system.

Mr. Powers responded to various questions from Council regarding Bali Janik and the timeframe for action.

Mayor Bellamy said that a meeting is being set up with Congressman Taylor, Senator Burr and Senator Dole in order to build a personal relationship.

The motion made by Councilman Newman and seconded by Councilwoman Cape failed on a 3-4 vote, with Vice-Mayor Jones, Councilwoman Cape and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis, Councilman Freeborn and Councilman Mumpower voting "no."

G. RESOLUTION NO. 06-44 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Jones said that the terms of Richard Fort (Regular member), Robert Middlemas (Regular member), Jonathan Glover (Alternate Member) and Scott Shealy (Alternate member who has resigned) on the Board of Adjustment expired on January 21, 2006.

At the City Council's worksession on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Jonathan Glover, James Sheeler and Cheryl Johnson for the Alternate seats. Mr. Glover was unable to reached for an interview time.

Also at the City Council's worksession on January 17, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Richard Fort (Regular member) and Robert Middlemas (Regular member) to each serve an additional three-year term respectively, terms to expire January 21, 2009, or until their successors have been appointed.

It was the consensus of Council to appoint James Sheeler and Cheryl Johnson as Alternates to the Board of Adjustment to each serve a three year term respectively, terms to expire January 21, 2009, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 392

H. RESOLUTION NO. 06-45 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Jones said that the terms of Michael Burkhead and Jim Mullen (who has resigned), as members on the Asheville-Buncombe Community Relations Council, expired on December 31, 2005.

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Burkhead to serve an additional three year term, term to expire December 31, 2008, or until his successor has been appointed.

In addition, at the worksession held on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Rev. Keith Ogden, Veronica Sotolongo and Martha Brown. Ms. Sotolongo was unable to attend the interview.

After Council spoke highly about the candidates, Council voted until one candidate received the majority vote. As a result, Veronica Sotolongo was appointed to serve a three year term, term to expire December 31, 2008, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 393

I. RESOLUTION NO. 06-46 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE DOWNTOWN COMMISSION

Vice-Mayor Jones said that the terms of Chuck Pickering, Pat Whalen and Leslie Yancey (who has resigned) on the Downtown Commission expired on December 31, 2005.

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Whalen to serve an additional three year term, term to expire December 31, 2008, or until his successor has been appointed.

In addition, at the worksession held on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Guadalupe Chavarria, Michael McDonough, Kitty Brown, Sherry Luft, Larry Johnson and Daniel Sanders.

After Council spoke highly about the candidates, Council voted until two candidates received the majority vote. As a result, Kitty Brown and Larry J. Turner were appointed to each serve a three year term respectively, terms to expire December 31, 2008, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 394

J. RESOLUTION NO. 06-47 - RESOLUTION APPOINTING MEMBERS TO THE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

Vice-Mayor Jones said that there currently exists four vacancies on the Economic Development Advisory Committee (Jim Mullen, James Geter, David Phillips and Valerie Dennis). Since the Advisory Committee is being reformed from a Task Force, terms have yet to be determined.

At City Council's worksession on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Becky Anderson, John Payne, Phillip Ray Gibson, Kenneth Brown, Matthew Raker, Neil Newberry, Smithson Mills, LaVoy Spooner, Lewis Lankford and Kimberly Hodges. Mr. Payne was not able to attend the interview.

After Council spoke highly about the candidates, Council voted until four candidates received the majority vote. As a result, Becky Anderson, Matthew Raker, Lewis Lankford and Kimberly Hodges were appointed to the Economic Development Advisory Committee. Terms for each member will be determined by City Council at an upcoming Council meeting.

RESOLUTION BOOK NO. 29 – PAGE 395

K. RESOLUTION NO. 06-48 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION

Vice-Mayor Jones said that there currently exists two vacancies on the Asheville-Buncombe Fair Housing Commission until December 31, 2007, (Mr. Jim McCulley, who has passed away, and Ms. Christiana Tugman (who has resigned).

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Paul Ford, Jeff McMickens, Mary Robertson, C. Joy Thigpen and Jessica Erwin Leaven.

After Council spoke highly about the candidates, Council voted until two candidates received a majority vote. As a result, Paul Ford was appointed to serve the unexpired term of Mr. McCulley, term to expire December 31, 2007, or until his successor has been appointed; and Jeff McMickens was appointed to serve the unexpired term of Ms. Tugman, term to expire December 31, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 396

L. RESOLUTION NO. 06-49 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE GREENWAY COMMISSION

The terms of Gerry Hardesty, Linda Giltz and David Tuch, as members on the Greenway Commission, expired on December 31, 2005.

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Giltz and Mr. Tuch to each serve an additional three year term respectively, terms to expire December 31, 2008, or until their successors have been appointed.

In addition, at the worksession held on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Glen Locascio, Starr Silvis, Sarai Rightmyer, Dawa Clark and Marc Hunt.

After Council spoke highly of the candidates, Council voted until one candidate received a majority vote. As a result, Marc Hunt was appointed to serve a three-year term, term to expire December 31, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 397

M. RESOLUTION NO. 06-50 - RESOLUTION APPOINTMENT MEMBERS TO THE PUBLIC ART BOARD

Vice-Mayor Jones said that the terms of Bill Fishburne, Pam Myers and Dana Irwin, as members of the Public Art Board, expired on December 31, 2005. In addition, Kathleen Peters has resigned, thus leaving an expired term until December 31, 2007.

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Fishburne and Ms. Irwin to each serve an additional four year term respectively, terms to expire December 31, 2009, or until their successors have been appointed.

In addition, at the worksession held on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Terry Taylor, Kenn Kotara, Kristin MacLeod, Janiece Meek and Bill Branyon.

After Council spoke highly of the candidates, City Council voted until two candidates received a majority vote. As a result, Kristin MacLeod was appointed to serve a three-year term, term to expire December 31, 2008, or until her successor has been appointed; and Kenn Kotara was appointed to serve the unexpired term of Ms. Peters, term to expire December 31, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 398

N. RESOLUTION NO. 06-51 - RESOLUTION APPOINTMENT MEMBERS TO THE ASHEVILLE TREE COMMISSION

Vice-Mayor Jones said that the terms of Bill Jones, Peter Gentling and Joseph Carney, as members on the Asheville Tree Commission, expired on December 31, 2005.

At the City Council worksession on January 17, 2006, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Jones to serve an additional three year term, term to expire December 31, 2008, or until his successor has been appointed.

In addition, at the worksession held on January 17, 2006, City Council instructed the City Clerk to arrange interviews for Richard Koerber, Hartwell Carson, Starr Silvis, Donna Clark, Bob Gale and Bill Branyon. Mr. Koerber was not interested in the Tree Commission at this time.

After Council spoke highly of the candidates, City Council voted until two candidates received a majority vote. As a result, Starr Silvis and Bob Gale were each appointed to serve a three-year term respectively, terms to expire December 31, 2008, or until there successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 399

VI. OTHER BUSINESS:

For Our Kids

Vice-Mayor Mumpower thanked people, through the For Our Kids Program, who helped out with painting the community center of Klondyke public housing development. He also updated Council on the next Top-A-Stops that will be built.

Claims

The following claims were received by the City of Asheville during the period of January 27 – February 16, 2006: Nichole Compton (Police), Sarah Richardson (Streets), BellSouth (Water), Cyndy Howze (Water), Maxine C. DeBruhl (Parks & Recreation) and Lonnie Bryant (Transit Services).

The following claims were received by the City during the period of February 17-February 23, 2006: Jeanette O'Connor (Fire), Wind-in-the-Oaks (Water), Robert E. Harris (Water) and Wendy E. Fletcher (Traffic Engineering).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Karen Snow addressed Council regarding the inadequacy of storm water structures and storm water damages on Reed Street off Hendersonville Road. Mayor Bellamy said that City Manager Jackson will be in contact with her to discuss this matter.

Mr. Tim Peck spoke to Council about the Merrimon Avenue zoning study. He explained the concerns that the survey is anonymous, the survey contains bias and the survey is open to the risks of fraud, misinterpretation and manipulation. The Greater Asheville Advisory Group

recommends that the results of the survey be given no weight in deliberations on zoning plans for the Merrimon Avenue corridor.

Mr. Fred English urged Council to contact the N.C. Dept. of Transportation to address the graffiti in the Beaucatcher Tunnel as well as the burnt out lights.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:03 p.m.

Magdalen Bowlesson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – March 7, 2006 – 8:15 a.m.
Police Training Room – 3rd Floor
Municipal Building

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Diana Hollis Jones and Councilman Brownie W. Newman

Mayor Bellamy announced that this special meeting is being held to consider a resolution of consideration identifying areas with potential for future annexation

RESOLUTION NO. 06-52 – RESOLUTION IDENTIFYING THE AREA DESCRIBED HEREIN AS BEING UNDER CONSIDERATION FOR ANNEXATION

Urban Planner Julia Cogburn said that this is the consideration of a resolution of consideration identifying areas with potential for future annexation.

State law provides that a Resolution of Consideration may be adopted by cities as a preliminary step in the annexation process. The Resolution of Consideration serves the purpose of providing citizens with advance notice that certain areas in proximity to the City may, within the reasonably near future be subject to annexation. After being in effect for at least one (1) year, the Resolution of Consideration also has the benefit of reducing the time period required between adoption of any annexation ordinance and the effective date of that ordinance from a minimum of one (1) year to a minimum of seventy (70) days. Each Resolution of Consideration is effective for two (2) years. The initial City of Asheville Resolution of Consideration was adopted on April 9, 2002, and a revised map adopted by Council on March 9, 2004. It is now time to consider the next resolution.

The map staff has prepared to accompany this resolution utilizes the same perimeter boundaries as were approved by Council in 2004, minus any areas that have been annexed by the City of Asheville or another jurisdiction since that time. In 2004, as well as today, these are areas with the potential for urbanization, such as the areas along major thoroughfares, areas within the City's extraterritorial jurisdiction, areas with existing infrastructure or areas where utility extensions are feasible and other areas with potential for urban development.

The map includes many areas that may not experience urban development in the near future, because the boundaries are drawn to be expansive enough so that any possible near term (1-5 years) annexation areas will be within the boundaries.

Pros:

- Gives residents and property owners within the area advance notice of possible annexation.
- Allows the time period between passage of an annexation ordinance and the effective annexation date to be shortened to a minimum of seventy (70) days.
- The City can (and will) conduct smaller, incremental annexations within the area.

Cons:

- The possibility of annexing some parts of the area may not be realized for a number of years.

City staff recommends that the Resolution of Consideration be adopted.

Upon inquiry of Mayor Bellamy, Ms. Cogburn said that the map can be viewed in the City Clerk's Office, in the Planning Department and the internet.

In response to Councilman Davis, Ms. Cogburn said that even though the map is the same as two years ago, staff did not see any other urbanized areas that should be included.

Mr. Tim Peck questioned Council if they favored the incorporation of Leicester. City Attorney Oast said that under the statutes if Leicester does pursue incorporation, then at that time City Council will have the opportunity to take a position on it.

At the request of Councilwoman Cape, Ms. Cogburn said that she would provide Council with more information regarding the area of Biltmore Forest and the Biltmore Estate.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 06-52. This motion was seconded by Councilman Freeborn and carried on a 4-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 400

ADJOURNMENT

Mayor Bellamy adjourned the meeting at 8:30 a.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – March 14, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Cadets from A.C. Reynolds High School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF RECIPIENTS OF THE DR, MARTIN LUTHER KING JR. YOUTH AWARDS

Ms. Oralene Simmons explained the significance of the Dr. Martin Luther King Jr. Youth Awards. Mayor Bellamy then recognized Derrick Beasley (Asheville High School), Sharonda Bradley (Asheville High School), Megan Clark (Buncombe Community School) and Rita Williams (A.C. Reynolds High School) for receiving the Martin Luther King Jr. Leadership Award. In addition, she recognized Edith Alas-Ortega (Asheville Middle School), Cameron Bowers (Erwin High School), Nakia Harrell (Asheville Middle School), Katrina Ireland (Asheville Middle School), Zanele Mangena (Asheville Middle School), Shree McMorris (Asheville Middle School), Cynthia Molina (Asheville Middle School), Patricia Moore (Asheville Middle School) and Kyle Weeks (Asheville Middle School) for receiving the Martin Luther King Jr. Emerging Heros Award.

II. CONSENT AGENDA:

At the request of Councilwoman Cape, Consent Agenda Item "B" was pulled from the Consent Agenda for discussion.

At the request of Councilman Newman, Consent Agenda Item "G" was pulled from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETINGS HELD ON FEBRUARY 28, 2006, AND MARCH 7, 2006

B. RESOLUTION DECLARING PROPERTY AT 8 CEDAR STREET AS SURPLUS AND ESTABLISHING THE MINIMUM PRICE

This item was pulled from the Consent Agenda for individual discussion.

C. ORDINANCE NO. 3338 - BUDGET AMENDMENT FOR REIMBURSEMENT BY THE N.C. DEPT. OF TRANSPORTATION FOR MATERIAL COSTS FROM THE HAYWOOD ROAD PROJECT

Summary: The consideration of a budget amendment, in the amount of $16,000, for the reimbursement from the N.C. Dept. of Transportation of funds expended completing Haywood Road ADA ramps.

City Council authorized the Mayor to enter into an agreement with the N.C. Dept. of Transportation (NC DOT) to install Americans with Disabilities Act (ADA) compliant ramps along Haywood Road in conjunction with the NC DOT's resurfacing project. Both the City of Asheville and the NC DOT were in need of ADA compliant ramps along their respective street systems. It was a requirement of NC DOT to install ADA compliant ramps in conjunction with their resurfacing projects. In order to install some additional City amenities, and to expedite completion, the City of Asheville offered to install these ramps using Street Division forces. For completing this work on their behalf, the NC DOT agreed to reimburse the City the full cost of construction, which is estimated at $16,000 (16 ramps X $1,000 each). Street Divisions staff has completed this work, and the NC-DOT has submitted the reimbursement. Per the considerations on the original Staff Report, the Street Division would use reimbursements placed back in its operating budget on additional streets and sidewalk projects throughout the City.

Pros:

- This budget revision is a direct reimbursement of costs incurred completing a needed partnership project with NC-DOT, and will not be any burden to the general fund.
- The funds placed in the Streets Division materials line will allow additional streets and sidewalk projects to be completed.

Cons: None noted.

City staff recommends City Council adopt the budget amendment, in the amount of $16,000, for material reimbursements for completing the City's requirements of a Municipal Agreement between the City and the NC DOT.

ORDINANCE BOOK NO. 22 - PAGE 404

D. RESOLUTION NO. 06-53 - RESOLUTION APPROVING A HOUSING TRUST FUND LOAN FOR DEVELOPMENT OF 84 UNITS OF AFFORDABLE HOUSING ON SPRINGSIDE ROAD IN SOUTH ASHEVILLE

Summary: The consideration of a resolution approving a $300,000 Housing Trust Fund loan for the development of 84 units of affordable housing on Springside Road in South Asheville.

Shelter Development, LLC has requested a Housing Trust Fund (HTF) loan in the amount of $300,000 as partial financing for a proposed $9.3 million Low Income Housing Tax Credit (LIHTC) development for seniors. The project will consist of 84 units with many amenities for the residents.

Shelter Development specializes in housing developments for the elderly and has an excellent track record with LIHTC developments nationwide. The proposed rents are very affordable and the LIHTC rules guarantee 30 years of continued affordability.

The application was evaluated by a panel of outside experts and staff and scored well against the HTF criteria. The Housing and Community Development Committee reviewed the application on January 23, 2006, and has recommended awarding an HTF loan in the amount of $300,000 at 2% interest amortized over a 30 year term.

Advantages:

- Creation of 84 units of affordable housing for seniors
- Long-term affordability
- Increased tax base

Disadvantages: None

Staff recommends approval of a $300,000 HTF loan to Shelter Development, LLC

RESOLUTION BOOK NO. 29 – PAGE 402

E. RESOLUTION NO. 06-54 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOUNTAIN AREA JOB LINK CENTER OF THE MOUNTAIN WORK FORCE DEVELOPMENT BOARD TO PROVIDE THE ORGANIZATION AND ADMINISTRATION OF THE SUMMER YOUTH EMPLOYMENT PROGRAM

Summary: The consideration of a resolution authorizing the City Manager enter into an agreement with Mountain Area Job Link Center of the Mountain Work Force Development Board to provide the organization and administration of the Summer Youth Employment Program.

The Parks and Recreation Department has again contacted the Mountain Area Workforce Development Board (MAWDB) on the campus of A-B Technical College to determine the feasibility of organizing and administering a summer youth employment program for 2006. The MAWDB has actively administered and delivered career development services, remedial education, job skills training and subsidized employment opportunities for Asheville's economically disadvantaged youth for more than 30 years. The MAWDB successfully administered the program, providing employment and educational opportunities for over 55 youth in 2005.

Highlights of the proposal:

- Employment of 55 disadvantaged youth from the City of Asheville.
- Summer employment period of June 8, 2005 – July 29, 2005 (8 weeks)
- Youth employees between the ages of 14 and 17 years old.
- Specific application process and selection procedures mutually agreed upon by the City and MAWDB.
- Education and training components aimed at assisting youth to move forward in school and toward a successful productive life.
- MAWDB will develop, organize, administer supervise and evaluate the program through an agreement with the city including recruitment of youth, development of worksite agreements, orientation and training of worksite supervisors and employees, monitoring and counseling of youth employees and program accounting and oversight.
- The City of Asheville will provide payroll services and worker's compensation insurance.

Pros:

- History of proven professional administration of youth employment programs in Asheville by MAWDB for over 30 years.
- Cooperative agency approach to providing youth development activities.
- Ability to integrate the City's youth employment program with the efforts of the MAWDB career development programs.

- Existing connections to public and private agencies through the MAWFDB "workforce board partners program" which allows for better recruitment of disadvantaged youth and potential worksites.
- Allows for program over site by City staff without the extensive time commitment necessary to actually administer a program of this magnitude.

Cons

- Only enough funds to employee 55 youth for eight weeks which is far less than the demand for this type of employment program.

This action is in keeping with the City Council Strategic Plan's economic development goal #4 of providing vocational training opportunities for teenage youth and the plan's critical services and infrastructure goal #4 of reducing drug related crime activities through holistic approaches targeting at-risk and economically disadvantaged youth. This agreement is for the delivery of a youth development program that combines the opportunities for summer employment with meaningful training and education in the areas of job success skills, career planning, life skills, personal financial management and development of teamwork and interpersonal relations on the job

City staff recommends the City Manager be authorized to enter into a contract with the Mountain Area Job Link Center of the Mountain Work Force Development Board, to provide the organization and administration of the program, in the amount of $100,000.

RESOLUTION BOOK NO. 29 – PAGE 403

F. RESOLUTION NO. 06-55 - RESOLUTION AMENDING RESOLUTION NO. 95-81 REGARDING THE CITY'S POLICY RELATING TO CLAIMS AND JUDGMENTS SOUGHT OR ENTERED AGAINST THE CITY OFFICERS AND EMPLOYEES

Summary: The consideration of a resolution amending the policy for claims and judgments against City employees.

Since 1995 and earlier, the City has provided legal defense to its employees who are sued or named as defendants in actions taken in the course and scope of their employment. Beginning in 1995, the defense for most matters was provided through Asheville Claims Corporation, our self-funded risk management facility

Recently we found language in our excess coverage policy (insurance for claims exceeding the amount covered by the City's self-coverage) that could be viewed as inconsistent with our policy, and might require us to provide a defense even when the employee was clearly acting outside the course and scope of their employment. The resolution addresses that issue by amending the policy to provide that the City may request that the employee indemnify the City for those costs. The only change from Resolution No. 95-81 is the addition of subparagraph C that addresses this particular issue, but the entire resolution is being readopted. This amendment does not otherwise change the City's policy of providing a legal defense to its employees.

Considerations:

1. Addresses inconsistency between City's policy and some insurance coverage;
2. Continues policy of providing employees a defense in appropriate cases.

City staff recommends adoption of the resolution amending the policy for claims and judgments against City employees.

RESOLUTION BOOK NO. 29 – PAGE 404

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONSERVATION EASEMENT WITH RIVERLINK AT AZALEA PARK

This item was removed from the Consent Agenda for individual discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

RESOLUTION DECLARING PROPERTY AT 8 CEDAR STREET AS SURPLUS AND ESTABLISHING THE MINIMUM PRICE

Summary: The consideration of a resolution authorizing the marketing of surplus property at 8 Cedar Street and establishing a minimum price.

The City owns property at 8 Cedar Street (PIN No 9657.07-58-4903) which it does not need and proposes to sell using the process provided in N. C. Gen. Stat. sec. 160A-269, negotiated offer and advertisement for upset bids.

The property at 8 Cedar Street is located at the intersection of Fairview Road and Cedar Street in the Oakley community. It was acquired by the City in December, 1999, for the purpose of realigning the Cedar Street/Fairview Road and Liberty Street/Fairview Road intersections in order to eliminate one of two "back to back" traffic signals. Since that time the amount of traffic on Liberty Street and Cedar Street has diminished significantly due to the closing of Crayton Road and the alternative access between Tunnel Road and Sweeten Creek Road via I-240 and I-40 at Exit 51. Realignment of the intersections is no longer needed based on current and anticipated traffic flow.

The property is zoned RS-8 and improved with a single family residential structure. The lot is 0.1745 acre, rectangular in shape and level to street grade with typical residential landscaping, fencing, etc. The structure is a circa 1926 two story Dutch Colonial with white clapboard siding containing 1,674 square feet. It is structurally sound and in fair to good condition, but it does need some repairs in order to obtain a Certificate of Occupancy. Marketability prospects for the property are very good.

The property has been appraised by CDN Appraisals at $128,000 and by BRB Appraisals at $165,000. The appraisals were reviewed by the City's Real Estate Manager and based on that review $158,600 is recommended as a minimum price for the property. The proceeds from the sale of the property will be general fund revenue.

The positive aspects of marketing the property are:

- The property will be marketed at the appraised value using the upset bid method of sale to ensure a competitive process.
- The sale of the property will generate revenue for the City.
- It will place the property back on the tax rolls.
- It is an efficient use of resources, because un-needed property will return to private ownership.

- It will make available moderately priced housing in a fully serviced neighborhood.

The one negative aspect is that if traffic improvements at the Cedar Street/Fairview Road intersection were ever needed the property may have to be reacquired.

Approval of the resolution will authorize marketing of the property through the process provided in N. C. G. S. 160A-269 and establish a minimum price of $158,600.

City staff recommends City Council adopt the resolution authorizing the marketing of surplus property at 8 Cedar Street and establishing a minimum price of $158,600.

Upon inquiry of Councilwoman Cape, a short discussion took place regarding how might this property be affordable. City Attorney Oast said that the City can explore putting those types of restrictions on the sale.

Councilman Newman agreed that the City needed affordable housing, but didn't think addressing it on a house-by-house basis was the most constructive way to do it.

Councilwoman Cape moved to refer this matter to the Housing & Community Development Committee. This motion was seconded by Vice-Mayor Jones and carried on a 5-2 vote, with Councilman Mumpower and Councilman Newman voting "no."

RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONSERVATION EASEMENT WITH RIVERLINK AT AZALEA PARK

Summary: The consideration of a resolution authorizing the Mayor to sign a conservation easement at Azalea Park with RiverLink Inc. for stream bank restoration and protection.

The Parks and Recreation Department and RiverLink, Inc., have been working together to develop a conservation easement in conjunction with the Clean Water Management Trust Fund for approximately 27.09 acres located along the Swannanoa River within the Azalea Park. This particular easement will allow for restoration and rehabilitation for the stream bank along the Swannanoa River. The plan will allow a contractor to perform stream restoration and stabilization measures within the riparian buffer easement area which will include removal of a number of trees, laying back the bank of the river, and providing an extensive landscape plan for vegetation in the disturbed area. Funds for this project are being provided through the Clean Water Management Trust Fund through a grant secured by RiverLink. The overall management of this project will be the responsibility of RiverLink working in conjunction with the City of Asheville. This project will occur without disruption to the existing park features and will allow for continued development of the master plan that was approved by City Council for this park. In addition, this project will not in any way affect the beneficial fill area that is currently being used by the City of Asheville.

Pros:

- This project will stabilize the stream bank along a large portion of the Swannanoa River.
- This project will allow for a conservation easement of approximately 27.09 acres for protection for future generations.
- This stream bank restoration will also assist in future flooding events and assist in minimizing damage downstream from this area.
- This project will also allow for increased protection of fish and wildlife along this stretch.

Cons:

- Construction will result in the removal of a number of very large trees near the bank of the Swannanoa River within the park area.

- Construction will be occurring while the soccer complex is in use, and it will be necessary for protection measures to occur for the safety of all participants.

This project relates to City Council's Strategic Plan in regard to protection and improvement of water quality in the region.

City staff recommends City Council authorize the Mayor to sign a conservation easement between the City of Asheville and RiverLink Inc. within Azalea Park.

There was a brief discussion about the need to discuss this easement prior to placing any permanent restrictions on the property.

Using a map, Parks & Recreation Director Irby Brinson said that the Clean Water Management Trust Fund requirement is that approximately 10% of the land in the easement can be developed. City staff have worked on specifics all the way down to trash cans, picnic tables and paved trails that can be in the area. Approximately 50% of the 27 acres is part of the wetland area existing now in that area. The area protected in the easement follows the river and is 50-feet on each side from the top of the bank of the Swannanoa River. They have put a lot of detail into the discussion in making sure that the protection of the park plan was first and foremost.

Councilman Davis moved to continue this matter until the March 21, 2006, worksession. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Councilwoman Cape and Councilman Freeborn voting "no."

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE A HABITAT FOR HUMANITY SUBDIVISION LOCATED OFF OF SAND HILL ROAD

ORDINANCE NO. 3340 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE A HABITAT FOR HUMANITY SUBDIVISION LOCATED OFF OF SAND HILL ROAD

Mayor Bellamy said that this public hearing was originally scheduled for January 10, 2006, however, City staff and the property owner asked that the public hearing be continued until February 14, 2006. That request was granted. On February 14, 2006, City staff requested the public hearing be continued again, with the approval of the applicant, until March 14, 2006. That request was granted.

Mayor Bellamy opened the public hearing at 5:23 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to extend the corporate limits of the City of Asheville to include a Habitat for Humanity subdivision (2 lots) located off of Sand Hill Road. This public hearing was advertised on December 30, 2005.

Asheville Area Habitat for Humanity has petitioned the City for the annexation of two lots they own located off of Sand Hill Road (PIN Nos. 9617.16-74-9433 and 9617.16-83-8448) containing approximately 17.24 acres. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

The lots are currently vacant, however, the property has been reviewed and approved by the City's Technical Review Committee for a single-family subdivision of 55 lots. The current assessed valuation for this property, according to the Buncombe County tax records, is

110

$200,600.00. The City reviewed the subdivision as its location is within our extraterritorial jurisdiction. Habitat is requesting annexation prior to the construction of the homes in the development.

Pursuant to N. C. Gen. Stat. sec. 160A-31 a public hearing must be held prior to adopting any ordinance for voluntary annexation.

The proposed effective date for this annexation is March 31st of 2006.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Allows the City to review and inspect the development of homes in the proposed subdivision.

Cons:

- There will be service costs involved, consisting of street lights, street maintenance, and tips fees for approximately $4,000 a year and a single one-time capital cost of $2,500 for the sanitation trash cans for the single-family homes.

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the ordinance annexing the property set forth in the petition.

Mr. Lew Krause, representing Habitat for Humanity, encouraged Council to support this petition and said that they are anxious for the 55 houses to become part of the City.

Mr. Steve Arpin encouraged the City to build compactly and preserve as much of the tree cover as possible when considering development.

Upon inquiry of Councilman Mumpower, Ms. Cogburn said that she believed Habitat requested annexation because they were contiguous to the City limits and they preferred to have inspections, etc. be conducted by the City.

Mayor Bellamy closed the public hearing at 5:27 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3340. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 411

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 509 BILTMORE AVENUE, AND IDENTIFIED AS MISSION HOSPITALS DOGWOOD PROJECT, FOR A PROPOSED ADDITIONAL BUILDING ON 29 ACRES

ORDINANCE NO. 3339 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 509 BILTMORE AVENUE, AND IDENTIFIED AS MISSION HOSPITALS DOGWOOD PROJECT, FOR A PROPOSED ADDITIONAL BUILDING ON 29 ACRES

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:29 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of the issuance of a conditional use permit for property located at 509 Biltmore Avenue, and identified as Mission Hospitals Dogwood Project, for a proposed additional building on 29 acres.

He said that The *Asheville City Development Plan 2025* recognizes that the future development of major institutions such as the Mission-St. Joseph Health Center must be considered as an element of planning for Asheville's future. One of the plan's land use goals urges that the City pursue compatible adaptive reuse, redevelopment, and infill development. This project's design, re-using a part of the campus that previously was occupied by another building, exemplifies one kind of compact development encouraged in the smart growth principles.

Another goal of the plan is that the City should enhance its role as western North Carolina's regional medical and education center, with one explicit strategy being "The City should work with Mission-St. Joseph's Health System in the implementation of the Health System's Master Facilities Strategic Plan." Construction of this facility is part of the Health System's master plan.

One of the goals of the Strategic Operating Plan is increased street and sidewalk connections. This project would enable a future sidewalk extension along McDowell Street.

Regarding recent zoning actions, on March 22, 2005, a conditional use zoning from RM-16 and RS-8 to INST-CUZ was approved for the "Biltmore Gardens" project at Biltmore Avenue and Caledonia road. This project, with a combination of retail, office, and residential uses, is about ¼ mile south of the hospital property being considered.

There is another rezoning application currently under review, which is about the same distance south of the hospital property on McDowell. The 430 McDowell Street rezoning, seeking

a change from RS-8 to INST, was remanded to the Technical Review Committee (TRC) by City Council on January 24, 2006, and is on their agenda for March 20, 2006, as a conditional zoning request.

This review concerns a proposed project in the interior of the Mission Hospitals campus. The project would involve 219, 390 square feet of new construction plus 4,160 square feet of renovation. The facility would provide: a new entrance and waiting area for surgery patients, new operating rooms and support spaces, and 48 intensive care patient rooms. The building would have 5 stories above grade, as well as two stories below grade.

The site is located in an Institutional zoning districts within the corporate limits of the City of Asheville, between Biltmore Avenue and McDowell Street (Attachments to City Exhibit 3 – Location Map & Aerial Map). The primary vehicular access to the building's main entrance would be via the McDowell Street and Victoria Road entrances to the campus. The project would also include a proposed service area on the north side of the building (City Exhibit 4 – Site Plan; City Exhibit 5 – Building Footprint; and City Exhibit 6 – Building Elevations).

Medical centers are a permitted use in the Institutional zoning district. Review for compliance with the development and design standards from Article 11 of the Unified Development Ordinance (UDO) is applied to the area of the property affected by the project.

The applicant has provided analysis of present and projected parking facilities, which indicate that an appropriate number of spaces will be available to meet the needs of the proposed facility.

Concept plans for this project were reviewed and discussed at an informal TRC meeting on June 13, 2005. Comments from that review were addressed and written responses were supplied by the applicant as part of the packet submitted for review.

At their January 18, 2006, formal meeting, the TRC approved the project with the conditions stated in the TRC staff report.

At their February 1, 2006, the Planning and Zoning Commission (P&Z Commission) unanimously recommended approval for the project. The only element of the project discussed at the meeting was the sidewalk requirement along the east side of McDowell Street. The sidewalk is shown in the submitted plans, but the applicant had expressed a desire to not construct the sidewalk until a safe connection is provided through and beyond the tunnel. The P&Z Commission noted the applicant's concern about the safety of a sidewalk that would terminate in an exceptionally tricky location for pedestrians, and added the condition that the sidewalk requirement be waived in the event a suitable and safe alternative cannot be found (Fee-in-lieu would be required if the sidewalk is waived.)

On February 23, 2006, staff from the Engineering and Planning departments met with the applicants about this sidewalk situation. It was agreed that the applicant would prepare the site for the sidewalk shown on the plan, performing the necessary grading and retaining wall work to create a strip of appropriate width and slope. Rather than paving that strip, however, the applicant will leave it covered with topsoil and plantings to discourage (temporarily) its use as a path. The applicant will also pay the fee-in-lieu amount, and, when the sidewalk through the tunnel and north of the tunnel is due to be constructed, the City will complete the paving of that section.

Staff has received no communications from citizens regarding this project.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The area of the property on which the building would occur is mostly flat and has previously been paved, graded, or built upon. Thus, no undeveloped land or open space would be affected other than the sidewalk area along McDowell Street. The proposed project is thus compatible with the topography and natural features.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** Staff feels that the proposed project would have no discernible effect on surrounding property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The proposed project would be adjacent to other large medical facilities, and would be very much in harmony with the neighboring area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The **Asheville City Development Plan 2025** recognizes that the future development of major institutions such as the Mission-St. Joseph Health Center must be considered as an element of planning for Asheville's future. One of the plan's land use goals urges that the City pursue compatible adaptive reuse, redevelopment, and infill development. This project's design, re-using a part of the campus that previously was occupied by another building, exemplifies one kind of compact development encouraged in the smart growth principles. Another goal of the comprehensive plan is that the City should enhance its role as western North Carolina's regional medical and education center, with one explicit strategy being "The City should work with Mission-St. Joseph's Health System in the implementation of the Health System's Master Facilities Strategic Plan." Construction of this facility is part of the Health System's master plan. One of the goals of the Strategic Operating Plan is increased street and sidewalk connections. This project will facilitate a future sidewalk extension along McDowell Street.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The project's location off Biltmore Avenue and McDowell Street ensures access to major transportation facilities and other services. Transit routes 4, 6, 8, and 12 serve the area, with one route passing immediately in front of the proposed building. In

addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. Only minor changes to the property's entrance and exit from McDowell would occur, primarily to improve pedestrian safety.

Pros

- Would further goals of City of Asheville comprehensive plan, smart growth policies, and strategic operating plan.
- Could accommodate necessary growth for important regional health system, in keeping with their master plan.
- No apparent opposition.

Cons

- Likely construction noise and disturbance to neighboring hospital facilities during building process.

Staff recommends approval of the proposed project and Conditional Use Permit subject to the conditions in the TRC staff report, and subject to the February 23, 2006, sidewalk agreement mentioned above.

After rebuttal, Mayor Bellamy closed the public hearing at 5:32 p.m.

Upon inquiry of Mayor Bellamy, Mr. Esselstyn explained that City departments did not have any concerns regarding traffic. In addition, he said that the project would be complete in the summer of 2008.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3339, granting a conditional use permit for property located at 509 Biltmore Avenue, and identified as Mission Hospitals Dogwood Project, for a proposed additional building on 29 acres, subject to the conditions in the Technical Review Committee staff report and subject to the February 23, 2006, sidewalk agreement. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE

C. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF VARIOUS PROPERTIES RECENTLY ANNEXED ALONG LONG SHOALS ROAD

ORDINANCE NO. 3341 - ORDINANCE ZONING VARIOUS PROPERTIES RECENTLY ANNEXED ALONG LONG SHOALS ROAD

Mayor Bellamy opened the public hearing at 5:36 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance initially zoning various properties recently annexed along Long Shoals Road. This public hearing was advertised on March 3 and 10, 2006.

She said that the *Asheville City Development Plan 2025* identifies Long Shoals Road as a connecting corridor and shows the intersection of Long Shoals and I-26 as a Regional Node. According to the plan, the purposes of the connecting corridor is to "....preserve the flow of traffic along major thoroughfares that connect compact centers of urban development. Connecting corridors are characterized by land uses such as offices and apartments, and should not include regional shopping destinations." The plan further calls for the encouragement of transit supportive residential density (8-16 units per acre minimum) along and adjacent to major corridors. The HB zoning proposed at the intersection of Long Shoals and I-26 supports the regional node concept.

A number of recent zonings related to annexation in Biltmore Park (2004) and a voluntary annexation on Long Shoals Road (2005) have taken place. A conditional use zoning application was approved in early 2005 (to CI) for a property just east of this area.

The property presented to Council for initial zoning is property annexed by the City of Asheville effective December 31, 2005. The properties (a total of 55 parcels) are located along Long Shoals Road and Overlook Roads. The land uses on these property are varied from commercial and institutional to multi- and single-family residential. Surrounding land uses are also similarly varied. The zoning in the area (both City of Asheville and Buncombe County – Limestone Zoning) is a mix of commercial (near the intersection with I-26), institutional (properties surrounding and including the schools in the Overlook area) and residential (the properties between the I-26 and Overlook nodes).

The initial staff recommendation for the entire annexation area was presented to the Planning and Zoning Commission at a meeting on January 4, 2006. At this meeting the Commission accepted staff recommendation on all but thirty-five (35) of the properties south of Long Shoals Road that staff had recommended for RM16 zoning. The purpose of the continuation was to allow the property owners in this area a greater chance to review their options under the City's ordinances.

The City's Planning and Development staff held an informal meeting with the property owners in the area on January 19, 2006, to discuss the zoning of these thirty-five (35) properties. At that time, staff presented options and explained the process and relevant ordinance information as follows:

OPTIONS - WITH PROS AND CONS FOR EACH

HB (HIGHWAY BUSINESS)

Pros

- Consistent with the zoning pattern and development of properties closer to the interstate and at intersection of Long Shoals with Hendersonville Road.
- Provides property owners with greatest flexibility of use.
- Provides land for services needed by the growing residential population in the area.

Cons

- Promotes commercial strip development of Long Shoals Road.
- Not as compatible with abutting residential properties as RM16 or lower intensity commercial/office districts.
- May allow consolidation of properties for big box development.
- May create capacity problems for newly widened road.

116

CBII (COMMUNITY BUSINESS II)

Pros

- More consistent in use and scale with commercially zoned properties to the east than HB development would be.
- Provides a "cap" on building size.
- More appropriate scale with surrounding development than Highway Business.
- Provides property owners with large degree of flexibility in use.

Cons

- Promotes commercial strip development of Long Shoals Road.
- Not as compatible with abutting residential properties as RM16 or lower intensity commercial/office districts.
- 45,000 square foot building size maximum allows for a fairly large building.

CBI (COMMUNITY BUSINESS I)

Pros

- More consistent in use and scale with commercially developed properties to the east than HB development would be.
- Provides a "cap" on building size.
- More appropriate scale with surrounding development than Highway Business or CBII.

Cons

- Promotes commercial strip development of Long Shoals Road.
- Not as compatible with abutting residential properties as RM16.
- 12,000 square foot building size limit might promote the development of convenience stores and small, fast food (non-drive thru) restaurants.

OB (OFFICE BUSINESS)

Pros

- More consistent in use and scale with commercially developed properties to the east than HB development would be.
- Provides a more reasonable "cap" on building size than HB, CBII, or CBI.
- More appropriate scale and uses with surrounding development than HB or CBII.
- May not result in commercial strip development of Long Shoals Road.
- Supports the *Asheville City Plan 2025* purposes for connecting corridor development.

Con

- Not as compatible with abutting properties as RM16.
- Residential density is lower than allowed in RM16.
- Flexibility (in development) for current property owners is more limited than HB or CBII.

RM16

Pros

- Supports the *Asheville City Plan 2025* purposes for connecting corridor development.
- Is compatible with the zoning patterns (both City of Asheville and Buncombe County) in the area.
- Prevents the development of strip commercial along another Asheville corridor.

Cons

- Flexibility (in development) for current property owners is limited to residential.

At their meeting on February 1, 2006, the Planning and Zoning Commission considered the aforementioned options for the thirty-five (35) parcels to the south of Long Shoals Road.

They recommended (6-1; Byers opposed) that these parcels be zoned CB II. Mr. Byers supported an OB designation for these properties.

The Planning and Zoning Commission recommends approval of the proposed initial zoning of the properties shown on the proposed map and known as the Long Shoals Road Annexation Area: Staff initially recommended RM16 zoning for the thirty-five (35) properties that were the subject of the continued Planning and Zoning Commission discussion. However, it is clear that the Commission supports a wider range of uses than just multi-family (the Commission unanimously supported either CBII or OB zoning for these properties) based on public input received at two public hearings on this matter.

Senior Pastor James V. King of the Family of Faith Fellowship, formerly Asheville Pentecostal Holiness Church, requested CB II zoning of the 3 parcels at 213 Long Shoals Road, for the following reasons: (1) the purchase of road right-of-way reduced the size of their property to approximately 3.5 acres which hinders their ability to expand their facilities for future growth; (2) some expenses have accrued on their present property and they have spent a considerable amount on new property for relocation; (3) the value of this property on Long Shoals was set at commercial by two appraisals – one 5 years ago and one 2 years ago. The State also negotiated a settlement with us on the right-of-way at commercial rates. Based on this information we planned to move forward, but if those funds are not available from a commercial sale we would probably not be able to afford the move; (4) this decision is a common consensus among the entire church body, not just a few; and (5) qualified individuals have deemed the present 10,300 sq. ft. building on this property suitable for a variety of commercial applications with very little renovation necessary. He presented Council with a petition, containing 80 signatures, requesting 213 Long Shoals Road be zoned commercial, preferably Highway Business. However, the signers of the petition are now in support of the Planning & Zoning Commission's recommendation of CB II.

Mr. Curtis Ensley, representing 31 out of 34 parcels property owners, requested Community Business II zoning for their parcels, which the Planning & Zoning Commission recommended. Some reasons are (1) CB II is in keeping with the surrounding area and zoning on the south side of Long Shoals Road; (2) property owners are in favor of CB II zoning; (3) property owners are trying to be proactive and plan ahead to control our community and continue the tradition of being good stewards of this land for over 50 years; (4) CB II will give flexibility to have mixed use and consistent zoning throughout the 34 parcels without forcing individual property owners to come to Council on a parcel by parcel basis; (5) CB II allows commercial, offices, and residential in a planned manner to provide for pedestrian friendly areas and greenways; (6) the heavy concentration of surrounding residential have needs for goods, services and jobs in this area without having to make a two-way drive across Long Shoals Road to an already busy Hendersonville Highway; and (7) minimal impact on surrounding properties since it is bordered by the south by Progress Energy and on both ends by existing Highway Business and CB II. He presented Council with a petition, containing 26 signatures, requesting Highway Business, which he said was prepared for the February 1, 2006, Planning and Zoning Commission meeting. However, at the February 1, 2006, meeting, the signers of the petition are now in support of the Planning & Zoning Commission's recommendation of CB II.

Mr. Charles Worley spoke in support of the Planning & Zoning Commission recommendation of CB II.

Mayor Bellamy closed the public hearing at 5:48 p.m.

Upon inquiry of Councilman Newman, Planning & Development Director Scott Shuford explained how staff looks at the zoning pattern and how it might work with the relationship of the road.

In response to Councilwoman Cape about looking for secondary access roads to take traffic off the main corridor, Mr. Shuford felt that was closer related to a thoroughfare plan that a local government might adopt to look for ways to encourage, as development occurs, connecting streets to be built. That is in our 2025 Plan and staff could focus on that if that becomes a priority for Council. He felt we should do that City-wide. He did say it would be difficult to get significant traffic distribution along Long Shoals Road off of the roadway because of the depth of the properties with regard to the lake to the south and the established development pattern to the north.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3341, adopting the Planning & Zoning recommendation. This motion was seconded by Vice-Mayor Jones.

There was discussion initiated by Councilman Freeborn about possibly changing the Highway Business zoning district to Commercial Business II. Mr. Shuford explained that those areas already have a development pattern that has Highway Business type development on it. Even though the existing development would conform to the Community Business II development, it would make some of the uses non-conforming and since there was no objection to the Highway Business designation by the owners at the Planning & Zoning Commission meeting, he felt Council may want to let those owners know of the potential zoning change prior to taking action on it.

Councilman Freeborn felt that by designating property Highway Business in that area, that we are contributing to congestion along that road more so than if it was a more limited usage of that property. Therefore, he moved to amend the original motion to change the rezoning of the Highway Business zoning district to Community Business II District. This motion failed due to lack of a second.

The original motion made by Councilman Mumpower and seconded by Vice-Mayor Jones carried on a 6-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 22 – PAGE 413

D. PUBLIC HEARING TO CONSIDER AN APPEAL FROM AN ORDER OF THE BUILDING SAFETY DEPARTMENT ORDERING THE BUILDING LOCATED AT 1500 TUNNEL ROAD (FORMER SITE OF DAYS INN MOTEL), VACATED, CLOSED AND REPAIRED

Mayor Bellamy said that on March 13, 2006, a First Motion to Continue was received from Mr. David W. Cartner, attorney for the owners. Said motion requests an extension of time within which to investigate the facts, prepare an answer or otherwise respond to the City's Findings of Fact/Order and Appeal thereto. Therefore, Vice-Mayor Jones moved to continue this public hearing until March 28, 2006. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Freeborn voting "no."

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 06-56 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WOOLPERT INC. TO ASSIST THE CITY OF ASHEVILLE IN UPDATING THE STORMWATER, FLOODPLAIN AND EROSION CONTROL ORDINANCES

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to sign a contract with Woolpert Inc. for an hourly rate not to exceed the amount of $74,000 to assist the City of Asheville in updating the Stormwater, Floodplain and Erosion Control Ordinances.

Due to the flooding events of September 2004, changes in State laws and requirements of Federal regulations, the City of Asheville is in the process of revising the Stormwater, Floodplain and Erosion Control Ordinances.

The process for making these updates includes reviewing the latest trends in the field, examining growth and land use patterns in the City and gathering input from the community. The reason staff is requesting hiring a consultant to perform these services include the following:

- The Consultant offers professional expertise in the stormwater, floodplain and erosion control fields;
- The Consultant has experience in working with similar municipalities in North Carolina;
- Staff resources are limited. It would be difficult to allot enough staff time to makes these updates in a timely manner. We have a deadline of July 1, 2006, to have the Stormwater Ordinance updated;

Staff developed a request for professional services for this project. We received three proposals. Staff reviewed these proposals and determined that Woolpert Inc. was the most qualified for this project.

Staff has reviewed the original scope of work and reduced the amount of time the consultant will dedicate to working with the stakeholders group. Additionally staff has removed the task of developing design standards from the contract. These changes have resulted in a reduction in the contract from approximately $90,000 to $74,000.

Considerations:

- Cost is within acceptable limits for the scope of the work.
- The money for this project is currently budgeted.
- The consultant will be working with the stakeholders group to make recommendations to Council.

Revisions to these ordinances will address City Council's strategic goals by improving the quality of our water. This goal is stated in the focus area of Natural and Built Environment.

City staff requests that City Council authorize the City Manager to sign a contract with Woolpert Inc. for an hourly rate not to exceed an amount of $74,000 to assist the City of Asheville in updating the Stormwater, Floodplain and Erosion Control Ordinances.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-58. This motion was seconded by Councilman Davis.

In response from Councilman Newman, Ms. Ball said that City staff needs the consultants for their technical expertise.

Ms. Ball responded to Councilman Mumpower's concern about spending $74,000 when he felt that City staff should be able to take a strong look at the existing federal and state models.

In response to Councilwoman Cape, Ms. Ball said that these ordinance revisions will not only cover the City of Asheville, but possibly the extraterritorial jurisdiction area as well.

City Manager Jackson said that what this offers Asheville residents is that we are not looking at an off-the-shelf answer for Asheville. We are asking specialists in the field, who are familiar with the best practices, to look at our specific terrain, our unique grades and slopes, and our unique development patterns to make sure Council has the best advice possible.

Vice-Mayor Jones said that we want the best for the community and that we have a fund set aside to do this very work.

In response to Councilman Freeborn, Ms. Ball said that she does have confidence in her staff, but there is no one that has the specialty in this field, without doing a lot of research and dedicating a lot of time. However, that would indirectly cost the City as much as hiring the consultant.

At 6:26 p.m., Vice-Mayor Jones called the question.

The motion made by Vice-Mayor Jones and seconded by Councilman Davis carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 29 – PAGE 406

B. ORDINANCE NO. 3342 - ORDINANCE DECLARING "SNIPE" SIGNS TO BE NUISANCES, AND AUTHORIZING REMOVAL

City Attorney Oast said that said that this is the consideration of a revised ordinance regulating snipe signs.

During Council's consideration of this ordinance on February 28, several questions were raised, and the matter was referred to the Public Safety Committee. In response to the questions raised, as follows:

Regarding will the ordinance apply to non-commercial signs, yes. It is legally difficult to distinguish between signs based on content. A sign in the right-of-way / safety zone is no less a visual distraction / nuisance because it advertises for a lost dog or a yard sale than a closing out sale at a discount store.

Regarding whether the new ordinance will apply to activities such as neighborhood protests expressed on bed sheets hung from trees or houses, yes, if they are located in the right-of-way / safety zone. However, our Code allows for non-commercial messages to be displayed in all zoning classifications, if they comply with the ordinance requirements for that district. This allows signs, but bed sheets may not comply with applicable size limitations.

He suggested the following solutions: Limit applicability of snipe sign ordinance (and summary removal) to non-residentially zoned areas only. This is where the majority of snipe signs are posted, and where the traffic safety issue is most critical. Other non-nuisance sign code provisions would continue to apply to snipe signs in residential areas.

The question regarding if political signs are covered, he responded yes, if they are in the right-of-way / safety zone. He misspoke at Council's February 28 meeting when he said that political signs were permitted in the right-of-way (he confused them with governmental signs). However, political signs are subject to certain time limitations.

With regard to whether this will increase our budget/resource burden, he responded no. Snipe signs are already illegal and subject to removal, but the process for dealing with them is cumbersome. The proposed ordinance does not create a new regulation, or give us something else to enforce. Rather, it gives us an additional less cumbersome tool to enforce the ordinance. Rather than increasing the enforcement burden, it should make things easier for our code enforcement staff to effectively address a temporary, but nettlesome problem.

The Committee indicated that the issues were addressed satisfactorily, and Planning Director Scott Shuford provided some additional clarification with respect to the logistics of implementing the ordinance.

The Committee recommended that the ordinance be revised to limit its application to non-residential areas only, and be sent back to Council. Accordingly, he have revised the ordinance to reflect that the snipe sign problem is particularly acute in commercial areas, and revised the definition of snipe sign so that it does not apply to signs in residentially zoned areas. Such signs would still be subject to the sign regulations in the Unified Development Ordinance, but would not be classified as nuisance under the proposed ordinance.

In the coming months, staff will do some further work to identify the corridors where the problem is most acute, and may request some additional revisions based on that work.

Considerations:

- Revision restricting ordinance application to non-residential areas.

If Council approves of the proposed ordinance as revised, adoption of it is recommended.

He suggested the definition be amended so that it does not include signs affixed to kiosks, bulletin boards or other structures permitted or constructed by the City and intended for community use.

City Attorney Oast said that some further narrowing of the ordinance may be called for because our code enforcement staff has identified not just the commercial areas but specific corridors where the signs are a particular problem. He would like to ask Council to adopt this ordinance, with the definition amended, and direct staff to come back to Council at some point to report on the progress of how they are doing with the snipe sign ordinance and perhaps ask that it be narrowed so that it only applies to certain corridors.

Ms. June Patterson, representing Stop the Signs, spoke in support of the ordinance showing letters of support from the N.C. Dept. of Transportation, Progress Energy, Coalition of Asheville Neighborhoods, Quality Forward, etc.

Councilman Mumpower was concerned that political signs were not specifically mentioned in this ordinance as being prohibited in the right-of-ways. City Attorney Oast said that there is a specific provision in the sign ordinance (Section 7-13-2 (d) (6)) that deals with the

placement of political signs. Political signs are not allowed in the right-of-way, and if they are, they would be subject to the same snipe sign provisions as any other sign. He reiterated that any sign that is not specifically permitted to be displayed in the right-of-way is prohibited.

When Councilman Mumpower felt the snipe ordinance should specifically reference political signs, City Attorney Oast felt that if we start referring to political signs, we start distinguishing on the basis of content, which is a legal problem. He said we can be more specific in the sign ordinance that political signs are not permitted in the right-of-way.

Mayor Bellamy felt it was important to educate political candidates about these changes, which will be enforced. In addition, she asked that the snipe ordinance be well publicized to advise the public about the changes and strict enforcement as well.

In response to Vice-Mayor Jones about the public taking down signs, City Attorney Oast said that this does not deputize anyone to go out and remove a sign they think is illegal. The issues the City would run into is that they might be construed as agents of the City with attendant liability concerns or they might be trespassing on someone's property. We are hoping that this enables our Code Enforcement Officers to be more efficient in how they do their jobs. We are continuing to explore ways to allow community groups to help us out on this and we will advise Council when we have gotten there.

Councilwoman Cape asked the City for a commitment to place more kiosks and more information areas for the community to communicate with each other.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it will not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3342, with the definition being amended so that it does not include signs affixed to kiosks, bulletin boards or other structures permitted or constructed by the City and intended for community use. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 416

V. NEW BUSINESS:

A. RESOLUTION NO. 06-57 - RESOLUTION AMENDING THE MINORITY BUSINESS PLAN IN ORDER TO UPDATE THE RECENT CHANGES TO THE MINORITY BUSINESS PROGRAM

Minority Business Director Brenda Mils said that this is the consideration of a resolution amending the Minority Business Plan in order to update the recent changes of the Minority Business Program.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan has been amended five times: (1) November 1998 to expand participation in the Mentor-Protégé Program; (2) December 1999 to add the 72-hour delay requirements for "good faith efforts; (3) December 2001 to expand certification to two years; (4) October 2002 to reduce the Minority Business Commission from 13 to 11 members and provide for clarification of the grievance process in the Plan; and (5) September 2004 to make administrative changes and updates to the Plan.

At their meeting on December 1, 2005, the Minority Business Commission recommended that the Plan be amended to reflect the recent changes of the Minority Business Program, which

is no longer a joint agreement between the City of Asheville and Buncombe County but solely managed by the City of Asheville as of October 2005. Ms. Mills reviewed the substantial changes with Council.

City staff recommends City Council adopt the resolution amending the Minority Business Plan.

Ms. Mills responded to various questions from Council, some being, but are not limited to: why did Buncombe County withdraw from the joint program; did Buncombe County equally contribute monetarily to the program; is Buncombe County still working with minority businesses; what did the City accomplish this last year regarding reaching our goals; what is the Minority Business Program's budget; how is the City doing with their stated goals vs. the actual performance; what percentage of our overall business in the City is invested in construction vs. procurement and professional services; when was the last disparity study performed;

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-57. This motion was seconded by Councilman Freeborn.

Councilman Mumpower felt that the City is consistently missing our goals by dramatic proportions. He hoped that over the next year, Council will be shown some progress in our goals or advise Council on how those goals can be achieved.

Ms. Mills explained that when the goals were set for the City, it was through the disparity study, so you can't do a market study just for the City and Buncombe County. You have to use the market at wherever you buy goods and services – you may be comparing goods and services from Chicago, etc. A lot of those goals are outgrown for Western North Carolina. She felt the City is doing an excellent job of opening access to this community of how to do business with the City and County.

Ms. Mills said that she provide Council with the cost of a new disparity study and a report on exactly what the City is buying so Council has a good benchmark as they make policy.

After a brief discussion initiated by Councilwoman Cape in the declaration of policy, City Attorney Oast said that he would review the law with respect to the policy statement and will change if possible.

The motion made by Vice-Mayor Jones and seconded by Councilman Freeborn carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 407

B. RESOLUTION NO. 06-58 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONTRACT WITH HUNTLEY CONSTRUCTION COMPANY INC. FOR CONSTRUCTION OF THE FAIRVIEW ROAD WATER LINE

ORDINANCE NO. 3343 - BUDGET AMENDMENT FOR CONSTRUCTION OF FAIRVIEW ROAD WATER LINE

Assistant City Engineer John Echeverri said that this is the consideration of a resolution authorizing the City Manager to sign a contract with Huntley Construction Company, Inc., in the

amount of $1,054,499, for the project known as Fairview Road Water Line Replacement and approval of a budget amendment, in the amount of $1,083,963, to provide funding for this project.

This project consists of the installation of approximately 8,640 linear feet of eight-inch diameter water line and related appurtenances.

The Engineering Department received and publicly opened bids on Thursday, February 2, 2006, at 2:00 p.m. Four (4) bids were received from Steppe Construction Co., Buckeye Construction, Buncombe Construction and Huntley Construction in the amounts of $1,315,906.80, $1,103,476.00, $1,056,800.39 and $1,054,499.00, respectively. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Huntley Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $1,054,499.

This project totaling $1,083,963 for construction and inspections will be funded in the Water Capital Projects Fund. $759,567 which is currently budgeted in In-Lieu of City Taxes in the FY 05/06 Water Fund Budgeted will be transferred to the Water Capital Projects Fund. The remaining $324,396 will be reprogrammed from the following deleted or obsolete projects in the Water Major Capital Projects Fund. NCDOT Hwy 151 and NCDOT 70/74 were completed below NCDOT's estimate. The EPA Grant (for an Emergency Response Plan) and Pesticide Mixing Stations Project were completed below our engineer's estimate. The Master Plan Project (for Water Line Oversizing) is being deleted.

Huntley Construction Company, Inc., has performed several projects of this nature in the past in a satisfactory manner.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Considerations of adopting a resolution authorizing the City Manager to execute this contract are as follows:

- The execution of this contract will allow the City of Asheville Water Resources Department to continue upgrading old and small diameter water mains in the water system;
- The bid amount of $ 1,054,499.00 for the construction of the Fairview Road Water Line Replacement is equitable and reflects the increase in market prices experienced by the piping industry.
- Replacement of this water line will enhance domestic and fire protection service for a service area extending from Sweeten Creek Road to Bleachery Boulevard, along Fairview Road. Construction of this sewer line is in line with Goal # 1 under the Natural and Built Environment focus area of the Strategic Operating Plan of the City of Asheville.
- The only foreseeable disadvantage of adopting a resolution authorizing the City Manager to execute this contract is the temporary land and traffic pattern disturbances along the proposed construction corridor.

City staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with Huntley Construction Company, Inc., in the amount of $ 1,054,499.00,

for the project known as Fairview Road Water Line Replacement as well approve a budget amendment to provide funding for this important project.

City Manager Jackson said that he has asked the Chief Financial Officer to go through all of the water capital accounts and rather than bring Council these reallocations piece-meal, he would like a comprehensive review of all the projects. Where we have projects that are completed. the available funds should move into a capital reserve for Council to reallocate or to remain in that reserve for these types of purposes.

Mayor Bellamy said that a lot of residents will be impacted as a result of this project and she instructed City staff to do a special outreach to the citizens, including the phone system, newspaper and television. In addition, she instructed staff to make sure that the contractor is well aware of the need to complete the work within the 120 days.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they will not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-58. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 408

Councilman Mumpower moved for the adoption of Ordinance No. 3343. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 420

VI. OTHER BUSINESS:

Councilman Mumpower thanked groups and individuals for their work and contributions on the Top-A-Stops

Mayor Bellamy urged people in our community to keep Asheville clean. She invited the community to join with the City in a community clean-up event in cooperation with the N.C. Dept. of Transportation and the Chamber of Commerce. She would advise the public when the dates and times are set,

Upon inquiry of Councilman Davis regarding the number of people who are damaging their cars due to traffic islands, City Manager Jackson said that the Chief of Police and Traffic Engineer are putting together a report to bring back to Council on traffic calming, their observations on what it has and has not accomplished, and practices with other jurisdictions. It was the consensus of Council that the City Council Public Safety Committee review this report.

Councilwoman Cape felt the City should be involved in a community slow-down effort.

Upon inquiry of Councilman Newman, Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that her Committee will be discussing possible consolidation or dissolution of existing committees.

The following claims were received by the City of Asheville during the period of February 24 – March 2, 2006: John Madden (Streets), Larry Ray/Mission Hospital (Police) and Ashley St. Martin (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton felt City Council should establish a committee to assure the achievement of quality public education in Asheville.

Ms. Karen Snow, resident at 346 Reed Street, said that over the past 20 years, permitted development of commercial properties all around the affordable housing neighborhood, combined with the lack of upgrades to the City storm water drainage system in the area, has resulted in a serious damaging impact to the homes on Reed Street. She requested Council (1) to instruct City staff to re-attach and stabilize the section of pipe that has become disconnected behind her house at 346 Reed Street; and (2) review the situation concerning the current project recently permitted above this block of Reed Street. Mayor Bellamy asked that the City Manager and City Attorney report back to Council in an open session.

Mr. Zev Friedman talked about the need for improved bicycle infrastructure planning. It was the consensus of Council to refer this matter to the City Council Public Safety Committee and instructed the City Manager to provide Mr. Friedman with some existing information.

Mr. Steve Arpin talked about sustainable development, especially land use planning, compact building with walkable distances and green spaces in the city as a pattern of development that is a wise alternative to urban sprawl. Mayor Bellamy said that a task force is being formed and as the City moves forward that applications for that Task Force will be sought.

Mr. David Herbert talked about the need for aggressive enforcement of the stormwater ordinance.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:56 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – March 21, 2006- 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Bellamy asked for a moment of silence for Mr. Kevin Wilson, Mr. John Van Dyke, Staff Sergeant Joe Ray and Sergeant Kevin Akins.

STATE OF THE AIRPORT PRESENTATION

Mr. David Edwards, Airport Director, reviewed with Council the Authority's mission, an overview of the Airport, financial information of Fiscal Year 2002- 2006, passenger traffic growth, Airport terminal improvements, other Airport projects; Airport services; and the future development phases and costs. He said that key objectives include (1) fund the future development program as a pay-as-you-go program; no local tax dollars or long-term debt financing will be used; (2) promote general aviation and commercial air travel from and to Asheville and Western North Carolina; (3) seek additional air service options for both the business and leisure traveler; and (4) seek aviation and non-aviation related business development opportunities.

Mr. Edwards and Vice-Chair Jim Ellis responded to various questions from Council,

Discussion surrounded an independent airport authority.

Upon inquiry of Councilman Freeborn, Mr. Edwards said that the total assets of the Airport are approximately $55 Million, which is a combination of buildings, land and equipment.

Councilman Freeborn questioned if Asheville removes itself from owning the Airport, would we be losing that money and would it affect our bond rating. City Manager Jackson said that if Buncombe County, the City Council and the Airport Authority were interested in pursuing that independent authority, we would want to explore the pros and cons. He said that the conditions under which, he believed, Council would entertain a self-supporting airport would be with some compensation back to the City for their assets – some kind of long-term plan of payment and some review/research/analysis of alternative structures to replace what is in place now. To speak to how that might be structured and what those levels of compensation might be would be a matter for a joint mutual study group to entertain. In his discussions with the Buncombe County Administrator and Mr. Edwards, there was consensus about the amount of work necessary, e.g., financial feasibility, governance structure, sensible alternative models, legal considerations, previous bond covenants, advantages and disadvantages from a regulatory standpoint with the Federal Aviation Administration, etc. They envisioned a 6-month study process to get to the point where there would be a serious report and potential policy consideration. During this process, preliminary contacts would be made with Henderson County, the Federal Aviation Administration, major stakeholders at the Airport, etc. He asked for Council's direction to begin this feasibility work at a staff level so that Council might be in a position to send the request to the General Assembly.

Vice-Mayor Jones was interested in seeing the analysis report but stressed that it was a courageous act on the part of the City to step out there when the Airport was built for not only Asheville, but the entire region.

Councilman Newman was open to obtaining additional information on this, but felt there are several other opportunities for regional cooperation, e.g., Civic Center, recreational services, water issue, etc., and felt Council might want to chose on which regional cooperation presents the best opportunities.

Because City Council requested more time before they commit to that feasibility process, it was the consensus of Council to bring a resolution forward at a formal meeting in April, 2006, authorizing City staff to explore the feasibility of creating an independent airport authority.

REPORT FROM CHAIRS OF POLICY COMMITTEES

Revenue & Finance

Councilman Newman, Chair of the Revenue & Finance Committee, reviewed with Council when the Revenue & Finance Committee's regularly scheduled meetings will be held and updated Council on the latest actions and discussions of the Committee, some being, but are not limited to: how the Buncombe County revaluation will affect City taxpayers; the tax rate; infrastructure and service needs; fees and charges; revenue neutral budget; and potential revenue sources.

Public Safety

Councilman Mumpower, Chair of the Public Safety Committee, reviewed with Council when the Public Safety Committee's regularly scheduled meetings will be held and updated Council on the latest actions and discussions of the Committee, some being, but are not limited to: City-County negotiations on consolidated dispatch center; manpower – retention and compensation; legislative priorities on judicial system funding and structured sentencing; new district deployment system; take-home car process; and emergency response vehicles..

Housing & Community Development

Vice-Mayor Jones, Chair of the Housing & Community Development Committee, reviewed with Council when the Housing & Community Development Committee's regularly scheduled meetings will be held and updated Council on the latest actions and discussions of the Committee, some being, but are not limited to the allocation of $1.9 Million of Community Development Block Grant Funds; revisit the Housing Trust Fund allocation process; revisit some of the out-of-the-box innovative ideas for increasing affordable housing stock; and city-owned property.

Planning & Economic Development

Councilman Davis, Chair of the Planning & Economic Development Committee, reviewed with Council when the Planning & Economic Development Committee's regularly scheduled meetings will be held and updated Council on the latest actions and discussions of the Committee, some being, but are not limited to form-based codes, the Unified Development Ordinance, the hillside/hilltop ordinances, the West End/Clingman Avenue Corridor, the Merrimon Avenue Corridor Plan, river development, and also city-owned property.

2006-07 BUDGET PLANNING

Overview/Update/Schedule

Chief Financial Officer Ben Durant said that the purpose of this report is to give an overview and update of the current status of the budget.

He said that planning for the Fiscal Year 2006-2007 budget began in January with a projected budget gap of approximately $2.6 million. Staff has made significant progress toward closing this gap since then.

Guiding principles for staff development of the budget are as follows: resources are limited; must prioritize programs and services; core services must be maintained; evaluate a market-competitive compensation plan; address strategic initiatives as resources allow; assume a revenue neutral tax rate; use cost reduction and revenue enhancement strategies; and development multi-year approach to financial planning.

Implications of a revenue neutral scenario include: unable to fully fund strategic initiatives; unable to effectively address challenges of employee recruitment/retention/ compensation; unable to effectively address growth demands; may require reduction/elimination of existing services; and public demand for service exceeds available revenues.

Potential gap closing strategies include budget reductions of (1) across-the-board departmental reductions; (2) delay/reduction in capital purchases; (3) reducing general fund contingency; (4) reduction of existing programs/services: (a) non-core services; (b) outside agency funding; and (c) low priority strategic initiatives; and (5) re-engineering proposals for greater efficiency.

Various revenue enhancement strategies, including adjusting the business privilege license fees, extending development fees into the extraterritorial jurisdiction area. Increasing cost recovery for special events, greater cost recovery for fee-based services and sale of property are being developed and will be discussed in detail with the Revenue and Finance Committee.

Staff is also developing various "belt-tightening" strategies, including delaying/reducing capital equipment purchases, reducing the general fund contingency budget and reducing various consultant contracts. More aggressive strategies being examined include reducing contributions to outside agencies and subsidies to other funds. Staff's emphasis in balancing the budget has been to provide sufficient funding for existing programs and services. No provisions at this point have been made for new strategic initiatives. Staff will provide more detail on these recommendations in the upcoming weeks.

Mr. Durant responded to various questions/comments from Council.

Growth Management – Planning, Building Safety, Engineering

Chief Financial Officer Ben Durant said that Asheville is currently experiencing significant economic growth, which is placing increasing demands on our ability to manage the development process and maintain our public infrastructure assets. He used various graphs that illustrated current growth trends in Asheville relative to resources available to manage our growth and invest in public infrastructure. Resources available for growth management and investment in infrastructure in general have not kept pace with recent growth pressures.

Councilman Newman said that one way to address the Planning Department's major workload is to hire some additional staff, but there might be another way of addressing that by streamlining some of the Planning Department's processes so a full-time person can handle more caseload than they have in the past.

Strategic Initiatives Discussion

Assistant City Manager Jeff Richardson said that at the City Council's February 21, 2006, worksession, the City Manager indicated that staff would be bringing forward the City Council

draft two-year strategic initiatives that were brought forward individually by City Council members at the January 20-21 board retreat. He reviewed the compilation of new and old initiatives that were listed for future consideration and discussion by City Council.

During the Fiscal Year 2004-05 budget process, City Council adopted its current Strategic Operating Plan. Seven focus areas and accompanying short and long range goals were identified and adopted accordingly. These goals have been woven into each respective department's work plans accordingly, which has served to guide City staff for the past two budget cycles. Most recently, staff has received additional six month to two year priorities from each Council member as mentioned above. He reviewed with Council these priorities which allow City Council to consider any existing priority in coordination with the new initiatives.

In coordination with the review and adoption of the Fiscal Year 2006-07 budget process, City staff is prepared to execute City Council's short range and long range strategic priorities by assuring available resources are aligned with City Council's final direction.

Councilman Davis felt that the review of the 2025 Comprehensive Plan may need to be moved to the longer-term goals.

At the request of Vice-Mayor Jones and consensus of Council, Mr. Richardson was instructed to find the appropriate place in the short-term goals of developing a regional approach to flood management, thinking long-term.

Ms. Lauren Bradley, the City's Public Information Officer, updated City Council on the citizen communication and customer service enhancements by explaining the outreach and participation; e-communications improvements; and customer service enhancements.

Compensation Framework Proposal

Human Resources Director Belinda Odom said that in developing appropriate employee pay and reward systems, organizations must determine the best fit for their particular organizational mission and culture. Once City Council approves such a philosophy the detailed work of implementation begins. Human Resources will facilitate additional management and employee information gathering to determine appropriate next steps within the established philosophy.

Mr. Bruce Lawson of Fox, Lawson Inc. presented a philosophy to City Council and asked for City Council to give policy direction on these recommendations.

Existing challenges include three major issues: recruitment challenges, retention problems and pay compression.

Motivation includes monetary rewards, such as benefits, wellness programs, etc.; intangible rewards, such as recognition, flexible scheduled, etc.; but, an appropriate base salary is the necessary starting point.

The process includes reviewed current pay plan, policies and procedures; interviewed department directors; reviewed input from employees focus groups; analyzed data; and make recommendations to Council on philosophy.

He said that before we go further, we need Council's guidance in the form of a compensation philosophy.

Basic premises: (1) as reaffirmed by Council in the last strategic plan, the mission of the City is to deliver an excellent quality of service to enhance the quality of life of its citizens; (2) consistent with the practice of City Council and administration for the last seven years, the City is striving to fulfill its potential as a high performance organization; and (3) any proposed system is affordable. He questioned if Council agrees that these premises are the correct framework for the compensation philosophy for the City of Asheville.

Implications are that the City must attract (recruit), motivate and retain productive employees who are willing and able to provide excellent service, and the City needs more flexibility in structure, policies and employee job classifications.

Competitive markets include local public and private employers; statewide and local public employers; and regional and national public employers.

He asked if Council agrees that these are the appropriate markets against which the City must compete for talent.

Market placement considerations are (1) natural grandeur of Western North Carolina and the draw of a vibrant, diverse community make this a desirable place to live and work; and (2) high cost of living (especially housing) and low availability of job opportunities for family members are challenges.

Regarding the market rate, it is (1) calculated by analyzing salaries within the appropriate competitive market for each position; and (2) adjusted based on the cost of labor (very high paid areas and very low paid areas do not skew the data). He reviewed a chart of the city salaries vs. the market. 20% are above the market by more than 5%; 25% is near market; and 55% is below market by more than 5%.

He explained the market = target pay for full performance; new hire pay = based on experience; and movement from new hire to market = based on progress toward full performance. He used charts that showed samples of non-public safety and samples of public safety.

Regarding retention, it is (1) providing excellent service requires seasoned professionals; and (2) replacement costs are expensive.

Implications are that (1) the City cannot afford to be a training ground; (2) to retain good employees, salaries must not be significantly out of step with the competitive market; and (3) this system will specifically improve pay for the City's lowest paid employees and the lower ranks in police and fire.

Compression is a market-based system that will alleviate the City's internal compression over time.

Regarding affordability, (1) phased transition over 3 to 5 years allows for affordable implementation; and (2) by reducing turnover the City should save significant recruitment and training costs.

Cost of implementation is as follows: (1) Year 1: $450,000 (+1% to salaries); (2) Year 2: $450,000 (+1% to salaries); (3) Year 3: $450,000 (+1% to salaries); (4) Year 4: $450,000 (+1% to salaries); and (5) Year 5: $450,000 (+1% to salaries). Total cost over 5 years will be $2.25 Million. This adds 0.4% to annual operating budget. He felt the first year would be Police, Fire and Engineering.

It is Fox Lawson's recommendation that Council support a market-based compensation system. If Council concurs with that recommendation, then (1) adoption of compensation philosophy; (2) implementation plan; (3) employee communications plan; and (4) budgetary decisions.

Mr. Lawson, City Manager Jackson and Chief Financial Officer Ben Durant responded to various questions/comments from Council, some being, but are not limited to: how does the market base deal with merit pay; how was the 5-year implementation schedule arrived at; will the City lose ground over that five years; does the City have a policy for training and commitment; at what time does the Council review the benefit package; what is the definition of the market and how is that formula developed; can the City remain revenue neutral and still proceed with the recommendation of Fox Lawson; interest in looking at other revenue options; and need for a better understand of who is impacted.

Mayor Bellamy asked for City staff to provide to Council everything that staff is cutting to meet the needs, like positions delayed, equipment purchases delayed, consultants; etc.

Vice-Mayor Jones was open to the plan, but felt strong about being revenue neutral. She stressed that Asheville should look at our annexation process to grow our tax base as Asheville citizens are already paying more than their fair share.

Councilman Mumpower supported being revenue neutral, noting that our biggest hole is a result from Sullivan Acts II and III. He felt staff should bring Council options so they can choose.

Mayor Bellamy summarized that City Council pretty much agrees with the study presented and the need for its implementation. How we do that is the question. Council would like for City staff to give Council a menu of options on how to best get to that place, giving Council different levels of cuts in our budget and letting Council know where all those cuts will be, as well as the impact of those cuts. Council is open to seeing deeper cuts than maybe staff is proposing. Council is open to seeing the revenue enhancement strategies, as well as options to not go entirely revenue neutral. Once this information is received by Council, Council will then decide how to proceed. She requested a preview of the overview of the rest of the budget as soon as possible.

Councilman Newman felt that Council can't get there by just raising the property taxes. Council also has to look at consolidating certain city/county functions to reach that goal. Another idea is that we need some new progressive revenue options.

City Manager Jackson said that City staff will come back to Council in approximately two weeks with a rough cut of the budget and a menu that closes the gap.

After a short discussion about the sales tax distribution by Buncombe County, it was the consensus of City Council to ask City staff to prepare a resolution requesting Buncombe County to consider a more fair and equitable sales tax distribution.

Budget Direction

After discussion, it was the consensus of City Council to hold the following budget worksessions, all to begin at 3:30 p.m. – 5:30 p.m.: Monday, May 8, 2006; Tuesday, May 16, 2006 (with the regular worksession starting at 3:00 and the budget worksession beginning at 3:30 p.m.), and Monday, May 22, 2006. These worksessions will be held in the Council Chamber, located on the 2nd Floor of the City Hall Building, Asheville, N.C., with each worksession being televised.

In addition, it was the consensus of City Council to cancel the 5th Tuesday community meeting.

At this time, Mayor Bellamy announced a short break.

EXTRATERRITORIAL JURISDICTION AREA & JOINT PLANNING AREA REPORT

Mayor Bellamy said that this report is being pulled from the worksession agenda at this time.

RESOLUTION NO. 06-59 – RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONSERVATION EASEMENT WITH RIVERLINK AT AZALEA PARK

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution authorizing the Mayor to sign a conservation easement at Azalea Park with RiverLink Inc. for stream bank restoration and protection.

The Parks and Recreation Department and RiverLink, Inc., have been working together to develop a conservation easement in conjunction with the Clean Water Management Trust Fund for approximately 27.09 acres located along the Swannanoa River within the Azalea Park. This particular easement will allow for restoration and rehabilitation for the stream bank along the Swannanoa River. The plan will allow a contractor to perform stream restoration and stabilization measures within the riparian buffer easement area which will include removal of a number of trees, laying back the bank of the river, and providing an extensive landscape plan for vegetation in the disturbed area. Funds for this project are being provided through the Clean Water Management Trust Fund through a grant secured by RiverLink. The overall management of this project will be the responsibility of RiverLink working in conjunction with the City of Asheville. This project will occur without disruption to the existing park features and will allow for continued development of the master plan that was approved by City Council for this park. In addition, this project will not in any way affect the beneficial fill area that is currently being used by the City of Asheville.

Pros:

- This project will stabilize the stream bank along a large portion of the Swannanoa River.
- This project will allow for a conservation easement of approximately 27.09 acres for protection for future generations.
- This stream bank restoration will also assist in future flooding events and assist in minimizing damage downstream from this area.
- This project will also allow for increased protection of fish and wildlife along this stretch.

Cons:

- Construction will result in the removal of a number of very large trees near the bank of the Swannanoa River within the park area.
- Construction will be occurring while the soccer complex is in use, and it will be necessary for protection measures to occur for the safety of all participants.

This project relates to City Council's Strategic Plan in regard to protection and improvement of water quality in the region.

City staff recommends City Council authorize the Mayor to sign a conservation easement between the City of Asheville and RiverLink Inc. within Azalea Park.

Upon inquiry of Councilman Mumpower, Mr. Brinson said that construction should begin relatively soon and be completed by early summer.

Councilman Mumpower expressed concern of taking formal action at the worksessions.

Vice-Mayor Jones moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Davis and carried unanimously.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-59. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 409

MISCELLANEOUS

Councilman Freeborn commented on the good educational experience he encountered on a Police Department ride-along.

Councilwoman Cape invited the public to a Citizens/Police Advisory Committee meeting on Thursday, March 23, 2006, at 7:00 p.m. at the North Asheville Library. This meeting will give the public an opportunity to understand the new police districting system.

Councilman Mumpower thanked the Church of Latter Day Saints and volunteers on completing the third Top-A-Stop. He also reminded the public of two seminars which will be taking place on March 28, 2006.

CLOSED SESSION

At 7:00 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The property is located on Amboy Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (3) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Councilman Davis and carried unanimously.

At 8:45 p.m., Councilwoman Cape moved to continue the closed session until Tuesday, March 28, 2006, at 4:00 p.m., in Room 209 of the City Hall Building, Asheville, N.C. This motion was seconded by Councilman Freeborn and carried unanimously.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:45 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday, - March 28, 2006 – 4:00 p.m.

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman Brownie W. Newman; City Manager Gary W. Jackson; and City Attorney Robert W. Oast Jr.

Absent: Vice-Mayor Diana Hollis Jones; Councilman R. Carl Mumpower (hosting Asheville-Buncombe County Drug Commission Program)

At 4:00 p.m., Councilman Freeborn moved to go into closed session in order to continue the closed session discussion on the following item from the March 21, 2006, meeting: To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville and State of North Carolina. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Davis and carried unanimously.

At 4:50 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

Tuesday – March 28, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower (arrived at 5:26 p.m.); Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The North Buncombe High School Color Guard led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING APRIL, 2006, AS "CHILD ABUSE PREVENTION MONTH"

Mayor Bellamy read the proclamation proclaiming April 2006 as "Child Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Mr. Bill McGuire, Director of Child Abuse Prevention Services Inc., who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

City Attorney Oast requested that Consent Agenda Items "D" and "F" be removed from the Consent Agenda for further clarifications.

City Manager Jackson requested that Consent Agenda Item "K" be removed from the Consent Agenda.

Mayor Bellamy requested Consent Agenda Item "M" be removed from the Consent Agenda for an individual vote due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 14, 2006, AND THE WORKSESSION HELD ON MARCH 21, 2006

B. RESOLUTION NO. 06-60 - RESOLUTION OF INTENT TO CLOSE AN UNOPENED RIGHT-OF-WAY OFF CARROLL AVENUE AND SETTING A PUBLIC HEARING ON APRIL 25, 2006

Summary: The consideration of a resolution of intent to close an unopened right-of-way off of Carroll Avenue and setting a public hearing for April 25, 2006.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mr. Martin Barnes of Brooks & Medlock Engineering, PLLC representing the property owner Farwood Properties, Mike Farmer, President of Farwood Properties, has requested the City of Asheville to permanently close to the public an unopened right of way off of Carroll Avenue as shown on Plat Book 6, Page 6, Block "C" in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this unopened right-of-way is not a City maintained street. Closure of this unopened right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There is one parcel that abuts this section of right-of-way, owned by Farwood Properties. It is identified by PIN No. 9648.07-68-1457.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution setting a public hearing for April 25, 2006, to close the unopened right-of-way off Carroll Avenue.

RESOLUTION BOOK NO. 29 – PAGE 410

C. RESOLUTION NO. 06-61 - RESOLUTION AUTHORIZING CRAFTSMAN CIRCLE AND A PORTION OF ROLLING TERRACE IN CHUNNS COVE TO BECOME PUBLICLY MAINTAINED STREETS

Summary: The consideration of a resolution to accept Craftsman Circle and a portion of Rolling Terrace in Chunns Cove as a City maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Craftsman Circle and a portion of Rolling Terrace are developer constructed streets that have an average paved width of 22 feet and a length of 0.29 and 0.06 miles respectively for a total length of 0.35 miles. The City of Asheville staff inspected the construction of these roadways and certified they were built in accordance with City standards.

Following City Council's approval of this resolution, these streets will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council adopt the resolution accepting Craftsman Circle and a portion of Rolling Terrace as a City maintained streets.

RESOLUTION BOOK NO. 29 – PAGE 411

D. RESOLUTION ACCEPTING BLEACHERY BOULEVARD IN EAST ASHEVILLE AS A CITY MAINTAINED STREET

This item was removed from the Consent Agenda for further clarification.

E. RESOLUTION NO. 06-63 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT DONATION OF REAL PROPERTY ON SWANNANOA RIVER ROAD FOR PARK AND GREENWAY AND NAMING SAID PARK "RIVERBEND PARK – A MEMORIAL TO OFFICER JEFF HEWITT"

Summary: The consideration of a resolution authorizing the Mayor to accept a donation of real property on the Swannanoa River from Home Development River Bend LLC (Home), for the City of Asheville parks and greenway system and naming the park: "Riverbend Park ~a memorial to Officer Jeff Hewitt~".

The City of Asheville is interested in establishing and maintaining parks and greenway systems throughout the corporate limits of the City of Asheville and in particular along the Swannanoa River. Home has offered to donate an approximately 11± acre parcel on the Swannanoa River Swannanoa River (PIN Nos. 9658.15-54-1298; portion of 9658.14-44-8292; portion of 9658.15-53-8225; and portion of 9658.15-53-9371) to become part of the City's parks and greenway system.

The subject property lies between Swannanoa River Road and the Wal-Mart parking lot with most of the property between the river and the parking lot. It extends along the river bank from the I-240 right of way in an east then southeast direction to a point about It is level to gently sloping and follows a natural bend in the river making it an attractive location for recreational purposes. It is grassy and the bank of the river in this area for the most part has a steep approach to the water. The property is improved with a paved trail and picnic tables and is easily accessed from the parking lot.

The positive aspects of the donation are:

- The improvements to the park have been installed by the donor.
- The proposed park is consistent with the greenway master plan.

- It will preserve in perpetuity green space along the river as a buffer to the developed area.
- It is an efficient use of resources both public and private, because the City will own property best suited to the greenway while property appropriate to the development will remain in private ownership.
- The greenway was a requirement of the site development approval by Council.

The negative aspects are:

- The City will incur the cost of maintaining the park at an approximate cost of $7,500 per year
- Land will be removed from the tax base at an estimated tax value of $185,600.

We have on file an Environmental Site Assessment and a copy of a "no further action" letter issued by the N. C. Department of Environmental and Natural Resources. A preliminary survey has been completed and final revisions are in progress. The Parks and Recreation staff have reviewed the proposed donation and found that the property is appropriate for the parks and greenways system.

This action ties in with City Council's Strategic Operating Plan in the Focus Area: Natural and Built Environment, Goal 1, Objective C, Task #1 – Require new development projects to dedicate easements for greenways included in the City's Greenway Master Plan.

City staff recommends City Council adopt the resolution authorizing the Mayor to accept the donation of real property from Home and naming the park: "Riverbend Park ~a memorial to Officer Jeff Hewitt~".

RESOLUTION BOOK NO. 29 – PAGE 415

F. RESOLUTION APPOINTING OFFICERS OF PINE PROPERTIES INC.

This item was removed from the Consent Agenda for further clarification.

G. RESOLUTION NO. 06-65 - RESOLUTION APPOINTING MAGDALEN BURLESON AS CITY CLERK ON AN INTERIM BASIS

Summary: The consideration of a resolution appointing retiring City Clerk Maggie Burleson as City Clerk, and a resolution authorizing the City to enter into a contract with Ms. Burleson for that purpose.

Current City Clerk Maggie Burleson is retiring effective March 31, 2006. Council has not selected her replacement, but is in the process of doing so. However, there will be a continuity gap between Ms. Burleson's retirement date, and the date when the new clerk starts.

North Carolina law, N.C.G.S. 160A-171, provides that "there shall be a city clerk" to perform a certain designated functions, so the office should not remain vacant. At Council's request, Ms. Burleson has consented to continue as clerk in an interim capacity until the new clerk is on the job. She has agreed to do this at her current compensation, plus an additional amount to cover costs for the City's health insurance, previously part of the standard benefits package.

The first resolution appoints Ms. Burleson as City Clerk on a contracted basis, effective March 31, 2006, at 5:00 p.m., until the new city clerk is on the job.

The second resolution authorizes the Mayor to sign a contract with Ms. Burleson setting out the terms and conditions of her employment as City Clerk on an interim basis.

The appointment and the contract are both terminable at the will of Council; however, the contract contains some provisions for notice of any premature termination. The contract also contemplates that Ms. Burleson may be retained in a consulting capacity even after the new clerk is on the job, but any such service would be pursuant to a separate agreement.

If Council approves of the appointment of Ms. Burleson as city clerk on a contracted, interim basis, adoption of the resolutions is recommended.

RESOLUTION BOOK NO. 29 – PAGE 417

H. RESOLUTION NO. 06-66 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A CONTRACT WITH MAGDALEN BURLESON TO SERVE AS CITY CLERK

Summary: See Consent Agenda Item "G" above.

RESOLUTION BOOK NO. 29 – PAGE 418

I. RESOLUTION NO. 06-67 - RESOLUTION ESTABLISHING THE TERMS OF THE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

Summary: The consideration of a resolution establishing terms of Economic Development Advisory Committee

In 2002, the City Council adopted the Sustainable Economic Development Strategic Plan, and established a citizen-led task force for providing the expertise of the Plan, and established an initial duration the task force of 3 years. In May of 2003, the task force was reauthorized for an additional two year period. In September of 2003 the task force became a standing committee of City Council, and was directed to make recommendations to the Council as to its structure.

The City Council Boards and Commissions Committee has reviewed the membership of 19 of the EDAC, and recommends staggered terms of 3 years, commencing March 1, 2006.

If Council agrees with the proposed structure of the EDAC, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 29 – PAGE 419

J. RESOLUTION NO. 06-68 - RESOLUTION MODIFYING THE 2006 CITY COUNCIL MEETING SCHEDULE TO (1) ADD TWO BUDGET WORKSESSIONS BEGINNING AT 3:30 P.M. ON MONDAY, MAY 8, 2006, AND MONDAY, MAY 22, 2006, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE, N.C.,; AND (2) CANCEL THE COMMUNITY MEETING SCHEDULED FOR TUESDAY, MAY 20, 2006

RESOLUTION BOOK NO. 29 – PAGE 421

K. BUDGET AMENDMENT TO FUND WEB SITE DESIGN AND CONTENT MANAGEMENT SOFTWARE IMPLEMENTATION SERVICES

This item was removed from the Consent Agenda for individual discussion.

L. RESOLUTION NO. 06-69 - RESOLUTION APPOINTING A MEMBER TO THE DOWNTOWN COMMISSION

Summary: Mr. Andy Archie, member of the Asheville Downtown Commission has resigned, thus leaving an unexpired until December 31, 2006. This resolution will appoint Mr. Guadalupe Chavarria, 84 Walnut Street, Unit A, Asheville, N.C., as a member of the Asheville Downtown Commission to serve the unexpired term of Mr. Archie, term to expire December 31, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 422

M. RESOLUTION AUTHORIZING OWENS BELL LANE TO BECOME A PUBLICLY MAINTAINED STREET

This matter was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 06-62 - RESOLUTION ACCEPTING BLEACHERY BOULEVARD IN EAST ASHEVILLE AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept Bleachery Boulevard in East Asheville as a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Bleachery Boulevard was constructed as part of the Riverbend Development. It has an average paved width of 24 feet and a length of 0.94 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Bleachery Boulevard will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pro:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Bleachery Boulevard in East Asheville as a City maintained street.

City Attorney Oast said that the City has encountered a few minor problems with completing the plat that is supposed to be recorded as cited in the resolution. He asked that the

resolution be amended to reflect the fact that (1) the right-of-way for Bleachery Boulevard does not include any portion of the current right-of-way for Stevens Street, which is anticipated to be closed at a later time; and (2) the resolution shall be effective upon the recordation of the plat for RiverBend Market Place in Buncombe County Registry, which plat shall comply with the above-stated condition as to Stevens Street, as approved by the City Attorney.

Vice-Mayor Jones moved for the adoption of Resolution No. 06-62, as amended by the City Attorney. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 413

RESOLUTION NO. 06-64 - RESOLUTION APPOINTING OFFICERS AND BOARD OF DIRECTORS OF PINE PROPERTIES INC.

Summary: The consideration of a resolution appointing officers to the Pines Properties, Inc. (Jake Rusher Estate).

In 1999, the City reached an agreement with Jake Rusher regarding the acquisition of the Royal Pines property, now Jake Rusher Park. As part of that agreement, the City was also a main beneficiary of Mr. Rusher's estate. Mr. Rusher died in October of 2003, and his estate has been in administration ever since, complicated by some handwritten codicils that required resolution in court.

Now that these issues have been resolved, distribution from the estate has begun. Earlier this month, we received the corporate stock of Pines Properties, Inc., which was Jake Rusher's corporate identity, and the business entity that ran the Pines when it was in operation. The City of Asheville is now the sole stockholder of the Pines Properties, Inc.; the main asset of which is Mr. Rusher's Rutherford County farm, fulfilling his promise to leave the property to the City to make the City whole for purchasing the Jake Rusher Park. Other assets include some personal property at the farm; several items of personal property including some cash distributions, were disbursed following the judicial ruling on the handwritten codicils.

Since the City is the owner of the stock of Pines Properties, Inc., action needs to be taken to appoint officers of the corporation. This will enable the City to proceed with disposition of the corporation's assets, and the wrapping up of its affairs. A resolution has been prepared appointing the following corporate officers, based on the operational areas that will be concerned with the disposition of the assets:

President – Irby Brinson
Vice President – Jeff Richardson
Secretary/Treasurer – Ben Durant

Regular reports regarding the corporation's activities, including the wrapping up of its business activities and distributions, will be provided to Council.

Considerations:

- Appointment of officers will facilitate the disposition of the Rusher estate, fulfilling Mr. Rusher's promise to the City.

If Council approves of the proposed officers, adoption of the resolution is recommended.

City Attorney Oast asked that the resolution be amended to reflect that the same individuals are also appointed as the board of directors for the corporation

Vice-Mayor Jones moved for the adoption of Resolution No. 06-64, as amended by the City Attorney. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 416

BUDGET AMENDMENT TO FUND WEB SITE DESIGN AND CONTENT MANAGEMENT SOFTWARE IMPLEMENTATION SERVICES

City Manager Jackson asked that this item be removed from consideration at this meeting in order to give him the opportunity to have further discussions with local firms to make sure that we are aware of their capabilities and they are aware of our needs. He asked that this item be rescheduled.

Councilman Freeborn moved to postpone this matter indefinitely. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION NO. 06-70 - RESOLUTION AUTHORIZING OWENS BELL LANE TO BECOME A PUBLICLY MAINTAINED STREET

At the request of Mayor Bellamy, Councilman Freeborn moved to excuse Mayor Bellamy from voting on this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

At this time, Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Summary: The consideration of a resolution to accept Owens Bell Lane in the West End/Clingman Avenue area as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Owens Bell Lane is a developer-constructed street that has an average paved width of 20 feet and a length of 0.10 miles. The City of Asheville staff inspected the construction of this roadway and certified they are built in accordance with City standards.

Following City Council's approval of this resolution, this street will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council adopt the resolution to accept Owens Bell Lane in West End/Clingman Avenue area as a City maintained street.

Councilman Newman moved for the adoption of Resolution No. 06-70. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 423

Vice-Mayor Jones continued to conduct the meeting as Mayor Bellamy has a conflict of interest on the following public hearing regarding the conditional use permit for Crowell Park Apartments.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON CROWELL ROAD, NEAR SMOKY PARK HIGHWAY AND I-40, KNOWN AS CROWELL PARK APARTMENTS

ORDINANCE NO. 3344 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT LOCATED ON CROWELL ROAD, NEAR SMOKY PARK HIGHWAY AND I-40, KNOWN AS CROWELL PARK APARTMENTS

Councilman Freeborn moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Vice-Mayor Jones opened the public hearing at 5:13 p.m.

Council members disclosed that they had either attended the Planning & Zoning Commission public hearing on this matter or had read proposals about this project. However, they would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for property located on Crowell Road near Smoky Park Highway and I-40, known as Crowell Park Apartments, for a proposed 73-unit apartment complex (Attachment to City Exhibit 3 – Aerial Map).

The project is supported by a number of goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes the existing zoning on the lot to create a sustainable high-density residential development within the City's ETJ (Extraterritorial Jurisdiction). It is also located within close vicinity to potential employment centers, restaurants and shopping centers. A disadvantage to this project is the absence of public transportation, which is not available in this area. The closest transit stop is more than 2 miles away near the NCDOT driver's license office off of Smokey Park Highway.

This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2005-2010. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median

income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs.

Provides an increased supply of affordable housing by providing up to 73 affordable rental units.

The applicants (the Estate of Harlan L. Barnes & Murphy-Wilson Investments, Inc.), being represented by Mountain Housing Opportunities, has requested a conceptual site plan review for a Level III multi-family project to allow for the construction of a 73 unit affordable housing development. The project site is located off of Crowell Road and consists of 2 parcels totaling 3.59 acres (Attachment to City Exhibit 3 – Site Plan). The site currently zoned Highway Business and is located within City's extraterritorial jurisdiction area (ETJ).

The site, as it currently exists, is mostly undeveloped and wooded with mild to moderate slopes. The property has frontage along two state maintained roads (Crowell Road and Farm Street). Access to the development is proposed off of Crowell Road via two, one-way connecting drives. In addition, a pedestrian connection will be provided from the buildings to Farm Street.

The HB district permits a density of 32 units per acre. Given the acreage of the property, 115 units could be constructed. The project proposes 73 units, a density of approximately 20 units per acre.

The development proposes construction of two, three story, 42,171 square foot multi-family buildings located on the periphery of a 32,968 square foot landscaped courtyard. The project will consist of 73 units with 20 one bedroom apartments, 34 two bedroom apartments and 19 three bedroom apartments. A 1,015 square foot office is also housed within the complex.

The project site is being developed to accommodate a large-open air courtyard that will serve as the primary open space and recreational area for the development. The buildings are located at the periphery of the courtyard in order to provide access to the area from each unit. Additional site development will include the construction of a 95-space parking lot, perimeter landscape buffers (some areas enhanced with the existing vegetation) and parking lot landscaping as required by the Unified Development Ordinance (UDO). A sidewalk, street trees and shrubs will be provided along Crowell Road (Attachment to City Exhibit 3 – Building Elevations).

The Technical Review Committee reviewed this project on February 20, 2006, and voted unanimously to recommend approval of the project subject to the conditions outlined in the staff report. Revised plans' addressing the open space area necessary for approval of the project has been provided through a reduction in the initial number of units and types of units proposed (79 units to 73 units) and the number of parking spaces (from 101 spaces to 95 spaces).

On March 1, 2006, the Asheville Planning and Zoning Commission, voted unanimously to approve the project subject to the conditions outlined in the staff report and with the following addition that Mountain Housing Opportunities (MHO) shall pay for or construct a transit shelter when transit service is available within 2/10's of a mile of the development.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO and must find that all 7 standards for approval of the conditional use are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and

appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The existing site topography is mildly sloped along the southwestern side of the property. The northern side and southeastern parts of the site have a more moderate slope towards Farm Street. The property will require a fair amount of grading and fill to develop the site as proposed.

   The project is designed more sensitively through building design and preservation of existing vegetation. The placement of the buildings is more compatible with the existing topography as they terrace with the natural slope of the land towards Farm Street. This project also proposes to preserve many of the large mature pine trees that exist on the site. The site plan shows preservation of trees within the courtyard area and along the perimeter of the north, south and west sides of the property. These areas will also be enhanced as needed to meet the City's landscape buffer requirements.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The project site is zoned (HB) Highway Business, which allows for a wide variety of both residential and large scaled commercial uses. A multi-family project is more in keeping with the residential context of the area than a commercial development would be, as permitted under the HB (Highway Business) zoning designation. In addition, the higher density development could serve as a buffer/transition area to the existing single-family residences north of the project site that could be impacted by more intense uses and development likely to occur along Crowell Road.

   Additionally, this project will provide on-site management with a caretaker and office manager. The development is expected to preserve many of the large pine trees on site and enhance the 25-foot landscape buffer areas required around the perimeter of the property. It is not expected that this development would negatively affect the value of surrounding properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The project site and many of the surrounding single-family properties along Crowell Road are zoned (HB) Highway Business. While it is noted that the proposed development is of greater scale and density than the existing single-family development along the western section of Crowell Road, the buildings are similar in size and scale with development found along the southern section of Crowell Road. Additionally, the project is proposed at a density below that permitted in the (HB) Highway Business zoning district.

   The buildings, although 3-stories in height, are designed to appear more like a large two story single-family structure when viewed from Crowell Road. The bulk of the development's visual impact will be along the north, east and south sides of the property. The building elevations presented for the development, however, incorporate architectural design elements that assist in visibly reducing the overall scale and mass of the structures allowing the development to be more in context with the neighborhood.

Additionally, properties to the north, south and portions of the east side of the site will be separated from the development by a 25-foot landscape buffer. The north and south sides of the site will be greatly enhanced with the preservation of many large mature pine trees that exist on site.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project is supported by a number of goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes the existing zoning on the lot to create a sustainable high-density residential development within the City's ETJ. It is also located within close vicinity to potential employment centers, restaurants and shopping centers. A disadvantage to this project is the absence of public transportation, which is not available in this area. The closest transit stop is more than 2 miles away near the N.C. Dept. of Transportation driver's license office off of Smoky Park Highway.

   This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2005-2010. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's Technical Review Committee and found that adequate sewage and water utilities are available for the proposed development.

   The project site is located in the City's ETJ. Properties located in these areas are provided Fire and Police protection through Buncombe County. The developer will also be responsible for providing waste disposal to the development. Public transportation is not available in this area.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The City's Traffic Engineer has determined that the project does not meet the threshold for requiring a Traffic Impact Analysis. However, due to the narrowness of Crowell Road, the applicant is required to increase the width of the road to 20-feet, as a condition by the Technical Review Committee.

Pros

- The project makes a significant contribution to meeting the need for affordable rental housing in the City of Asheville.
- The project site is zoned for the use and proposed density.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to smart growth, infill and sustainable development.
- Provides an opportunity for infill residential development on underdeveloped property.
- A multi-family project is more compatible with the residential character of the area than a commercial development would be, as permitted under the HB (Highway Business) zoning designation.

- The higher density development could serve as a buffer/transition area to the existing single-family residences north of the project site that could be impacted by more intense uses and development likely to occur along Crowell Road.
- The project proposes preservation of a large quantity of mature pine trees that exist on the site.

Cons

- A primary disadvantage to this affordable housing development is the absence of public transportation.
- The buildings will be larger in scale than those found along the western side of Crowell Road (although consistent with building sizes typically found in the Highway Business zoning district).
- The existing zoning in the area and the proposed project could spur additional development, including commercial uses, along Crowell Road resulting in an overall change in character of the area. (Could also be a pro.)

Staff recommends approval of this request with the conditions outlined by the Technical Review Committee and the following added conditions:

1. All site lighting shall be equipped with 90-degree cutoff features and be directed away from adjoining properties and streets.
2. A tree survey shall be provided noting all existing vegetation to be retained. This vegetation shall be clearly indicated and dimensioned on the site plan, landscape plan and grading plan.
3. The zoning permit must be issued prior to initiating clearing and grading of the site.
4. No grading shall commence until tree protection devices are installed and inspected by Planning Staff.
5. Due to the size and scale of the project an urban level of service shall be provided.
6. MHO shall pay for or construct a transit shelter when transit service is available within 2/10's of a mile of the development. The location of the shelter is to be coordinated with the Engineering Department.

Mr. Gerald Green, representing the developer, spoke in support of the project showing Council examples of MHO's work (Applicant Exhibit 1). He also showed Council examples of area architecture (Applicant Exhibit 2). He said they have addressed the major concern of residents (which is the widening of Crowell Road), and they have no problems with meeting the conditions imposed by the Technical Review Committee or the Planning & Zoning Commission. He summarized by saying that (1) the apartments will enhance the residential character of the area; (2) this is a good transition from the more commercial scaled uses to the residential scale uses; (3) the proposed development is permitted within the Highway Business District; (4) the project helps strengthen the business community in that it will provide housing for the working people of Buncombe County; (5) the structures will buffer the other residential uses from the commercial uses further down Crowell Road; (6) they will preserve as many of the existing trees as possible; and (7) the project is good for the neighborhood and the City.

At 5:27 p.m., Councilman Mumpower arrived at the meeting.

Mr. Fred English asked if any public money is used in this project.

At 5:27 p.m., Vice-Mayor Jones closed the public hearing.

Upon inquiry of Councilman Mumpower about voting on the matter when he didn't hear the presentation, City Attorney Oast said that the presentation did not differ from the materials sent to Council last week. It was his opinion that Councilman Mumpower should vote on the matter.

Ms. Cindy Weeks, Housing and Development Specialist for Mountain Housing Opportunities, responded to questions regarding financing. She noted that they will be paying property taxes on this development in the amount of approximately $70,000.

Councilman Newman pointed out that no Housing Trust Fund revenues are part of this project. However, the Housing Trust Fund is funded from the City's General Fund.

Upon inquiry of Councilman Mumpower, Ms. Weeks said that the cost per square foot, including administration and other variables is approximately $85.00 per square foot.

Councilman Freeborn moved for the adoption of Ordinance No. 3344, granting a conditional use permit for property located at Crowell Road near Smoky Park Highway and I-40, subject to the following conditions: (1) all conditions outlined by the Technical Review Committee; (2) All site lighting shall be equipped with 90-degree cutoff features and be directed away from adjoining properties and streets; (3) A tree survey shall be provided noting all existing vegetation to be retained. This vegetation shall be clearly indicated and dimensioned on the site plan, landscape plan and grading plan; (4) The zoning permit must be issued prior to initiating clearing and grading of the site; (5) No grading shall commence until tree protection devices are installed and inspected by Planning Staff; (6) Due to the size and scale of the project an urban level of service shall be provided; and (7) MHO shall pay for or construct a transit shelter when transit service is available within 2/10's of a mile of the development. The location of the shelter is to be coordinated with the Engineering Department. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 423

At this time, Vice-Mayor Jones returned the gavel to Mayor Bellamy who proceeded with conducting the meeting.

B. PUBLIC HEARING TO CONSIDER REZONING PROPERTY ON BEAUCATCHER ROAD FROM OFFICE BUSINESS DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT

ORDINANCE NO. 3345 - ORDINANCE TO REZONE PROPERTY ON BEAUCATCHER ROAD FROM OFFICE BUSINESS DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 5:36 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone property on Beaucatcher Road from Office Business District to RM-6 Residential Multi-Family Low Density District. This public hearing was advertised on March 17 and 24, 2006.

This rezoning request is being brought forward by staff to change the zoning from Office Business (OB) to RM-6 Residential Multi-Family Low Density District found on the majority of this parcel. Recently the subdivision plat for Restaurant Row was completed for the development with access from Tunnel Road. This is the reason for the recently assigned PIN for the parcel. Because of the way the larger parcel was subdivided, a rear section of the parcel that fronts on Beaucatcher included a section of OB zoning. Rezoning this back corner to RM-6 will provide consistent zoning for the entire parcel.

Office Business District is set aside for a wide range of office uses and a more limited range of other commercial uses. The OB district can provide a transition between intensive commercial uses and residential areas.

Residential Multi-family Low Density District (RM-6) is established to permit a limited range of low-density multi-family and single family housing types. It can provide a transition from single family areas and other more intensive multifamily areas.

Pros

- Provides consistent zoning for a residentially zoned parcel
- Avoids any future problems with a split-zoned parcel

Cons

No concerns noted

At their March 1, 2006, meeting, the Planning and Zoning Commission voted 7-0 to recommend approval of the rezoning request. Staff concurs with that recommendation.

Mayor Bellamy closed the public hearing at 5:38 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3345. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 429

C. PUBLIC HEARING TO CONSIDER AN APPEAL FROM AN ORDER OF THE BUILDING SAFETY DEPARTMENT ORDERING THE BUILDING LOCATED AT 1500 TUNNEL ROAD (FORMER SITE OF DAYS INN MOTEL), VACATED, CLOSED AND REPAIRED

Mayor Bellamy said that this public hearing was continued from March 14, 2006, at which time the owners requested an extension of time within which to investigate the facts, prepare an answer or otherwise respond to the City's Findings of Fact/Order and Appeal. That request was granted.

Mayor Bellamy opened the public hearing at 5:38 p.m.

Assistant City Attorney Martha McGlohon said that this is the consideration of an appeal from an Order of the Building Safety Department ordering the buildings located at 1500 Tunnel Road (former site of Days Inn Motel), vacated, closed and repaired. This public hearing was advertised on February 28, 2006.

The property at 1500 Tunnel Road (herein "Property"), is the site of the former "Days Inn Motel," consisting of three separate buildings. The property had operated as a motel. The buildings were found to have Building and Fire Code violations in July 2004 and despite the efforts of staff to encourage compliance, the condition of the property worsened. The deterioration was coupled with an increase of calls to the Asheville Police Department, with complaints of drug and criminal related activity. In July of 2005, the City's Building Safety Department held a hearing under the Unsafe Buildings Act and ordered the buildings on the Property vacated and closed until repairs were made consistent with the requirements of the State Building Code. Barry Rogers, either as an alleged party in interest or on behalf of the property owner, appealed that Order. The time period to comply with the Order has long since passed and the property owner has not applied for the required building permits. Additionally, recent activity on the property indicates that the buildings continue to be occupied in violation of the Order entered. City Council

is being asked to hear the appeal of Mr. Rogers despite staff's lack of success in getting Mr. Rogers to perfect his appeal.

Positives:

1. Authorizes City staff to initiate appropriate proceedings to abate a growing nuisance.
2. Allows the City to obtain a court order enforceable by the local police to prevent occupancy of the property.
3. Eliminate a safety and fire hazard
4. Eliminate frequent calls to police, fire, building and housing staff

Cons:

1. Requires ongoing monitoring by police and fire personnel to enforce the Order

This action complies with City Council Strategic Operating Plan on Partnerships to Improve Critical Services & Infrastructure directs staff to work for providing the quality of life within the mountain region: Goal #4: Develop programs and policies to defeat street level drug problems and crime. Asheville City Council has directed staff to work diligently to provide sufficient, safe, and affordable housing for Asheville residents. All neighborhoods should provide a safe and nurturing environment within which to raise a family.

After hearing the appeal, Council is asked to enter an order to affirm the order from which the appeal has been taken. Further, Council is requested to give the City's Legal Services Division authorization to initiate any appropriate legal proceeding in a court of law to prevent, restrain, correct or abate any violation of the Order affirmed and/or to enforce the requirements thereof.

Ms. McGlohon said that Mr. Cartner, attorney for the owners, is not present and she has not heard from him, however, it is her understanding that they will not contest the motion to dismiss the appeal filed by Mr. Barry Rogers.

Mayor Bellamy closed the public hearing at 5:40 p.m.

Councilman Newman moved to dismiss the appeal filed by Mr. Barry Rogers. This motion was seconded by Vice-Mayor Jones and carried unanimously.

Councilman Newman moved to give the City's Legal Services Division authorization to initiate any appropriate legal proceeding in a court of law to prevent, restrain, correct or abate any violation of the Order affirmed and/or to enforce the requirements thereof. This motion was seconded by Vice-Mayor Jones and carried unanimously.

Upon inquiry of Councilman Davis, Ms. McGlohon said that the City hopes the property owner will (1) put the property on the market for sale; (2) proceed with obtaining a demolition order to demolish the building; or (3) obtain the appropriate permits to commence proceedings to do the necessary repairs. If they should do none of those, then we are prepared to move forward. City Attorney Oast noted that the representative of the property owner has been in contact with the Building Safety Department to pursue option no. 3.

In response to Vice-Mayor Jones, Ms. McGlohon said that in terms of a timeframe, she leaves that up to the Building Safety Department to work with the property owner. As a general rule, they usually give the property owner anywhere from 60-90 days, but in this particular instance (because this is a huge commercial building), they may give them more time. But, it

depends on what they believe is reasonable under the circumstances in light of what they must do to bring the buildings into compliance.

Ms. McGlohon responded to Councilwoman Cape when she asked if the City could place a lien on the property to recoup the costs the City incurred regarding this property.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 3346 - BUDGET AMENDMENT TO PROVIDE FOR LEGAL FEES FOR CHALLENGING THE SULLIVAN ACT

City Attorney Oast said that this is the consideration of an ordinance amending the budget, in the amount of $50,000, to provide for legal fees for challenging the Sullivan Act

When Council undertook the legal challenge to the Sullivan Act, legal fees were estimated to be $100,000. Some of these costs were paid from the Legal Services line item (not intended for the Sullivan Act matter), and in October, Council amended the budget to provide $50,000 for this purpose. This amount has been exhausted, and an additional $50,000 is needed to (1) replenish the budget line item for routine legal services; and (2) take us through disposition of this matter in the trial court.

Considerations:

- The City is committed to following through on this legal challenge;
- The requested amount is still within initial estimates.
- Line item for routine legal services can be replenished.

Adoption of the ordinance is recommended.

Councilman Mumpower felt that it was disgusting that Asheville has to spend this money because our legislative delegation unanimously facilitated legislation against the City, which is unique to Asheville. He hoped our legislative representatives will make an effort to re-think their position that Asheville is unique, because the only thing that is unique in this process is their willingness to intrude on local government affairs.

Councilwoman Cape felt that this is money well spent.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3346. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 431

B. EXTRATERRITORIAL JURISDICTION AND JOINT PLANNING AREA POLICY DIRECTION

Planning & Development Director Scott Shuford said that the purpose of this report is to advise Council concerning issues and opportunities for managing growth in areas immediately proximate to the City limits and to seek Council direction concerning the extension of City development review services into the extraterritorial jurisdiction (ETJ), the cessation of

negotiations with Buncombe County regarding the Joint Planning Area (JPA), and whether the ETJ area should be expanded beyond current boundaries.

In the staff's opinion, there are strong positive reasons for discontinuing JPA negotiations with Buncombe County, for extending the full range of City development review services into the ETJ, and for considering further extension of the City ETJ consistent with state law. The following report was discussed with the Planning and Economic Development Committee and the Committee directed that the report be placed on the Council's March worksession agenda.

Ms. Shuford then summarized the following report:

ETJ

Statutory Authority. NC Statutes allow cities the size of Asheville to extend a wide range of development review services beyond their corporate limits if the county does not provide all of three critical development review services: Building inspections; subdivision regulation; and zoning. Buncombe County is the largest county in NC without countywide zoning, so Asheville has adopted an ETJ.

Cities like Asheville can extend their ETJ areas unilaterally (i.e., without county permission) up to one mile beyond their corporate limits. With Buncombe County's approval, Asheville could extend its ETJ up to three miles beyond its corporate limits. Asheville's current ETJ does not include all areas within one mile of our corporate limits.

Statutory Purpose. The purpose behind an ETJ is to ensure that municipalities are able to effectively manage land uses, establish development standards, and address infrastructure needs on land adjacent to their corporate boundaries. In NC, counties are generally not responsible for providing urban services like roads and water and sewer infrastructure. ETJ therefore enables the local governments responsible for providing those services -- cities and towns - to set the standards for those services. ETJ's are not unique to NC; many states confer some form of extraterritorial powers on their cities.

Range of Services. ETJ areas may have a wide range of development review services administered by the municipality. Asheville has elected to only provide two of these services in our ETJ area - zoning and subdivision regulation. We also understand that the mandated stormwater management program will ultimately need to be administered by the City in part or all of our ETJ areas. Services that are not currently being provided but could be are listed below. We cannot provide nuisance abatement services in the ETJ.

- Floodplain Management
- Street Address Assignment
- Erosion Control
- Stormwater Management (mentioned above)
- Building and Life-Safety Code Inspections

Recent ETJ History. Asheville most recently extended its ETJ in 2001. The City was prepared to extend its ETJ earlier but waited until Buncombe County chose to not establish countywide zoning based on the results of a citizen referendum. Once that decision was made, Asheville City Council directed staff to extend the ETJ to cover urbanizing areas near the City. We initially proposed a very large ETJ expansion but the reaction from the County was not positive so we significantly scaled back our proposal, concentrating on areas that:

- Were growing extremely rapidly
- Contain property suitable for industrial development

- Serve as gateways to the City

Despite the City's concession regarding a reduced ETJ area, Buncombe County chose to attempt to block Asheville by trying to establish a single district zoning for just the area within one mile of the City corporate limits. Essentially, the County proposed to surround the City with a zoned circle for the sole purpose of rebuffing the current and any future ETJ expansions. The County took one vote on this proposal and it failed by a 2-3 vote, but at its next meeting the Commissioners revived the proposal and it passed by a vote of 3-2.

City Council felt the procedures used by the County to resuscitate the zoning vote were improper. Council took two actions: (1) It directed staff to proceed with the ongoing ETJ expansion; and (2) It authorized a lawsuit against the County. The City enacted the ETJ and later prevailed in the lawsuit. The ETJ extension was legal and County zoning was not in place. The City currently maintains zoning and subdivision regulations over the ETJ.

JPA

After the lawsuit, City Council had informal negotiations with County Commissioners about compromises that would offer ETJ property owners less stringent zoning than that found in the City. When charged by Council to provide ideas on this concept, Planning and Legal staff proposed a Joint Planning Area (JPA), an area of shared jurisdiction between Buncombe County and the City of Asheville where both the County and City would agree to the development standards and enforcement procedures.

This proposal was acceptable to Buncombe County and they authorized their staff to work with City staff in developing the JPA regulations and associated zoning map. They also chose not to appeal the court's decision regarding their zoning.

Under the City proposal, the JPA would replace the City ETJ fully to reduce customer confusion. The JPA would automatically expand to include a roughly one-mile area around Asheville as the City annexed. The potential benefits of the JPA are summarized in the following table.

City Benefits	County Benefits
Shared growth management over larger area	Less restrictive than UDO
Automatic JPA expansion	Day-to-day County administration
Cooperation with County on key issue	Cooperation with City on key issue

After months of City and County staff, City Planning and Zoning Commission, and County Planning Board negotiations about the development regulations, JPA discussions were postponed to accommodate County elections and the Water Agreement termination process. There were many "sticking points" remaining, including the following:

- Big box development regulation
- Infrastructure standards, especially streets, stormwater and erosion control
- Board of Adjustment make-up

Our negotiations with Buncombe County have led us to the conclusion that the City and County have fundamentally different viewpoints on the subject of growth management and infrastructure standards. These differences are related to several factors, including the fact that Buncombe County is not in the infrastructure business and has no vested interest in the long-term durability

of roads, stormwater ponds and pipes, and similar improvements and the fact that the County has traditionally taken a non-regulatory approach to growth management.

Issues and Recommendations

Staff has identified two key issues related to the ETJ and JPA where City Council policy direction is needed. These issues are described in the following policy questions:

- What standards for development should apply in the ETJ?
- Which organization is best able to implement those standards?

What standards for development should apply in the ETJ?

City staff spent months attempting to create a reasonable, suburban-style zoning for the JPA. After reaching a general consensus with County staff about the standards, we found that the County Planning Board expected a substantially weaker set of regulations and development standards. As noted above, the key issues that were not resolved were standards and processing procedures for "big box" development, infrastructure standards and inspection procedures, and governance structure for the jointly-appointed Board of Adjustment that would administer reviews of larger structures and developments and grant variances to the standards.

As far as infrastructure is concerned, we are starting to see Fire Department and Public Works concerns about annexing urban areas of the County due to inadequate infrastructure that could negatively affect our fire insurance (ISO) rating and our ability to effectively serve these areas. Additionally, our reading of the stormwater management mandate requires the same standards to apply in the ETJ or JPA as in the City proper.

With regard to the Board of Adjustment make-up and procedures, the County's latest proposal to us was for the Board of Adjustment to consist of four County appointees and one City appointee. Not coincidentally, decisions by the Board of Adjustment have to be made on a 4-1 or 5-0 majority, rather than a simple majority. City staff was willing to accept a Board of Adjustment made up of three County appointees and two City appointees for this reason. The Board of Adjustment would represent the one opportunity for public consideration and comment on conditional use permits, as opposed to the two opportunities under City regulations. These two issues create concerns about the extent to which the public would have a voice in development matters in a JPA arrangement.

In summary, while the JPA offers an opportunity to allow development standards to cover a wider area of land than the current ETJ, staff believes that City standards are more appropriate for the future development of periphery areas than anything that could reasonably be negotiated.

Which organization is best able to implement those standards?

The City of Asheville has experience in managing the full range of development review services possible to apply in the ETJ or the JPA.

- Floodplain Management Program - Currently, the City of Asheville does not administer the Floodplain Management Program outside its corporate limits. However, given recent events, this is an area that City staff has a heightened interest in administering as new standards are developed to address flooding issues. The City Engineering Department is set up to manage such a program and the fee

structure makes it self-supporting.

- Street Address Assignment - The responsibility for assigning street addresses in ETJ areas remains with the County. The City has an Address Coordinator position that can assume these duties in a highly effective fashion.

- Erosion Control Ordinance - The City of Asheville does not review or enforce the Erosion Control Ordinance outside the corporate limits. Proposed development projects in an ETJ area are required to submit erosion control plans to Buncombe County for review, approval and periodic inspection. There are substantial differences between the City and County requirements and level of enforcement. Silt and sediment are the number one threats to water quality in WNC. The City Engineering Department is set up to manage this program and the existing fee structure would make this service self-supporting.

- Stormwater Management - The UDO stipulates that the City's regulations apply only to "proposed developments within the city limits of the City of Asheville" but our reading of the stormwater management mandate from the state requires the same standards to apply in the ETJ or JPA as in the City proper. The City Engineering Department is set up to manage this program, with the fee structure making this service self-supporting.

- Minimum Housing Code - The City has a Minimum Housing Code program with a proven track record for effectiveness. However, the City of Asheville does not review or enforce its Minimum Housing Code outside its corporate limits. The City Building Safety Department is set up to manage this program; the fee structure would make this service self-supporting.

- State Building Code - A city may assume responsibility for administering the State Building Code in an ETJ area. However, the responsibility has remained with Buncombe County in City of Asheville ETJ areas. Problems have occurred in the past when permits have been issued by the County for projects located in the City's ETJ area without required zoning permits from the City. Other problems have resulted from County staff not notifying City staff members prior to a Certificate of Compliance being issued so that required buffers, parking areas, and planting areas can be inspected for conformance with City regulations. There have been situations in which new development has received a Certificate of Compliance from the County but the project did not comply with the approved plans. Additionally, the City of Asheville Building Safety and Fire Departments are nationally recognized for the knowledge and diligence of their programs. Consequently, the City Building Safety and Fire Departments are set up to manage this program. The fee structure would make this service self-supporting.

City Council and staff are concerned about addressing Council priorities and making up the revenue shortfall caused by the effect of Sullivan Acts II and III. There is a fee option used by many NC cities that could help make up the revenue difference and improve development review service quality at the same time – extension of State Building Code enforcement by the City into the ETJ.

The ETJ is about 12,500 acres compared with our corporate limits (CL) of 42,500 acres, so it is roughly 30% the area of the City. Generally speaking, more growth is happening in the ETJ than in the CL since there is more vacant land in the ETJ, but, to be conservative, we can assume at least a 20% increase in Building Safety fees alone if we started performing building inspections in

the ETJ. This would generate about $350,000 in fee revenue (based on the projected $1,748,100 fee revenue in the current budget).

Building Safety Director Robert Griffin has estimated that he could undertake building inspections in the ETJ with the addition of three new inspectors and a paraprofessional to handle application intake. The cost of these new positions for the first year, including vehicles and equipment is about $215,000. The difference in fee revenue over costs could pay for at least two positions in Planning and Development that are currently solely involved in development review. (This is not a new idea: Increased fee revenues due to the increase in development activity were used to fund the most recent position added to the Planning and Development Department, for example.) This would free up approximately $135,000 that could be used for other General Fund priorities or to address the revenue shortfall created by Sullivan Acts II and III.

In summary, the greater experience level of City staff in handling the above areas of development review make it logical to extend these services into the ETJ at the beginning of the coming Fiscal Year. Our fee structure and existing staff not only make such extension possible but offer the opportunity for reducing some of the impact of Sullivan Acts II and III on the City budget.

Staff makes the following recommendations for Council direction:

(1) Advise Buncombe County that, while we are no longer interested in discussing the JPA as an alternative to the existing ETJ, we do remain open to discussing shared goals and objectives concerning land use. For example, perhaps there is a supporting role for the City to play in the development of the County Land Use Plan. Additionally, we may have opportunities for joint facility siting or public land redevelopment. We will certainly want County cooperation with any of our project development financing initiatives.

(2) Extend the following development review services into the existing ETJ in Fiscal Year 2006/07:
- Floodplain management
- Stormwater management
- Erosion control
- Street address services
- State Building Code
- Minimum housing code

(3) Evaluate the need for further ETJ extensions into other areas within one mile of the corporate limits.

Pros and cons for these actions are listed below.

CONS: For ETJ development service expansion, there may be the following concerns:

- New or higher service fees for property owners and developers in the ETJ
- New or more extensive requirements may increase building costs
- County may object to losing inspection fees or jurisdiction
- County may claim City is not complying with a prior commitment to the JPA

PROS: Staff feels the above potential public concerns are outweighed by:

- Enhanced service to community residents
- Quality of public infrastructure considerations
- General development quality considerations

- Public safety and Fire ISO considerations
- Effectiveness of future annexations
- Improved quality and consistency in review and inspection
- Management of ETJ development pattern
- Compliance with mandated stormwater regulations
- Budgetary considerations

Mr. Shuford asked for Council direction on the three issues and if Council is interested in the second recommendation of extending the above-mentioned development review services into the existing ETJ in Fiscal Year 2006/07, then the City Attorney will come back with a recommended procedure by which we would handle that at an upcoming meeting.

Mr. Fred English questioned if the City has to maintain the streets in the ETJ. He also felt that the ETJ is just a fast-track for annexation. He felt the City need to take care of what they have in the City before annexing any more residents.

Councilman Davis felt it was commendable that the County's Planning Board and our Planning & Zoning Commission spent so much time and effort to try to get to the point where if areas were annexed there would not be long periods of time before the area was built to the same standards. Again, it was a good effort on a lot of people's part.

Upon inquiry of Councilwoman Cape, Mr. Shuford said that the ETJ does address street standards, but the City does not take over the maintenance of those streets – they would either be private streets or state maintained roads.

In response to Councilwoman Cape of why the city is not extending the ETJ to the complete one mile area, Mr. Shuford said that originally in 2001 the City considered about 14,000 acres out of the 6,000 acres we did proceed with. At that time there was a great deal of resistance on the part of Buncombe County and some County residents to that concept, so we unilaterally scaled back our effort to just cover areas that we felt were gateway areas, areas experiencing a lot of rapid development and also areas that might be suitable for industrial uses. We dropped off roughly 8,000 acres from our original proposal. City Attorney Oast also responded that under the law, although one mile is the extent to which you can go without approval from the County Commissioners, within that one mile you have to define areas of critical concern. Therefore, we identified the areas of critical concern and extended the ETJ to those areas.

In response to Councilwoman Cape, Mr. Shuford said that all of the areas in the ETJ (and some areas outside that) are included in the resolution of consideration identifying areas with potential for future annexation.

Councilman Davis moved to (1) advise Buncombe County that, while we are no longer interested in discussing the JPA as an alternative to the existing ETJ, we do remain open to discussing shared goals and objectives concerning land use; (2) extend the following development review services into the existing ETJ in Fiscal Year 2006/07: floodplain management, stormwater management, erosion control, street address services, State Building Code, and Minimum Housing Code; and (3) evaluate the need for further ETJ extensions into other areas within one mile of the corporate limits. This motion was seconded by Vice-Mayor Jones.

Councilman Davis pointed out that in the latest draft the County came to the City with, they were willing to adjustment the Board of Adjustment make-up of 3 County appointments and 2 City appointments, and there was also a willingness to compromise what their desire was for the thresholds of big box-type development. We just never really heard because of the Water

Agreement termination and there was not a particular willingness to move forward. He regretted that it has come to this, but he did think we should leave it as an opportunity in the future. Again, he felt there was a great effort made by both parties and he wished it would have gotten to a better place. However, he thinks by this move we can control some of Asheville's future.

Councilman Mumpower was concerned that our timing with this action is off. As discussed earlier, our state representatives have put the City in a very difficult decision budget-wise, and the County Commissioners are requesting a moratorium on annexation. We have a keen sense of our responsibilities as a city but no willingness to support us by our state legislators or by our County Commissioners. He felt that since we spent 3 years working on the JPA we certainly shouldn't close any doors. Though the JPA effort we were trying to grow in cooperation with the County, but now we have an adversarial process. He struggled to see any grand benefits from extending our services into the ETJ and was concerned that we risk creating an elite city that the wealthy can afford to live in but others can't.

Councilman Freeborn was not an advocate for annexation, but if we do take on new property, then it should be closer to city standards. He felt this is a way to start bridging that gap.

Councilwoman Cape felt that this is about the quality of how development and infrastructure proceeds and how people are brought into the community, even though they are outside the city limits. Asheville is annexing at a much slower rate than the rest of North Carolina cities and development is happening very rapidly all around us. To not try to create good standards at our city limits, we end up making the citizens of Asheville bear the burden of growth in the whole area.

Councilman Newman said that Asheville is the economic hub of the multi-county area of Western North Carolina. All the people who come to Asheville use our infrastructure every day and it is the City residents who live here who have to pay for the infrastructure being used by many, many other people. The people who use it the most are those people who live immediately outside our city limits in the areas that are growing very fast and becoming urban in nature.

Councilman Davis felt the JPA would have been a great opportunity to work with the County. He hoped that we will continue to keep this plan on the shelf because a lot of time and work have been invested in this and at some time we will get past the adversarial relationship with Buncombe County.

Councilman Newman didn't want to say that the City was no longer interested in discussing the JPA, because we should always be open to the possibilities of coming together around ideas.

Councilman Davis moved to amend his motion to read as follows: (1) Advise Buncombe County that in recognizing the work that has taken place on this issue for 3 years and we haven't been successful in finding a common approach, the City feels, in light of that, the need to move on, but will remain open to joint community planning efforts and new ideas; (2) extend the following development review services into the existing ETJ in Fiscal Year 2006/07: floodplain management, stormwater management, erosion control, street address services, State Building Code, and Minimum Housing Code; and (3) evaluate the need for further ETJ extensions into other areas within one mile of the corporate limits. Vice-Mayor Jones accepted the amendment with said amended motion carrying on a 6-1 vote, with Councilman Mumpower voting "no."

C. RESOLUTION NO. 06-71 - RESOLUTION APPOINTING CITY OF ASHEVILLE REPRESENTATIVES TO THE COMPREHENSIVE TRANSPORTATION PLAN TASK FORCE

Councilman Freeborn said that City Council is requested to make appointments to a task force advising the N.C. Dept. of Transportation (NCDOT) and Metropolitan Planning Organization (MPO) on the area's Comprehensive Transportation Plan.

Mayor Bellamy has requested that City Council appoint City members to a task force to provide input into the Comprehensive Transportation Plan (CTP) under development by the NCDOT for the MPO. The best way to proceed in making these appointments was determined to be the use of the City board structure as the basis for selecting City members to the task force (Buncombe County and other municipalities will also appoint members to the task force). The following persons have been identified from the listed boards to serve on this task force, as they would best represent our community in creating long-range maps for Buncombe County and the MPO:

- Greenway Commission – Linda Giltz
- Bike and Pedestrian Task Force – Claudia Nix
- Transit Commission - Karen Austin
- I-26 Aesthetics Advisory Committee – Leslie Fay
- Sustainable Economic Development Advisory Committee – Chuck Tessier (or delegate)

By using existing boards, information about the CTP can be more effectively shared across the community and with the affected boards. The long-range maps would then go back to the community for their input. The maps need to be ready by late summer of 2006.

City staff recommends City Council adopt the resolution appointing the above persons to the CTP Task Force as City representatives.

Upon inquiry of Councilwoman Cape, Planning & Development Director Scott Shuford said that the meetings will not be a major time commitment. He felt there would be approximately 4 meets ranging from 1-2 hours in length to gain the level of public input. He reiterated that this Task Force will also include representatives from Buncombe County and other areas.

In response to Mayor Bellamy, Mr. Shuford said that he will find out at what opportunity City Council will have to review the maps.

There was considerable discussion, initiated by Councilmen Davis and Mumpower, regarding the balance of the Task Force and the need to move forward and continue dialogue on this time-sensitive matter.

At 6:43 p.m., Mayor Bellamy called a short recess.

Councilwoman Cape moved to adopt Resolution No. 06-71 to appoint the members identified above, along with a representative from the Asheville Downtown Commission, a representative from the Planning & Zoning Commission, and a representative from the Buncombe County Tourism Development Authority to the Comprehensive Transportation Plan Task Force. This motion was seconded by Councilman Mumpower and carried unanimously.

Vice-Mayor Jones, Chair of the City Council Boards & Commissions Committee, said that her Committee will take on the task of developing guidelines for task force process and appointments and bring it back to City Council for review.

RESOLUTION BOOK NO. 29 – PAGE 425

VI. OTHER BUSINESS:

Announcements

Councilman Mumpower spoke about the successful seminars of "Reaching for a 21st Century Criminal Justice System" (sponsored by the N.C. District Attorney's Council and the Asheville-Buncombe Drug Commission) and "'Best Practices' for Hard Drug Interdiction" (sponsored by the Asheville-Buncombe Drug Commission, the Asheville Police Department, and the Buncombe County Sheriff's Department) that occurred earlier in the day.

Councilman Mumpower thanked the many community volunteers and the cadets from the Police Academy for helping with the For Our Kids Program by painting at Aston Park Towers.

Councilman Davis urged the public to get involved in the Quality Forward Clean-Up Program.

Councilman Freebom reminded the public about the Arbor Day Celebration that will be taking place on April 1, 2006, at Vance Elementary School in West Asheville with various activities throughout the day.

Claims

The following claims were received by the City of Asheville during the period of March 3-16, 2006: Beverly-Grant Inc. (Water), Hilda K. DeBruhl (Transit Services), Opal Mann (Sanitation) and Amy Lovinger (Sanitation). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Avram Friedman, Director of The Canary Coalition, urged Council to support the Energy Futures Resolution that calls for a comprehensive state-wide study to determine the least-cost mix of electrical generation and demand reduction, including an evaluation of impact on public health, the environment and agriculture and the costs of the full fuel cycle, waste handling and decommissioning of power plans. He said that 20 prominent community organizations have supported this resolution and urged the City of Asheville express their support as well. When Mayor Bellamy explained Council's policy to not address policy issues if they don't have a unique relevance to Asheville, Councilman Newman asked (and the majority of Council concurred) that time be set aside at the April worksession to address matters such as this, long with the Land for Tomorrow resolution.

Mr. Bruce Delle urged Council to rescind the ordinance that prohibits begging in the City of Asheville. Mayor Bellamy responded by stating the several programs City Council has supported for the homeless and encouraged him to contact some of the local non-profit organizations who provide services to the homeless and the phone service of 211.

Mr. Chris Pelly, President of the Coalition of Asheville Neighborhoods (CAN), requested input into the outside review process of the recent Planning Department's decisions relating to Greenlife, Staples and Prudential Realty. After Mr. Pelly explained how he felt CAN has uncovered Planning decisions that do not adhere to the Unified Development Ordinance and how the system for citizen appeals is flawed, he requested (1) for City Council to heard CAN's 3 appeals which the Board of Adjustment dismissed two and said one appeal was moot; (2) the return of $1,500 for CAN's filing of the appeals; and (3) a commitment from City Council to fix the citizen appeals process. It was the consensus of Council to have the City Council Planning & Economic Development Committee review the process.

Ms. Leslie Fay urged City Council to dedicate a staff person (10-20 hours a week) to work specifically on growth on the Haywood Road Corridor.

Mr. Fred English spoke about the short duration of the indoor football at the Asheville Civic Center.

Mr. Walter Plaue was concerned that the City of Asheville is not being viewed as a regional partner.

Mr. Reid Thompson spoke to Council about the Unified Development Ordinance not being adhered to regarding screening by Greenlife Grocery on Maxwell Street.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:28 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – April 11, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Mayor Bellamy asked that Consent Agenda "C" be removed from the agenda entirely for additional information.

At the request of Councilman Mumpower, Consent Agenda Items "F", "G", and "H" were removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 28, 2006

Vice-Mayor Jones asked that the March 28, 2006, minutes be amended to reflect that she was not present at the closed session.

Mr. Bruce Deile asked that the March 28, 2006, minutes be amended to reflect that his statement to Council was to urge them to rescind the ordinance that prohibits begging in the City of Asheville.

B. RESOLUTION NO. 06-72 - RESOLUTION REVISING THE NAME OF THE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE TO SUSTAINABLE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

Summary: The consideration of a resolution revising the name of the Economic Development Advisory Committee to Sustainable Economic Development Advisory Committee.

In 2002, the City Council adopted the Sustainable Economic Development Strategic Plan, and established a citizen-led Sustainable Economic Development Implementation Task Force for providing the expertise of the Plan. In September of 2005 the Task Force became a standing committee of City Council and at the initial authorization, the word "Sustainable" was not included in the committee's name. The committee members voted at their February, 2006 meeting to revise the name to Sustainable Economic Development Advisory Committee to better reflect their work plan.

If Council agrees with the proposed addition of the word "Sustainable" to the Economic Development Advisory Committee's name, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 29 – PAGE 426

C. RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO EXPLORE THE FEASIBILITY OF CREATING AN INDEPENDENT AIRPORT GOVERNANCE STRUCTURE THROUGH THE GENERAL ASSEMBLY OF NORTH CAROLINA FOR THE ASHEVILLE REGIONAL AIRPORT

This item was removed from the agenda entirely in order to gather additional information.

D. RESOLUTION NO. 06-73 - INITIAL RESOLUTION AUTHORIZING NEGOTIATION OF AN INSTALLMENT PURCHASE CONTRACT AND CALLING FOR A PUBLIC HEARING ON MAY 9, 2006

Summary: The consideration of (1) an initial resolution authorizing negotiation of an installment purchase contract and calling for a public hearing on May 9, 2006; and (2) a resolution authorizing the reimbursement of the City from proceeds of the financing for project expenses incurred prior to the execution of the installment purchase contract.

The current budget includes funds previously appropriated by City Council to finance (1) the construction of two fire stations, (2) the replacement of the civic center roof (3) the upgrade of the 800 mhz public safety radio system and (4) the acquisition of large vehicles.

The first proposed resolution, *initial resolution*, asks Council to confirm that it is in the City's best interest to enter into an installment purchase contract with a financial institution to fund the aforementioned projects and to provide for a public hearing on these matters. This resolution is simple formality required by North Carolina General Statutes before the process of securing financing can begin.

The second proposed resolution, a *reimbursement resolution*, allows the City to reimburse itself from the proceeds of the financing the City incurs any project related expenses before the financing is actually incurred. This resolution provides an appropriate audit and accounting trail, allowing us to tie the proceeds from the financing back to the specific projects that they will fund.

City staff recommends City Council adopt (1) an initial resolution authorizing negotiation of an installment purchase contract and calling for a public hearing on May 9, 2006; and (2) a resolution authorizing the reimbursement of the City from proceeds of the financing for project expenses incurred prior to the execution of the installment purchase contract.

RESOLUTION BOOK NO. 29 – PAGE 427

E. RESOLUTION NO. 06-74 - RESOLUTION AUTHORIZING THE REIMBURSEMENT OF THE CITY FROM PROCEEDS OF THE FINANCING FOR PROJECT EXPENSES INCURRED PRIOR TO THE EXECUTION OF THE INSTALLMENT PURCHASE CONTRACT

See Consent Agenda Item "D" above.

RESOLUTION BOOK NO. 29 – PAGE 431

F. **RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR A GRANT FOR THE PACK SQUARE CONSERVANCY PROJECT**

This item was removed from the Consent Agenda for discussion.

G. **RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AGREEMENT BETWEEN THE CITY OF ASHEVILLE AND PACK SQUARE CONSERVANCY FOR SAFETEA-LU GRANT FOR PACK SQUARE RENAISSANCE PROJECT**

This item was removed from the Consent Agenda for discussion.

H. **BUDGET AMENDMENT FOR A GRANT FROM THE N.C. DEPT. OF TRANSPORTATION FOR THE PACK SQUARE CONSERVANCY PROJECT**

This item was removed from the Consent Agenda for discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda, with the two amendments to the March 28, 2006, minutes. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

RESOLUTION NO. 06-75 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR A GRANT FOR THE PACK SQUARE CONSERVANCY PROJECT

RESOLUTION NO. 06-76 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AGREEMENT BETWEEN THE CITY OF ASHEVILLE AND PACK SQUARE CONSERVANCY FOR SAFETEA-LU GRANT FOR PACK SQUARE RENAISSANCE PROJECT

ORDINANCE NO. 3347 - BUDGET AMENDMENT FOR A GRANT FROM THE N.C. DEPT. OF TRANSPORTATION FOR THE PACK SQUARE CONSERVANCY PROJECT

Summary: The consideration of a resolution authorizing the Mayor to sign: (1) a municipal agreement with the N.C. Dept. of Transportation (NCDOT) for a grant in the amount of $3,899,860; and (2) an agreement with Pack Square Conservancy (herein "PSC") to carry out the work that is to be funded by the grant. Additionally, staff is requesting the consideration of a budget ordinance amendment in the amount of $3,899,860 for this project.

Working through Congressman Charles Taylor, PSC has secured grant funding through the Safe Account Flexible Efficient Transportation Equity Act – A Legacy for Users (herein "SAFETEA-LU") for its work on the Pack Square Renaissance Project. This money was earmarked through the NCDOT for this purpose.

Since NCDOT can only provide these funds to municipalities, PSC and NCDOT requested that the City accept the money from the State and pass it through to PSC. This grant requires a 20% match, but these funds will come from PSC. Two agreements are required to accomplish this:

1. A Municipal Agreement between the City and NCDOT. This Agreement outlines the terms and conditions that the City must follow in order to qualify for the grant, including procurement of professional and construction services, permitting, and compliance with State and federal guidelines. The grant money does not come all at once, but is in the form of reimbursement upon submission of proper documentation of completed work, and the amount is expressly made subject to the availability of federal funds.

2. The Grant Administration agreement between the City and PSC. This agreement requires PSC to manage and execute the work required for the Project, and to comply or ensure compliance with the terms and conditions of the SAFETEA-LU grant. In essence, PSC would function as the City's contractor for the project. The City, upon proper documentation, would pay PSC – or pay contractors directly – for completion of portions of the work. Using that same documentation, the City would then request reimbursement from DOT. The City reserves the right to review any plans or documents prepared by or for PSC, and to inspect any work.

This arrangement is similar to the existing arrangement approved in 2004 for the administration of a TEA-21 grant for the design of certain pedestrian improvements.

Considerations: By authorizing these agreements and adopting the budget amendment, the City would be responsible for the following:

- Reimbursing Pack Square Conservancy for eligible expenses up to $3,899,860, of which the City would be reimbursed $3,899,860 from NCDOT
- Processing necessary paperwork to reimburse Pack Square Conservancy, and for getting reimbursed from NCDOT.
- Providing updates to NCDOT on the status of the project.

There will be no direct costs to the City as a result of entering into this agreement.

If Council approves of the arrangement as outlined above, adoption of the resolutions and budget amendment are recommended.

Councilman Mumpower voiced concern of investing almost $4 million from the federal government in a City park, especially at a time of extreme deficits.

Vice-Mayor Jones moved for the adoption of the Resolution No. 06-75. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 433

Vice-Mayor Jones moved for the adoption of the Resolution No. 06-76. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 435

Councilman Freeborn moved for the adoption of the Ordinance No. 3347. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 22 - PAGE 433

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON SMOKY PARK HIGHWAY AND COOPER BOULEVARD FROM HIGHWAY BUSINESS DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/ CONDITIONAL ZONING FOR A PROPOSED WAL-MART SUPER CENTER STORE AND ADDITIONAL RETAIL DEVELOPMENT

Mayor Bellamy announced that around Noon today the City Clerk received a letter from Ashley H. Story, attorney with Troutman Sanders, LLP, which read: "Please accept this letter as notification that Wal-Mart Real Estate Business Trust ('Wal-Mart') is withdrawing its application for Conditional Zoning to be heard at the April 11, 2006, City Council meeting. Wal-Mart is terminating this project and will no longer be pursuing this site. Wal-Mart appreciates all of your assistance in this matter."

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Land Use

Councilman Newman asked for Council to revisit the definition of single tenant development vs. multi-tenant development in terms of square footage allowed. He questioned if it is Council's intent to define a one large single tenant development (using Wal-Mart as an example) as a multi-tenant development just because it has a very small percentage of ancillary businesses (like a vision business, or a McDonalds or Dominos Pizza). Councilman Mumpower suggested some type of proportional percentage increase. Planning & Development Director Scott Shuford will report back to Council with some options to pursue.

Mayor Bellamy asked that City Council be prepared to come to the May 16, 2006, worksession with a list of items from the Unified Development Ordinance they wish to have reviewed. At that time, Council will give direction to Planning staff on which items they wish to move forward with, with the ultimate result of letting the citizens of Asheville know the vision for what type of development City Council is seeking for the City of Asheville.

Mr. Shuford said that ultimately he will need some guidance from Council about what areas in the City seem more appropriate for suburban type of development patterns and what areas in the City an urban development pattern would be more appropriate. That will help Planning staff try to formulate regulations that will address those issues.

In the midst of discussion initiated by Councilman Newman, Councilman Newman moved to direct Planning staff to look at the areas in Asheville that contain mobile home parks and identify how they are zoned. Keeping in mind the goal of preserving the City's affordable housing stock, Planning staff is directed to think about the areas that are not zoned residential, to determine if they should be. After Planning staff has completed that task, they directed to take their results to the Planning & Zoning Commission for their input and then report back to Council. Councilwoman Cape seconded the motion.

After more discussion regarding Mayor Bellamy's request to have all land use concerns discussed by Council at the May 16, 2006, worksession, Councilman Newman and Councilwoman Cape withdrew their motion noting that they will bring the matter back up at the May 16 worksession. In the meantime, however, Planning staff was directed to bring forward to

Council a map of Asheville and it's extraterritorial jurisdiction area to show where the mobile home parks are located, along with their current zoning designations.

For Our Kids

Councilman Mumpower thanked all the volunteers from UNC-Asheville, the children and adults who participated in the successful For Our Kids event at Lee Walker Heights on Saturday, April 8, 2006.

Arbor Day

Councilman Freeborn thanked the many volunteers, in particular City employee Mark Foster and Susan Roderick from Quality Forward who all helped plant the trees donated by Progress Energy on Arbor Day.

Claims

The following claims were received by the City of Asheville during the period of March 17-30, 2006: Nancy Tabel (Fire), Michael Sullivan (Transit Services), Vilma Lindo (Transit Services), Clay Property Management (Transit Services), Harry Ramsey (Water), Mildred Delp (Water), Maricene Clark (Water) and Michael Micciche (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Jill Rios, Clean Water for North Carolina, Erin Krauss, Emma Family Resource Center, and Mr. Craig White, Center for Participatory Change, all representing the Cooper Boulevard Community Support Network, said that they have been working extensively with the Cooper Boulevard/Monticello mobile home community by collecting information from residents, sharing accurate information with residents and encouraging community involvement in the public process regarding the Wal-Mart Super Center that was proposed on Smoky Park Highway. They noted that they do not speak for the residents, who hold many different views, as their primary commitment is seeing that they are treated fairly. They then reviewed with Council a snapshot of the neighborhood and families that would have been displaced if the Wal-Mart Super Center was constructed. Regarding of whether the property is sold to Wal-Mart, the seller of the mobile home park has indicated a wish to sell the Cooper Boulevard property. Therefore, they recommended the following two considerations. One, that City Council develop a public/private partnership to maintain affordable housing through a land trust. They recommend that Council instruct the Community Development Division of the Planning Department to convene a meeting with local affordable housing nonprofit organizations to discuss the viability of raising money for purchase of property and development of a land trust, in either the Cooper Boulevard or an alternate location, which could indefinitely maintain a number of affordable housing units, whether mobile homes or more permanent housing. Two, that City Council research and approve a policy that would add relocation assistance as a condition for new development that displaces low income residents. Displacement of one or two families is a landlord / tenant issue, but in a city and county that already has an affordable housing crisis, displacement of a significant number of families by new development imposes a burden on the whole community, at least as significant as traffic, noise or light pollution. This concern is only going to escalate in the next decade, and should be addressed in a comprehensive manner. Whether or not this particular development is approved, we strongly recommend that Council research relocation assistance policies in other cities, and pass an ordinance that will require relocation assistance be paid to residents displaced by any new development that displaces ten or more families or eliminates ten or more units of affordable housing. After discussion by Council on the two recommendations, it was the consensus of City Council to ask that the City Council Housing & Community Development Committee review these

suggestions and report back to Council at their June worksession. Councilman Newman also noted that this may be an issue to be discussed at Council's May worksession regarding land use issues.

Mr. Fred English urged City Council to support a resolution supporting legal immigration.

Mr. Bruce Delle spoke to Council about the non-profits not meeting the needs of the homeless. He again explained why Council should rescind the ordinance prohibiting begging in the City of Asheville. It was the consensus of Council to refer Mr. Delle's request to City Council's Housing & Community Development Committee. Vice-Mayor Jones, Chair of the Housing & Community Development Committee, felt that there was a need to check on the progress of the 10-Year Plan to End Homelessness and requested an update from the Downtown Social Issues Task Force on their recommendations, especially from the Subcommittee on Panhandling. Mayor Bellamy wanted to make sure that the City Council Public Safety Committee is kept informed of this issue, as they are reviewing panhandling issues.

Mr. Tim Peck was sorry Wal-Mart felt compelled to withdraw their conditional zoning application, which store would have provided jobs and would have helped defray moving expenses for those living in the mobile home park.

Mr. Steve Arpin urged Council to create a committee to develop recommendations for sustainability. Councilwoman Cape invited Mr. Arpin to attend the Sustainable Economic Development Advisory Committee, which will be meeting on April 14, 2006, at 8:30 a.m. at 29 Haywood Street, Asheville, N.C., to voice his ideas.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:20 p.m.

Magdalen Burleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – April 18, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

REPORT FROM CHAIRS OF POLICY COMMITTEES

Public Safety

Councilman Mumpower, Chair of the Public Safety Committee, updated Council on the latest actions and discussions of the Committee and requested full Council action on the following items:

(1) Traffic calming report – After a discussion of completed and active projects, the effects of traffic calming on traffic, the effect of traffic calming on police enforcement, vehicle damage, and the effect on other City services, Council voiced their opinions on traffic calming.

Councilman Freeborn encouraged the School Board to instruct the School Resource Officers at the elementary and middle schools to have more of a presence on the streets. He suggested presenting a menu of options (islands, bulb-outs, speed humps, increased police presence), with costs associated with each option, to neighborhoods and encourage them to be proactive in finding funds for their preferred option.

Councilman Newman was under the impression that once the active traffic calming projects were completed, Council would move away from comprehensive traffic calming to more pedestrian safety measures at targeted areas in the community, like schools and parks.

It was the consensus of Council to instruct City staff to initiate strong traffic enforcement.

Traffic Engineer Anthony Butzek will provide the full Council with more detail on the effectiveness of each street that has traffic calming in a format available to be placed on our website.

Mayor Bellamy said that once additional information from the Traffic Engineer has been formulated, the information will come back to the full Council.

(2) Fund and Support the Quick Response Vehicles as deemed appropriate by Fire Department staff - After discussion, final action was to direct the Fire Chief to prioritize this request in his budget, noting that City staff has general policy direction from Council recognizing that this is important.

(3) Police Department take home vehicles – After discussion, final action was for City staff to provide additional information regarding the cost of this program.

Housing & Community Development

Vice-Mayor Jones, Chair of the Housing & Community Development Committee, updated Council on the latest actions and requested full Council action on the following items:

(1) At the request of Mayor Bellamy, Councilman Newman moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Mumpower and carried unanimously. Mayor Bellamy turned the meeting over to Vice-Mayor Jones. Approval of Mountain Housing Opportunities' request for a $500,000 loan (for Crowell Park) on provisional terms of 0% interest for 15 years, with the condition that the final terms would be set after the Fiscal Year 2007 property tax rates are known. After discussion, final action was to bring this matter forward to the April 25, 2006, meeting. Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

(2) Committee performed due diligence on 8 Cedar Street on whether to sell the property to the highest bidder or retain as affordable housing. After discussion, final action was to bring this matter forward to the April 25, 2006, meeting.

(3) The following three amendments to the Housing Trust Fund guidelines: (1) To increase the loan limit to $500,000, (2) To significantly increase price limits for both the Housing Trust Fund and the Fee rebate program; the limit for a 3-bedroom unit should be $160,000; and (3) To allow the developer to exceed price limit if other subsidies are available to make home affordable to low-income buyer. After discussion, final action was to bring this matter forward to Council at their April 25, 2006, meeting.

(4) Funding recommendations for the Community Development Block Grant funds. Final action was to bring this matter forward to Council at their April 25, 2006, meeting.

Planning & Economic Development

Councilman Davis, Chair of the Planning & Economic Development Committee, updated Council on the latest actions and discussions of the Committee, some being, but are not limited to: Eagle/Market Street redevelopment; areas of improvement with networking with Council members in terms of overall performance from staff on important issues, e.g., planning policies and processes; discussion of Board of Adjustment responsibilities and explanation of appeals process; and preliminary review of future annexation plans.

In addition, at the meeting, the Committee heard a presentation from Coalition of Asheville Neighborhoods regarding the Board of Adjustment appeals process.

After considerable discussion about the appeals process, particularly with development issues, Mayor Bellamy stressed that City Council is the policy-making board and if there is a procedure in place that is not working, Council can create new policy and move forward. She asked City Council for possible solutions. Some suggestions were (1) expanding the length of time to appeal to the Board of Adjustment; (2) having a private Certified Planner signing off on Unified Development Ordinance interpretations that are being aggrieved; (3) procedure for citizens getting their "Day in Court"; (4) make sure aggrieved parties go through an established process before it comes before Council; (5) ask for third-party reviews only in extreme measures, with possible shared cost; (6) develop an alternative process for the public to appeal decisions of

the Unified Development ordinance; and (7) process for citizens to be heard and responded to by Council not only with development issues.

Councilman Newman moved to refer this matter to the Planning & Economic Development Committee. This motion was seconded by Councilman Mumpower and carried unanimously.

City Manager Jackson said that staff will research some best practice models in other cities.

Mayor Bellamy pointed out that this seated Council has only been in place for 5 months and cannot address problems without giving them time within which to research and obtain data to help support good policy changes.

Closed Session

At 5:07 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 6:10 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

Revenue & Finance

Councilman Newman, Chair of the Revenue & Finance Committee, updated Council on the latest actions and discussions of the Committee, some being, but are not limited to: increase and decrease recommendations for various fees and charges; outside agency funding will be discussed at the next Committee meeting; and heard a presentation from firefighters about their long-standing concern regarding retirement.

At the suggestion of Vice-Mayor Jones, Councilman Newman said that the Committee would be open for Council to suggest an amount of money that would be available for outside agency funding.

2006-07 BUDGET PLANNING

General Fund Overviews

Chief Financial Officer Ben Durant reviewed with Council the revised budget schedule, with the public hearing being held on June 13, 2006, and final adoption being on June 27, 2006.

He explained that the goals of this budget preview session will be to (1) provide updated financial and budgetary forecasts; (2) identify budget-balancing alternatives; and (3) offer Council decision packages for resource allocation in Fiscal Year 2006-07 budget.

Policy decisions will be (1) what should the price of government be – (a) what are citizens willing to spend; (b) what are the citizens priorities and desired outcomes; and (c) what is the

price of priority outcome; (2) who should bear the cost of general government services – (a) users of the service (through fees and charges); (b) all citizens for the good of the whole (through taxation); and (c) outsiders who pay no taxes, but enjoy the benefits of city services and programs; and (3) which should take funding priority in any given year – long term needs or short term goals.

He then reviewed the General Fund revenue assumptions of property tax; licenses and permits; intergovernmental revenues; sales tax; and one-time revenues. In addition, he reviewed with Council in detail the General Fund Revenue Summary.

General Fund expenditure assumptions: maintains current level of service in most areas; personnel; operating costs; capital expenditure; General Fund Subsidy of Enterprise Fund reduced; and additional General Fund needs identified by Council and staff, but not budgeted. He then reviewed in detail the General Fund Expenditure Summary.

Another topic Mr. Durant reviewed was the General Fund subsidy of enterprise funds: Civic Center Fund, Festivals Fund, Golf Fund, Housing Trust Fund, Parking Fund, Transit Fund, Transit Motor Vehicle Fee, Stormwater Fund and Water Fund. The Fiscal Year 2005-06 amended budgeted was $2,661,622 and the Fiscal Year 2006-07 budget estimate is $2,380,222.

He reviewed the General Fund continuation budget summary of a General Fund budget gap of $2.4 Million. Requests not currently in the General Fund budget include: (1) market-based compensation plan - $2.2 Million; (2) service enhancement requests - $1.8 Million; (3) strategic initiatives ($1.8 Million); and (4) capital improvements - $11.9 Million = Total $17.7 Million. Capital Improvement requests not in the budget (current capital needs without identified source of funding): (1) General Fund (fleet, technology, maintenance) - $11.9 Million; (2) Golf Fund (irrigation system) - $1.0 Million; (3) Water Fund (infrastructure) - $8.2 Million; and (4) Civic Center (existing facility) - $16.6 Million = $37.7 Million.

Staff recommendations for the General Fund budget balancing alternatives: (1) proposed reductions in spending of $460,000 (professional/contracted services; staff realignments; and departmental line item adjustments); and (2) proposed revenue enhancements of $870,000 (privilege license adjustments; fee and permit adjustments; and cost recovery/allocation).

He explained in detail further considerations for Council for balancing alternatives: (1) possible reductions in spending: maintain Housing Trust Fund at current level (no new funding in Fiscal Year 2006-07); reduce service levels; eliminate low priority programs; reduce/eliminate funding for outside agencies; achieve 100% cost recovery for co-sponsored activities/events; defer capital expenditures; and defer filling position vacancies; and (2) revenue opportunities: property tax rate adjustment; increase recycling fee to include organic (loose leaf/brush) & bulky goods collection and recycling; adjust other fees and charges; and one-time revenue generation (proceeds from sale of land and appropriation of fund balance).

He outlined other potential service reductions, but not recommended: (1) reduce service in streets and sidewalk maintenance; (2) discontinue right-of-way maintenance; (3) scale back lower priority programs in public safety; (4) scale back lower priority programs in Parks and Recreation; (5) reduce Community Oriented Government Services; (6) extend PC leases/utilize free software; (7) reduce departments line items in training and professional services; and (8) eliminate 12 full-time employees (currently vacant positions). This totals $1.3 Million.

He asked for the following policy guidance from Council: (1) what is the appropriate balance between budget cuts and revenue enhancements for Fiscal Year 2006-07; (2) should we continue to raise fees while reducing reliance on property tax, or vice versa; (3) should we

reduce/eliminate low priority services; (4) should we employee short-term (or one-time) budget balancing strategies, for recurring expenditures; (5) should funding and support for the City's external partners take precedence over City services and internal operations; and (6) should we continue to delay capital improvements in order to balance the budget in the short-term.

Mr. Durant summarized the Civic Center Fund, the Festivals Fund, the Golf Fund, the Parking Fund, the Transit Fund, the Stormwater Fund, and the Water Fund.

Next steps include the (1) Revenue & Finance Committee reviews/recommends proposed fee adjustments and outside agency funding requests; (2) Council reviews unfunded expansion and Capital Improvement Plan detail requests; and (3) Council provides feedback to budget staff for completion of proposed budget by April 28, 2006.

Throughout Council discussion and their individual comments, Mr. Durant obtained direction from Council, as well as responded to various questions/comments, some being, but are not limited to: are we tracking the funds from the Housing Trust Fund used for Hurricane Katrina efforts; better documentation of the operating costs in the Parking Fund; what is the Consumer Price Index; what is the percentage increase in our revenues this year vs. last year; can the City initiate an employment tax and do other cities in North Carolina have such a tax; why is the method of paying for motor vehicle license fees being requested for change; need to define what the core services are for city government; what is the long-term result when we delay capital improvements; need to find a way to eliminate the subsidies going to the Civic Center Fund and the Golf Fund; does the City have a privatization analysis; request for figures for police, fire and public works regarding festivals; support for a revenue neutral tax rate; request for the appraised value of the Civic Center; is the Housing Trust Fund meeting a realistic need; request list of what capital improvement plan items would be deferred as a potential cost reduction; request for additional information on what the right-of-way maintenance reduction would consist of; request for more information on what the Parks & Recreation Department reductions would be; request for additional information on what things would be reduced in the Community Oriented Government Program; request for additional information on what businesses would be impacted in the privilege license changes; request for more information on how the fees and permit increases would impact small businesses; how does this preliminary budget impact our sales tax if we go revenue neutral; is this preliminary budget projected at revenue neutral; need to review each parcel of land fully to make sure selling it would be in the best interest of the City; can the City raise the motor vehicle fee; need to issue some bonds and increase the $8.2 Million capital improvement request not in the budget for Water Fund infrastructure; what do other cities across the state charge for their transportation systems; need to find additional $425,000 for portion of pay plan recommended by Fox Lawson consultants; comments about a 5-year budget; need more detail about possible reduction/elimination of low priority services and how our citizens would see that impact; and request that all cost savings that we get this year from budgets go directly into the General Fund instead of automatically being reallocated to those departments, and request for that total amount.

Mr. Durant said that he will be contacting Council members next week to arrange a time to review what the budget scenario will look like after staff takes the Council's comments and works to close the gap.

After discussion, Mayor Bellamy asked that before staff prints the proposed budget, that Council be given another preview session like this on May 8, 2006, with the requested information from this session, in order to give staff final direction. In addition, it was the consensus of Council to allow public comment at May 8 worksession on the proposed budget, in addition to the public hearing scheduled on June 13, 2006.

Mr. Durant said that he would review the state statutes to determine the timeframe in which he needs to have a formal proposed budget available for City Council, the City Clerk, and public inspection.

Upon inquiry of Councilwoman Cape, City Manager Jackson said that we can expand the public communication distribution of information, including posting the information on our website.

City Manager Jackson said that staff will use these comments as base information and start showing more staff recommendations that are consistent with a revenue neutral budget. It will then be clear to Council what is not included in a revenue neutral budget and then Council can determine if that stalls or furthers Council's long-term objectives. In the interim, Council will receive the detail of what is in those unfunded items because you will see that most significant initiatives that move many of the strategic goals identified by Council fall into those categories.

It was the consensus of Council to send to Mr. Durant and/or City Manager Jackson any Council initiatives that have budgetary impacts by May 8, 2006.

At 8:11 p.m., Mayor Bellamy announced a short recess.

Water Fund

Director of Water Resources David Hanks reviewed with Council the Water Department's expenses in the Fiscal Year 2006-07 budget: In detail he reviewed the operations & maintenance – in the amount of $15.45 Million; debt service – in the amount of $5.2 Million; and capital improvement projects – in the amount of $8.2 Million – totaling $28.85 Million for the annual water system expenses.

Mr. Hanks then reviewed the capital improvement projects funded by the CIP fee for Fiscal Year 2006-07 and Fiscal Year 2007-08: water treatment plant, distribution system projects, neighborhood projects, transportation improvement projects and water facility.

He reviewed in detail the CIP fee impact on average customer bills; the recommended uniform rate structure water rates by customer class; the combined impact of CIP fee and uniform rate structure; the impact of phasing for uniform rate; the impact of reduced rate for minimum volume usage; the combined impact of CIP fee and minimum volume rate; and the wholesale customer rates (Town of Woodfin, Town of Biltmore Forest and Town of Black Mountain).

Throughout Council members voicing their opinions, Mr. Hanks responded to various questions/comments from Council, some being, but are not limited to: what are the largest water users; have any manufacturers expressed concern over possible CIP fee; is this in line with the Brown & Caldwell report; request to identify the $4.5 Million of distribution system projects; request for average utility increases, e.g., gas, electricity, etc.; request for information about how many manufacturers are outside the City limits with significant employees; what is the reasoning behind bringing the Bee Tree facility back on line; has there been an analysis that shows what severity of drought would be necessary to occur that would max out North Fork Reservoir and the full capabilities of the Mills River Treatment Plant; how long would it take to put the Bee Tree facility on line; why isn't City staff recommending the minimum volume rate at this time; and does staff anticipate an annual rate increase of the CIP.

Council members felt that it would be prudent to be sensitive about harming our manufacturers with any increase.

Mayor Bellamy spoke in favor of the $15-20 Million debt capacity so we can begin work on our Capital Improvements Plan. She supported the CIP fee, but since this is our first year with

the system, she didn't think the uniform rate should begin. She felt we need to strengthen our accountability to our community and distribute them more information on our water system and how the fee will help with the infrastructure.

Councilman Mumpower understands that Henderson County has a strong interest in working again with the City of Asheville in finding a way to put the expensive water treatment plant Henderson County to good use. He felt the City should not look at putting Bee Tree on line, but work with Henderson County.

City Manager Jackson understood that the majority of Council has provided staff with direction to proceed with the CIP fee.

Councilman Newman felt that since water is a big issue in the community and felt a stand-alone public hearing (without being included in the 2006-07 Annual Operating Budget public hearing), should occur. City Manager Jackson responded that if Council is ready to proceed with the CIP before the annual budget public hearing that can be accomplished. However, he felt that in the long-term management of a utility that it makes sense to annually review the cost of service and the rate structure in order to get into a regular cycle.

It was the consensus of Council to instruct City Manager Jackson to contact Henderson County and possibly other surrounding counties to begin a process to explore possible water purchasing negotiations.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on April 25, 2006. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Central Business District Revisions

Urban Planner Alan Glines, with the assistance of Mr. Peter Alberice and Mr. Pat Whalen, members of the Asheville Downtown Commission, explained that this is the consideration of (1) an amendment to the Unified Development Ordinance ("UDO") to strengthen the requirements for projects located in the Central Business District ("CBD"); and (2) an amendment to the UDO to adjust the review thresholds for minor and major works for the Downtown Design Review program; (3) a resolution to adopt the Key Pedestrian Streets Map to be used to support the Central Business District zoning; and (4) an ordinance to expand the design review boundary map.

This proposed amendment is drafted to update the Code of Ordinances regarding projects located in the Central Business District. The City is experiencing continued growth and development in the downtown Central Business District. The Downtown Commission was appointed by City Council to recommend policy and to support downtown revitalization. They have carefully considered the proposed wording changes for nearly three years. As downtown's stock of existing buildings have been renovated to new uses, opportunities for new construction have shifted to under-developed infill lots in and around the periphery of the downtown core. This expansion from the core area will be the growth areas of the central business district. The proposed wording amendments to the UDO will provide additional requirements for new construction to ensure an urban style of development in the downtown area. Development along specific key pedestrian streets would have some additional requirements to improve the character of the street and strengthen the sense of place. The Key Pedestrian Streets Map, first developed for the City Development Plan 2025, is being submitted for adoption along with these ordinance

amendments. An additional item that is being submitted for consideration is a minor expansion of the boundary map, which outlines the coverage area for the Downtown Asheville Design Guidelines. The expansion seeks to include all parcels zoned CBD into the design review area. The Downtown Asheville Design Guidelines were adopted in the late in 1980's. The guidelines provide direction for new construction or major renovations in the downtown area. The program is administered by the Downtown Commission under a mandatory review and voluntary compliance authority. The current proposal seeks to amend this design review area to expand and include the entire area of the central business district (CBD zoning district). In order to balance out the need for a wider design coverage area and clearer requirements for new construction, the Downtown Commission is recommending that the design review program match City development review thresholds that are already in place. This means that instead of reviewing all projects greater than 5,000 square feet as currently provided for in the UDO, the Downtown Commission will review projects that are Level II and Level III projects. Staff will provide compliance review for Level I projects in a similar fashion as is done currently for projects under 5,000 square feet. This change in threshold requires an amendment to the UDO section that covers the downtown design review program. In summary, the proposed changes to the Central Business District section of the UDO, the Key Pedestrian Streets Map, the amendments to the Downtown Asheville Design Guidelines and review thresholds are expected to enhance and maintain the redevelopment that has occurred in downtown and provide direction, maintain the character and reinforce the urban form for new construction.

Pros –

- The ordinance amendments protects existing downtown development as new projects are proposed.
- The requirements for new construction ensures that new projects will add to the character of the downtown area and strengthen the urban form.
- Because the major part of downtown's stock of existing older buildings are renovated, new growth will be in the form of new in-fill construction. The amendments will be in place in time to positively affect this new development
- The dense development pattern of the core area of downtown will expand out to the edges of the Central Business District.

Cons –

- Some older businesses may find that their use would be a better fit in a more suburban setting.
- New development will place greater pressure on existing infrastructure.

The Downtown Commission voted to recommend approval of the proposed changes to the UDO covering the Central Business District. Staff concurs with this recommendation. In addition, at the Planning & Zoning Commission's February 12, 2006, meeting the Commission voted 6-0 to recommend approval of the proposed amendments with several minor changes that have been incorporated into the current ordinances contained herein.

City staff recommends City Council approve (1) an amendment to the Unified Development Ordinance ("UDO") to strengthen the requirements for projects located in the Central Business District ("CBD"); and (2) an amendment to the UDO to adjust the review thresholds for minor and major works for the Downtown Design Review program; (3) a resolution to adopt the Key Pedestrian Streets Map to be used to support the Central Business District zoning; and (4) an ordinance to expand the design review boundary map.

Councilwoman Cape felt we needed clarify on how we write our codes and suggested moving towards a form code.

Upon inquiry of Councilman Mumpower, Mr. Alberice said that in Phase II a form code will be addressed, along with discussion of height limits, affordable housing and other incentives to allow for higher and more dense development.

Mayor Bellamy asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda.

STATE LEGISLATIVE PROGRAM

City Attorney Bob Oast said that this is the consideration of requests for legislative action for the 2006 "short" session of the North Carolina General Assembly

Perhaps the most important factor in Council's consideration of the matters it wishes to submit for legislative consideration is that the legislative session for 2006 is a "short" session – in essence, a continuation of the 2005 "regular" session. Under the rules of the General Assembly only certain matters are eligible for consideration in the short session:

1. Bills that passed one house but not the other when the 2005 General Assembly adjourned (crossover bills);
2. Bills affecting pensions or retirement;
3. Bills making appointments;
4. Bills dealing with governmental reorganization;
5. Bills dealing with State budgetary matters;
6. Study bills;
7. Non-controversial local bills.
8. Other bills of a procedural nature may be introduced, as may bills that are introduced pursuant to a joint resolution.

Of the matters eligible for consideration, the provision for local bills is of most relevance to the City. Our legislators have advised in the past that "non-controversial" means not only that the proposal must have unanimous Council support, but also that the greater community is in general agreement with it.

The General Assembly reconvenes on Monday, May 9. In order to be eligible for consideration, any local bill must be submitted to the Bill Drafting Division by May 17, and introduced (House) or filed for introduction (Senate) by May 24.

1. LEGISLATIVE ACTION NEEDED. There have been several matters in the last year or so when it was recognized that legislative action was needed or desirable.

   A. Settlement agreement with Progress Energy regarding Lake Julian. Near the end of last year, the City and Progress Energy reached an agreement settling the 2000 litigation involving the attempted annexation of Progress Energy's Lake Julian power generating facility. Pursuant to this agreement, the City would cease attempts to annex Progress Energy's Lake Julian facility, and Progress Energy would continue to pay the City a utility franchise tax. This essentially amends an earlier (1994) agreement, formalized by legislation, settling a dispute (and threatened litigation) over the utility franchise tax.

   This settlement agreement was discussed with the legislative delegation prior to Council acting on it back in the Fall. The delegation has indicated that this matter is appropriate for consideration in the short session, and that they will take the appropriate steps to have it enacted into law.

B. Voluntary / legislative annexation in South Asheville. The area between the southern City limit and Henderson County is developing rapidly. For a variety of reasons, some of the commercial developments in this area wish to be annexed into the City of Asheville. Under current law, however, voluntary annexation is complicated because those areas are closer to Fletcher than they are to Asheville's primary corporate limits, even though Fletcher cannot expand into Buncombe County. Last year, legislative action was required in order to annex some commercial properties in the new development near the airport. This year, a similar situation has arisen with other commercial properties, and legislative action will likely be required again.

It may be possible to address this issue by reaching an annexation agreement with Fletcher, but legislation may provide a more long term solution.

C. Annexation of I-26 corridor. This corridor connects Asheville's primary corporate limits with its major satellite (the Airport), and with the rapidly developing (and voluntarily annexing) areas south of town, as described above. Construction work along I-26 and increased traffic, much of it local, make a municipal level of traffic enforcement in this area desirable. We have discussed this with DOT, and they have indicated support for this corridor being incorporated into the City. We have not discussed this with members of the delegation, but it is a possibility for action.

II. OTHER MATTERS: The City has in recent years considered seeking, and in some cases has sought, legislative action on several other matters. Some matters that may be of continuing interest to Council are:

A. Dedicated revenue for Civic Center. This discussion has typically centered on an occupancy or hotel tax, a prepared food and beverage tax, or a local sales tax.

B. Camera enforcement of red light violations. This is permitted by local act in several jurisdictions around the State. Currently, there is litigation pending on the proper use of the proceeds from the civil penalties.

The reasons why these matters have not moved forward include:

1. lack of uniform support on Council
2. lack of support among our delegation
3. insufficient information on how the revenue will be used (Civic Center)
4. inability to certify that the measure is not controversial.

It is unlikely that these measures would qualify for introduction or action in this short session.

III. NEW MATTERS. In addition to the above listed items, there may be matters that the Council wishes to propose for legislative consideration. Those would be subject to applicable rules regarding consideration in the short session. Also, we always look at proposed legislation affecting other local governments for consideration of whether Asheville should be included among the localities to which it applies. We will advise you if we see any items that are of potential interest to Asheville,

We are anticipating that we will proceed with requesting action on the settlement agreement with Progress Energy and we recommend that the legislative action be requested as

to voluntary annexation of developing areas to the south of town, and as to the I-26 corridor. We will prepare the appropriate information, depending on Council's direction.

Councilman Newman explained his following proposals: (1) Asheville be allowed to increase our local hotel occupancy fee from 4% to 6%, with the new 2% revenue being available for (a) operate and repair the Civic Center; (b) promote and support events in Asheville that increase visitor room nights in Asheville; and (c) create workforce housing in Asheville, focusing on the needs of workers who make at or near minimum water. If our local delegation will not increase our hotel occupancy rate, then request that the existing 1% which is dedicated to local tourism product development be re-allocated to City Council to be dedicated to the operation and repair of the Civic Center; (2) If additional funds beyond the hotel occupancy fee are needed to operate and repair the Civic Center, then request the ability to charge a local fine-dining tax – in the form of prepared food and beverage tax but would exempt meals which cost less than $35; (3) due to the deeply regressive nature of sales tax, Asheville should oppose any new sales tax; and (4) allow local governments to decide if they want to create public financing for local elections. Legislation has been introduced to allow cities over 50,000 to establish public financing of municipal elections.

Councilman Mumpower explained his following proposals (1) criminal justice system reform; and (2) repeal of Sullivan Acts II and III. He suggested we approach our legislative delegation know of our specific needs regarding the Civic Center and ask them for the best way on creating a revenue stream.

Councilman Davis felt our local delegation expects the City to come with them with a plan and he didn't believe that could be accomplished with the short time-frame for this short session. In addition, he said that this is the first time the Tourism Development Authority has committed (with a good plan) to ask the local delegation for a percent to be added.

Vice-Mayor Jones explained her proposal that we ask the local delegation to increase the child care reimbursement rate for Buncombe County.

After each Council member expressed their support or opposition for various legislative items, it was the unanimous support of Council to submit the following for the state legislative program (1) settlement agreement with Progress Energy regarding Lake Julian; (2) voluntary/legislative annexation in South Asheville; (3) support for presenting the legislation with a menu of options, with the exception of the local sales tax, for a dedicated revenue stream for the Civic Center; (4) child care subsidy; (5) criminal justice system reform; and (6) repeal of Sullivan Acts II and III.

At the request of Councilman Newman, Mayor Bellamy said that if Council has other broader public policy issues, that Council should circulate that additional information prior to the next formal meeting at which time the issues will be voted on separately.

Mayor Bellamy asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to appoint Jessica Leaven as an Alternate Member to the Board of Adjustment.

It was the consensus of City Council to ask the City Clerk to extend the application deadline for another month in order to obtain more applications for a vacancy on the Buncombe County Tourism Development Authority.

It was the consensus of City Council to ask the City Clerk to arrange the following interviews for a vacancy on the Asheville Transit Commission: Bruce Emory, Hanna Miller and Yuri Koslen.

OTHER BUSINESS

Vice-Mayor Jones announced that the Tourism Development Authority will be holding a 2-day charette for the community to get input on how to utilize the product development dollars.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:25 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – April 25, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Jones gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF SILVER WELL WORKPLACE AWARD

Mayor Bellamy recognized and praised Ms. Destiny Mattsson, the City's Wellness Coordinator, on receipt of the Silver Well Workplace Award from the Wellness Councils of America.

B. PROCLAMATION PROCLAIMING MAY, 2006, AS "MOTORCYCLE AWARENESS MONTH"

Mayor Bellamy read the proclamation proclaiming May, 2006, as "Motorcycle Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Roger Williams who briefed City Council on some statistics regarding motorcycle accidents and some activities taking place during the month.

II. CONSENT AGENDA:

Mayor Bellamy asked that Consent Agenda items "I" and "J" be removed from the Consent Agenda, with Consent Agenda "I" being removed for an individual vote. She said that Consent Agenda Item "J" will be considered after consideration of a resolution amending the Housing Trust Fund guidelines (under New Business).

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 11, 2006, AND THE WORKSESSION HELD ON APRIL 18, 2006

B. RESOLUTION NO. 06-77 - RESOLUTION OF INTENT TO CLOSE ALL STREETS IN THE AREA KNOWN AS CITY-COUNTY PLAZA AND SETTING A PUBLIC HEARING FOR MAY 23, 2006

Summary: The consideration of a resolution of intent to close all streets in the area known as City-County Plaza and setting a public hearing for May 23, 2006.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Buncombe County and the City of Asheville have requested the City of Asheville permanently close all streets in the area known as City-County Plaza as bounded by College Street on the north, Davidson Street on the east, Marjorie Street on the south and South Spruce Street on the west (a/k/a Court Plaza, City Hall Drive North, City Hall Drive South, City Hall Circle and any and all other names such streets may have from time to time been titled).

Public Works Department staff has researched and determined all streets in the area known as City-County Plaza are City maintained. Closure of these street will not deny any of the adjoining property owners reasonable means of ingress and egress as the City of Asheville and Buncombe County are the only adjoining property owners. The owner of the Hays Hopson Building, although not an adjoining property owner, will be provided a courtesy notice of the intent to close

Pros:

- The closure is necessary for the successful completion of the redesign of Pack Square.
- Closure of the streets will facilitate the timely completion of the Pack Square Project.
- The closure of the streets will still facilitate pedestrian movement from one location to another in downtown Asheville. There will be no future compromise of ingress/egress to other property.
- Ties in with City Council's Strategic Operating Plan

Cons:

- Staff can find no potential challenges.

This action ties in with the City Council Strategic Operating Plan in Focus Area: Sense of place, heritage and arts, Goal 3, Task 3, by promoting downtown revitalization, assisting in the implementation of the Pack Square Renaissance Project.

City staff recommends that City Council adopt the resolution setting a public hearing for May 23, 2006, to close all streets in the area known as City-County Plaza.

RESOLUTION BOOK NO. 29 – PAGE 436

C. RESOLUTION NO. 06-78 - RESOLUTION ACCEPTING AN AWARD FROM CATERPILLAR CORPORATION FOR THE RETROFIT OF 16 ORION TRANSIT BUSES WITH POLLUTION CONTROL DEVICES

Summary: The consideration of a resolution accepting an award from Caterpillar Corporation for the retrofit of 16 Orion transit buses with pollution control devices.

The Asheville Transit System has received an award from Caterpillar Corporation for the retrofit of 16 Orion transit buses with Diesel Oxidation Catalysts to lessen emissions from the buses diesel engines. The award was made in conjunction with the Diesel Technology Forum, an industry group dedicated to the extension and promotion of clean diesel technologies.

The Diesel Oxidation Catalysts will chemically oxidize particulate matter into water vapor and other gases such as sulfur dioxide and carbon dioxide. This technology will provide a 20 to 50 percent reduction in particulate matter, a 60 to 90 percent reduction of hydrocarbons, and more than a 90% reduction in carbon dioxide. This is equivalent to removing approximately 18 tons of particulate matter from the air and is accomplished without a loss in engine efficiency.

The entire cost of the project including materials and installation will be born by Caterpillar International. Installation will be through the local caterpillar dealer, Carolina Cat.

The benefits to the City of Asheville are:

- Cleaner air, and an advancement of transit strategy of moving towards clean diesel and eventually hydrogen power.
- Equipment will remove about 18 tons of particulate matter from air
- There is no cost to the city for the equipment or retrofit (The value of the project is unknown as Caterpillar would not disclose, preferring to frame discussion in terms of pollution removed from the air.)

There are no disadvantages or costs to the City of Asheville.

City staff recommends City Council formally accept the award from Caterpillar Corporation for the retrofit of 16 Orion transit buses with pollution control devices.

RESOLUTION BOOK NO. 29 – PAGE 437

D. RESOLUTION NO. 06-79 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH DIXON HUGHES FOR AUDITING SERVICES FOR FISCAL YEAR 2005-06

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2005-2006.

NC General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

Based on our review of a proposal submitted by Dixon Hughes, staff recommends retaining their services for Fiscal Year 2005-2006. We have worked with Dixon Hughes in the past and they have consistently provided a quality audit for the City.

The base fee has been proposed at $84,500. Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends adoption of the resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2005-2006

RESOLUTION BOOK NO. 29 – PAGE 438

E. RESOLUTION NO. 06-80 - RESOLUTION DECLARING PROPERTY AT 8 CEDAR STREET AS SURPLUS AND ESTABLISHING THE MINIMUM PRICE

Summary: The consideration of a resolution authorizing the marketing of surplus property at 8 Cedar Street and establishing a minimum price.

The City owns property at 8 Cedar Street (PIN No. 9657.07-58-4903) which it does not need and proposes to sell using the process provided in N. C. Gen. Stat. sec. 160A-269, negotiated offer and advertisement for upset bids.

The property at 8 Cedar Street is located at the intersection of Fairview Road and Cedar Street in the Oakley community. It was acquired by the City in December, 1999, for the purpose of realigning the Cedar Street/Fairview Road and Liberty Street/Fairview Road intersections in order to eliminate one of two "back to back" traffic signals. Since that time the amount of traffic on Liberty Street and Cedar Street has diminished significantly due to the closing of Crayton Road and the alternative access between Tunnel Road and Sweeten Creek Road via I-240 and I-40 at Exit 51. Realignment of the intersections is no longer needed based on current and anticipated traffic flow.

The property is zoned RS-8 and improved with a single family residential structure. The lot is 0.1745 acre, rectangular in shape and level to street grade with typical residential landscaping, fencing, etc. The structure is a circa 1926 two story Dutch Colonial with white clapboard siding containing 1,674 square feet. It is structurally sound and in fair to good condition, but it does need some repairs in order to obtain a Certificate of Occupancy. Marketability prospects for the property are very good.

The property has been appraised by CDN Appraisals at $128,000 and by BRB Appraisals at $165,000. The appraisals were reviewed by the City's Real Estate Manager and based on that review $158,600 is recommended as a minimum price for the property. The proceeds from the sale of the property will be general fund revenue.

The positive aspects of marketing the property are:

- The property will be marketed at the appraised value using the upset bid method of sale to ensure a competitive process.
- The sale of the property will generate revenue for the City.
- It will place the property back on the tax rolls.
- It is an efficient use of resources, because un-needed property will return to private ownership.
- It will make available moderately priced housing in a fully serviced neighborhood.

The one negative aspect is that if traffic improvements at the Cedar Street/Fairview Road intersection were ever needed the property may have to be reacquired.

Approval of the resolution will authorize marketing of the property through the process provided in N. C. G. S. 160A-269 and establish a minimum price of $158,600.

At the March 14, 2006, City Council meeting, Council referred this item to the Housing & Community Development Committee. At the Committee meeting on April 10, 2006, they reviewed this proposed sale and determined that the subject property was not suitable to be designated as affordable housing.

City staff recommends City Council adopt the resolution authorizing the marketing of surplus property at 8 Cedar Street and establishing a minimum price of $158,600.

RESOLUTION BOOK NO. 29 – PAGE 439

F. RESOLUTION NO. 06-81 - RESOLUTION APPOINTING A MEMBER TO THE BOARD OF ADJUSTMENT

Summary: Ms. Cheryl Johnson has declined the appointment as an Alternate member on the Board of Adjustment, thus leaving an unexpired term until January 21, 2009. This resolution will appoint Ms. Jessica Erwin Leaven, 52 Gracelyn Road, Asheville, N.C., to serve as

an Alternate member to the Board of Adjustment, to serve the unexpired term of Ms. Johnson, term to expire January 21, 2009, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 440

G. RESOLUTION NO. 06-82 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY ON DUNDEE STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property on Dundee Street.

A bid has been received from Robert Simon in the amount of $26,200 for the purchase of land on Dundee Street.

The land on Dundee Street was acquired by the City as part of the East End/Valley Street Community Improvement Program. It is a rectangular shaped lot comprising 0.115 acre±. It has a moderate slope downward from the street. It is zoned RM-8 and it is suitable as a home site. The bid from Robert Simon is in the amount of $26,200. We have in file an appraisal prepared by Joseph F. Moore dated September 13, 2005, estimating the market value of the property at $26,200. Mr. Simon proposes to acquire the property next door to live in and eventually build on the subject parcel

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

There is no negative impact.

City staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 29 – PAGE 441

H. ORDINANCE NO. 3348 - BUDGET AMENDMENT TO FUND WEB SITE DESIGN AND CONTENT MANAGEMENT SOFTWARE IMPLEMENTATION SERVICES

Summary: The consideration of a budget amendment, in the amount of $29,320, from the City Manager's contingency to fund web site design and content management software implementation services.

Pursuant to a memorandum sent to City Council on December 20, 2005, city staff is pursuing a web site redesign project along with developing a new process for updating and maintaining the city's web content.

This project was bid competitively at the local level, providing prospective vendors with a simple set of desired features. Notification of the bid was provided utilizing a local industry mailing list as well as posting on the City web site. A one week deadline was utilized because of the time-sensitive nature of this project. (Staff is now projecting that this project will be completed at the end of August rather than in July.) No local participation was received within the deadline.

The goal of the project is to design and structure a user-friendly site with intuitive navigation that will focus on reprioritizing and reorganizing information based on users' needs and perspectives. The project will make more efficient and effective use of the city's external web site as a tool for sharing information with the public by: (1) enhancing the ability to add, update and remove information from the site; (2) restructuring the information architecture to improve navigation and ease of use, and; (3) updating the look and feel of the site to reflect the organization's brand and professionalism.

A key component of the project is the implementation of content management software, which will make it easier for non-technical staff within each city department to add content to the city's web site, resulting in a more streamlined process that produces current, up-to-date and relevant information on the web site. The city is using Ektron CMS 400 software for this application.

COMSYS, an IT solutions company with extensive government experience, works as a partner with Ektron to implement the content management software as part of the redesign process. The budget amendment from the city manager's contingency will fund: web site design and architecture services; software installation and configuration; on-site training and support, and; the migration of priority content from the city's current site to the redesigned site.

Pros:

- Contingency funds will expedite the project's schedule for completion this fiscal year.
- The content management system will automate and streamline web management efforts, making more efficient use of staff time and resources.
- Efforts will result in a more user-friendly site based on citizen needs and feedback.
- The city will redesign its site so that a finite set of web templates provide a consistent and professional look across the organization
- The vendor has a proven track record of project success with other municipal governments.

Cons:

- Loss of the ability to use these contingency funds for other purposes in FY 2005-06.

Given City Council's commitment to improved communications and citizen service, city staff requests City Council adopt a budget amendment appropriating $29,320 from the manager's contingency to find the web site project.

ORDINANCE BOOK NO. 22 – PAGE 435

I. **RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE WEDDING AND RECEPTION ON MAY 13, 2006**

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION EVENTS ON MAY 19, JUNE 16 AND JULY 21, 2006

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BIG RED CHILI COOK-OFF ON JUNE 17, 2006

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE WINGS & STRINGS: WNC BUFFALO WING COOK-OFF ON JULY 15, 2006

These items were removed from the Consent Agenda for an individual vote.

J. RESOLUTION APPROVING A HOUSING TRUST FUND LOAN TO MOUNTAIN HOUSING OPPORTUNITIES FOR CROWELL PARK APARTMENTS

This matter was removed from the Consent Agenda in order to be discussed after consideration of a resolution amending the Housing Trust Fund guidelines (under New Business).

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 06-83 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE WEDDING AND RECEPTION ON MAY 13, 2006

RESOLUTION NO. 06-84 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION EVENTS ON MAY 19, JUNE 16 AND JULY 21, 2006

RESOLUTION NO. 06-85 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BIG RED CHILI COOK-OFF ON JUNE 17, 2006

RESOLUTION NO. 06-86 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE WINGS & STRINGS: WNC BUFFALO WING COOK-OFF ON JULY 15, 2006

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2006 Special Events: Wedding and reception on May 13, 2006; Asheville Downtown Associations' Events on May 19, June 16 and July 21, 2006; Big Red Chili Cook-Off on June 17, 2006; and Wings & Strings: WNC Buffalo Wing Cook-Off on July 15, 2006.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- A renewal of wedding vows and a reception on May 13, 2006, in the grassy knoll area of Pack Square, with indoor accommodations located at Windows on the Park, A Restaurant for Private Events.

- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville Parks and Recreation Department the Downtown After Five series to bring both

citizens and visitors to the downtown area. This year, only the first three events will be held in Pack Square, due the Pack Square Conservancy construction. They will be held on May 19, 2006, June 16, 2006, and July 21, 2006.

- The Big Red Chili Cook-Off, hosted by Season to Season Promotions, is a fundraiser for the Humane Society. This event will be held on June 17, 2006, in Pack Square.

- Wings & Strings: WNC Buffalo Wing Cook-Off, also hosted by Season to Season Promotions, is another fundraiser for the Humane Society. This event will be held on July 15, 2006, in Pack Square.

The Asheville Parks and Recreation Department recommends City Council adopt the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following 2006 Special Events: Wedding and reception on May 13, 2006; Downtown After Five events on May 19, June 16 and July 21, 2006; Big Red Chili Cook-Off on June 17, 2006; and Wings & Strings: WNC Buffalo Wing Cook-Off on July 15, 2006.

Councilwoman Cape moved to adopt Resolution Nos. 06-83, 06-84, 06-85 and 06-86. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION NO. 06-83 - RESOLUTION BOOK NO. 29 – PAGE 442
RESOLUTION NO. 06-84 - RESOLUTION BOOK NO. 29 – PAGE 444
RESOLUTION NO. 06-85 - RESOLUTION BOOK NO. 29 – PAGE 446

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT OAK PARK ROAD AND SKY VIEW ROAD FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING TO PERMIT CONSTRUCTION OF TWO DUPLEX BUILDINGS AND THREE SINGLE-FAMILY BUILDINGS

Mayor Bellamy stated that on Tuesday, April 18, 2006, an e-mail was received from Mr. Gerald Green, representing the applicant, stating that "the Laibsons are withdrawing their appeal of the Planning and Zoning Commission's recommendation for denial of the conditional zoning of property located on Oak Park and Sky View Roads. Mr. and Mrs. Laibson have agreed to sell the property to a neighboring property owner rather than pursue the development plan."

B. PUBLIC HEARING ON THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN FOR 2006-07

RESOLUTION NO. 06-88 - RESOLUTION APPROVING THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN FOR 2006-07

At the request of Mayor Bellamy, Councilman Freeborn moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously. Mayor Bellamy turned the meeting over to Vice-Mayor Jones.

Vice-Mayor Jones opened the public hearing at 5:12 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a public hearing on the City's Consolidated Annual Action Plan for 2006-07 and consideration of a resolution approving said Plan. This public hearing was advertised on April 14 and 21, 2006.

The City expects to have available $1,933,833 in CDBG funds and $1,418,821 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2006. The City's Housing and Community Development (HCD) Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 35 projects. Allocations are consistent with the draft Consolidated Strategic Housing & Community Plan for 2005-2010.

If approved, the HOME and CDBG funding will assist 528 housing units Consortium-wide (including 262 units at Pisgah View Apartments that will have a new security system). CDBG funds will also help more than 3000 low-income City residents obtain homeless services, housing counseling, business assistance, and other needed services.

Funding for the CDBG and HOME programs has been impacted by reductions in federal funding. In common with communities nationwide, Asheville's CDBG and HOME grants have been reduced by 9% from last year, and by 15% over two years. As a result many existing programs will receive less funding in this year's plan and six applications will receive no funding. After careful consideration, the HCD Committee has recommended closing the City's long-standing housing rehabilitation program, because we cannot afford the cost of staffing and funding it at an effective level. However, increased funding for Mountain Housing Opportunities' emergency repair program will provide urgently needed repairs for very low income, elderly, and disabled homeowners.

A summary of the draft Action Plan and notice of this public hearing was published on March 28, 2006. The Plan is due to be submitted to HUD by May 12, 2006.

Advantages:

- Allocates $3,352,654 in compliance with federal rules and enables the City to utilize these funds
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium
- Directly addresses most of the priorities set out in the Strategic Plan
- Leverages other funding in the ratio of $5.49 for every $1 of CDBG and HOME funds

Disadvantages:

- It is not possible to fund all of the applications received at the level requested.

City staff recommends City Council approve the City's Consolidated Action Plan for 2006-07 and subsequent submission of that Plan to the U.S. Dept. of Housing & Urban Development.

Vice-Mayor Jones closed the public hearing at 5:14 p.m.

Vice-Mayor Jones said that members of Council have previously received a copy of the resolution and it would not be read.

Ms. Caplan responded to various questions/comments from Council, some being, but are not limited to: what does the CD Administration cost consist of; what project is for the allocation to the micro-business development program; and are some of these funded programs competing for outside agency funds.

Councilman Mumpower said that a lot of the allocations represent a significant increase over last year and feels they are pretty well directed to a core group of non-profit agencies. He was disappointed that there was no recommendation made to fund waterline infrastructure. And, he understands that it is a struggle to put the document together, but philosophically he does see some waste of those hard-earned dollars. He could not support the resolution.

Upon inquiry of Councilman Davis, Ms. Caplan said that ten programs in the Consolidated Plan will, in various ways, impact the 10-Year Plan to End Homelessness. Councilman Newman explained how the recommended funding to the Affordable Housing Coalition does move us forward towards implementation of the Plan.

Councilman Davis felt it might be beneficial to have an update of the 10-Year Plan for discussion during the budget process.

Councilman Newman, Chair of the Revenue & Finance Committee, welcomed Council's input on budgetary direction for the outside agency funding.

Vice-Mayor Jones, Chair of the HCD Committee, discussed the process for allocation of the CDBG funds and HOME funds. She pointed out the good regional cooperation by the Regional Housing Consortium in allocating the HOME funds.

Councilman Newman moved for the adoption of Resolution No. 06-88. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no".

Vice-Mayor Jones turned the meeting over to Mayor Bellamy.

RESOLUTION BOOK NO. 29 – PAGE 451

C. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF AN UNOPENED RIGHT-OF-WAY OFF CARROLL AVENUE

Mayor Bellamy opened the public hearing at 5:36 p.m.

Assistant Director of Public Works Richard Grant said that this is the consideration of a resolution to permanently close an unopened right-of-way off of Carroll Avenue. This public hearing was advertised on March 31, April 7, April 14 and April 21, 2006.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Mr. Martin Barnes of Brooks & Medlock Engineering, PLLC representing the property owner Farwood Properties, Mike Farmer, President of Farwood Properties, has requested the City of Asheville to permanently close to the public an unopened right of way off of Carroll Avenue as shown on Plat Book 6, Page 6, Block "C" in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this unopened right-of-way is not a City maintained street. Closure of this unopened right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There is one parcel that abuts this section of right-of-way, owned by Farwood Properties. It is identified by PIN No. 9648.07-68-1457.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

City staff recommends that City Council adopt the resolution permanently closing the unopened right-of-way off Carroll Avenue.

He said that Carroll Avenue has existing drainage problems and there has been concern expressed that the development proposed in that area will only make the drainage problems worse. However, he said that the closure of the right-of-way will not affect the drainage within the proposed development because that right-of-way will be kept as open green space. He said that the development itself will have an impact on the drainage and various City departments are working on that concern.

Mayor Bellamy closed the public hearing at 5:39 p.m.

Mayor Bellamy said that the homeowners in the area were allegedly told that the closing had already been approved by City Council. She was concerned about that misinformation and felt it would be appropriate for City Council to postpone action on this closing until the conditional zoning matter comes before Council on the proposed development.

Ms. Jenny Farmer, representing Farwood Properties, said that when they met with the neighborhood for the conditional zoning issue, they had the design work already done, and felt that perhaps the neighbors assumed that the closing had already been approved by Council. She said that they are working hard with the neighborhood to resolve the issues concerning drainage and even asked for a continuance from the Planning & Zoning Commission meeting in order to work with them. This right-of-way is not used in their calculations for density, it will not be graded, and it's not required for the project, however, it is to clean up the paper street and make it a clear property line.

Councilwoman Cape moved to postpone this matter until June 27, 2006, at which time the conditional zoning public hearing will be before Council and this matter can be voted on as well. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 452

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING A PORTION OF PROPERTY LOCATED ON 430 MCDOWELL STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL ZONING TO PERMIT THE RENOVATION OF THE EXISTING BUILDING AND AN ADDITIONAL PARKING AREA FOR A DOCTOR'S PARK

ORDINANCE NO. 3349 - ORDINANCE TO CONDITIONALLY ZONE A PORTION OF PROPERTY LOCATED ON 430 MCDOWELL STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL ZONING TO PERMIT THE

RENOVATION OF THE EXISTING BUILDING AND AN ADDITIONAL PARKING AREA FOR A DOCTOR'S PARK

Mayor Bellamy opened the public hearing at 5:49 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to conditionally zone a portion of property located on 430 McDowell Street from RS-8 Residential Single-Family High Density District to Institutional District/Conditional Zoning to permit the renovation of the existing building and an additional parking area for a doctor's park. This public hearing was advertised on April 14 and 22, 2006.

Ms. Hamel said that the subject property is located off of McDowell Street across from Asheville High School. The lot consists of 1.33 acres and is currently zoned RS-8. The applicant is requesting a rezoning of a portion of this lot to Institutional District in order to convert the existing building, formerly used as a daycare center, to an office use. The portion of the parcel fronting St. Dunstan's Road will remain RS-8 and will be subdivided into two or three residential lots.

Surrounding land uses and zoning include the Asheville High School zoned Institutional to the west across McDowell Street; retail business zoned Institutional and a single-family dwelling zoned RS-8 to the north across Grindstaff Road; single family dwellings zoned RS-8 to the east; and vacant property owned by the N.C. Dept. of Transportation zoned RS-8 to the south fronting McDowell Street.

The parcel, in its current configuration, is considered both a through lot and a corner lot with street frontages on McDowell Street, Grindstaff Road and St. Dunstan's Road. The topography is steeply sloped from the top of the property towards the west (McDowell Street). The portion of the site to be rezoned to Institutional District currently houses a vacant building that was used as a daycare center. Access to the existing building and parking area is located off of Grindstaff Road.

The conceptual site plan proposes a conversion of the existing 3, 700 square foot building to an office. The building will function as a podiatry office and may also include one other general office use. The site plan illustrates use of the existing parking area off of Grindstaff Road that will consist of 6 spaces. The project also proposes construction of a new internal driveway that will connect the existing parking area to a new seven space parking lot located at the side and rear of the building. A 20-foot, Type B landscape buffer is required around the perimeter of the site where the property abuts residential uses. The applicant, Asheville Day Nursery School Inc., is meeting this requirement, except along the eastern side of the property where the buffer width has been reduced to install a privacy fence and other plantings; a fence can be installed to reduce buffer width and that is what is proposed in this case. In addition to the fence, alternative compliance has been requested for an area along the eastern side of the property where the proposed driveway, that connects the two parking lots, encroaches into the buffer. The applicant has stated that they would like to work with the adjoining property owners on providing them with an amendable planting plan. The mature vegetation shown along the west and north sides of the property will be maintained and credited towards the street tree requirements.

On Monday, March 18, 2006, the Technical Review Committee (TRC) approved the project subject to the conditions outlined in the TRC staff report. The applicant indicated at that meeting that the developer was not prepared to pursue Phase II of the project and asked that it be removed from the project review. Subsequent to the TRC meeting, the applicant provided staff with the information necessary to determine the number of parking spaces and type of landscaping required for the project. These items have been addressed on the revised plans.

On Wednesday, April 5, 2006, the Planning and Zoning Commission reviewed this request and unanimously voted to approve the project with the conditions outlined in the TRC staff report and with an added condition that the applicant complete the minor subdivision of the lot as proposed on the concept plan within 90 days of City Council approval.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by the TRC and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The property will be developed with minimal disturbance to the site and existing vegetation. The only land disturbing activity that will occur on site will be the construction of the proposed parking area on the south side of the building and the installation of required landscaping. This area of the site is relatively flat. Additionally, renovations required for the conversion of the building to office space will be confined to the interior of the structure.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** This property has been used commercially as a daycare facility. The proposed use of the property to an office is considered a low impact use and it not expected to injure the value of adjoining or abutting properties. The project will require the installation of landscape buffers where adjacent to residential uses and also parking lot landscaping that will assist in mitigating any potential negative impacts.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** This project proposes a rezoning only on the portion of the lot that is currently developed. The office will be housed within the existing structure on site. The remaining portion of the property will remain RS-8 and be subdivided from the main tract in order to create two to three residential infill lots that will be located off of Dunstan's Road.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project is supported by several goals and strategies in the plan relating to adaptive reuse, infill development, and smart growth policies. The project supports pursuit of compatible redevelopment and adaptive reuse of an existing structure with a low impact use. Traditional neighborhood development patterns are also recognized through the creation of several residential infill lots located within the core of the neighborhood.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar**

facilities. This project site is located within the City Limits and has access to all City services including water, fire and police protection and waste disposal. The project site is located on McDowell Street that is serviced by public transportation, including a transit stop located on the corner of McDowell Street and Grindstaff Road.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** This project has been reviewed by the City's Traffic Engineer who indicated that the office use would not cause undue traffic congestion or create a traffic hazard.

Pros

- The former use of the building as a daycare center was considered a non-conforming use. The building has been used commercially since 1956. Interior and exterior commercial up-fits to the building make it an unlikely candidate for the use to convert back to residential. A rezoning to Institutional District will allow a conforming use to occupy the lot.
- The proposed split zoning on the lot and creation of two residential parcels off of St. Dunstan's Road assists in protecting the integrity of the neighborhood by preventing access to the commercial portion of the existing parcel; and adds to the character of the neighborhood by creating additional single-family infill lots.
- Adaptive reuse of an existing structure.
- The conditional zoning process allows neighbors an opportunity to have a clear idea of how the property will be used.
- A medical office is provided on currently underutilized property in the close vicinity of other medical uses.

Cons

- Additional traffic may occur along St. Dunstan's Road in order to utilize the traffic signal at the corner of St. Dunstan's Road and McDowell Street.
- The rezoning could be viewed by some as an encroachment of nonresidential uses into a residential area.

Staff recommends approval of the project subject to the conditions outlined in the TRC staff report and with the following conditions: (1) That all site lighting be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and that a lighting plan be submitted to the City for approval; (2) All existing vegetation to be preserved and credited towards the landscape requirements be clearly dimensioned and delineated on the plans; (3) The minor subdivision of the lot, as illustrated on the concept plan be completed within 90 days of City Council approval; and (4) The developer shall meet with neighboring property owners in developing the design of required landscape buffers where alternative compliance is proposed.

Mr. Gerald Green, representing Asheville Day Care Nursery, spoke in support of the conditional zoning. It is their hope to preserve as many existing trees as they can near the back parking lot as they construct the privacy fence. Because of existing trees and rocks, they asked that in lieu of a constructing a sidewalk along McDowell Street, that they build a transit shelter, noting that there is an existing sidewalk on the other side of McDowell Street. He asked for the ability to work with City staff on this option.

Mayor Bellamy closed the public hearing at 5:56 p.m.

Mr. Green responded to various questions/comments from Council, some being, but are not limited to: will there be any major renovations to the outside of the building; and what is the access to the property.

In response to Mayor Bellamy's concern about the buffering be decreased because of the fence, Mr. Green said that they will try to save as many existing trees as they can and will supplement the fence with additional trees, as well as shrubs.

There was a brief discussion about the need for a sidewalk in that area.

Upon inquiry of Mayor Bellamy, Planning & Development Director Scott Shuford said that there is not an issue with changing the use from residential to Institutional/Conditional Zoning regarding the access onto Grindstaff Road.

Upon inquiry of Councilman Newman, Ms. Hamel said that there is an opportunity for flexibility on the sidewalk construction and will meet with the project engineer to look at the possibilities.

Councilman Newman agreed with the statement made by Ms. Hamel that the project conforms with the City's Comprehensive Plan and moved for the adoption of Ordinance No. 3349, to conditionally zone a portion of property located on 430 McDowell Street from RS-8 Residential Single-Family High Density District to Institutional District/Conditional Zoning to permit the renovation of the existing building and an additional parking area for a doctor's park, subject to the following conditions: (1) all conditions outlined in the TRC staff report; (2) That all site lighting be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and that a lighting plan be submitted to the City for approval; (3) All existing vegetation to be preserved and credited towards the landscape requirements be clearly dimensioned and delineated on the plans; (4) The minor subdivision of the lot, as illustrated on the concept plan be completed within 90 days of City Council approval; (5) The developer shall meet with neighboring property owners in developing the design of required landscape buffers where alternative compliance is proposed; (6) that a sidewalk be constructed for property frontage along McDowell Street; and (7) encourage the developer to preserve existing vegetation and work with City staff to plant additional trees to the buffer area in the back of the property. This motion was seconded by Councilman Mumpower and carried unanimously.

In response to Councilman Mumpower, Mr. Green said that he felt sure the developer would be amenable to help provide the labor for a Top-A-Stop at the site where the transit shelter would have been constructed.

Vice-Mayor Jones noted that Asheville Day Nursery provided a great service of affordable child care for over 50 years.

ORDINANCE BOOK NO. 22 – PAGE 437

E. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3350 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO STRENGTHEN THE REQUIREMENTS FOR PROJECTS LOCATED IN THE CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3351 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADJUST THE REVIEW THRESHOLDS FOR MINOR AND MAJOR WORKS FOR THE DOWNTOWN DESIGN REVIEW PROGRAM

RESOLUTION NO. 06-89 - RESOLUTION ADOPTING THE KEY PEDESTRIAN STREETS MAP TO BE USED TO SUPPORT THE CENTRAL BUSINESS DISTRICT ZONING

ORDINANCE NO. 3352 - ORDINANCE TO EXPAND THE DESIGN REVIEW BOUNDARY MAP

Mayor Bellamy opened the public hearing at 6:15 p.m.

Urban Planner Alan Glines said that this is the consideration of (1) an amendment to the Unified Development Ordinance ("UDO") to strengthen the requirements for projects located in the Central Business District ("CBD"); and (2) an amendment to the UDO to adjust the review thresholds for minor and major works for the Downtown Design Review program; (3) a resolution to adopt the Key Pedestrian Streets Map to be used to support the Central Business District zoning; and (4) an ordinance to expand the design review boundary map. This public hearing was advertised on April 14 and 21, 2006.

This proposed amendment is drafted to update the Code of Ordinances regarding projects located in the Central Business District. The City is experiencing continued growth and development in the downtown Central Business District. The Downtown Commission was appointed by City Council to recommend policy and to support downtown revitalization. They have carefully considered the proposed wording changes for nearly three years. As downtown's stock of existing buildings have been renovated to new uses, opportunities for new construction have shifted to under-developed infill lots in and around the periphery of the downtown core. This expansion from the core area will be the growth areas of the central business district. The proposed wording amendments to the UDO will provide additional requirements for new construction to ensure an urban style of development in the downtown area. Development along specific key pedestrian streets would have some additional requirements to improve the character of the street and strengthen the sense of place. The Key Pedestrian Streets Map, first developed for the City Development Plan 2025, is being submitted for adoption along with these ordinance amendments. An additional item that is being submitted for consideration is a minor expansion of the boundary map, which outlines the coverage area for the Downtown Asheville Design Guidelines. The expansion seeks to include all parcels zoned CBD into the design review area. The Downtown Asheville Design Guidelines were adopted in the late in 1980's. The guidelines provide direction for new construction or major renovations in the downtown area. The program is administered by the Downtown Commission under a mandatory review and voluntary compliance authority. The current proposal seeks to amend this design review area to expand and include the entire area of the central business district (CBD zoning district). In order to balance out the need for a wider design coverage area and clearer requirements for new construction, the Downtown Commission is recommending that the design review program match City development review thresholds that are already in place. This means that instead of reviewing all projects greater than 5,000 square feet as currently provided for in the UDO, the Downtown Commission will review projects that are Level II and Level III projects. Staff will provide compliance review for Level I projects in a similar fashion as is done currently for projects under 5,000 square feet. This change in threshold requires an amendment to the UDO section that covers the downtown design review program. In summary, the proposed changes to the Central Business District section of the UDO, the Key Pedestrian Streets Map, the amendments to the Downtown Asheville Design Guidelines and review thresholds are expected to enhance and maintain the redevelopment that has occurred in downtown and provide direction, maintain the character and reinforce the urban form for new construction.

Pros –

- The ordinance amendments protects existing downtown development as new projects are proposed.

- The requirements for new construction ensures that new projects will add to the character of the downtown area and strengthen the urban form.
- Because the major part of downtown's stock of existing older buildings are renovated, new growth will be in the form of new in-fill construction. The amendments will be in place in time to positively affect this new development
- The dense development pattern of the core area of downtown will expand out to the edges of the Central Business District.

Cons –

- Some older businesses may find that their use would be a better fit in a more suburban setting.
- New development will place greater pressure on existing infrastructure.

The Downtown Commission voted to recommend approval of the proposed changes to the UDO covering the Central Business District. Staff concurs with this recommendation. In addition, at the Planning & Zoning Commission's February 12, 2006, meeting the Commission voted 6-0 to recommend approval of the proposed amendments with several minor changes that have been incorporated into the current ordinances contained herein.

City staff recommends City Council approve (1) an amendment to the Unified Development Ordinance ("UDO") to strengthen the requirements for projects located in the Central Business District ("CBD"); and (2) an amendment to the UDO to adjust the review thresholds for minor and major works for the Downtown Design Review program; (3) a resolution to adopt the Key Pedestrian Streets Map to be used to support the Central Business District zoning; and (4) an ordinance to expand the design review boundary map.

Ms. Julia Brant wondered if there may be a conflict of interest of some members of the Downtown Commission since some are developers. She expressed the following three concerns: (1) balconies should not encroach on the public space; (2) height limitations should be based on the existing streetscape; and (3) developers should be responsible for providing their own parking, since there are no requirements for off-street parking.

Alan Ditmore explained why he felt that all projects should be reviewed on a square footage basis, regardless of whether they are residential or commercial structures.

Mayor Bellamy closed the public hearing at 6:23 p.m.

Mr. Peter Alberice, Chair of the Downtown Commission, assured Council that any time a project is brought before the Commission in which a member has a conflict they have asked to be excused.

After discussion surrounding whether the projects should be reviewed on a square footage basis only, it was the consensus of Council to accept the recommendation of the Downtown Commission at this time and ask that the Commission take Council's comments into consideration and re-visit this in their next phase of review. In addition, this matter can be discussed further at the May 16 worksession regarding land use issues.

Planning & Development Director Scott Shuford said that sometime ago Council asked Planning staff to look at making adjustments to our general thresholds to the three levels based on whether the developments achieve the variety of Council goals. Their review did include some exemptions for downtown development that does increase the threshold. As a result of this discussion, he said that in advance of the May worksession, he will send that code amendment to Council for their initial review.

In response to Councilwoman Cape, Mr. Alberice said that City Council has control over balconies since that issue will be handled in the conditional use permit public hearing.

Upon inquiry of Councilwoman Cape about the height limitations, Mr. Alberice said that the Downtown Commission spent an enormous amount of time in trying to come up with a way that could be quantified in the zoning ordinance that anyone could understand. As they were not able to come up with the height that was satisfactory to those proposing a mandatory height limit and those who want a height limit with more flexibility, the Commission decided to move that forward to the next phase of the Commission's review.

In response to Councilman Freeborn about no parking requirements, Mr. Alberice said that if they required parking, older buildings would be demolished to create surface parking in order to meet that requirement. He explained that most residential projects have provided parking in order to make their project marketable.

Upon inquiry of Councilwoman Cape about a fee in lieu of parking spaces, City Attorney Oast said that there are a number of vehicles available in the statutes for special tax districts and if Council is interested in pursuing those on a long basis he would look into those.

Councilman Newman was hesitant to support any additional regulations on parking, but would be interested in the Downtown Commission looking at ways to incenticize parking.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and ordinances and they would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3350. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 441

Councilman Davis moved for the adoption of Ordinance No. 3351. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 452

Councilman Freeborn moved for the adoption of Ordinance No. 3352. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 453

At 7:01 p.m., Mayor Bellamy announced a short recess.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION FINDING THAT AN UNOPENED 5-FOOT WIDE RIGHT-OF-WAY OFF FAIRMONT ROAD IS NOT PART OF AN ADOPTED STREET PLAN

Mayor Bellamy said that she has received the following request today from Mr. Jason Kraus, Counsel for the petitioners: "Please continue the matter involving the withdrawal of the 5-foot strip off of Fairmont Road to the May 9, 2006, formal Council meeting. This request is based upon the need of counsel for the petitioners, Mr. and Mrs. Chad Rundell, to conduct further investigation as it relates to a waterline crossing the 5-foot strip."

Therefore, Councilman Davis moved to continue this matter until May 9, 2006. This motion was seconded by Councilman Mumpower and carried on a 5-2 vote, with Councilwoman Cape and Councilman Freeborn voting "no."

B. RESOLUTION NO. 06-90 - RESOLUTION AMENDING THE HOUSING TRUST FUND GUIDELINES

Community Development Director Charlotte Caplan said that this is the consideration of amendments to the Housing Trust Fund (HTF) guidelines

The Housing and Community Development (HCD) Committee is undertaking a thorough review of the policy and procedures for the City's Housing Trust Fund, which were established in September 2000 and last updated in October 2004. At its April 10, 2006, meeting, the Committee noted the following issues which it felt needed immediate action.

1. Loan Limits

The current limit on any one loan is $250,000. While this is adequate for most developments, for those few proposals that involve large numbers of affordable units, this limit can greatly restrict the effective subsidy per unit. For example, for an 80-unit project the loan amount would be only $3,130 per unit, and the benefit in terms of increased affordability less than $200 in price, or $10-$15 a month in rent.

Staff recommends that the limit be increased to $500,000 for development of 30 units or more that offer a high degree of affordability and leverage.

2. Sales price limits

The current limits were adopted in October 2004. Rapid inflation of construction costs has made these limits out of date. Permit data suggests that construction costs are currently increasing by about 8% a year. Both for-profit and non-profit developers tell us that they can no longer build a 3-bedroom single family home on an infill lot to sell for the current limit of $135,000, and we have not received an application for HTF funds for homes for sale since February 2005. Applications for fee rebates through March 2006 are 70% down on the same period last year. The same price limits apply to both programs.

Staff recommends the following new price limits, effective immediately, which should remain realistic through Fiscal Year 2007:

Size	Existing Limit	Proposed Limit
0-bedroom (efficiency)	95,000	105,000
1-bedroom	110,000	115,000
2-bedroom	120,000	140,000
3-bedroom	135,000	160,000
4-bedroom	150,000	180,000

Staff further recommends that the same limits be considered for the fee rebate program, either immediately or on July 1, 2006, after passage of the City budget.

3. Exception to the price limits.
Some non-profit developers have pointed out that they are often able to make the homes they build more affordable by bringing in other forms of subsidy. These subsidies usually require sale to households with less than 80% area median income, a market that for-profit developers are barely able to serve. The non-profits have requested exemption from the HTF price limit provided that the home is made affordable to a household below 80% AMI. The HCD Committee has recommended this exception.

The Committee has also instructed staff to prepare more far-reaching proposals, which would modify some of the fund's basic policies. Staff expects to have these ready for Council's review in the summer.

Advantages:

- Larger loans to assist the largest and most affordable developments will increase the impact of the fund.
- Increased price limits will restore the fund's availability to developers.
- Price limits will not be a barrier where additional subsidy is available to serve low-income homebuyers.

Disadvantages:

- Larger loans will mean less funds available for small developments
- Homes priced close to the new limits will be less affordable, since incomes are increasing more slowly than land and construction costs.
- Less pressure on developers to build smaller, more basic homes.

Staff recommend approval of the new loan limits and sales price limits, and the exception to the sales price limits in the case of buyers under 80% AMI.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities, said that the per unit subsidy is important and explained why he felt the 3-bedroom unit sales price should be $150,000 not the proposed $160,000.

Mr. Walter Plaue felt that MHO is a great leader in providing affordable homes, but voiced concern about putting the annual available money for the HTF in "one pot" and felt there may be some sense of impropriety in that MHO is the first one who would benefit from the HTF guidelines proposed today.

Mayor Bellamy requested that the three proposed changes be discussed and voted on separately.

Councilman Newman spoke about how the HCD Committee has worked hard on making the HTF as useful as possible. He said that considering the needs in the community, we need to have tools to support the big projects that deliver "a lot of mileage."

Councilman Mumpower explained why he felt the HTF should be re-visited in its entirety for possible dissolution.

Vice-Mayor Jones, Chair of the HCD Committee, offered to make a presentation about the value of the HTF if the majority of Council wishes.

Ms. Caplan responded to Councilman Freeborn when he asked how many dollars have gone into the community as a result of the HTF and how many affordable units have been created.

Because discussion began in an area which Mayor Bellamy would have a conflict of interest, she asked to be excused. Therefore, Councilman Newman moved to excuse Mayor Bellamy from participating further in this matter due to a conflict of interest. This motion was seconded by Councilwoman Cape and carried unanimously. Mayor Bellamy turned the meeting over to Vice-Mayor Jones and left the meeting room.

After Council members voiced their concerns/support for the three proposed changes, Councilman Mumpower moved to send the sales price limits change and the exception to the price limits back to the HCD Committee for further review and consideration, taking into consideration Council's comments. This motion was seconded by Councilman Davis and carried unanimously.

Vice-Mayor Jones moved to amend the HTF guidelines to increase the loan limit to 500,000 for development of 30 units or more that offer a high degree of affordability and leverage. This motion seconded by Councilwoman Cape and carried on a 4-2 vote, with Councilman Mumpower and Councilman Davis voting "no."

RESOLUTION BOOK NO. 29 – PAGE 454

C. RESOLUTION NO. 06-87 - RESOLUTION APPROVING A HOUSING TRUST FUND LOAN TO MOUNTAIN HOUSING OPPORTUNITIES FOR CROWELL PARK APARTMENTS

Even though Mayor Bellamy did not re-enter the meeting room, Councilman Mumpower moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Freeborn and carried unanimously.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution approving a $500,000 Housing Trust Fund loan for the development of 73 units of affordable rental housing on Crowell Road in West Asheville.

Mountain Housing Opportunities (MHO) has requested a Housing Trust Fund (HTF) loan in the amount of $500,000 for a proposed $7 million Low Income Housing Tax Credit (LIHTC) development. They also plan to use $395,700 in HOME funds.

The available balance in the Housing Trust Fund is currently $562,000

The application was evaluated by a panel of outside experts and staff and scored very well against the HTF criteria. MHO has an excellent track record with similar tax credit projects in Asheville. This development will be targeted to working families with income below 50% of the area median income and LIHTC rules guarantee 30 years of continued affordability. The HTF investment per unit is only $6,850.

The requested loan amount of $500,000 is above the current HTF loan limit of $250,000. The HTF investment will allow the developer to meet the additional property taxes after annexation to provide an urban level of services (a condition of the zoning permit) and will also enable it score additional points in the tax credit competition. However, the request is based on a calculation of property taxes that assumes continuation of the current tax rate. If the tax rate is rolled back as a result of the recent re-valuation, the operating costs will be reduced and the project may be over-subsidized.

The Housing and Community Development Committee reviewed the application on April 10, 2006, and has recommended awarding an HTF loan in the amount of $500,000 with provisional terms of 0% interest and principal payments amortized over 15 years. Final terms will be subject to negotiation after July 1, 2006, and may include an interest rate above 0% and/or an accelerated repayment of principal to prevent over-subsidizing.

Advantages:

- Creation of 73 units of affordable housing for low income working families
- Long-term affordability (at least 30 years)
- Increased of almost $6,000,000 in the tax base
- Increased chance of winning Low Income Housing Tax Credits for Asheville

Disadvantages: This loan will exhaust most of the remaining Housing Trust Fund cash balance for this fiscal year. No other significant project can be funded until additional funds are available.

City staff recommends City Council approve a $500,000 Housing Trust Fund loan to Mountain Housing Opportunities.

Ms. Cindy Weeks, representing MHO, spoke in support of the loan.

Mr. Walter Plaue felt the City should concentrate on infill development.

Ms. Weeks responded to several questions from Council, some being, but are not limited to: how does MHO sustain affordability for the units; explain the zero interest rate; and when would the project break ground.

Councilman Newman moved to adopt Resolution No. 06-87. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no".

Vice-Mayor Jones then turned the meeting back over to Mayor Bellamy when she re-entered the meeting room.

RESOLUTION BOOK NO. 29 – PAGE 450

D. RESOLUTION NO. 06-91 - RESOLUTION ADOPTING THE STATE LEGISLATIVE PROGRAM

City Attorney Oast said that this is the consideration of adoption of a resolution for approving legislative action in the 2006 session of the North Carolina General Assembly.

At the Council work session on April 18, 2006, the City's legislative requests were considered by Council. Based on that consideration, Council indicated a desire to proceed with the following items as indicated:

A. Settlement agreement with Progress Energy regarding Lake Julian. Near the end of last year, the City and Progress Energy reached an agreement settling the 2000 litigation involving the attempted annexation of Progress Energy's Lake Julian power generating facility. Pursuant to this agreement, the City would cease attempts to annex Progress Energy's Lake Julian facility, and Progress Energy would continue to pay the City a utility franchise tax. This essentially amends an earlier (1994) agreement, formalized by legislation, settling a dispute (and threatened litigation) over the utility franchise tax.

This settlement agreement was discussed with the legislative delegation prior to Council acting on it back in the Fall. The delegation has indicated that this matter is appropriate for consideration in the short session, and that they will take the appropriate steps to have it enacted into law.

City Attorney Oast has been in discussions with Progress Energy's attorney, former Mayor Larry McDevitt, about this matter, and he indicates that he has been in discussion with our delegation, and they are ready to act on the request.

When the settlement was initially approved back in November, it was contemplated that a detailed review of information might result in slight revisions to the area included in the coverage of the Agreement. This detailed review has been completed, and the map showing the properties to be included has been slightly revised. However, this revision has no financial consequence to the City under the Agreement, and amounts to a technical correction. For a further explanation of the revisions, see my memorandum dated April 21, 2006.

Council direction: Resolution to proceed with finalization of settlement agreement.

Note: Because Mr. McDevitt's office will take the lead in working with the delegation on this matter, no further action by the City, other than cooperating with Mr. McDevitt, should be necessary.

B. Voluntary / legislative annexation in South Asheville. The area between the southern City limit and Henderson County is developing rapidly. For a variety of reasons, some of the commercial developments in this area wish to be annexed into the City of Asheville. Under current law, however, voluntary annexation is complicated because those areas are closer to Fletcher than they are to Asheville's primary corporate limits, even though Fletcher cannot expand into Buncombe County. Last year, legislative action was required in order to annex some commercial properties in the new development near the airport. This year, a similar situation has arisen with other commercial properties, and legislative action will likely be required again.

Council direction: Resolution to seek legislative action as necessary to enable properties in this area to voluntarily annex into the City of Asheville without specific legislative approval.

C. Revenue for Civic Center: Although this matter may be more appropriate for consideration in the 2007 session than in this short session, Council indicated that it wished to work with the delegation in considering the menu of options available to provide needed funding for the Civic Center. This request coincides with the approval by the Civic Center task force of alternatives for renovation / expansion of the Civic Center, and the transmission of those recommendations to the Council for action. Since Council action will necessarily involve some consideration of funding, Council wishes to begin that consideration sooner rather than later, and to request appropriate assistance and direction from the legislative delegation. Council indicated that it was open to any funding mechanism except a sales tax. A detailed discussion of available options is beyond the scope of this staff report, but more information will be available and developed as the options emerge.

Council direction. Resolution to seek assistance and appropriate action as necessary to develop a funding source for this regional facility.

D. Repeal of Sullivan Acts: This was not discussed in detail on April 18, but has been the subject of much consideration in the last 18 months, and there is a wealth of information available from a variety of sources.

Council direction. Resolution requesting repeal of the Sullivan Acts.

E. Child care reimbursement: There is concern within the community that Buncombe County does not receive its fair share of funds for reimbursement for child care services provided for low/moderate income families. Consideration should be given to the adoption of the 2005 Market Rate Study, and increasing overall funding.

Council direction. Resolution requesting legislative review and action as necessary to address funding inequities and insufficiencies.

F. Funding of criminal justice system: There is concern within the community that the State's criminal justice system is not adequately funded, especially with respect to drug-related offenses. This has the effect of allowing offenders – sometimes repeat offenders – to get back on the street with little or no deterrent action.

Council direction. Resolution requesting legislative review and action as necessary to address criminal justice system funding issues, particularly as they may affect Asheville.

The 2006 session is a "short" session, meaning that there are limits on what can be considered by the General Assembly. There is also a fairly narrow window for submission of requests; the deadline for submission of material to the Bill Drafting division is May 17.

Councilman Newman introduced for Council's consideration for inclusion in the legislative package (1) campaign finance reform – allow local governments to decided if they want to create public financing for local elections; (2) concern regarding cable franchise fees – statement that Asheville is concerned about the state-wide video franchise bill which would cap PEG access fess at $16,000 per community and delegate responsibility to the Attorney General's Office for handling citizen complaints about local TV providers (historically, local governments have laced a leading role in these issues); (3) raise the minimum wage – statement that Asheville asks our legislators to raise the state minimum wage to $7 per hour; (4) homestead exemption – reduce property taxes on low-income senior citizens who live in their own home, expand the homestead exemption act and index it for inflation; and (5) Land for Tomorrow initiative – place the Land for Tomorrow bond referendum on the ballot for consideration by the people of North Carolina.

City Attorney Oast said that the following four specific items for local legislation (settlement agreement with Progress Energy regarding Lake Julian; voluntary/legislative annexation in South Asheville; revenue for the Civic Center; and repeal of the Sullivan Acts), will require unanimity (which our delegation requests) from the Council before the legislative delegation will introduce them. The other items are relevant to the City of Asheville, but since they are not specific pieces of legislation, he was not certain unanimity by Council was necessary.

Mayor Bellamy said that this is a short session, which needs to have non-controversial items and items with unanimity of Council. She recalled that during the regular session, other items of endorsement have been submitted with the vote of Council. The majority of Council can change that process.

Councilwoman Cape moved to include items that are not unanimous to move forward, but presented separately from the items that are unanimous, in the short session of the City's

legislative package items. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote, with Mayor Bellamy voting "no."

Councilman Mumpower felt that even though the items are not unanimous, is gives us an opportunity to educate our legislative body on some of Council's interests, whether we chose to pursue those interests or not.

Councilwoman Cape moved to include the following three items specifically relating to the City of Asheville to the City's legislative package: (1) settlement agreement with Progress Energy regarding Lake Julian; (2) voluntary/legislative annexation in South Asheville; and (3) repeal of the Sullivan Acts). This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no".

Because there was unanimity by City Council at the worksession for all the items City Attorney Oast just reviewed, Councilman Mumpower moved to include the following six items to the City's legislative package: (1) settlement agreement with Progress Energy regarding Lake Julian; (2) voluntary/legislative annexation in South Asheville; (3) revenue for the Civic Center; (4) repeal of the Sullivan Acts); (5) child care reimbursement; and (6) funding of criminal justice system. This motion was seconded by Councilman Freeborn.

There was a brief discussion regarding the Civic Center, noting that the Civic Center Task Force will be bringing forward their options to Council on May 9, 2006.

Councilman Newman is not supportive of a sales tax as an option for revenue for the Civic Center and requested more analysis on the different options, e.g., hotel occupancy fee, fine dining tax, etc., available for Civic Center revenue.

The motion made by Councilman Mumpower and seconded by Councilman Freeborn to move forward on all six items carried unanimously.

After each Council member voiced their opinion on the campaign finance reform item, Councilwoman Cape moved to move that forward to the legislative delegation. This motion was seconded by Councilman Freeborn and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

After each Council member voiced their opinion on the cable franchise fees item, Councilwoman Cape moved to move that forward to the legislative delegation. This motion was seconded by Councilman Freeborn and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

After each Council member voiced their opinion on raising the minimum wage item, Councilman Newman moved to move that forward to the legislative delegation. This motion was seconded by Councilwoman Cape, and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no." Mayor Bellamy requested a report from the City Manager on our employee salaries.

After each Council member voiced their opinion on the homestead exemption, Councilman Davis moved to move that forward to the legislative delegation. This motion was seconded by Councilwoman Cape, and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

After each Council member voiced their opinion on the Land for Tomorrow initiative, Councilwoman Cape moved to move that forward to the legislative delegation. This motion was

seconded by Councilman Freeborn and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 458

E. RESOLUTION NO. 06-92- RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE TRANSIT COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee said that Councilman Bryan Freeborn has resigned as a member of the Asheville Transit Commission, thus leaving an unexpired term until December 31, 2006.

At the City Council worksession on April 18, 2006, City Council instructed the City Clerk to arrange interviews for Mr. Yuri Koslen, Ms. Hanna Miller and Mr. Bruce Emory.

After Council spoke highly of the candidates, Vice-Mayor Jones said that the Boards & Commissions Committee will review the structure for possible expansion of the Board. The voting was as follows: Yuri Koslen received one vote, Hanna Miller received six votes, and Bruce Emory received no votes. Therefore, Hanna Miller was appointed to serve the unexpired term of Councilman Freeborn, term to expire December 31, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 459

VI. OTHER BUSINESS:

Councilwoman Cape suggested that when an item is withdrawn from the Council agenda that a notice be placed on the Council Chamber door for those who may not have been in the Chamber when that action happened.

City Council recognized Mr. Yuri Koslen for his efforts on Strive Not To Drive Day.

Vice-Mayor Jones announced the three upcoming board and commission vacancies.

The following claims were received by the City of Asheville during the period of March 31 – April 20, 2006: BellSouth (Water), Harriett Riddle (Sanitation), Emily Kinsella (Sanitation), Steve Earle (Water), David Wilson (Streets), Sherri Adkins (Water), Mildred Miller (Police) and Travis Smith (Police). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Bruce Deile spoke to Council about the denial of medical treatment due to high costs. He also brought to Council's attention that an older homeless man who can't take care of himself was kicked out of the Salvation Army. Mr. Deile said that A-Hope staff said they can't force this man into a state run agency. Mayor Bellamy said that she would follow-up on this.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:15 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – May 9, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING 2006 AS "YEAR OF THE MUSEUM"

Mayor Bellamy read the proclamation proclaiming 2006, as "Year of the Museum" in the City of Asheville. She presented the proclamation to Frank Thomson, Cassie Moore, Kelly Miller and Robert Sipes, all representing the Asheville Art Museum, who thanked City Council for this designation.

B. PROCLAMATION PROCLAIMING MAY, 2006, AS "PRESERVATION MONTH"

Councilman Davis read the proclamation proclaiming May, 2006, as "Preservation Month" in the City of Asheville. He presented the proclamation to Mr. Jim Coman, President of the Preservation Society, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING MAY, 2006, AS "DISABILITIES AWARENESS MONTH"

Vice-Mayor Jones read the proclamation proclaiming May, 2006, as "Disabilities Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Liz Huesemann, Executive Director of the Irene Wortham Center, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

Councilman Mumpower asked that Consent Agenda Item "E" be pulled from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 25, 2006

B. RESOLUTION NO. 06-93 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 23, 2006, TO CONSIDER THE VOLUNTARY ANNEXATION AT 3820 SWEETEN CREEK ROAD

Summary: The consideration of a resolution fixing the date of a public hearing on May 23, 2006, for property located at 3820 Sweeten Creek Road.

John W. Couch has petitioned the City of Asheville for the annexation of one lot located at 3820 Sweeten Creek Road containing approximately .72 acres. The area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

Pursuant to N. C. Gen. Stat. sec. 160A-31 such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed.

This property contains a single-family home and is zoned R-1 under Buncombe County's Limestone Township Zoning Ordinance.

The next step in this process is for City Council to fix the date for the public hearing on this matter. Should City Council decide to proceed with this request, the effective date for the annexation would be June 30, 2006.

Considerations:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council accept the petition and adopt the resolution setting the date for a public hearing on the annexation petition for May 23, 2006.

RESOLUTION BOOK NO. 30 – PAGE 1

C. RESOLUTION NO. 06-94 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 23, 2006, TO CONSIDER THE VOLUNTARY ANNEXATION OF FOUR LOTS ON ROCKWOOD ROAD

Summary: The consideration of a resolution fixing the date of a public hearing on May 23, 2006, for properties located on Rockwood Road.

Hankins Properties, LLC, has petitioned the City of Asheville for the annexation of four lots located along Rockwood Road in South Buncombe County (off of Airport Road) containing a total of approximately 6.54 acres. The area, while contiguous to other non-contiguous ("satellite") properties in the City of Asheville, is not contiguous to the primary corporate limits of the City and therefore is subject to the standards for annexation of noncontiguous areas contained in N. C. Gen. Stat. sec. 160A-58.1.

Pursuant to N. C. Gen. Stat. sec. 160A-58.2 such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed.

The next step in this process is for City Council to fix the date for the public hearing on this matter. Should City Council decide to proceed with this request, the effective date for the annexation would be June 30, 2006.

Considerations:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.
- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council accept the petition and adopt the resolution setting the date for a public hearing on the annexation petition for May 23, 2006.

RESOLUTION BOOK NO. 30 – PAGE 3

D. RESOLUTION NO. 06-95 - RESOLUTION AUTHORIZING THE SALE OF PROPERTY ON DUNDEE STREET TO ROBERT SIMON

Summary: The consideration of a resolution authorizing the Mayor to convey land on Dundee Street to Robert Simon.

On April 25, 2006, City Council authorized advertising for upset bids pursuant to a bid from Robert Simon for land on Dundee Street in the amount of $26,200. The advertisement was published on April 28, 2006, and no upset bids were received.

The land on Dundee Street was acquired by the City as part of the East End/Valley Street Community Improvement Program. It is a rectangular shaped lot comprising 0.115 acre±. It has a moderate slope downward from the street. It is zoned RM-8 Residential Multi-Family Medium Density District and it is suitable as a home site. The bid from Robert Simon is in the amount of $26,200. We have in file an appraisal prepared by Joseph F. Moore dated September 13, 2005, estimating the market value of the property at $26,200. Mr. Simon proposes to acquire the property next door to live in and eventually build on the subject parcel.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

There is no negative impact.

City staff recommends adoption of the resolution authorizing the Mayor to convey land on Dundee Street to Robert Simon in the amount of $26,200.

RESOLUTION BOOK NO. 30 – PAGE 6

E. RESOLUTION SUPPORTING CONTINUATION OF THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

This item was pulled from the Consent Agenda for an individual vote.

F. RESOLUTION NO. 06-97 - RESOLUTION AMENDING THE 2006 CITY COUNCIL MEETING SCHEDULE TO DELETE THE BUDGET WORKSESSION SCHEDULED FOR MAY 22, 2006

RESOLUTION BOOK NO. 30 – PAGE 8

G. RESOLUTION NO. 06-98 - RESOLUTION OF COMMITMENT TO THE PRESERVATION OF OUR COMMUNITY'S CULTURAL AND NATURAL HERITAGE ASSETS

Summary: The consideration of a resolution to be included with the Preserve America designation application package, reconfirming the City's commitment to the preservation of its cultural and natural heritage assets

Preserve America is a White House initiative developed in cooperation with the Advisory Council on Historic Preservation and the U.S. Department of Interior, Commerce, Agriculture and Housing and Urban Development. The program recognizes and designates communities that celebrate and protect their cultural heritage. Asheville has been invited to seek designation as a Preserve America Community based on its embodiment of the goals and spirit of the Preserve America Initiative. The adoption of a resolution by the local governing body, indicating commitment towards preservation of the community's heritage assets is required as part of the application package.

As a designated Preserve America Community, Asheville will not only be eligible to apply for a Preserve America matching grant, but will also benefit from increased community visibility and pride for its preservation efforts. Other benefits include: White House recognition, a Preserve America Community road sign, authorization to use the Preserve America logo, inclusion in national and regional press releases and the opportunity to receive one of four Presidential awards.

This program is consistent with the goals for preservation as indicated in the 2025 Plan. It is also a great opportunity for Asheville to further its reputation as a community dedicated to the preservation of its valuable cultural heritage.

Pros

- Eligibility to apply for matching grants
- Increased visibility and pride

Cons:

- Staff can find no potential challenges with this program

City staff recommends that City Council adopt the resolution reconfirming our commitment to the preservation of our cultural and natural resources.

RESOLUTION BOOK NO. 30 – PAGE 9

H. MOTION SETTING A PUBLIC HEARING ON MAY 23, 2006, TO CONSIDER RENAMING THE EXISTING STREET OF "HOLIDAY INN DRIVE," LOCATED OFF HIGHWAY 240 EAST, TO "RESORT DRIVE"

Summary: The consideration of a motion setting a public hearing for May 23, 2006, to consider renaming the existing street of "Holiday Inn Drive," located off Highway 240 East, to "Resort Drive."

The owners of Crowne Resort have petitioned the City of Asheville to rename "Holiday Inn Drive" to "Resort Drive." City staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any street is to facilitate emergency response. Staff researched the street data and has

determined that this name is not duplicated. The adoption of the new street name is to enhance emergency response to these citizens.

Pros:

- The street will be utilized to access the existing hotel golf resort.
- Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Cons:

- There are no negative affects of for assignment of "Resort Drive" to this existing road.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the city's strategic operation plan. This action complies with the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure: Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends City Council set a public hearing for May 23, 2006, to consider renaming the existing street of "Holiday Inn Drive," located off Highway 240 East, to "Resort Drive."

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

RESOLUTION NO. 06-96 - RESOLUTION SUPPORTING CONTINUATION OF THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

Summary: The consideration of a resolution in support of the Community Development Block Grant (CDBG) Program.

The President's draft budget for federal Fiscal Year 2007 proposes a 25% cut to the CDBG program.

The City of Asheville has used the CDBG program since its start in 1974 to revitalize blighted city neighborhoods, renovate many hundreds of units of housing, provide land and infrastructure for several hundred new homes, invest in downtown economic development, and support key social service programs. Aside from downtown economic revitalization, all funds have been used to benefit low income individuals and low-income neighborhoods. A fact sheet is attached on the City's CDBG accomplishments in 2004-05.

Between 2004 and 2006, federal funding for the CDBG program was reduced by 15%. This has caused significant cuts in Asheville's program, including closing down our long-standing housing rehabilitation program, and cutting funding to several well-established and successful social service programs operated by local non-profits. A further 25% cut would cause further cuts in these programs and serious setbacks in the progress we are making to provide low-income people with decent housing and economic opportunities and to address homelessness.

Advantages:

- Authorizes the Mayor to express the City's concern to our Congressional representatives
- Adds the City's voice to that of the National League of Cities and US Conference of Mayors, who have set this as a top priority issue in 2006.

Disadvantages: None

City recommends approval of the resolution supporting renewed federal funding for the CDBG program at $4.3 billion nationwide, the same level as in Fiscal Year 2004.

Councilman Mumpower said that we do try to use these federal dollars to good use, but philosophically he had a hard time about borrowing this money on our children's lives. He would have to speak against the misuse of the system that does good upfront, but charges us very heavily on the backside.

Vice-Mayor Jones spoke strongly in support of the CDBG Program. She felt this is one of the programs that actually invests in our community where you can see tangible returns. She felt this is a federal tax dollar investment that is actually giving back substantially to our community.

Councilman Newman moved to adopt Resolution No. 06-96. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 7

III. PUBLIC HEARINGS:

A. PUBLIC HEARING REGARDING THE APPROVAL OF THE EXECUTION AND DELIVERY OF AN INSTALLMENT PURCHASE CONTRACT FOR THE CONSTRUCTION OF TWO FIRE STATIONS, THE REPLACEMENT OF A ROOF ON A CITY FACILITY, ACQUISITION OF VEHICLES AND PUBLIC SAFETY RADIOS

RESOLUTION NO. 06-99 - RESOLUTION AUTHORIZING THE INSTALLMENT FINANCING OF TWO FIRE STATIONS, A CIVIC CENTER ROOF, VEHICLES AND EQUIPMENT

Mayor Bellamy opened the public hearing at 5:12 p.m.

Chief Financial Officer Ben Durant said that this is the consideration of a resolution authorizing the installment financing of two fire stations, a Civic Center roof, vehicles and equipment. This public hearing was advertised on April 28, 2006.

The current capital improvement program (CIP) includes funds previously appropriated by City Council to finance (1) the construction of two fire stations and a civic center roof at an approximate cost of $6,777,000 and (2) the acquisition of large vehicles and the upgrade of the 800 mhz public safety radio system at an approximate cost of $2,523,000.

The Finance Department sought proposals from six firms to finance the purchase of the construction of the fire stations and the roof and to purchase vehicles and equipment. Five proposals were received, the best of which was submitted by Bank of America at an interest rate of 3.92% per annum for the stations and the roof and 3.84% per annum for the vehicles and equipment.

Federal tax laws make it advantageous for banks to lend to "bank qualified" governmental borrowers. As a result, banks can provide lower rates for loans to their "bank qualified" borrowers. For a local government to be "bank qualified" it must not contemplate issuing more than $10,000 000 in tax-exempt debt in the calendar year in which the loan is made. The City is currently bank qualified for 2006.

Upon approval of this resolution, the final step in the process is to receive approval from the Local Government Commission and to close the loan with the bank. We anticipate these steps taking place within the first two weeks of June.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and Bank of America for the fire stations, a roof, vehicles and equipment; approves a deed of trust and provides for other related matters.

City staff recommends City Council adopt the resolution authorizing the installment financing of two fire stations, a Civic Center roof, vehicles and equipment

Mayor Bellamy closed the public hearing at 5:13 p.m.

Upon inquiry of Councilman Mumpower, Mr. Durant said that the Civic Center roof is approximately $1 Million and that was approved as part of the current budget.

Regarding the financing for the Civic Center roof, Councilman Mumpower said that as long as we can stay flexible and not commit ourselves to a process that may be redundant (e.g. re-configuring the Thomas Wolfe Auditorium in the near future which would result in another new roof), and as long as we have a reasonable period of time to make decisions he would be comfortable in going forward with this action. Mr. Durant explained that the financing will be secured and the funds will be placed in escrow, but we won't requisition those funds until we actually start spending them. The City won't pay interest until we actually draw down the money and start using the funds. If Council decided not to build a new roof, we would not requisition the funds and they would be returned to the bank, however, there may be some penalty for not using the money. He said he would verify this. In addition, City Attorney Oast said that any change of that nature may require an amendment to the agreement.

City Attorney Oast also stated that he didn't think the City is obligated to spend all the money, but that money is not available for other purposes. He said the City would pay interest only on the money that we use.

Councilman Davis said that regardless of which option Council chooses to go with regarding the Civic Center (to be discussed later in the meeting), the Thomas Wolfe Auditorium needs a new roof.

Councilman Newman suggested that we approve this resolution because when we put the money in our budget cycle, we knew there was going to be more discussion on what is gong to happen with the future of the Civic Center and we committed ourselves to start the process. He felt we should also ask City staff to not take additional steps to draw down the funds for at least another 60 days and hopefully over the next 60 days we will reach a direction on how we want to move forward. If it's clear that we are moving in a direction that would result in us having to fix the roof twice, then a decision could be made to not draw down the money.

Mr. Durant said that the City won't officially close until we get Local Government Commission approval which is slated for the first two weeks in June. He hoped that Council would have some final direction at that point.

When Vice-Mayor Jones asked what the cost of the contract was, Mr. Durant said that the annual debt service payments are estimated at a little over $900,000 a year, and our legal counsel on this financing is approximately $15,000.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-99. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 10

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 06-100 - RESOLUTION ESTABLISHING MEMBERS FOR THE HUB PROJECT'S POTENTIAL COMMUNITY AND ECONOMIC ALLIANCE BOARD OF DIRECTORS

Economic Development Director Sam Powers said that this is the consideration of a resolution establishing members for the HUB Project's potential Community and Economic Development Alliance Board of Directors.

The governance structure for the HUB Project has previously been discussed by City Council at their January 10, 2006, meeting. At that time, Council asked that discussions be conducted between the City and County about a possible governance structure and the Mayor has met with the Chairman of the County Commission. Consequently, the following make-up of the HUB governance has been provided by the County Manager and proposed for consideration by City Council:

Members based on their Position in the Community

1. Asheville Mayor
2. Asheville City Council Planning and Economic Development Committee member
3. UNCA Chancellor
4. Asheville Buncombe Technical Community College President
5. Mission Hospitals CEO
6. Asheville Citizen Times President
7. Department of Transportation Board Member
8. National Climatic Data Center CEO
9. Buncombe County Chair
10. Buncombe County Economic Development Coalition Representative

Ex-Officio members

1. Asheville City Manager
2. Buncombe County Manager
3. Buncombe County Schools Superintendent
4. Asheville City Schools Superintendent
5. Other ex-officio to be named

At-Large

Fourteen spots to be split between City Council and County Commissioners.

If Council agrees with the proposed governance structure of the HUB, adoption of the resolution is recommended.

Mayor Bellamy said that in light of the over $100 Million in projects by the N.C. Dept. of Transportation they wanted to make sure they had a seat on the Board and for them to be involved in the up-front planning process.

At the suggestion of Vice-Mayor Jones, it was the consensus of Council to have 10 at-large members (not 14) to be split by the City Council and County Commissions, with the four other members being appointed by the Board itself.

There was a brief discussion initiated by Councilman Newman's concern that the Board may be too large, however, after discussion, it was determined that it will be a functional group.

When Councilwoman Cape wondered if it might be more appropriate to have the organizations select the best person in their organization to be appointed to the Board, Mayor Bellamy said that they were intentional in the actual position being appointed to the Board because they are the ones who can move things forward.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 06-100, with the following amendments: (1) five at-large members being appointed by the Asheville City Council; (2) five at-large members being appointed by the Buncombe County Commissioners; and (3) four members being appointed by the Board itself, once the Board is established. This motion was seconded by Councilman Davis and carried unanimously.

Mayor Bellamy stated that the board and commission vacancy process will be used for the City Council five at-large members.

RESOLUTION BOOK NO. 30 – PAGE 13

V. NEW BUSINESS:

A. RECOMMENDATION FROM THE CIVIC CENTER TASK FORCE

RESOLUTION NO. 06-101 - RESOLUTION ACCEPTING THE CIVIC CENTER TASK FORCE REPORT

Councilman Davis, Chair of the Civic Center Task Force, said that The Civic Center Task Force was created by City Council to examine the options for the Civic Center. He thanked various people for their contributions in reaching this point including, but not limited to the former City Council members, present City Council members, Mayor Bellamy, former Mayor Charles R. Worley, Ms. Sasha Vrtunski, City Manager Gary Jackson, Civic Center Director David Pisha, all the Task Force members and their alternates, and the hundreds of people who have expressed their desire for the community.

Ms. Vrtunski summarized by saying that in October, 2005 City Council held a special worksession on the Civic Center in response to the proposal brought forward by the Asheville Area Center for the Performing Arts. At the worksession, Council agreed that the Civic Center should be a multi-purpose facility and remain downtown if at all possible. City Council then created the Task Force to further investigate options and bring back recommendations to Council. Task Force members are: Mayor Terry Bellamy, Councilman Jan Davis, City Council; Max Alexander, Civic Center Commission; Sidney Powell, Asheville Area Center for the Performing Arts; Bill Stanley, Buncombe County Commission; Ron Storto, Tourism Development Authority; and Charles Worley, former Mayor.

The report reviews the work of the Task Force over the past six months and brings several recommendations forward for Council to consider. The Task Force has looked at different options for the Civic Center building and events and narrowed the field to two main options. The first option is to build a new arena, and then build a performing arts and media center inside the current arena. The second option is to build a new performing arts hall and media center, and then refurbish the existing arena. Both options propose making Thomas Wolfe a flat-floor facility, which adds space for hosting a number of events and could be tied into existing events that need more space.

In addition, staff expects the economic impact study to be completed at the beginning of June. This will show what the impact of the Civic Center is on our local economy.

During the Task Force process, the Asheville Area Center for the Performing Arts organization offered to pay for professional services to examine the feasibility of a performing arts center on the Parkside site (which is on the lot next to City Hall). It is expected that this analysis would take between 30 to 60 days.

Advantages:

- The report brings forward several options for City Council's consideration and holds exciting possibilities for our community.
- Further examination of the Parkside site will help illuminate the potential of the site and funding possibilities.

Disadvantages:

- Two of the three options coming forward are large projects and will require the participation of other partners and multiple sources of funding.

City staff recommends that City Council: (1) receive the report and take it under advisement while waiting for the final economic impact analysis to be reported (early June); (2) accept the offer of $10,000 from the Asheville Area Center for the Performing Arts to further investigate the feasibility of the Parkside site; and (3) plan a worksession to discuss a preferred model options once the economic impact analysis and Parkside feasibility analysis are completed.

Ms. Vrtunski then briefed Council with the following: In August, 2005, the Civic Center Commission held a public forum about the future of the Civic Center. In September, 2005, the Asheville Area Center for the Performing Arts presented to City Council & Council formed the Civic Center Task Force (TF). In October, 2005, the Civic Center Task Force began meeting and collecting data. And, in March, 28806 – the Task Force worked on finalizing the best options and funding plan for those options to bring back to City Council.

Several policy questions arose. Those include, does Asheville need to host a multi-purpose facility; what is the preferred location for each component; total budget; phases; sources of funding; desired partners/coalition; and what trade-offs are acceptable to secure support.

The Task Force data gathering included: overview of the Civic Center operations and finances; panel of facility users (AC Entertainment, Asheville Symphony, WNC Productions, Broadway in Asheville, Palace Sports); comparisons of other facilities; presentations of building proposals (Heery, Highland Group report, PBC+L Architects, Asheville Area Center for Performing Arts ("AACPF")); review of hotel occupancy and food & beverage taxes collected in North Carolina; review of funding strategies; review of potential new arena sites; review of cost estimates; review of Parkside potential; public input at all meetings, and extensive public input at January 18, 2006, meeting.

Key data and findings included: 67% of the revenue of the Civic Center is generated by the Arena; staff does the best they can with the facility and funds they have; received many compliments from event producers; the Civic Center has met needs for diverse community and needs to continue to do so; there is very strong support in the community for a performing arts center, especially as Asheville is an arts destination; and the downtown businesses feel that the Civic Center is very important to them, especially the multi-day events, and arena events.

The Task Force reached the following findings: the Thomas Wolfe Auditorium cannot be renovated for a performing arts venue; doing nothing is not an option; multiple sources of funding are needed, there is no one source that will pay for it; and the City should not be the sole funder of improvements.

Two main options rose to the top: (1) Build a new arena and then build Performing Arts Center and Media Center inside the existing arena; and (2) Renovate the arena and build a new performing arts center on the lot next to City Hall (Parkside). Both options include making Thomas Wolfe a flat floor facility.

Option 1 major design concepts include: (1) Convert existing arena into 2400 seat Multiple Purpose Performing Arts Center – enhanced support; resolved load-in; and ample lobby space; (2) Convert Convention Space into Theatre Support and Media Center – performer support and equipment storage; and studio and classroom spaces; and (3) Convert Thomas Wolfe Auditorium Space into a flat floor banquet/conference/reception center - flexible, divisible space; full service catering support; and ability to use stage as rehearsal or open up to room for special presentations/dais/ or dinner theatre venue.

A combination performing arts and media has synergies, opportunities and efficiencies. Organizations benefit from co-location – share common infrastructure, share common support spaces, share content, and share exposure to patrons. The Civic Center becomes a public service resource, building on the foundation of the arts, education and media.

Sites studied included the current Civic Center site, Patton Avenue downtown gateway, south of City-County Plaza – "Parkside", Innsbruck Mall, Biltmore Square Mall, and Brevard Road at I-40 & I-240.

Option 2 would be to build a new performing arts center (and media center) on the lot next to City Hall (Parkside) and refurbish the arena.

Development challenges and opportunities for the City Hall parking lot include: City doesn't own entire block or Hayes-Hopson building; context issues – Mt. Zion, EMS, Pack Square design guidelines, parking logistics are excellent, considerable developer interest, proximity to Pack Square Renaissance, and possible linkage with other downtown properties.

The Parkside development potential for the performing arts center and media center also has the potential for residential units, commercial space and 600-700 space garage.

She showed an example of a parking deck wrapped with development with housing.

The process for redevelopment would include a (1) feasibility analysis to determine scope, cost of project, recommend financing strategy; (2) RFQ/RFP process to identify qualified master developer; (3) design process with master developer: community input and final approval of design; and (4) begin construction in phases.

Preliminary Cost Estimates: (a) Option 1: New Arena, AACPA - Estimated cost $107,700,000 - $128,000,000; and (b) Option 2: Renovate Arena, New PAC - Estimated cost $131,380,000 - $140,730,000. Estimates are rough, and could be more or less.

Potential funding alternatives; Hotel Occupancy Tax 1% = $1.3 million/year; private contributions: proposed $10 million -$15 million; County contribution; ½% Sales Tax *(generates $15 million/year);* Food and Beverage Tax; other State & Federal contributions; and Tax Increment Financing.

The Civic Center Task Force voted as follows: Task Force voted 2-2-2 on proposals - 2 in favor of Option 1 (Powell, Stanley); 2 in favor of Option 2 (Davis, Worley); and 2 in favor of either option. (Alexander, Storto). The Task Force is bringing these options forward to City Council for input.

The following steps are recommended (Item 1 which has been accomplished): (1) The Task Force processes and weighs options and criteria; (2) Economic Impact Study investigation of Parkside site; (3) Council determination of a preferred option; (4) coalition building and funding strategies; (5) management programming and operation plan; and (6) begin construction.

She felt the next steps would be: (1) accept the report; (2) receive the economic impact analysis in early June; (3) direct staff to flush out details of how the $10,000 will be used with the input of the AACPA and to bring those details back to Council with the Economic Impact Study is completed; and (4) plan a worksession in at a later date to discuss the results of the feasibility analysis and economic development study.

Councilman Davis said that two really good options have been presented. A third option that was not formalized is the fall-back position. If nether options 1 or 2 is approved, then the City needs to spend money for capital improvements. We can't just let that building sit.

Mayor Bellamy said that the information presented is more for Council to receive as a first step, understanding that partnerships will need to be developed, a funding package determined, and dialogue regarding other ownership possibilities.

Ms. Sidney Powell, President of the AACPA, said that "as a member of the Task Force and on behalf of the Asheville Area Center for the Performing Arts, I thank the City Council for convening the Task Force, Councilman Jan Davis for chairing it, and individual members: Mayor Bellamy, former Mayor Worley, Commissioner Bill Stanley, Max Alexander and Ron Storto, for donating their time to address these important issues. I also thank TDA for its expression of willingness to use 1% of a hotel occupancy tax, which would amount to an anticipated contribution of $26 million to this project, and I thank the many citizens who attended our meetings. They have provided excellent suggestions and comments, along with the countless citizens who have written each of you—making plain the community's support for a new center for performing arts. All of this effort has brought us to the critical point NOW of having two thoughtful choices for Council—choices that give Council the opportunity to bring Asheville *alive* with exciting economic, cultural and educational development.

"The Board of Directors of the Asheville Area Center for the Performing Arts (AACPA) acknowledges and supports the two potentially viable options for a new Performing Arts Center: 1) the adaptive reuse of the current arena in the Civic Center into a modern Performing Arts Center with the construction of a new arena elsewhere; or 2) the construction of a new Performing Arts Center at the Parkside site adjacent to City Hall. The Board has studied option one extensively, and it has offered funding to the City to assist in the evaluation of the recently proposed option two.

"The AACPA is a private, non-profit 501(c)(3), formed to explore and develop a performing arts center for all of the residents of Asheville; indeed, the WNC region. This need was identified by the City over a decade ago and confirmed again in the recent HUB economic development plan, as the City has continued to struggle to maintain and provide services in our venerable but aging, inadequate, and deteriorating facility. AACPA first examined and preferred building a stand-alone performing arts center that would face the new Pack Square Conservancy Park. When it became apparent that a solution to the Civic Center problem was compelling, and the option of a stand-alone facility near Pack Square seemed to be foreclosed, we fully explored and then presented the proposal for adaptive reuse of the Civic Center.

"Since learning of the possibility of the Parkside site a few weeks ago, AACPA has also undertaken its own initial evaluation of the land adjacent to City Hall and believe it offers real potential. Although a stand-alone, multi-use Performing Arts Center might provide less square footage than would be created through an adaptive reuse of the Civic Center, we anticipate that it would still be capable of most of the planned uses, including allowing the integration of media arts, technology, and education with the performing arts in a way that would allow Asheville to build on existing strengths while placing it at the forefront of the arts in this exciting merger of mediums. It would also allow the existing Civic Center to be renovated to enhance and enlarge the exhibition/trade show/ and conference space available by renovating the current auditorium, providing added economic benefit as indicated in tonight's Task Force Report.

"If the City Council decides to proceed with the Parkside Option, AACPA offers the following proposal for Council's consideration:

1. That the non-profit AACPA expand its board and be made solely responsible for designing, constructing and managing the operation of a new performing arts center on the Parkside site. The expanded governing Board of the organization would provide broader representation of interested elements of the community, similar to boards of other successful projects in the City.

2. That the Parkside site proposed by the City of approximately 2.43 acres (including any private parcels) be leased at a nominal sum to the AACPA for not less than 55 years for the construction of a stand-alone center for the performing and media arts.

3. That the City provide a parking structure as needed replacement and for area parking contiguous to the 2.43 acre site, which would provide daytime/weekday parking for public and area businesses.

4. That the new Performing Arts Center would be designed and completed as an independent structure that acts as a cornerstone for redevelopment of the adjacent area.

5. That the non-profit organization, AACPA, would commit to fundraising millions in private donations and grants toward the construction, and work to assemble and secure the balance of funding needed from other sources, recognizing the value of the land and shared parking being provided by the City.

6. That the AACPA would develop an endowment fund and other fund sources to underwrite the operation of the PAC.

"Alternatively, to provide <u>two</u> new facilities to the community, the AACPA Board continues to believe that the adaptive reuse of the current Civic Center as a Performing Arts Center and the construction of a new arena at a separate location is a viable and financially feasible option. We

have presented that alternative fully to the City Council previously, and to the Civic Center Task Force with supporting data. The facilities that this proposal represents would allow for:

- a new code-compliant and fully capable 2400-seat performance theatre, black box theatre, chamber music space, and classroom space;
- a new Great Hall for various uses including banquets, conferences, conventions, and trade shows;
- the incorporation of educational, media, and technological arts programs, including involving programs for students K-12, AB Tech and UNC Asheville;
- a new and more flexible entertainment arena and exhibition space at a separate location; and
- phased construction of each facility so that no interruption of current programming and use would be required.

"This proposal has been presented in detail, and it is a cost effective option to provide for both a new Performing Arts Center and new Arena.

"Accordingly, this Council has a choice of two achievable options, either of which will create a substantial economic, cultural and educational development engine for the region. This cannot be accomplished without the vision, dedication, and support of our elected representatives. Upon approval of the Council of either option, AACPA is prepared to commit its full effort in collaboration with the Park Conservancy, Art Museum, Diana Wortham, Media Arts Project, and our entire community to create a sparkling new centerpiece for this special place we all call 'home.'"

Mr. Chuck Tessier, Chair of the Sustainable Economic Development Advisory Committee, said that "for years our community has debated the future of our civic center and the potential development of a performing arts center and arena. Where should it go? Who will do it? How will we pay for it? Many people have spent countless hours trying to resolve these issues only to be frustrated by the lack of a community consensus on how to proceed.

"If we are to proceed with actually completing something, it is important to understand that great things are possible through the cooperative efforts of all parties, moving step by step, in a consistent direction for a long period of time. It is also important that all parties understand their respective limitations and that each party have confidence that together they can accomplish the mission.

"Perhaps looking back at how our community has accomplished three major civic projects, Pack Place, the Grove Arcade and the new Pack Square Park, in the past twenty years, will give some insight on how we might accomplish the task at hand. All three projects were financed and built by a private non-profit coalition assisted by some public funding on publicly assembled property.

"Pack Place was developed by Pack Place Education, Arts and Science Center, Inc. on land assembled by the City with funding provided through private philanthropy, foundations, a City bond issue, the State of NC and the County. The parking was built in partnership with a private developer using a UDAG grant from the federal government. It was completed in 1991, cost $14,000,000 and took seven years to develop.

"The Grove Arcade was developed by the Grove Arcade Public Market Foundation in a building given to the City by the Federal Government. Funding was provided through private philanthropy, foundations, Federal Grants, historic tax credits, Progress Energy and private bank financing. It opened in 2003, cost over $30,000,000 and took 15 years to develop.

"Pack Square is being developed by the Pack Square Conservancy on property owned by the City and County. It is being funded through private philanthropy, foundations, and grants from the Federal government and Buncombe County. The new park will open in 2008, will cost $17,500,000 and will take eight years to develop.

"The Civic Center Task Force has met on this issue and has recommended that a new Performing Arts Center be built. This would represent a fourth major civic project and should become the top priority of the community's agenda following the completion of the Park. The Asheville Area Center for the Performing Arts has been working diligently on this project for over five years and are willing to sponsor the project taking the lead to raise the necessary funding. As have the three projects preceding it, this will take a mix of public and private sources to accomplish and will first require that a site be secured.

"The Task Force has presented two options for the location of a new theater. One is to build it within the current civic center arena. The other is to build it fronting the new park. The first option requires that a new arena also be built before work could begin on the theater. This doubles the money necessary because it absolutely requires that two new facilities be built. We currently have a functioning arena, downtown, that provides 65% of the current civic center revenue. This facility can continue to function with some improvements for years to come while we finance, design and construct a new performing arts theater to replace the obsolete Thomas Wolf Auditorium. Down the road, if another group wants to sponsor and finance a major new sports arena then it can happen at that time.

"The second option provides the best possible location in the City for a new theater. It would front our new park on City/County Plaza. Parking would be below it with easy access off South Charlotte Street. The parking would also serve during the day the City Hall, County Courthouse, Pack Place and other businesses in the area. The parking component should be primarily self funding through parking revenues. It would provide a catalyst in that area for new development on other public property facing the Block and South Charlotte St. This new associated development need not be lumped into the same project but could be leveraged with Tax Increment Bond Financing to offset part of the project cost.

"A new state of the art performing arts facility is essential to Asheville's national image as a leading arts destination. It is essential to attracting both wealth and the creative class to our City. It must provide a "show" that will appeal to the wide spectrum of entertainment interests in our community. Combined with our new world class park it would be a key anchor in the economic development of the region.

"Likewise Asheville needs a "civic center". For years, this facility at the end of Haywood Street, has provided a home to the Mountain Folk Festival and the Southern Highlands Craft Show, high school graduations and concerts. Adding a new theater does not eliminate our need to continue to provide facilities for the full variety of events that currently use the civic center. The relocation of Thomas Wolf Auditorium will allow space in the civic center for other groups to use the facility that currently do not have a home. It will allow for additional exhibit and banquet space to be developed. The current civic center has been an anchor in our community for years and can continue to function for years to come. With a decision made, the City can proceed immediately to establish a capital facility plan to repair and improve their existing facility rather than continue to let it deteriorate while they debate the alternatives.

"In summary, it is our recommendation that (1) The City assemble the site fronting the park and make it available for the development of a new Performing Arts Center; (2) As a part of this project the City should agree to develop and fund, using parking revenues and TIF financing, a parking facility sufficient to meet the long range parking needs of the area; (3) The City should enter into a long term lease of said property to The Asheville Area Center for the Performing Arts

provided they are expanded to provide for the leadership and community representation necessary to sponsor this project and are able to raise the necessary funds for both its construction and operation; (4) The City should recognize that the Civic Center will need to continue to be an integral part of the cultural opportunities of this community for many years to come and as such the City has a responsibility to provide for its maintenance, repair, operation and improvement; and (5) The City explore other private development opportunities in the area around the new performing arts center to provide for additional tax base but that the development of the parking and Performing Arts Center not be contingent upon a larger private development project.

"We have proven time and time again that as a community working together we are able to accomplish significant civic projects. If each project can be isolated into manageable steps and funding can be distributed among a number of public and private resources then great things are proven possible. Too often false hope or trying to accomplish more than is feasible at any one time can stall a project. We hope that these recommendations can provide the roadmap to allow this project to finally get moving."

Former Mayor Charles R. Worley thanked the Task Force and Councilman Davis for the outstanding job he has done as Chair. He said that both options presented are good but he favored Option 2. He believes that Option 2 provides the most flexibility in terms of meeting other City needs, e.g., housing, creation of a public/private partnership with the development of the project. He cautioned Council about the cost estimates. A big problem with the results presented from the first Task Force was the estimated large dollar amount. He felt that amount slowed down and stopped that process. He stressed these numbers are pure guesses and some estimates. He pointed out that some of these things can be done at a lower cost. In any event, the options are costly and we know we cannot put that cost on the back of the Asheville taxpayer. There are multiple sources of funding but the only way we can get those is by working with our legislative delegation. He felt the economic benefit report will prove again the benefit to Asheville in ways that we don't really think of. He felt Council needs the determination to move forward and seek funding. The time is now.

Mr. Dennis Justice has heard that if the renovating of an existing building would cost more than half the cost of constructing a new building, then you would be better off in the long run of building the new building. He felt Option 1 is the only option that will not disrupt any scheduling. In addition, he felt that Council needs to talk about flexible rates for parking.

Councilman Mumpower felt we are heading down another dead-end with the two proposals presented. He agreed we need a community gathering place that will be practical, affordable, pleasant and useful. However, we have "hotdog pocketbooks and steak visions." In both options presented, there will be two facilities, which equals two staffs, two budgets, and two potential dark holes (due to that type of facility and expense). We now have the lowest deficit of any facility he is aware of, and there is a reason we do well – we don't have a tremendous debt service. He felt that Option 3 would be to do a cursory repair job on what we have – with the Heery Study estimate of $10 Million, understanding that all the numbers are estimates. He, however, is concerned with the numbers because they can cause great harm is we are not extremely careful. He suggested an Option 4, which would be to upgrade the Civic Center. This would not be easy, but there is a potential to fix what we have, e.g., have a design competition. If we can get the 1-cent room tax, that would fund roughly $26 Million in debt service. The middle ground between the proposals is approximately $30 Million and that is a point of realism for a City of 75,000 people. A lot of people in the County talk about a bigger and better Civic Center, but the bottom line is the Asheville taxpayers carry the ball and we have to be fair to them. He noted that the some of the example projects mentioned by Mr. Tessier did not require a large participation by the City of Asheville that this project will require. When he looks at the people who will be paying the majority share of this and then looks at the other needs in the City, e.g.,

infrastructure, affordable housing, tax relief, etc., the proposals presented represents a step towards an elitist solution not practicable to our pocketbooks, especially when there are other options available. Because he felt it would be a terrible mistake to not look closely at all of our options, he requested the Task Force to look at the option of a bare-bones upgrade of our facility to keep it going, and an option of a more moderate renovation which will take it into the next 15-20 years.

Councilman Davis said that the Task Force is asking is for Council to accept the Task Force Report because it is the report of the people. The Report is thinking "outside the box." He personally didn't think this is something that the City taxpayer should shoulder either. The Task Force is asking that City Council take the Report on advisement until our economic impact study comes in June. Then we can determine if it is useful to spend the generous offer of $10,000 to get real figures about the feasibility of the Parkside site. The Task Force is just asking Council to give them the opportunity to prove whether or not the Report is flawed in its thinking or is genuine in its thinking. The third option of $15 Million (from the Heery Report of four years ago which was $10 Million, but $15 Million at today's costs) would be a genuine remodeling, making the Civic Center ADA compliant and making it usable. That option was looked at, however, the Task Force felt compelled to bring this Report forward after six months.

Councilman Davis moved to accept the recommendations of the Civic Center Task Force on advisement until the economic impact study is brought forward and that in the meantime staff be directed to flush out those details of how the $10,0000 offered by the AACPA will be used in determining the feasibility of using the Parkside site. This motion was seconded by Councilwoman Cape.

Vice-Mayor Jones hoped that in the next level, the feasibility study will have information about the private development aspect of it. She pointed out that she has a real problem using the sales tax as a funding tool and felt we needed to be looking at other creative solutions.

Upon inquiry of Councilman Freeborn about the need for a new arena opposed to renovating our existing arena, Councilman Davis said that the floor space will have to be remodeled. The Heery Report recommended $25 Million, but we don't envision something of that magnitude. The size of the arena is good and effective, but not for ice hockey. We do have ADA problems and load-in problems, but that can be fairly readily remedied. We also need a full-service kitchen, which renovation would improve our revenue stream. In combination with those renovations and the Thomas Wolfe Auditorium becoming a flat floor, we would have another venue to improve our revenue stream. In summary, he felt like if we do a rehabilitation of our arena (between$10-15 Million) we could be very effective, but that is an integral portion of Option 2 and those figures would have to be fleshed out.

Councilman Newman felt that in addition to Options 1 and 2, Council needs to look hard at Option 3 as well. He felt we needed to put the effort of determining the future of the Civic Center within the context of other community priorities and our financial realities, e.g., infrastructure needs, safe and affordable housing, and need to attract good jobs for our community that pay a living wage. An important priority for him is that with the kind of economy that we have of an increasingly high cost of living and we don't have that many jobs that pay good wages, we must be careful to not increase the tax burden that middle class and low income families in our City pay. In addition to looking at these three different options for what is possible, we need to do some additional analysis of the revenue options themselves. His level of support for choosing different revenue options will be predicated on how they affect the middle class and low income families. With regard to the Parkside option, he is looking forward to exploring that and the other options. However, with the way our downtown is unfolding, that piece of property is an extraordinarily valuable asset to the City of Asheville – the tax value is approximately $8 Million now. If we sold the property and put it on the tax rolls, that by itself would generate

approximately $400,000 a year just in property taxes. He felt we should look at the public-private opportunities, but be very careful about what we do with that property, because those resources could address a range of community needs.

Councilman Mumpower suggested Council turn this back to the Task Force and ask you to at least explore the other two options and give us your recommendation about possibilities.

Councilman Davis explained some of the concerns regarding the Thomas Wolfe Auditorium renovations have been explored by Mr. Richard Fort. He stated that if Council requests the Task Force to come up with other options, he was confident they can do it. But, they have come with these two options and they would like to do a little more study on them and a third one, if Council chooses.

In response to Councilwoman Cape, Councilman Davis explained the scope of the $12,000 economic impact study. In response, Councilwoman Cape said that there is a real shift in what economic impact is within cities. It's no longer simply the old manufacturing model of attracting large factories to employ people. It is the quality of life and health, and what amenities you have in that community that you can offer people. Those are kind of ways you incenticize building economic bases onto which you have people employed. She hoped that kind of information will be available in that study.

Mayor Bellamy said that we do have a lot of issues impacting our community, however, when we look at the vision of our community, we need to remember the Civic Center is a long-term vision. It's important that we don't make a decision based on our short-term peril. We need to look at where we want to go as a community and how do we get there. She believes that is in partnerships and looking at how we can partner with the groups in the Chamber as well as the Buncombe County Commissioners and our legislators, understanding it can't be only the City taxpayers as it has been in the past. When this Council has the opportunity to cast a vision and see it through, it necessitates the need for us to come together. We need to look beyond where we are in our budget cycle and understand that what this Task Force has presented to Council is a bigger vision. She supported investigating the Parkside option in more detail and felt there should be some refurbishment of our Civic Center. We should look at all funding mechanisms and not close any doors. She didn't envision Council coming back in 60 days with a preferred option, because she felt Council (1) needed to take their time to make sure they are talking to the right people in the coalition building; (2) will need to review the economic impact study; (3) make sure we have the feasibility study for the Parkside option; and (4) investigate if there is a coalition of individuals who want the champion arena. She supported accepting the Report understanding that there is more work to be done in order for us to build a coalition, get a good sense of the community and to cast and follow-through the vision of our community.

The motion made by Councilman Davis and seconded by Councilwoman Cape carried on a 6-1 vote, with Councilman Newman voting "no."

Councilman Newman said that he had planned to vote for accepting the Task Force Report, but at the every end of the discussion he became concerned that a vote for it may be a vote to just explore the two options recommended. However, it sounds like there are other opportunities for taking a genuine hard look at the less expensive, fix-it oriented scenario. Again, he was supportive of exploring the two options, but hoped that they take a genuine look at the other option as well.

RESOLUTION BOOK NO. 30 – PAGE 14

At 7:19 p.m., Mayor Bellamy announced a short break.

B. RESOLUTION FINDING THE UNOPENED FIVE-FOOT RIGHT-OF-WAY OFF FAIRMONT IS NOT PART OF AN ADOPTED STREET PLAN

Mayor Bellamy said that an e-mail was received on May 3, 2006, from Jason D. Kraus, attorney representing the applicant, stating "I respectfully request that you remove from the Council's agenda Mr. Rundell and his request for withdrawal of the 5-foot right-of-way."

C. RESOLUTION NO. 06-102 - RESOLUTION AMENDING THE 2006 CITY COUNCIL MEETING SCHEDULE TO ADD A PLANNING, DEVELOPMENT AND GROWTH MANAGEMENT FORUM

Mayor Bellamy said that at the *Goals for Asheville* forum held on January 13, 2006, citizens rated growth and development as their top community priority. In addition, growth and development was the only priority area that every participating focus group held in common. In order to gain additional citizen feedback and input regarding this focus area, City Council is planning to host a second forum in the *Goals for Asheville* series focusing on planning, growth and development priorities. This forum meets City Council's goal to have continued forums that provide citizen the opportunity to give input on specific focus areas.

The purpose of this memorandum is to provide a suggested framework for planning City Council's May 30 forum. This preliminary plan is meant to serve as a starting point for City Council's discussion and input. The final plan for the upcoming event will be modified according to Council's direction received at the May 9 worksession.

Community Forum Preliminary Plan

- Logistics: The forum is scheduled for Tuesday, May 30 at 6 p.m. Staff is working to determine if Asheville High School (419 McDowell St.). Asheville High is accessible via public transportation, has adequate parking and can accommodate a large number of citizens. The May 30 date falls on a fifth Tuesday within City Council's typical rotation for community meetings.

- Format: The proposed format for the May 30 forum is modeled after the nominal group process used at the *Goals for Asheville* forum on January13.

  (1) Citizens will gather in the auditorium for welcoming remarks, a brief update on current process improvements and other relevant information about the forum.
  (2) Participants will then be divided into small focus groups where citizens will be charged with developing consensus on their top three goals in the planning, development and growth management area. To develop consensus, the groups will list all ideas, vote on the top three goals and develop a final list the group believes the city should adopt as priorities.
  (3) Focus groups will assemble at the end of the program to share results through a selected speaker from each group.

- Promotion: Invitations will be sent to all city boards and commission members, Citizens Academy graduates and current participants, organized groups (CAN, CIBO, etc.), contacts from the city manager's development forum, neighborhood association presidents and other key stakeholder organizations (Chamber of Commerce, Land-of-Sky Regional Council, etc.). The event will also be promoted via press release, in the city's eNews, on the city's web site and through newspaper advertisement.

Based on the success of the January 13 *Goals for Asheville Forum*, staff believes a similar format can produce meaningful results. However, staff would recommend implementing

some process improvements based on lessons learned from the January13 forum (e.g., improving the efficiency of sign-in procedures, etc.). In addition, this preliminary plan is open for City Council's ideas and will be modified to achieve Council's goals.

City staff recommends City Council schedule a Planning, Development and Growth Management Public Forum on Tuesday, May 30, 2006, at 6:00 p.m. at Asheville High School, located at 419 McDowell Street, Asheville, N.C.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 06-102. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 15

VI. OTHER BUSINESS:

Mayor Bellamy said that Council continued the budget worksession on Monday, May 8, 2006, until this meeting to receive additional information. After City Manager Jackson summarized the major outstanding issues regarding business licenses and outside agency funding, Council briefly discussed the issues and gave City staff further direction. At 7:56, Mayor Bellamy then closed the budget worksession.

Councilman Mumpower thanked several individuals and groups for tackling the newest design for the Top-A-Stop at the top of Livingston Street and Victoria Road.

The following claims were received by the City of Asheville during the period of April 21 – May 4, 2006: Cimarron Villas (Sanitation), Nathaniel Woods (Water), James E. Wilson (Sanitation), Russ Thomas (Parks & Recreation), Elizabeth Duvall (Streets), Hearns Bicycle (Water), and Azalee Jackson (Police). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Homelessness Report

Mr. Scott Rogers, Executive Director of the Asheville-Buncombe Community Christian Ministry (ABCCM), representing the Rescue Mission, Salvation Army and ABCCM, presented City Council the demographics of the homelessness, in which Asheville estimates 2,000 a year. He reviewed with Council the characteristics of homelessness, along with the treatment programs available. Mr. Rogers outlined the current beds available in each shelter, the shelters scope of services, their accountability in services, and employment statistics in 2005 for the three shelters.

Mr. Rogers said that the ABCCM, Salvation Army and Rescue Mission all agree with the points that are made in the 10-Year Plan to End Homelessness, but ask the City, County and State leaders to reconsider the priorities to match existing realities in services: (1) policy changes; (2) incentives for collaboration; (3) prevention; (4) adult crisis intervention and social detox; (5) build capacity with existing providers; and (6) annual report on benchmarks of progress.

In summary, Mr. Rogers said (1) the organizations who are doing a tremendous job could do more with the support from everyone; (2) give law enforcement the policies, procedures and ordinances to enforce personal responsibility and punish criminal behavior so that our homeless

are not victimized by criminals or misperceived as criminals; (3) give the technology tools that improves coordination and collaboration to all providers; (4) support building on existing services; (5) support expanding homeless prevention and homeless services that lead to responsible and productive residents in our country; and (6) support the services financially. The community has already invested many thousands of dollars into these faith-based organizations who exemplify the most cost effective services and produce stellar outcomes in the number of lives that are changed each year. While there may be cause to develop new systems of care or create new organizations to address similar needs, we as that the City, County and business leaders prioritize their funding, resources and strategies around ways to strengthen our existing providers who have demonstrated the competency, capacity and commitment to care through a combined 127 years of service to this community.

Mayor Bellamy thanked Mr. Rogers and the Joint Task Force members for their hard work on this effort. With the approval of Council, Vice-Mayor Jones, Chair of the Housing & Community Development Committee, said that this issue will be reviewed at the next meeting of the Committee.

Pritchard Park Homeless Ministry

Mr. Adam Ripley, Director for the Pritchard Park Homeless Ministry, said that he serves the homeless breakfast on Saturday mornings in Pritchard Park since September 2005 and was removed from the Park on May 1, 2006, due to a safety concern, which he disagrees with. He had already obtained an open flame permit from the Fire Department, and no one told him he needed a use permit. However, someone from the Downtown Commission advised Mr. Ripley that he needed a use permit as well. He then contacted the Parks & Recreation Department to obtain a use permit for Pritchard Park but was told he would not apply for Pritchard Park, but was given an application for a use permit for the City Hall parking lot. He felt that removing his group from the Park was nothing more than discrimination towards those who are not as prominent and successful in our community. He felt the new location is inaccessible for multiple reasons. In light of Council's 10-Year Plan to End Homelessness, he felt that removing the group from the Park, the City has reduced their capacity to care for the poor and also have removed them from the public eye. Many of his volunteers were people walking by on the street and offered to help in that way – so moving them to the parking lot, that opportunity has been eliminated. Regarding the safety concern, he agreed that they sometimes serve up to 300-400 people, but they do not serve them all at one time in the Park. He asked Council to examine the decision by the Director of Parks and Recreation to relocate his group to the City Hall parking lot. In summary, he will apply for the use permit for Pritchard Park and if he is denied the permit, he feels it is just a prejudice against the poor.

There was a brief discussion about the need to be consistent and fair in applying our policies. Ultimately, Assistant City Manager Jeff Richardson suggested Council allow him the opportunity to meet with Mr. Ripley and the Director of Parks and Recreation to collect more information, which he will report back to Council on Friday.

Affordable Housing Coalition

Mayor Bellamy recognized Mr. Philippe Rosse, Executive Director of the Affordable Housing Coalition of Asheville and Buncombe County, who said that in December, his Board unanimously approved their becoming the lead entity for the 10-Year Plan to End Homeless. He then introduced Ms. Amy Sawyer, 10-Year Plan Coordinator for the Program, who was optimistic about moving forward with the Plan.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:30 p.m.

Magdalen Bowlson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – May 16, 2006 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

ASHEVILLE HIGH SCHOOL'S ENHANCED SERVICE BILL – ASHEVILLE TRANSIT SERVICES

Ms. Alicia Funderburk, Ms. Leah Downey Mr. Zach Cobb and Ms. Alice Royer presented City Council with their proposed enhanced service bill regarding the Asheville Transit Services. They proposed that this local legislation should be enacted with the purpose of improving the Asheville transit system through the means of making it more accessible for citizens.

To achieve this goal, the transit times would be changed to a more suitable and practical schedule. Also, the routes of the buses would be re-evaluated to reach a larger percentage of the constituents. Finally the marketing and publicity of the transit system would be drastically increased to raise awareness of this new opportunity.

This legislation will not only benefit the citizens choosing buses over cars but it will benefit all the people of Asheville. By allowing more people to ride the buses this legislation will be reducing the number of cars on the road and thus the amount of greenhouse gas emissions. Also, the new buses purchased will be diesel based, and therefore allowing them to be run on bio diesel.

The local head of transportation and transit system would head up this legislation and determine what is necessary for implementation. In addition to this legislation would call on the congress representatives of North Carolina to use their franking privilege in order to promote this opportunity to the citizens.

To be able to reach more citizens, this legislation would call for the purchase of 6 new buses at $16,500 each to be added to the present available fleet. In addition to this, there will also be a cost to cover the wages for the added bus drivers. If we increase the route times from 5A.M. to 12 A.M, this will cost approximately 1 million dollars, if regular scheduling is maintained. In order to pay for these expenses we would be increasing the average fare to one dollar, and the transfer fare to 25 cents. Federal grants based upon environmentally-friendly transportation can also be taken advantage of.

Finally this legislation would help all of the people Asheville either directly or indirectly and therefore it is our job as congress people to pass it to better our constituents.

Using a powerpoint presentation, they said that the problem is (1) Currently Asheville Transit Services is not easily accessible for all citizens of Asheville; and (2) This is because of inconvenient times for necessary transportation, such as to and from work.

The impact on everyday people will (1) save people money (a) spend less on gas; and (b) little cost to get around; and (2) help the health (a) less pollution; and (b) decrease asthma and other respiratory diseases.

Economic benefits include (1) Using the local Bio Diesel pump will feed Asheville economy; (2) Protect Asheville from drastic economic impacts as gas prices continue to rise; and (3) Fares put money back into Asheville city system, which will help all citizens.

Environmental impacts include: (1) Cleaner air (a) Less cars on road; and (b) Bio Diesel buses; and (2) Bio Diesel Buses (a) Cost more now; (b) Reduce cost later; (c) Less emissions; (d) Use less gas; and (e) Fill up station already in Asheville; (3) Less Cars on road; (a) Less emissions; and (b) Less gas; (4) Gas will run out (a) Limited supply; and (b) In Middle East (poor relations); and (5) Look to alternatives (a) Gives us more time.

Proposed legislation costs would be to increase buses on 6 routes based on demand (a) At $16,500 per bus this will cost $99,000 (1 bus per route); (b) These will be diesel run buses to allow for the use of bio-diesel fuel; (c) They will also be smaller (16 passenger) buses to use on less frequented routes; (d) To provide for bus driver wages for the first year it would cost approximately 1 million dollars; (e) This cost based upon full scheduling from 5 am until 12 am (our proposal is not based upon full scheduling); and (f) According to our proposal, routes and times will be based upon demand.

Proposed Funding would include: (1) fares raised by 25 cents to $1; (b) Transfer fairs raised by 15 cents to one quarter; (c) During major festivals, such as Bele Chere, fares would be reduced in half to encourage more people to ride; and (d) Federal funding is also available in the form of grants based on environmentally-friendly transportation.

We feel that this proposed legislation would benefit all of Asheville's citizens by decreasing the amount of emissions and encouraging more citizens to use the buses as alternatives to private vehicles.

The students responded to various questions/comments from Council, some being, but are not limited to: what compelled you to bring this legislation forward; where did you research the prices for buses; they you look at the feasibility of the City purchasing hybrid City vehicles; what is the amount of grants being offered and by what agencies; have you researched what the bus would add in the affordability of each family or car owner, taking into account the cost of car insurance, gas, car maintenance; and have you researched other angles of view.

Upon inquiry of Mayor Bellamy regarding the next steps for the students, Ms. Downey hoped that there could be a student representative on a committee. Councilwoman Cape also encouraged the students to attend a Transit Commission meeting.

Mayor Bellamy asked the Boards & Commissions Committee investigate the possibility of tapping into the student representative resource on some of our committees.

Councilman Newman said that Council will be looking at things to market our transit system and hoped that the students would work with other young people to encourage ridership. He felt that the word-of-mouth kind of community outreach would be great.

Councilman Freeborn encouraged the students to utilize the student summer pass system and asked that if they see something good or something that needs improvement to contact our Transit Services Director Bruce Black.

Councilman Mumpower said that he would be interested in talking with some ways students can help with the Top-A-Stop Program.

Mayor Bellamy said that City Council is considering some components of what was recommended in the presentation. And, on behalf of City Council, Mayor Bellamy commended the students and their instructor Jotwan Daniels for their research in presenting this proposed legislation to City Council.

LAND USE ISSUES

Mayor Bellamy said that this is an opportunity for Council to present information and give direction on items they would like for City staff to work on, including amendments to the Unified Development Ordinance (UDO) and policies on growth and development. This will begin setting the stage for the workload of the Planning & Development Department over the next 12-18 months. This is the first step setting the tone for growth and development, with the second step being the community forum on this issue on May 30, 2006.

Councilman Davis' comments are as follows:

1. What is going well?
   - Staff response to developer, neighborhood groups and public boards.
   - Public process that includes Technical Review Committee (TRC), Planning and Zoning, review and hearings of Level III projects and zoning applications by Council.
   - The UDO, though cumbersome, is a development guide that is specific and readily adaptable to change.
   - Planning and Economic Development Committee
   - Corridor planning
   - Continued improvement in Permitting and Inspections

2. Areas that need improvement.
   - Enforcement
   - Permitting
   - Communication
   - Continued improvement of UDO
   - Adequately staff Planning Department for the workload they are handling.
   - Ridgetop, hillside protection

In response to the question "If we can only accomplish one thing in the area of planning, development and code enforcement during the next year, what would it be?", Councilman Davis' response was to find the balance that makes Asheville attractive to development, that offers good jobs and tax base, without compromising quality of life.

Mayor Bellamy's comments are as follows:

1. What is going well?
   - Planning & Zoning Commission's comprehensive look at development
   - Signage of Planning & Zoning hearings
   - Staff's ability to meet with developers in advance of putting in an application in for rezoning
   - Recent Downtown Commission recommendations and process they completed to make the recommendations
   - Corridor updates from staff
   - Comprehensive nature of the 2025 Plan

2. Areas that need improvement.
   - Public relations around issues that have been addressed
   - Clarify on how to address concerns

- Need for enforcement on a consistent basis
- Permitting time
- Need for additional staff members
- Communication between departments on permitting issues
- General nature of the evolution of planning documents

Guiding principles: The UDO is the City's development manual; however, it is missing guiding principles. We live in Asheville, N.C., which is located in the mountains of Western North Carolina. Our UDO should have guiding principles that keep in mind our sense of place – which is of major concern for many residents who come to Council to dispute a proposed development. City Council and staff should work with the community to develop guiding principles for the UDO, which will assist with planning future development in our community.

Small Area Plans: Work to create additional small area plans that are created by neighborhood residents in collaboration with business owners, property owners in and around the neighborhood, city staff and other interested parties. These plans will serve as a neighborhood's vision for their area. The West End/Clingman Avenue (WECAN) neighborhood residents created a plan that is a guide for development in their neighborhood. The developers wishing to develop in the WECAN area or any other neighborhood with a neighborhood plan will have an understanding of what the neighborhood envisions for their area, while at the same time neighborhood residents will understand that the vacant lots that are in their area today may not always remain undeveloped. The plan will be a guide but not a mandatory tool for a project. This could potentially reduce a significant amount of negative response to development in and around neighborhoods.

Affordable Housing: I support the creation of a comprehensive affordable housing plan to effectively address the growing affordable housing problem in the Asheville community that looks at density bonuses, zoning regulations and financial support in a comprehensive manner. For example, (1) Increase density bonuses for developers who develop affordable housing; (2) Provide density bonuses to developers who build affordable housing on and near transportation routes and on or near the City's major corridors; and (3) Encourage more mixed income housing. Provide density bonuses for developers who put affordable housing in with market rate housing.

Councilwoman Cape's briefly reviewed with Council her ideas about how Council might accomplish some of the provisions from the text of our guiding document – the Asheville City Plan 2025:

1. Update UDO to include form based codes and contextual design for each distinct district.
    a. Traditional neighborhood development patterns should be recognized and encouraged via our zoning districts
        i. Codify existing neighborhood plans
        ii. Determine if other definable neighborhoods should organize for community plans, i.e. Merrimon Corridor Group and support their development and work
        iii. Look for opportunities to create transition points, e.g., a roundabout or entry marker where land use character changes, where a commercial area stops and a neighborhood begins. A land use node that demarks the transition from one neighborhood
        iv. Manage transitions between higher and lower density neighborhoods with step down heights
        v. Add pedestrian friendly design requirements to developments, wall heights, fenestration, etc.
        vi. Instead of "mandatory review and voluntary compliance" of design plans for downtown development projects, require "mandatory review and

mandatory compliance" to ensure that new development is consistent with what the City wants for downtown.

vii. Putting more design requirements into the zoning regulations (UDO) will also help accomplish this.

2. Specify maximum square footage of disturbance based on slope steepness
   a. Steep sloped and environmentally sensitive areas should be identified and preserved while allowing alternatives to development that protect private property rights
      i. Efforts must be made to preserve sensitive areas, such as steep areas, flood plains, and other unique natural areas, as well as limited agricultural lands and open spaces
      ii. Permit duplexes and low intensity multifamily development meeting design and spacing requirements are as use by right subject to special requirements in single family zoning districts.

3. Make changes in our standards about the maximum square footage of a building instead of the number of units
   a. Create an option to incorporate duplexes and multi family where single family once existed if it is within the same footprint as the neighborhood context
   b. Create an ordinance allowing cottage developments within residential neighborhoods, modifying the subdivision rules for cottage developments

4. Remove loopholes /update and clarify UDO
   a. Single-family homes currently are not guided at all in addressing issues of storm water run off/parking requirements/slope disturbance, height requirements, footprint, size, etc.
   b. For primary buildings in CDB I and II
   c. For drive throughs
   d. For buffering requirements
   e. For loading zone and street access requirements
   f. Attached signs
   g. Clarify and enforce remodeling and renovation requirements
   h. Consider the creation of pattern books to help streamline construction and planning processes

5. Utilize smart growth codes, form based code models, district overlays, etc to achieve goals
   a. Direct staff to develop new zoning tools to promote (smart growth)
   b. The City should assure that new development and redevelopment is of high quality, complementing and adding to the character of the City of Asheville.
   c. Revise standards to require connectivity between parcels and development projects. Connectivity should include vehicular connections, frontage or service roads, alleys, and/or pedestrian connections.
   d. Establish standards for building orientation through the development of building templates that address build-to lines and site relationships.
   e. Develop design templates for structures that promote contextual design
   f. Through revision of development standards, the City should eliminate the opportunity for suburban development in urban settings.
   g. The City should identify areas for development focus, identifying and establishing standards for the type of development appropriate for the areas.
   h. The City should develop design standards for multi-family structures and non-residential uses in single-family areas.

l. The City should develop plans, programs, regulations and incentives for upgrading developed sites to meet new development standards.

6. Increase funding for sidewalks/greenways and bike path initiatives through bonding mechanism or similar option like fee in lieu from new development. Explore impact fees for infrastructure enhancements for new developments and permits.

7. Consider the establishment of neighborhood councils for the ETJ areas to give them a voice in their governance

8. Encourage redevelopment along commercial corridors to encourage mixed use housing options/commercial/ live work/etc… I.e. Patton Avenue, Tunnel road, etc.
    a. Mixed use redevelopment and infill development efforts must be concentrated on corridors where land values are greater than the value of the improvements on the land
    b. A minimum residential density of 8.16 units per acre is necessary to support transit;
    c. Development must be located in those areas where infrastructure exists or can be easily
    d. Major corridor and Brownfield redevelopment incentives for mixed use redevelopment
    e. Consider the development of a flexible zone that would permit higher density at appropriate locations within a five-minute walk of transit stops. The higher density development should be in accordance with design standards tailored for these areas.
    f. Residents and visitors must be offered viable transportation options for moving around the City
    g. Existing road systems must be used more efficiently due to the constraints on building new roads and widening existing ones;
    h. The City should permit and encourage transit supportive density (8-16 units per acre minimum) along and adjacent to major corridors and at logical transit nodes
    i. The City should revise its development standards for corridors to ensure that the corridors are developed in an urban manner.
        l. Development standards should be prepared for primary corridors that address the need to increase density along the corridors. The standards should provide incentives for mixed-use development that incorporates residential uses.
        ii. Minimum setbacks (or build-to. lines) should be required, with buildings permitted to front on the street.
        iii. Prepare design guidelines for corridor development. Guidelines should promote an urban style (multi-story, pedestrian oriented) of architecture along the corridors.
        iv. Create opportunities for the retrofitting of single use commercial and retail developments in to mixed use communities
        v. Invest city infrastructure in the redesigning of corridor areas to encourage reurbanization
        vi. Invest city infrastructure in existing neighborhood business districts

9. Create incentives for green/energy efficient buildings, neighborhood design compatible and affordable housing
    a. streamline the permitting process for projects that fit specific guidelines
    b. support tax incentives for green/efficient affordable and design compatible building

10. Support assimilation of public green space throughout the city via fee in lieu for green space lot requirements
    a. The City should ensure that the environmental quality and natural beauty of the area is protected as tracts of undeveloped land
    b. Revise the City's open space standards to require the incorporation of more well-defined open space into the City 's land use pattern
    c. Provide an option for the payment of a fee-in-lieu-of providing open space in developments.
        i. Incorporate conservation/open space design standards into the City's subdivision regulations. This alternative design template should be available to all subdivisions and required for those above a certain size and/or proposing development of sensitive lands (steep slopes, unique natural features, wetlands and flood plains, etc.)\
        ii. The City should identify sensitive areas and steep slopes that should be treated with caution during development and prepare additional regulations that promote their protection while reasonably respecting private property rights; such regulations may include transfer of development rights
        iii. The City should revise its standards to permit clustering of buildings in residential developments in order to avoid steep areas, ridge tops, wetlands, and other sensitive areas.
        iv. The City's open space standards should require the connection of open space areas where feasible and logical.
        v. The City should develop a resource conservation zone that provides incentives for the protection/preservation of important natural resources during the development process.
        vi. The City should develop an estate zoning classification requiring very large lots to apply to selected areas when such a development pattern is already a part of the neighborhood or to protect critical environmental or open space areas.

11. Pursue statutory authority rights to give the city greater development flexibility
    a. Pursue stricter ridgeline control authority
    b. The City should pursue statutory authority for a greater variety and range of development tools in order to actively promote development and redevelopment within the City and its ETJ.
        i. The City should pursue statutory authority for transfer of development rights in order to provide an opportunity to protect environmentally sensitive areas, scenic lands and farmland through a market-based regulatory incentive program.
        ii. The City should further investigate the benefits of land value taxation, and, determine if useful for our community for community development goals, i.e. greenways, parks, appropriate infill development
        iii. The City should pursue legislation authorizing inclusionary zoning for larger residential developments
        iv. The City should pursue statutory authority for mandatory design review for areas other than local historic districts in order to promote a Smart Growth development pattern by overcoming land use compatibility objections

12. Requirements for wildlife/sensitive plant relocation

13. .Salvage requirements for demolition projects.
    a. Preserve and reuse historic materials in public works projects.

b. Reduce reusable construction materials going to landfill

14. Enhancement of existing density bonus provisions for preservation of key environmental features.

15. Close loopholes in size of commercial structures in the HB districts.
    a. Set maximum size at 50,000 sq feet.
    b. Prohibit Blank walls, no uninterrupted length on any façade in excess of a specified amount,
    c. codify fenestration of at least 60 %,
    d. building must be in scale and character with traditional neighborhood/urban design and no more than 50% of parking between the building and the street
    e. The City should refine its development guidelines for large retail uses to ensure that the site and building design for these uses are reflective of the natural and architectural heritage of Asheville.

16. Create River way development plan in conjunction with stakeholders that includes a full range or commercial/mixed use/residential/work live units etc.
    a. City should take the lead as the voice for a river redevelopment vision
    b. consider flex zoning to allow developers/property owners to easily supply space in response to changing market/community needs
    c. utilize TIF funding mechanisms for redevelopment

17. Create a comprehensive citywide street plan in conjunction with Neighborhood Districts, the Greenways committee, the transit committee, and the DOT
    a. The City should work with property owners, institutions, and public and private agencies to enhance the streetscape along streets and roads in the City.
    b. The City should prepare streetscape design plans to serve as guide for development and treatment of the City's streetscapes.
    c. The City should reevaluate how the public right-of-way is used. As part of this reevaluation, the following should be considered
        i. Revision of the City's engineering standards to require street trees between the street and the sidewalk.
        ii. Permitting on-street parking on most streets.
        iii. Eliminating private use of the public right-of-way unless approved through a process
        iv. As new development is proposed, encourage/provide incentives for developers to incorporate streetscape terminating vistas (public art, buildings) as part of their developments.
        v. The City should work with TDA/ NCDOT and (neighborhood stakeholders) to identify gateway areas and develop a streetscape/landscape plan, including signage, for each gateway that emphasizes each area as an important entrance to the City
        vi. The City should work with utility companies to bury overhead utility lines as funding becomes available.
        vii. The Planning and Development Department staff should continue to work with the City's Urban Forester on better selection, placement, and care of street trees
        viii. The City should develop an ordinance requiring tree pruning to be done according to accepted professional standards and practices.
        ix. Rename streets where necessary for ease of identification and travel
            Wilma Dykeman Riverway
            Hwy 25 Merrimon/Broadway/Biltmore
            Broadway/Lexington

Patton/College/Tunnel

x. The City should work with local artists and community organizations to incorporate public art throughout the City of Asheville, such as Downtown, the river district, historic districts, and urban and neighborhood corridors. The streetscape plans should work to beautify these areas, reduce the environmental impacts of development, encourage pedestrian activity, and uniquely identify these areas. The streetscape design plan should provide for the following:
    a. an inventory of street trees.
    b. a schedule and policy for replacement of street trees.
    c. Streetscape design templates for different areas/categories of streets.
    d. Appropriate setbacks and building heights for different areas/categories of streets.

She questioned if we have the comprehensive conservation map of the city and extraterritorial jurisdiction area in the year 202, and what is the status of our architectural inventory identified in the 2025.

Vice-Mayor Jones said that there is basically a cultural and organizational change that is happening within the City of Asheville's operations in terms of planning & development and building safety. Anytime you have that type of cultural change, it takes time, and we are now beginning to feel some of those impacts. The Planning & Economic Development Committee had an update on the implementation of the Development Review Task Force recommendations and it is incredible what has been implemented in less than 12 months. We are getting some positive feedback from the developer community. We are also poised to have that type of input from the community at large. The benchmarking of that shift and openness is going well.

She felt that opportunities for improvement have to do with building public trust. That will play out in issues of enforcement, in issues of telling the stories of what we are doing, in owning our mistakes when we make them, and in building a neighborhood liaison. She agreed that most development things are going fine, but it appears that the big mistakes are with the high profile things. She hoped that we will continue to work on our mistakes.

In response to the question "If we can only accomplish one thing in the area of planning, development and code enforcement during the next year, what would it be?", Vice-Mayor Jones' response was how do we as a City incenticize our community needs around affordable housing – places where our working people can afford to live.

Councilman Newman briefly reviewed with Council his thoughts as follows:

1. What is going well?
    - Changes in the permitting process
    - Asheville is blessed to have visionary developers
    - Strong green building community

<u>Potential policy options to encourage healthy community development in Asheville</u>

Key goals:
- Attract and retain good jobs in Asheville
- Create incentives for use of green building practices in Asheville
- Create stronger incentives for builders to create affordable and work-force priced homes
- Strengthen enforcement of development standards and communication between neighborhoods and the city.

- Support in-fill development that is in character with our community.
- Encourage energy savings and reduce fuel costs.

Economic development policy

Discontinue policy of giving special grants to select companies who propose locating or expanding here. Develop specific criteria and give property tax rebates to all manufacturing businesses and developers who meet the criteria.

- Manufacturing companies—20% annual tax rebate; perpetual; contingent on company paying a living wage to very high percentage of employees.
- LEED/ Healthy Built Home certified buildings—Each level of LEED/ Healthy Built Home certification = 20% tax rebate for five years. – This could apply to new construction or renovations.
- Affordable housing—25%- 75% tax rebate for 5 years depending on percentage of affordable housing included in development.
- Structured parking—50% rebate for 10 years.
- Any HOPE VI-oriented projects—50% rebate for 10 years.

UDO Reforms:

1. Regulation of large retail developments:

- Cap size of retail buildings in Highway Business/ Regional Business at 75,000 but provide density bonuses for green building, innovative design approaches; direct staff to develop specific criteria for density bonuses.
- Close the loophole in the UDO that allows a tenant within a "multi-tenant" development to be larger than a tenant in a "single-tenant" development, which is 75,000 sq. feet. Again, the cap can be exceeded for projects that include green building and innovative design elements.

2. Incentives for green building and inclusion of affordable housing:

- Automatic, use-by-right density bonuses in UDO for projects that include green-building elements, affordable housing and transit orientation. These density bonuses will not trigger City Council review is they exceed the TIER III thresholds. It may be useful to create a "points system" whereby including carious degrees of affordable housing, green building elements, etc will be awarded "points" and the level of density bonus you can get is based on how many points a project receives.
    - Projects that include affordable housing—every 10% affordable = 15% density bonus, up to a 100% maximum.
    - Green building—every level of LEED or Healthy Built Home certification = 15% density bonus.
    - Transit oriented developments can receive a 10- 20% density bonus.
- Create permit fee reduction for green buildings similar to current fee reduction for affordable housing.
- Small scale multi-family allowed as a use by right in all residential areas if they meet design criteria, to be developed by staff. This may include limits on the foot-print size of new developments, or requirements that the buildings can't be larger than most of the other homes in the neighborhood, etc.
    - Duplexes allowed in RS-2 areas.
    - Duplex and triplex allowed in RS-4 areas.
    - 4-plex and smaller allowed in RS-8 areas.

3. Regulation of hill-side development and incentives to conserve green-space:

- Hillside development standards—should there be limits on the size of footprints or alternate setback requirements on steep slope development (even for single family homes?)
- Open space requirements—strengthen the open space requirements but also create a "Fee in lieu" process if developers don't think additional open space makes sense for their project.

Enforcement
- Bump up/ clarify penalties for violations. They should not be punitive but they need to be an effective deterrent to violating our rules.
- Require developers to clearly mark buffer areas and mature trees to be preserved prior to grading or land clearing.
- Support hiring neighborhood liaison position.

Form based codes:
- Codify existing neighborhood plans—i.e. WECAN.
- Explore creation of neighborhood-wide form based codes for each major area of town (i.e. north, south, east, west and downtown).

Green building/ green energy
- All new City of Asheville buildings over 5000 square feet will be LEED certified.
- Include a green building checklist for builders to review during the permitting process, outlining green building options and benefits of green building to developers. No requirement to actually include green building in the project.
- Asheville sets a goal to reduce energy use by local government by 10% within 1-2 years.
- Asheville sets a goal to reduce fuel usage by ___ % over ___ years.

In response to the question "If we can only accomplish one thing in the area of planning, development and code enforcement during the next year, what would it be?", Councilman Newman response was to create a broad range of regulatory and economic incentives, including use-by-right density bonuses, expedited permitting, increasing thresholds for Tier III review, and property tax rebates which include affordable housing, green-building elements, and innovative design elements.

Councilman Mumpower felt that we have a busy City where development is working well for the most part. He felt that some organizations and activists are over-reacting and socializing the problems that we do have. Many people move to Asheville but then want things to stay the same. We live, however, in a world that is dynamic and requires change. He felt the more we control, the more expensive and elite our City becomes. He personally believes that we should approach our UDO as an evolutionary vs. a revolutionary document. We need to be careful with existing neighborhoods and using tax rebates as an incentive for affordable housing issues is a good idea. When you look at all the new construction in our City, there is very little small construction and small is where affordable comes from. We need to ask our staff to come up with incentive packages that encourage real small development because that is how we are going to be able to get people to live in our community. He feels we have a history of being loose and dynamic and we shouldn't walk away from that by trying to over control development.

Councilman Freeborn commented as follows:

1. What is going well?
   - Likes the Asheville City Plan 2025

- Downtown Commission is on target and on time
- Council initiating discussion on land use issue
- City staff doing well with limited resources available

2. Areas that need improvement.
   - Need to put more resources into our corridors (charettes)
   - Planning & Development Department needs public relations skills

Planning & Development Director Scott Shuford said that basically many of the ideas and visions that Council has expressed represent a fundamentally different way of thinking than the UDO. Mayor Bellamy's issue about including a lot of guiding principles into the document seems to indicate a different document than a legally worded set of regulations. There are opportunities to add graphics and other things into the document that would simplify it and get to what Council is looking for. Also, if we can find a way to distill Council's comments and the comments from community down in ways that are more simple, we can end up with a document that might have significantly fewer zoning districts and/or a much more simple set of landscaping standards. The developers can use that document more readily and we can still get the results that we are after, but yet still provide some flexibility on dealing with our unique situation. He was very encouraged with the direction Council is going because he sees opportunities for us to incorporate some things that may actually enable the staff to work more efficiently. He said that his goal will be to have all the information compiled for the June 20 worksession, or at the least by the June Planning & Economic Development Committee.

BOARDS AND COMMISSIONS:

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that the Committee:

- Reviewed the following three boards and feel they have outlived their usefulness. The Committee recommended (and City Council concurred) dissolving the Americans With Disabilities Act Compliance Committee; the Taxicab Advisory Board; and the Carriage Permit Advisory Board.

- Begin exploring with City staff the potential of expanding the role of the Greenway Commission to be renamed and to include pedestrian amenities and sidewalks.

- Begin initial conservation with pertinent department heads about including transit and parking.

- Was not supportive of increasing the stipend of the Alcoholic Beverage Control Board.

Councilwoman Cape asked that the Boards & Commissions Committee review the recommendation from the URTV Board to expand their membership from 11 to 13 members.

It was the consensus of City Council to instruct the City Clerk to advertise the Civil Service Board vacancy for an additional month.

It was the consensus of City Council to postpone taking action on the Educational Access Channel Commission until September, 2006, at the request of Chairman Tim Amos who would like to meet with the Commission to discuss restructuring.

It was the consensus of City Council to instruct the City Clerk to advertise the vacancy on the Buncombe County Tourism Development Authority for an additional month.

At 4:20 p.m. Mayor Bellamy recessed the regular worksession and began with the budget worksession.

BUDGET

At 5:05 p.m., Mayor Bellamy recessed the budget worksession and returned into the regular worksession. Councilman Mumpower then moved to go into closed session for the following reasons: (1) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; State of North Carolina; Gannett Pacific Corporation d/b/a Asheville Citizen-Times Publishing Company, an Hawaii Corporation; Chesapeake Television, INC., d/b/a WLOS-TV, a Maryland Corporation; and County of Buncombe. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Newman and carried unanimously.

At 6:15 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 6:15 p.m., Mayor Bellamy recessed the regular worksession and continued with the budget worksession.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:10 p.m.

Magdalen Burleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – May 23, 2006 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Brownie W. Newman

FIT COMMUNITY DESIGNATION

Lt. Governor Beverly Purdue was pleased to unveil Asheville's new "Fit Community" street sign. Ms. Purdue explained that Asheville is the first of 8 cities in North Carolina to receive this designation, which is awarded to communities that promote physical activity, healthy eating and youth tobacco use prevention.

PLEDGE OF ALLEGIANCE

Fourth grade students from Mr. Vince Floriana's class at Claxton Elementary School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. PRESENTATION OF THE SONDLEY AWARD TO STEVE HILL

Mayor Bellamy said that the Sondley Award is given by the Historic Resources Commission of Asheville and Buncombe County to an individual or individuals in the community who by word or deed has kindled among the citizenry of Asheville and Buncombe County an appreciation for the history or historic resources of the area.

Mayor Bellamy then recognized Mr. Curtis Walk, Chairman of the Asheville-Buncombe Historic Resources Commission. Mr. Curtis Walk said that the Historic Resources Commission gives the Sondley Award to an individual(s) in the community who by word or deed has kindled among the citizenry of Asheville and Buncombe County an appreciation for the history or historic resources of the area. He presented this year's Sondley Award to Steve Hill, Site Manager of the Thomas Wolfe Memorial.

II. PRESENTATION OF THE BUDGET

A. PRESENTATION OF PROPOSED FISCAL YEAR 2006-07 ANNUAL OPERATING BUDGET AND SETTING A PUBLIC HEARING ON JUNE 13, 2006, TO CONSIDER ADOPTION OF SAID BUDGET

Chief Financial Officer Ben Durant said that this is the formal presentation of the proposed Fiscal year 2006-07 Annual Operating Budget and consideration of a motion setting a public hearing on June 13, 2006, to consider adoption of said budget.

Mr. Durant reviewed with Council the following budget process highlights (1) Nov. 22: Brown & Caldwell Water Rate Presentation; (2) Jan. 13: Goals for Asheville Forum; (3) Jan. 20: City Council Retreat & Long-Range Financial Forecast, (4) Jan. 31: Water System Policy

Discussion & Public Forum; (5) Feb. 21: Financial Forecast Update & Water Rate Discussion; (6) Apr. 18: Budget Preview/Water CIP Fee; (7) May 8: Budget Update: General Fund; (8) May 16: Budget Update: Enterprise Funds/Fees/CIP; and (9) May 23: Formal Budget Submittal

Regarding property tax, he explained that property tax revenue: largest general fund revenue source; 49% of total; Revenue-neutral rate: 41 cents per $100 of assessed valuation; and Tax Base Growth: 5.4% - Natural growth: 3.5%; and Annexation growth: 1.9%.

He then reviewed the General Fund Revenue Summary.

Mr. Durant briefly explained the General Fund Expenditure Highlights of the (1) Personnel Package (a) 3% Average Merit Increase, 1% COLA; and (b) $450,000 for Market-based Compensation Plan; (2) Operating Costs (a) Operating costs are increasing due to the inflation in utility, fuel & material costs (i) $300,000 due to higher fuel costs; (ii) $167,000 increase in street lighting; and (iii) $152,000 increase for fire annexation contracts; and (3) Capital Outlay (a) Reduced to balance budget. He then reviewed the General Fund Expenditures Summary.

Mr. Durant reviewed the Fund Balance, the Capital Improvement Summary, and the Deferred Investment in Priority Areas.

Other Fund Highlights include the Water Fund (CIP investment plan and surcharge); Transit and Parking (Increased general fund subsidy to transit); Golf Fund (Eliminated general fund subsidy); Festival Fund (Increased revenue from 2nd gated event, fees); and Civic Center (Reduced general fund subsidy by $361,000).

Next steps include the May 23 Budget Submittal – distribution of the budget document; and plan for June 20 worksession (outside agencies, business licenses; transit and parking; and deferred investments in priority areas); June 13 public hearing; June 20 worksession; and June 27 budget adoption.

Councilman Freeborn moved to set the public hearing on the adoption of the Fiscal Year 2006-07 Annual Operating Budget for June 13, 2006. This motion was seconded by Vice-Mayor Jones and carried unanimously.

III. CONSENT AGENDA:

Mayor Bellamy asked that Consent Agenda Item "M" be pulled off the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 9, 2006, AND THE WORKSESSION HELD ON MAY 16, 2006

B. RESOLUTION NO. 06-103 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE AIR SPACE AT 12 S. LEXINGTON AVENUE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase air space at 12 South Lexington Avenue.

A bid has been received from Centrino LLC in the amount of $2,000 for the purchase of air space at 12 South Lexington Avenue.

The land at 12 South Lexington Avenue was acquired by the City as part of the Pack Square Redevelopment Project. It was sold for redevelopment to Centrino LLC in July, 2004, to construct a multi-story, mixed use building with 43 residential condominiums, 1 office condominium, 1 retail condominium and 49 parking spaces. The project which is nearing 60% complete was approved by the City's Technical Review Committee on July 12, 2004, and included balconies which would project 3 ft. or less over the sidewalk through a required encroachment agreement. Centrino proposes to acquire the air space for the balconies to be able to convey it to the purchasers along with the respective condominiums. The bid from Centrino LLC is to acquire title to the air space for the balconies at fair market value. The air space for the balconies over the sidewalk totals 167.942 ± S.F. and begins at approximately 18 feet above the sidewalk. The appraisal prepared by Joseph F. Moore dated February 26, 2006, estimates the market value of the airspace at $2,000.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by independent appraisal.
- It will provide for a more practical approach to the air space occupied by the balconies.
- It will clarify responsibility and liability for the balconies.

There is no negative impact.

City staff recommends City Council adopt the resolution, which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 30 – PAGE 16

C. RESOLUTION NO. 06-104- RESOLUTION AUTHORIZING THE PURCHASE OF 3,000 DATAMATIC RADIO READ UNITS TO BE USED WITH OUR DATAMATIC AUTOMATED METER READING SYSTEM

Summary: The consideration of a resolution authorizing the purchase of 3,000 Datamatic radio read units, in the amount of $222,000, to be used with our Datamatic automated meter reading system.

The Water Resources Department purchased a Datamatic "Roadrunner" mobile meter reading system and 500 Datamatic "Fire-Fly" radio read units in Fiscal Year 2002 at a cost of $36,635 as a pilot program. These automated meter reading units were installed at locations that were very difficult to access and that posed a safety threat to our meter reading employees. By automating the meter reading at these locations, a serious safety hazard was eliminated. In addition, this pilot program has proven to be very cost effective by reducing the time to read these meters by 85%.

This is a request to purchase an additional 3,000 Datamatic "Fire-Fly" radio read units. These units will be placed in the East Asheville area (Riceville Road, Old Farm School Road, and Warren Wilson School Road) because of the difficulty in manually reading these meters. By purchasing these devices in bulk, the cost is only $74 per unit versus $104 per unit. There is sufficient funding of $222,000 available in the current budget to purchase these devices.

The goal of this department is to implement automated radio reading throughout the water system. This will facilitate the move to monthly meter reading and billing versus bimonthly reading and billing.

PROS:

- Reduce meter reading time by 85%
- Reduce meter reading costs over time
- Reduce the safety hazards of reading meters manually in difficult to access areas
- Reduce the risk of back injuries from having to lift the meter lids to read the meters
- Improve customer service by being able to reduce meter reading errors
- Provide a service to the customer by being able to data-log usage for 72 hours
- Reduce per unit cost of meter reading devices by purchasing devices in bulk

CONS:

- The cost of this purchase is a factor; however, sufficient funding is available and has been set aside for this important project.
- If these devices are not purchased in bulk at a cost of $74/unit at this time, the cost will increase to at least $104 per unit.

Staff recommends City Council approve the resolution authorizing the purchase of 3,000 Datamatic radio read units in the amount of $222,000 to facilitate meeting the Water Resources Department's goal to implement automated meter reading system wide.

RESOLUTION BOOK NO. 30 – PAGE 17

D. RESOLUTION NO. 06-105 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH THE CLEAN WATER MANAGEMENT TRUST FUND TO ACCEPT A GRANT FOR A FEASIBILITY STUDY FOR STORMWATER RETROFITS FOR THE DINGLE CREEK WATERSHED

Summary: The consideration of (1) a resolution authorizing the City to enter into an agreement with the Clean Water Management Trust Fund in the amount of $133,000 for design and permitting of water quality improvements to the Dingle Creek Watershed; and (2) a budget amendment, in the amount of $233,000, to accept these funds and budget in a grant fund the $100,000 that the City will be contributing to the project.

In 2005 the City of Asheville requested $579,500 of an $875,000 effort to address stormwater and stream restoration needs in the Dingle Creek watershed in Buncombe County in the French Broad River basin. This watershed is developing, and the impervious surface area is projected to increase from 20% currently to 40% within the next 20 years.

The Board of Trustees approved a reduced grant amount of up to $133,000 to the City of Asheville at its meeting on November 14, 2005, to be used for design and permitting for a specific stormwater project and a specific stream restoration project, and to prepare a feasibility study that includes an analysis of and planning for stormwater retrofits and other Best Management Practices for the most developed parts of the Dingle Creek watershed.

The City of Asheville Stormwater Program has $100,000 budgeted in Fiscal Year 2006 to study the Dingle Creek Watershed. This money will be used to supplement the Clean Water Management Trust Fund Grant to complete the feasibility study.

Considerations:

- The first consideration of this project is the cost the project. The grant is covering approximately 57% of the project cost. The City's portion of the costs is $100,000. This money will be paid from the Stormwater Enterprise Fund. The money was programmed

for this project prior to receiving this grant. The scope of the project has increased to cover water quality issues in addition to flooding problems.

- Additionally, the Clean Water Management Trust Fund has indicated that they will consider funding some of the construction costs for this project once the feasibility study and design are complete.

This action complies with the City Council Strategic Operating Plan in Goal #1 in the focus area of Natural and Built Environment. Goal #1: Enhance and preserve air and water quality through comprehensive efforts. Objective #D Improve water quality.

City staff recommends City Council adopt (1) a resolution authorizing the City to enter into an agreement with the Clean Water Management Trust Fund in the amount of $133,000 for design and permitting of water quality improvements to the Dingle Creek Watershed; and (2) a budget amendment, in the amount of $233,000, to accept these funds and budget in a grant fund the $100,000 that the City will be contributing to the project.

RESOLUTION BOOK NO. 30 – PAGE 18

E. ORDINANCE NO. 3353 - BUDGET AMENDMENT TO ACCEPT A CLEAN WATER MANAGEMENT TRUST FUND GRANT FOR A FEASIBILITY STUDY FOR STORMWATER RETROFITS FOR THE DINGLE CREEK WATERSHED

Summary: See Consent Agenda Item "D" above.

ORDINANCE BOOK NO. 22 – PAGE 457

F. RESOLUTION NO. 06-106 - RESOLUTION ACCEPTING MAPLE SPRINGS ROAD, A PORTION OF BALLANTREE DRIVE AND OLD HAYWOOD ROAD FOR CITY MAINTENANCE

Summary: The consideration of a resolution accepting Maple Springs Road, a portion of Ballantree Drive and a portion of Old Haywood Road for City of Asheville maintenance.

The N. C. Dept. of Transportation (NC DOT) contacted the City approximately one year ago and requested that the City take over maintenance responsibility for approximately twelve NC DOT maintained roadways. The Public Works Department along with the Engineering Department evaluated all the streets and has determined it is in the best interest of the City to take over maintenance of three of the twelve streets.

The criteria we used to make this determination included the following:

- condition on the street;
- volume of traffic on the street;
- location of the street as it relates to the city limits and other city maintained streets;
- desirability of the City to control driveway access, traffic calming, etc., on the street; and
- land use.

The first street identified, Maple Springs Road, is approximately 0.32 miles in length known as State Route 2006. It begins at US 70, Tunnel Road to the end of the pavement. It is a residential street.

The second street identified, Ballantree Drive, is approximately 0.20 miles in length known as SR 3281. This section of Ballantree Drive is from the end of the existing City maintenance to the end of pavement. It is a residential street.

The third street identified is Old Haywood Road know as SR 1404. It is approximately 0.91 miles long and extends from Smoky Park Highway to the end of the existing City maintenance. This roadway is mixed residential and light commercial.

Considerations:

- The City will receive Powell Bill funds from the NC DOT to maintain the roadway.
- These Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends that City Council adopt a resolution accepting Maple Springs Road, a portion of Ballantree Drive and a portion of Old Haywood Road for City of Asheville maintenance.

RESOLUTION BOOK NO. 30 – PAGE 19

G. RESOLUTION NO. 06-107 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT A DONATION OF REAL PROPERTY ON WOOD AVENUE FROM THE DAN RIVER FOUNDATION

Summary: The consideration of a resolution authorizing the Mayor to accept a donation of real property on Wood Avenue from Dan River Foundation.

The subject property lies west of Wood Avenue between the residential property on Wood Avenue and the River Hills Shopping Center. The right-of-way for Wood Avenue is combined with the I-240 right of way at this point. There are no improvements on the property and it is heavily wooded. The land slopes from South to North. The parcel is about 0.59 acre and is zoned RS-8 Residential Single-Family High Density District. The tax value is $32,100 and the land appears to have some potential for development.

In 1986, the Dan River Foundation, a non-profit organization, executed a deed to the City of Asheville for property along Wood Avenue described as Ward 7, Sheet 13, Lot 78. The parcel is now identified as PIN 9658.18-42-2366. There is no record that the deed was ever recorded, although the tax listing was changed at that time to the City of Asheville. A search of various City records and files did not discover the original deed or any evidence that the deed was ever officially accepted by City Council. Staff has contacted Dan River Foundation and the foundation has executed a new deed to the City of Asheville dated April 19, 2006.

Staff recommends that the deed be accepted and the property be offered for resale.

The positive aspects of the donation are:

- The donor is a non-profit so property is not being removed from the tax base because it is not currently being taxed.
- The proposed donation will create an opportunity for the City to make the property available for infill development.
- The subsequent sale of the property would place it back on the tax rolls.
- The sale of the property would generate revenue for the City.

The negative aspects are:

- The deed from Dan River Foundation is a non-warranty deed, so the City will only be able to convey a non-warranty deed.

City staff recommends City Council adopt the resolution authorizing the Mayor to accept the donation of real property from Dan River Foundation.

RESOLUTION BOOK NO. 30 – PAGE 23

H. ORDINANCE NO. 3354- BUDGET AMENDMENT TO ACCOMMODATE INCREASED TRANSIT FUNDING FROM FEDERAL 5307 PROGRAM AND TO RECOGNIZE STATE FUNDING IN EXCESS OF BUDGETED AMOUNT

Summary: The consideration of a budget amendment, in the amount of $509,863, to accommodate increased funding from federal 5307 program and to recognize state funding in excess of budgeted amount.

The Asheville Transit System is eligible to obtain two funding lines from the federal 5307 program. One is the operations funding which is being phased out beginning in Fiscal Year 2007 but which is available in its entirety in Fiscal Year 2006, and is included in the Fiscal Year 2006 transit operating budget. The other is a reimbursement for a portion of operating maintenance costs which is not presently included in the Fiscal Year 2006 operating budget. The Asheville Transit System will be eligible for this funding line this year and in all future years. This line was not needed in prior years, but is now. The total of the line items is $1,425,917, an increase in the budget of $457,873. The state assistance funding was also $51,990 greater than expected.

This action conforms to City Council's Strategic Operating Plan in Goal 2, Objective A, Task #2: Leverage outside funding to achieve multiple Transportation goals where possible.

The benefit to the City of Asheville is:

- Increased revenue to cover increasing fuel and operating costs

Costs to the City of Asheville:

- None

City staff recommends City Council amend the budget to reflect increased federal funding.

ORDINANCE BOOK NO. 22 – PAGE 459

I. ORDINANCE NO. 3355 - BUDGET AMENDMENT TO APPROPRIATE DEPARTMENT OF JUSTICE BULLETPROOF VEST REIMBURSEMENT FUNDS

Summary: The consideration of a budget amendment, in the amount of $7,023, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

The Asheville Police Department currently participates in the Department of Justice Bulletproof Vest Reimbursement Program. This program is designed to off-set the tremendous cost involved in purchasing bulletproof vests for police officers. During the current fiscal year, the City of Asheville has collected $7,023 from the Department of Justice Bulletproof Vest Reimbursement Program. Adding these funds into the police (patrol) safety equipment budget line would assist in the purchase of additional bulletproof vests for Asheville Police officers.

This action confirms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pro:

- Reimbursement revenue to cover the rising cost of bulletproof vests for Asheville Police officers

Con: None noted.

City staff recommends City Council adopt the budget amendment in the amount of $7,023, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

ORDINANCE BOOK NO. 22 – PAGE 461

J. **ORDINANCE NO. 3356 - BUDGET AMENDMENT TO AUTHORIZE THE USE OF FEDERAL DRUG SEIZURE FUNDS TO PURCHASE EQUIPMENT AND FUND IMPROVEMENTS AND TRAINING FOR THE ASHEVILLE POLICE DEPARTMENT**

Summary: The consideration of a budget amendment, in the amount of $174,481, to authorize the use of Federal Drug Seizure Funds to purchase equipment and fund improvements and training for the Asheville Police Department.

The federal drug seizure program is an equitable sharing program which divides the illegal proceeds from drug dealing between the federal government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement, by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 20% going to the federal agency adopting the seizure and 80% going to the local law enforcement agency initiating the seizure. To date, the City of Asheville Police Department has received $174,481 in federal drug seizure funding. This proposed budget amendment would authorize the use of this funding for critical improvements, training, and equipment purchases for the Asheville Police Department.

Among the items slated for purchase with this funding include: 1) a "Hawkeye" drug surveillance camera system, wireless remote interface system and laptop computer, which will allow for covert video and audio taping of illegal drug transactions; 2) "Drug Trak" drug intelligence software and a computer mini-server to store drug intelligence information; 3) ballistic helmets & ammunition for the APD Drug Suppression Unit / Emergency Response Team; and 4) two Segway human transporters for use in patrolling the central business district. The funding will also be used to make improvements to the APD training room and to pay for training and travel expenses for several law enforcement training conferences.

This action confirms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pro:

- Federal seizure revenue to cover the cost of equipment and training related to street level drug enforcement and community policing

Con: None noted.

City Staff recommends City Council adopt the budget amendment in the amount of $174,481, to authorize the use of Federal Drug Seizure Funds to purchase equipment and fund improvements and training for the Asheville Police Department.

ORDINANCE BOOK NO. 22 – PAGE 463

K. RESOLUTION NO. 06-108 - RESOLUTION AUTHORIZING THE EXECUTION OF POWER LINE EASEMENT IN HUMMINGBIRD PARK

Summary: The consideration of a resolution authorizing an easement through Hummingbird Park at Starnes and Cumberland Avenues for an underground electric power line

Progress Energy has requested an easement through Hummingbird Park, located at the intersection of Cumberland and Starnes Avenue, to install an underground power supply line to a new home located adjacent to the Park. The City will receive no consideration for this easement and historically has not received consideration for power line easements. Per State and local law, Progress Energy pays a utility franchise tax. Parks and Recreation staff have reviewed this request, and have no objection to it.

Considerations:

- The easement will not interfere with the City's or the public's use of the Park.
- The electric power supply line will be installed in such a manner as not to be a hazard;
- The line will be installed underground, as opposed to overhead.

If Council approves of this easement, adoption of the resolution authorizing an easement through Hummingbird Park at Starnes and Cumberland Avenues for an underground electric power line is recommended.

RESOLUTION BOOK NO. 30 – PAGE 24

L. MOTION TO FORM THE ASHEVILLE-BUNCOMBE FLOOD REDUCTION TASK FORCE

Summary: The purpose of the Asheville-Buncombe Flood Reduction Task Force is to establish a regional approach in developing a long-range plan based on best practices models to protect our floodplains/ floodways and manage our watershed. Such a plan should integrate objectives of flood control, transportation, economic development, land use and community planning, recreation and environmental preservation.

Objectives:

- To study strategies to reduce future flood levels in the drainage basins in the Swannanoa Basin during heavy rain episodes.
- To study strategies to minimize the economic, environmental and social impacts and the risk to human life when floods occur in the future.
- To analyze whether current development patterns are affecting the severity of flooding during heavy rain events.
- To review the current flood studies underway and assess the feasibility of developing a dynamic and predictive capability to keep abreast of those variables that affect future flood potential.
- To make recommendations to Asheville City Council on these matters
- To act as a citizen advisory board for Stormwater Utility issues, as needed

Structure:

- This is a citizen task force, to be comprised of 12-15 individuals with technical expertise and experience in this topic.

- Staff support will be made available to facilitate the work product (if necessary.
- Staff will be available to present background information to commission, if requested.

Timeline:

- Six months to report back to Asheville City Council
- This time can be extend if needed

M. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE STONELEAF FESTIVAL OPENING GALA ON MAY 26, 2006

This item was pulled off the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEM PULLED OFF THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

RESOLUTION NO. 06-109 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE STONELEAF FESTIVAL OPENING GALA ON MAY 26, 2006

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Stoneleaf Festival Opening Gala on May 26, 2006.

The below listed group has requested, through the Asheville Parks and Recreation Department, that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption at this event.

- The Stoneleaf Festival Opening Gala on May 26, 2006, in the grassy knoll area of Pack Square, with indoor accommodations located at Windows on the Park, A Restaurant for Private Events.

The Asheville Parks and Recreation Department recommends City Council adopt the resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Stoneleaf Festival Opening Gala on May 26, 2006.

Councilman Freeborn moved for the adoption of Resolution No. 06-109. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 26

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING ALL STREETS IN THE AREA KNOWN AS CITY-COUNTY PLAZA

RESOLUTION NO. 06-110 - RESOLUTION PERMANENTLY CLOSING ALL STREETS IN THE AREA KNOWN AS CITY-COUNTY PLAZA

Mayor Bellamy opened the public hearing at 5:29 p.m.

Assistant Director of Public Works Richard Grant said that this is the consideration of a resolution to close all streets in the area known as City-County Plaza. This public hearing was advertised on April 28, May 5, 12 and 19, 2006.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Buncombe County and the City of Asheville have requested the City of Asheville permanently close all streets in the area known as City-County Plaza as bounded by College Street on the north, Davidson Street on the east, Marjorie Street on the south and South Spruce Street on the west (a/k/a Court Plaza, City Hall Drive North, City Hall Drive South, City Hall Circle and any and all other names such streets may have from time to time been titled).

Public Works Department staff has researched and determined all streets in the area known as City-County Plaza are City maintained. Closure of these street will not deny any of the adjoining property owners reasonable means of ingress and egress as the City of Asheville and Buncombe County are the only adjoining property owners. The owner of the Hays Hopson Building, although not an adjoining property owner, will be provided a courtesy notice of the intent to close

Pros:

- The closure is necessary for the successful completion of the redesign of Pack Square.
- Closure of the streets will facilitate the timely completion of the Pack Square Project.
- The closure of the streets will still facilitate pedestrian movement from one location to another in downtown Asheville. There will be no future compromise of ingress/egress to other property.

Cons:

- Staff can find no potential challenges.

This action ties in with the City Council Strategic Operating Plan in Focus Area: Sense of place, heritage and arts, Goal 3, Task 3, by promoting downtown revitalization, assisting in the implementation of the Pack Square Renaissance Project.

City staff recommends that City Council adopt the resolution closing all streets in the area known as City-County Plaza.

Ms. Regina Ray, probation officer that works in the Hayes & Hopson Building, was concerned that if the roads are closed there will be no access to the Hayes & Hopson Building.

Mr. Grant responded that the Hayes & Hopson is not directly adjacent to the property but still has access on two sides.

Mayor Bellamy closed the public hearing at 5:32 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 06-110. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 20

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF 3820 SWEETEN CREEK ROAD

ORDINANCE NO. 3357 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 3820 SWEETEN CREEK ROAD

Mayor Bellamy opened the public hearing at 5:33 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to extend the corporate limits of the City of Asheville to include 3820 Sweeten Creek Road. This public hearing was advertised on April 28, 2006.

John W. Couch has petitioned the City for the annexation of one lot he owns located at 3820 Sweeten Creek Road (PIN 9654.14-34-8944) containing approximately .72 acres. The area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

The lot currently contains a single-family home. The current assessed valuation for this property, according to the Buncombe County tax records, is $109,400.00.

Pursuant to N. C. Gen. Stat. sec. 160A-31 a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on June 30, 2006.

Considerations:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the ordinance annexing one lot located at 3820 Sweeten Creek Road.

Mr. John Couch, property owner, spoke in support of his request to be annexed.

Mayor Bellamy closed the public hearing at 5:35 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3357. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 465

C. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY ON ROCKWOOD ROAD

ORDINANCE NO. 3358 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY ON ROCKWOOD ROAD

Mayor Bellamy opened the public hearing at 5:35 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance for the voluntary ("satellite") annexation of four properties located on Rockwood Road in South Buncombe County. This public hearing was advertised on April 28, 2006.

Steve Hankins of Hankins Properties, LLC, has petitioned the City for the annexation of four lots owned by the LLC and located along Rockwood Road, off of Airport Road, in South Buncombe County (PINs No. 9643.02-65-7556, 9643.02-65-8378, 9643.02-65-5483, 9643.02-65-5606) containing approximately 6.54 acres.

The lots are adjacent to the new Southridge Shopping Center and the Holiday Inn on Airport Road. The current assessed valuation for this property, according to the Buncombe County tax records, is $4,073,100.00. The area, while contiguous to other non-contiguous ("satellite") parcels in the City of Asheville, is not contiguous to the primary corporate limits of the City and, therefore, is subject to the standards for annexation of noncontiguous areas contained in N. C. Gen. Stat. sec. 160A-58.1. One of these standards states, "no point on the proposed satellite corporate limits may be closer to the primary corporate limits of another city than to the primary corporate limits of the annexing city....." The area proposed for annexation is closer to the corporate limits of the Town of Fletcher. However, since Fletcher's charter precludes them from annexing into Buncombe County, staff has determined that this annexation is not contrary to state statutory requirements. Council may recall that a similar situation arose last year, and legislative assistance was needed for the annexation. We have requested local legislation to address the situation created by Fletcher's proximity.

In accordance with N. C. Gen. Stat. sec. 160A-58.1, the petitioners, in addition to the submittal of the petition, have filed a statement declaring vested rights with respect to the properties. Specifically, the property owner has received approval for four different site-specific development plans from the Board of Adjustment of Buncombe County in accordance with the regulations of the Limestone Township of Buncombe County. The vested rights for two of the plans will remain in effect until April 13, 2010. The vested rights for the other two submittals will remain in effect until December 14, 2010. These four site plans have been submitted to the City Planning and Development Department and can be made available as needed. The City Planning and Development Department has confirmed the validity of the vested rights in accordance with state law.

Pursuant to N. C. Gen. Stat. sec. 160A-58.2 a public hearing must be held prior to adopting any ordinance for voluntary annexation. Should City Council decide to proceed with this annexation, it is proposed that the annexation become effective on June 30, 2006.

Considerations:

- Provides for the orderly growth of the City and the tax base through the acceptance of contiguous areas into the corporate limits where owners desire annexation.
- Provides for orderly service provision by the City of Asheville.

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the ordinance annexing four properties located on Rockwood Road in South Buncombe County.

Mayor Bellamy closed the public hearing at 5:39 p.m.

In response to Councilman Freeborn, Ms. Cogburn explained the four development site plans.

Upon inquiry of Councilman Freeborn, Ms. Cogburn said that the developer does not have to comply with the City's landscaping requirements. However, Mr. Steve Hankins, property owner, said that they are willing to meet the City's landscaping requirements in the designated landscaped areas. He said he has a big investment in the property and hopes to be a part of the community.

When Vice-Mayor Jones asked why this area was requesting to be annexed, Ms. Cogburn said that that one restaurant would like to apply for a liquor license.

City Attorney Oast said that with respect to this project, there was an issue about the level of police and fire services that were available from the City of Asheville as opposed to either Fletcher or Buncombe County. These are fairly intensively developing commercial areas and they do require a higher level of service that the City of Asheville is able to provide.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3358, specifically noting that he is not asking the petitioner to do more landscaping than already agreed to do with Buncombe County. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 467

D. PUBLIC HEARING TO CONSIDER RENAMING THE EXISTING STREET OF "HOLIDAY INN DRIVE" LOCATED OFF HIGHWAY 240 EAST TO "RESORT DRIVE"

Mayor Bellamy said that the petitioners have requested this public hearing to be continued to July 25, 2006, in order to address street signage. Therefore, Councilman Davis moved to continue this public hearing to July 25, 2006. This motion was seconded by Vice-Mayor Jones and carried unanimously.

E. PUBLIC HEARING TO CONSIDER THE REZONING OF ONE LOT LOCATED ON FAIRVIEW ROAD FROM NEIGHBORHOOD BUSINESS DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3359 - ORDINANCE TO REZONE ONE LOT LOCATED ON FAIRVIEW ROAD FROM NEIGHBORHOOD BUSINESS DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 5:46 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone one lot located on Fairview Road from Neighborhood Business District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on May 12 and 19, 2006.

The subject site is located in the western part of the Oakley neighborhood, within the City of Asheville corporate limits. The property, 0.2 acres in area, is currently zoned Neighborhood Business, and is undeveloped. The applicant, Carol L. Massey, who is hoping to purchase the property, is seeking a rezoning to RS-8 Residential Single-Family High Density District. The applicant would like to build a single-family home on the property, and under the current Neighborhood Business zoning, residential uses are restricted to parts of a building other than the first floor or street level.

More than half of the surrounding property is zoned RS-8, and the surrounding land uses are primarily residences, with small businesses located to the east. The average lot size in the vicinity is approximately 0.3 acres.

It appears that this property was assigned Neighborhood Business zoning in order to extend the district west to Unaka Avenue. The modification of the zoning district boundary requested by the applicant would create a western limit of the district that would line up on both sides of Fairview Road.

The existing Neighborhood Business district has a total area of approximately 4.4 acres. The intent of the Neighborhood Business district is to provide for the daily convenience and personal service needs of the surrounding residential neighborhood while minimizing conflicts with surrounding residential uses. This district is designed to be located within or adjacent to residential neighborhoods where large commercial operations are inappropriate, but where small neighborhood oriented businesses are useful and desirable. This particular parcel has been on the market for several years, but has not found a buyer for a suitable commercial use.

The intent of the RS-8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character in areas of existing high density single-family development while promoting a suitable environment for single-family living.

This small parcel's location at the western tip of the district, in a situation such that three of its sides face primarily RS-8-zoned property, makes the rezoning to RS-8 an appropriate modification of the district boundaries. While the parcel is a suitable location for a small business, its failure to attract a buyer for such a purpose provides another argument in favor of the rezoning. The subject site is located in the western part of the Oakley neighborhood, within the City of Asheville corporate limits. The property, 0.2 acres in area, is currently zoned Neighborhood Business, and is undeveloped. The applicant, Carol L. Massey, who is hoping to purchase the property, is seeking a rezoning to RS-8 Residential Single-Family High Density District. The applicant would like to build a single-family home on the property, and under the current Neighborhood Business zoning, residential uses are restricted to parts of a building other than the first floor or street level.

More than half of the surrounding property is zoned RS-8, and the surrounding land uses are primarily residences, with small businesses located to the east. The average lot size in the vicinity is approximately 0.3 acres.

It appears that this property was assigned Neighborhood Business zoning in order to extend the district west to Unaka Avenue. The modification of the zoning district boundary

requested by the applicant would create a western limit of the district that would line up on both sides of Fairview Road.

The existing Neighborhood Business district has a total area of approximately 4.4 acres. The intent of the Neighborhood Business district is to provide for the daily convenience and personal service needs of the surrounding residential neighborhood while minimizing conflicts with surrounding residential uses. This district is designed to be located within or adjacent to residential neighborhoods where large commercial operations are inappropriate, but where small neighborhood oriented businesses are useful and desirable. This particular parcel has been on the market for several years, but has not found a buyer for a suitable commercial use.

The intent of the RS-8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character in areas of existing high density single-family development while promoting a suitable environment for single-family living.

This small parcel's location at the western tip of the district, in a situation such that three of its sides face primarily RS-8-zoned property, makes the rezoning to RS-8 an appropriate modification of the district boundaries. While the parcel is a suitable location for a small business, its failure to attract a buyer for such a purpose provides another argument in favor of the rezoning.

At the May 3, 2006, meeting, the Planning and Zoning Commission voted unanimously to recommend approval. At this meeting, one citizen expressed a desire for the site to allow higher impact use than it is currently zoned for.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposed rezoning is highly compatible with surrounding zoning and uses.
- No indication of neighborhood opposition to such a down-zoning.
- Would eliminate a potential location for a neighborhood business, but:
- Property has not proven attractive to buyers for permitted commercial use.

Based on the analysis above, staff finds no compelling reason for objection to the request, and therefore recommends approval of the rezoning petition. In addition, staff finds that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation.

Mayor Bellamy closed the public hearing at 5:49 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3359. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 470

F. PUBLIC HEARING TO CONSIDER THE REZONING OF A PORTION OF PROPERTY LOCATED AT 1301 SAND HILL ROAD FROM INDUSTRIAL DISTRICT TO COMMERCIAL BUSINESS II DISTRICT

ORDINANCE NO. 3360 - ORDINANCE TO REZONE OF A PORTION OF PROPERTY LOCATED AT 1301 SAND HILL ROAD FROM INDUSTRIAL DISTRICT TO COMMERCIAL BUSINESS II DISTRICT

Mayor Bellamy opened the public hearing at 5:50 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone a portion of property located at 1301 Sand Hill Road from Industrial District to Commercial Business II District. This public hearing was advertised on May 12 and 19, 2006.

The subject site is a portion of the Colbond Plant property (sometimes referred to as American Enka or BASF) on Sand Hill Road in Enka, just within the City of Asheville corporate limits. The portion of the property to be rezoned is approximately 1.5 acres in size, less than one percent of the 246 acres owned by Colbond. All of the property owned by Colbond is currently zoned Industrial.

The applicant, American Enka Credit Union, is seeking a rezoning to Community Business II District. For more than half a century, American Enka Credit Union has operated a small financial institution within the industrial site. (Financial institutions are not a permitted use in Industrial zoning districts, so the credit union facility became an existing nonconformity.) The applicant's wish to relocate to a proposed new building closer to Sand Hill Road requires a rezoning in order to establish conformity.

The applicant and the property owner have agreed that if the rezoning is approved, the property will be subdivided so that the zoning district will follow property lines and no part of the property will be split-zoned. Staff has reviewed the geometry of the proposed district (and potential future lot) and verified that it meets City requirements for a minor subdivision.

In the vicinity of the subject site, the north side of Sand Hill Road is zoned Industrial, and the south side is zoned CB-II; hence the proposed zoning would match that across the street. The surrounding land uses are vacant land, industrial operations, and the (non-conforming) current credit union location.

According to the Unified Development Ordinances Article 8, the purpose of the Industrial District is to reserve land for existing and future industrial activities and for land uses that support industrial activities. Development standards are established to ensure that land uses located outside the Industrial District are not adversely affected by the negative impacts of industrial uses. Industrial Districts shall be located to capitalize on existing infrastructure where possible, such as transportation facilities and utilities. Supporting land uses are characterized as providing supplies, raw materials, transportation, or storage services to industries or providing services to industrial employees.

The Community Business District II was established to provide areas for medium-to-high-density business and service uses serving several residential neighborhoods. Such areas may serve as a workplace for many residents in the surrounding neighborhoods and should be sensitive to a significant pedestrian population, but also provide for adequate and safe vehicular access. The Community Business II District is designed to be located primarily along minor and major thoroughfare streets which serve multiple residential neighborhoods.

The existing Industrial zoning district in which the subject site is located has a total area of more than 500 acres. Staff feels that the rezoning of such a small area to bring a use into conformance does not constitute a significant loss of industrially zoned land, nor does it

compromise the utility of the larger area for industrial use. Further, staff consensus is that a request to rezone a larger fraction of this area would be unlikely to receive staff support.

At the May 3, 2006, meeting, the Planning and Zoning Commission voted unanimously to recommend approval. Staff has received no indication of neighborhood opposition.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Would make a non-conforming situation conforming.
- Proposed zoning district matches the district across the street.
- Down-zoning the property is unlikely to be opposed by neighboring property owners.
- Would cause loss of industrially zoned land (approximately 1.5 acres)

Based on the analysis above, staff finds there are multiple arguments for supporting the request with no significant reason to oppose it, and therefore recommends approval of the rezoning petition. In addition, City staff finds that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation.

Mayor Bellamy closed the public hearing at 5:52 p.m.

In response to Councilman Mumpower, Mr. Esselstyn explained why staff is supporting the rezoning from Industrial District since it is in conflict of Council's policy in the Asheville City Plan 2025, which specifically states that industrial land should be preserved for industrial uses.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3360. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 472

G. PUBLIC HEARING TO CONSIDER THE REZONING OF A PORTION OF PROPERTY LOCATED ON ROCK HILL ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 3361 - ORDINANCE TO REZONE OF A PORTION OF PROPERTY LOCATED ON ROCK HILL ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 5:54 p.m.

Urban Planner Shannon Tuch said that this is the consideration of an ordinance to rezone a portion of property located on Rock Hill Road from Commercial Industrial District to RS-4 Residential Single-Family Medium Density District. This public hearing was advertised on May 12 and 19, 2006.

Ms. Tuch said that the property owners, Ronald & Deanna Goldstein, are interested in rezoning approximately 2.23 acres of a 6.39 acre lot. The existing lot currently supports a

commercial-industrial use but leaves approximately 1/3 of the total lot undeveloped at the rear of property. Rezoning this property will provide the opportunity for medium density single-family infill development with frontage on Rock Hill Road which is exclusively residential in character. With over 530 linear feet of road frontage, these 2.23 acres could easily be subdivided to allow for up to 6-7 separate lots. A subdivision of the land is recommended but not required as part of the rezoning; however, a subdivision will be required before any single-family home permits are issued.

Commercial Industrial zoning does allow for residential uses but does not allow single family homes which are the predominant character of Rock Hill Road. It is possible to expand the existing commercial industrial use if desired but expansion would require heavy landscape buffering and the non-residential use would not be able to access the residentially zoned Rock Hill Road, limiting all access to Sweeten Creek Road. Lastly, the existing topographical change would add development challenges and cost to an expansion of the existing business, while access on the alternative through road is clear and level and is not restricted for residential development.

The rezoning proposal as presented would allow for up to seven single-family home lots while retaining the existing commercial-industrial use and zoning on the balance of the property. The residential portion of the property would be located at the rear of the site, adjacent to other single family uses and would access from Rock Hill Road; while the existing commercial-industrial use would remain and would continue to access from Sweeten Creek Road.

- The RS-4 zoning district is designed to establish and promote a suitable and medium density single-family district where public infrastructure is sufficient to support such development.

- The purpose of the Commercial Industrial zoning district is to provide areas for a wide range of commercial and industrial uses where environmental conditions and urban infrastructure are adequate to support commercial and industrial development.

At their May 3, 2006, meeting, the Planning & Zoning Commission voted unanimously to approve the 2.23 rezoning request from Commercial Industrial District to RS-4 Residential Single-Family Medium Density District.

Based on the above findings and the analysis provided in the report, staff concurs with the Planning & Zoning Commission and finds this request to be reasonable.

Considerations:

- Reduces the opportunity for a limited expansion of the existing commercial industrial use.
- Provides the opportunity for new single family residential infill development in an established neighborhood.

Mayor Bellamy closed the public hearing at 5:58 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3361. This motion was seconded by Councilman Freeborn and carried unanimously.

H. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADJUST THE URBAN PLACE ZONING DISTRICT TO ALLOW SINGLE FAMILY DETACHED DWELLINGS AS A USE BY RIGHT SUBJECT TO SPECIAL REQUIREMENTS AND TO PROVIDE GREATER FLEXIBILITY FOR STREET SETBACKS**

ORDINANCE NO. 3362 - ORDINANCE TO AMEND CHAPTER 7 OF THE CODE OF ORDINANCES TO ADJUST THE URBAN PLACE ZONING DISTRICT TO ALLOW SINGLE FAMILY DETACHED DWELLINGS AS A USE BY RIGHT SUBJECT TO SPECIAL REQUIREMENTS AND TO PROVIDE GREATER FLEXIBILITY FOR STREET SETBACKS

Mayor Bellamy opened the public hearing at 5:59 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance ("UDO") to adjust the Urban Place Zoning District to allow single family detached dwellings as a use by right subject to special requirements and to provide greater flexibility for street setbacks. This public hearing was advertised on May 12 and 19, 2006.

This code amendment is intended to allow greater use and setback flexibility in the Urban Place zoning district by allowing detached single family dwellings and greater street setbacks under certain circumstances.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros –

- Greater opportunity to address specific street setback situations.
- A wider range of land uses would be available to property owners.

Con –

- None noted.

The Planning and Zoning Commission recommended approval of this code amendment on May 3, 2006, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Mayor Bellamy closed the public hearing at 6:02 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3362. This motion was seconded by Councilman Freeborn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 476

I. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 919 HAYWOOD ROAD FROM INSTITUTIONAL DISTRICT, RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED MIXED-USE PROJECT**

ORDINANCE NO. 3363 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 919 HAYWOOD ROAD FROM INSTITUTIONAL DISTRICT, RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED MIXED-USE PROJECT

Mayor Bellamy opened the public hearing at 6:03 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to conditionally zone property located on 919 Haywood Road from Institutional District, RM-8 Residential Multi-Family Medium Density District and RS-8 Residential Single-Family High Density District to Urban Place District/Conditional Zoning for a proposed mixed-use project. This public hearing was advertised on May 12 and 19, 2006.

Mr. Glines said that the proposed project is located at 919 Haywood Road. The St. Joan of Arc Church currently uses the block-wide site. Over the years several properties were purchased at the rear of the church property for expansion of the church. The church though is relocating further out in west Asheville. The current proposal is a conditional zoning to Urban Place District following the master plan generated during a weeklong charette (a community planning and design process) The charette process provided an opportunity for the neighborhood to participate in the design development of the site. Several evening meetings were held in order for the neighborhood to offer feedback for the schematic plans. The plan provided with the application (now more defined) is the same as was reviewed with the community.

The plan proposes 77 residential units and 33,000 square feet of commercial space (office and retail) on an almost three acre property. The primary building is oriented towards Haywood Road. The building covers the block face and is three stories tall. A section of the building towards the center is 4 stories tall. The four-story section provides a setback from the roofline on Haywood Road and will reduce the perceived height of the building The remaining structures on the site are two stories tall. These proposed buildings at the rear of the site are scaled to be closer to the residential buildings found in the neighborhood. Driveways that are placed across from each other on Mitchell and Blue Ridge Avenues will provide access to the development. They are placed behind the main structure. Each driveway is angled to discourage commercial traffic from turning back into the neighborhood area. At the point that the driveways interact with the neighborhood, there will be a neighborhood gateway feature to provide a transition and signify that drivers are entering a neighborhood area. The primary parking for the project is being handled under the main building. A small amount of surface parking is located within the site. Across the front of the building and at regular intervals around the property, pedestrian access is provided by sidewalk connections and by a major pedestrian corridor through the interior of the building.

In addition to commercial and residential space located in the main building, there are a variety of other structures located internal to the site. There are live/ work units and artists lofts located at the center of the project. Single family and duplex units are located at the rear of the site to offer a transition back into the neighborhood fabric.

The size of the project was developed with the scale and density patterned after the Neighborhood Corridor District. However several challenges were presented during the design process and Urban Place District was thought to be a better fit for this project. The project as proposed does require a wording amendment to the Urban Place District to allow greater structure setbacks and single family uses in the Urban Place District. A wording amendment will accompany this development proposal and should be a condition of its approval.

The Institutional District was developed to set aside areas for major educational and medical facilities and other complementary uses such as office developments and public services. The current zoning causes challenges for the proposed development because of height restrictions next to residentially zoned property and density restrictions. The residential single family and multifamily districts allow single family and multifamily neighborhoods and other limited non-residential uses. Both districts allow a density maximum of 8 units per acre and other commercial uses would not be allowed in the development. This posed a challenge for the current development proposal.

The project was reviewed at the April 17, 2006, Technical Review Committee (TRC) meeting and the comments are conditions of approval. Staff added the comment that the parcels should be recombined into a single parcel if the proposal is approved

The Planning and Zoning Commission reviewed the project at their May 3, 2006, meeting and approved the project unanimously with TRC conditions added as conditions. In addition the Commission recommended the developer provide up to $25,000 for participation in traffic calming measures in the neighborhood following the City traffic calming policy and procedures. In addition because the City process may take some time to complete, any funds would be provided on or before the issuance of a certificate of occupancy. Although the project is not expected generate large amounts of traffic on its own, the developer is willing to help the neighborhood address the existing cut-through traffic problem. The Commission noted that the wording changes for Urban Place District be approved as a condition of the approval of the conditional zoning permit.

The developer has related that he has a contract with the current owners of the property (the Diocese of Charlotte). The Diocese is concerned that should the project be denied by City Council, they will have a required waiting period before a new zoning change can be brought forward. For this reason they are requesting that a special condition be attached to the review, that if the developer does not close on the property by August 31, 2006, then the conditional use permit will become nullified and the property will revert to the former zoning.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project will be built according to City and State code requirements. The developer is interested in providing traffic calming in the neighborhood to reduce the short-cut traffic from Patton Avenue. Working with the City, the neighborhood will benefit from this funding towards traffic calming.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The bulk of the development will occur towards Haywood Road. The buildings are being setback from the secondary streets in order to preserve significant existing trees along both Mitchell and Blue Ridge Avenues. Significant grade changes are not present on this site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** This development proposal along this portion of Haywood Road has the potential to be a positive force for change.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The largest building in the development is located along Haywood Road. Although the scale of Haywood Road has historically been one and two story buildings, the area has the capacity for larger structures. The building is primarily a three-story structure with a fourth story section that is setback from the Haywood Road façade. This setback will reduce the perceived height of the building. The scale and massing of the development reduces significantly as the project transitions into the neighborhood. This should mitigate concern about compatibility with the neighborhood and meet the spirit of this consideration.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The comprehensive plan encourages redevelopment of infill sites in a sensitive way. Community planning processes are encouraged to gather stakeholder comments as the plans are being created. Mixed-use centers on commercial corridors are encouraged in the comprehensive plan because of their efficient use of land, support of mass transit, and because they provide variety of choices for housing and commerce. This development style is a preferred pattern for Haywood Road for these reasons and because there is the opportunity to increase community character and pedestrian connectivity.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The site has sufficient infrastructure to support the development proposal. The site is on the City transit line that may be of special convenience to the project. Route One passes directly by the site and Route Nine is a quarter mile away along Haywood Road.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** Traffic concerns have been shared by the neighborhood. The scale of this development is not expected to generate significant traffic on its own. The neighborhood is already experiencing cut-through traffic because of its proximity with Patton Avenue. The developer has expressed interest in assisting with traffic calming measures along these streets.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable. The project meets City goals and planning documents and is aligned with the Asheville City Development Plan 2025.

Considerations:

- A valuable piece of real estate would come back onto the tax rolls
- The development site is an entire block along Haywood Road making it very unique
- An involved planning and design process included neighbors and other community stakeholders to provide comment on the development
- The project has the potential to be a positive catalyst for other development along this portion of Haywood Road
- Traffic entering through the neighborhood has been the primary concern of the neighborhood and some amount of additional traffic may be generated because of this project.
- The developer has expressed willingness to participate in traffic calming following the City procedure for determining traffic calming measures

The Planning and Zoning Commission at their May 3, 2006, meeting voted 5-0 to recommend approval of the conditional zoning permit for 919 Haywood Road with the following: (1) All TRC conditions being met: (2) The developer participate in neighborhood traffic calming measures an amount up to $25,000 following the City process for determining those measures; (3) Because the City process may take some time to complete, any funds would be provided on or before the issuance of a certificate of occupancy; and (4) Wording changes proposed for Urban Place District and needed for this proposal be approved.

Staff concurs with this recommendation with a single addition that City Council address Diocese of Charlotte concerns about the timeframe for the developer to close on the property to be August 31, 2006, or the site zoning revert to the original and the permit be revoked.

Mr. Andy Worley, resident on Blue Ridge Avenue, presented City Council with a petition from the neighbors (62 signatures) which requests the City allow the developer to put in the following "(1) On Mitchell Avenue: (a) Use the standard 5-foot siddwalk, 5-foot setback from Haywood Road to the existing brick driveway; and (b) Use a 6-foot sidewalk that adjoins the curb from the existing brick driveway to the north end of the property; and (2) On Blue Ridge Avenue: (a) use the standard 5-foot sidewalk, 5-foot setback between Haywood Road and the existing stone wall; and (b) Use the existing sidewalk located at the back of curb located along the existing stone wall, only if the stone wall is to be preserved; or (c) Use a 6-foot sidewalk that adjoins the curb from the end of the stoon wall to the north end of the property, except to meander around the large trees." His main concern is that the City's recommendation of a 5-foot sidewalk and a 5-foot setback will damage the trees.

Mr. Allan Wolf, resident on Blue Ridge Avenue, agreed with Mr. Worley in that they want the developer to do what they can to save the trees, one which is a 60-foot sycamore. He said that the neighborhood believes this is a good change, but they want the transition done smoothly while keeping the trees which are the character of the neighborhood.

Mr. Gerald Green, representing the developer, spoke in support of the project noting that they held a design charette in which approximately 125 community members attended. The development team would like for this project to be a model for infill development, both in terms of the extent to which they gathered community input during the planning process and for the quality of construction in trying to blend into the community. They had proposed some on-street parallel parking on Haywood Road, but have just received final word from the N.C. Dept. of Transportation to the effect that on-strete parking on Haywood Road will not happen.

At 6:12 p.m., Councilwoman Cape left the meeting, but noted that she attended the charette was was very impressed by the whole process and the developer's willingness to invest into this community.

Mr. Green said that they will be using modual construction to keep the costs down so it is affordable to a wide range of people. There will be a variety of housing types and sizes. Regarding the design of a sidewalk, they are working with the City on a plan to save the trees. He said that the developer hired an arborist to look at the trees. That arborist stated that the 5-foot planting strip and the 5-foot sidewalk would negatively impact not only the trees, but some historic rock walls. The City's Traffic Engineer met with the developer's staff and came up with one solution – a meandering sidewalk with a varying planting strip that meanders through the trees. He proposed that Council allow them to use a 6-foot sidewalk that abuts the street which does meet the City standard for sidewalks. He noted that they are continuing to work with the neighborhood representatives to make sure the community is involved in the continuing development of this project.

City Traffic Engineer Anthony Butzek said that he feels the staff proposal is appropriate. He disagreed with the characterization of a meandering sidewalk. There are a few transition points at which it would change the transition from a 5-foot setback to a 2-3-foot setback to the back of the curb and one or two trees which was suggested to meander around to save that tree. He feels this provides a safe environment for pedestrians, it avoids a number of existing utility poles and fire hydrants (which would otherwise be in the sidewalk, if they are allowed to do the back to curb sidewalk), and it does preserve the existing trees.

In response to Mr. Butzek stating that traffic on Mitchell Avenue is an existing problem, Councilman Mumpower felt it was generous for the developer to contribute $25,000 to traffic calming in the area.

Mr. Kevin Crump, developer, said that his development will have a $22-25 Million impact and the $25,000 for traffic calming is not that much in the big scheme of things. He said he doesn't feel forced to contribute to traffic calming, but he offered. Regarding the trees, they can put in a 5-foot buffer and a 5-foot sidewalk but feels that the trees will die as a result of root damage within a few years, based on their arborist and their landscape architect. He wants to preserve the trees and is confident that a 6-foot sidewalk that adjoins the curb will save the trees.

Mayor Bellamy closed the public hearing at 6:30 p.m.

After a brief discussion regarding the sidewalks, Planning & Development Director Scott Shuford suggested the following condition: "That the sidewalk design shall be referred to City staff to involve the Asheville Tree Commission members and the City Arborist to ascertain the best alternative that balances tree health, utility considerations, and pedestrian safety." The developer agreed with this condition.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3363 to conditionally zone property located on 919 Haywood Road from Institutional District, RMi-8 Residential Multi-Family Medium Density District and RS-8 Residential Single-Family High Density District to Urban Place District/Conditional Zoning for a proposed mixed-use project, subject to the following conditions: (1) All TRC conditions being met: (2) The developer participate in neighborhood traffic calming measures an amount up to $25,000 following the City process for determining those measures; (3) Because the City process may take some time to complete, any funds would be provided on or before the issuance of a certificate of occupancy; (4) Wording changes proposed for Urban Place District and needed for this proposal be approved; (5) Timeframe for the developer to close on the property to be August 31, 2006, or the site zoning revert to the original and the permit be revoked; and (6) That the sidewalk design shall be referred to City staff to involve the Asheville Tree Commission members and the City Arborist to ascertain the best alternative that balances tree health, utility considerations, and pedestrian safety. He noted that this request is reasonable based on the information provided in the staff report. This motion was seconded by Councilman Freeborn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 478

J. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 37 ARLINGTON STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR A PROPOSED PARKING LOT

Mayor Bellamy said that on Monday, May 22, 2006, the City Clerk received a letter from Mr. Robert Malkin, agent for Mr. & Mrs. Randall Higgins, doing business as 37 Arlington Street, Asheville, North Carolina. The letter read "we wish to request a continuance of the public hearing now scheduled for May 23 to July 11, 2006, based on a valid protest petition being filed on May 18, together with the absence of Councilman Brownie Newman during this Council meeting on May 23."

Ms. Elizabeth Ann Wyndelts hoped that the petitioner and the neighborhood will halve worked some details out prior to the July 11 meeting date.

Councilman Davis moved to continue this public hearing until July 11, 2006. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Freeborn voting "no."

K. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF ONE LOT LOCATED ON OLD ASHELAND AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING WITH A DENSITY BONUS FOR PROPOSED AFFORDABLE HOUSING

ORDINANCE NO. 3364 - ORDINANCE TO CONDITIONALLY ZONE ONE LOT LOCATED ON OLD ASHELAND AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING WITH A DENSITY BONUS FOR PROPOSED AFFORDABLE HOUSING

Mayor Bellamy opened the public hearing at 6:36 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to conditionally zone one lot located on Old Asheland Avenue from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Zoning with a density bonus for proposed affordable housing. This public hearing was advertised on May 12 and 19, 2006.

The applicant, Lisa Karen Roberts, seeks rezoning from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Zoning for a multi-family residential project with 5 units. This level of density will require the development standard bonus for both affordable housing and exceptional design. The proposed project would include a single family structure to be licensed as a Family Care Home, as well as two duplexes available to the general public (and potentially adults transitioning out of the Family Care Home).

The lot, 0.316 acres in area, is located on Old Asheland Avenue south of Asheville's Central Business District, between South French Broad Avenue and McDowell Street. The site's proximity to the Central Business District makes it exempt from off-street parking requirements.

Multi-family and single-family dwellings are permitted uses in the RM-8 zoning district. With the 200% density bonus applied, the proposed number of units conforms with the density standards for the district. The combined habitable area of the residences would be approximately 5,500 square feet. The duplexes would be two stories, while the single-family home will be one story over a finished basement. The plans show a Type "B" buffer with an opaque wooden fence. Though details about the plantings will need to be provided, the buffer location and width appear to otherwise meet standards.

To qualify for the density bonus for affordable housing, the applicant has stated that the rents will not exceed the maximum rental rates of $690 and $1,050 per month for the two-bedroom units and four bedroom unit respectively.

To qualify as an exceptional development project for the development standard bonus, the applicant has stated that the project includes elements of higher quality building design, design sensitive to neighborhood context, and project amenities. Planning staff feels that the submitted plans and elevations exhibit all of these elements, to an extent that the minimum requirements can be met.

At the April 3, 2006 meeting, the Technical Review Committee and approved the proposed concept plan, based on the conditions outlined in the staff report.

At the May 3, 2006, meeting, the Planning and Zoning Commission voted unanimously to recommend approval.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the TRC are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The proposed use is compatible with the surrounding natural features and topography.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** Staff does not expect that the proposed use would have anything more than a minimal impact on property values, and expects that the impact could just as likely be in a positive direction as negative.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The proposed project would be in harmony with these characteristics of the area. While the layout differs from any existing residential development in the immediate area, staff feels that the design would be complementary to the neighborhood.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The adopted Smart Growth Land Use Policies listed in Asheville's **City Development Plan 2025** state that compatible, higher density commercial and residential infill development should be encouraged, that existing neighborhoods near Downtown Asheville should be strengthened through infill development, and that traditional neighborhood development patterns should be recognized and encouraged. Further, the plan makes numerous references to the need for affordable housing, calling it "one of the most pressing

problems facing the City of Asheville." The exceptional design elements which a project must provide to qualify for the maximum density bonus are all in keeping with the New Urbanism concepts espoused in the plan. Thus, staff finds this project to be in compliance with the Comprehensive Plan.

One of the goals expressed in the Strategic Operating Plan is increased employment training opportunities. Vocational training is among the services that the proposed family care home will offer to its residents. Another plan goal is an increased supply of affordable housing. The applicant has stated that all the units will meet the City's rental rate requirements to qualify as affordable housing. The proposed development therefore would further two of the goals of the Strategic Operating Plan.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The project's location near McDowell Street ensures access to transportation facilities and other services. Transit route 6, 12, and 18 serve the area. In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Proposed project would provide affordable housing and vocational services – both goals of the strategic operating plan.
- Proposed project exhibits elements of exceptional design.
- As of this writing, staff has received no indication of opposition to the project.
- Overall mission of project could be described as a helpful one for the community.
- Proposed design is of a higher density than the surrounding single-family developments.

Staff is of the opinion that the proposed conditional zoning and concept plan would represent a net benefit to the community and therefore recommends approval of the request.

Ms. Lisa Roberts Allen, property owner, spoke in support of the project which will offer affordable housing.

Mr. George Young, area resident, said that over 35 years ago this area was considered an East Riverside urban renewal area and designated for single-family structures. He urged Council to keep this single-family designation.

Mayor Bellamy closed the public hearing at 6:43 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3364 to conditionally zone one lot located on Old Asheland Avenue from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Zoning with a density bonus for proposed affordable housing, subject to the following condition that all

outstanding issues in the TRC staff report be addressed, noting that this request is reasonable based on the information provided in the staff report. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 with Mayor Bellamy voting "no".

ORDINANCE BOOK NO. 22 - PAGE 481

At 6:45 p.m., Councilwoman Cape returned to the meeting.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CONVENTIONAL WISDOM TO DEVELOP A COST ANALYSIS FOR REFURBISHING AND UPGRADING THE CURRENT CIVIC CENTER FACILITY

Mayor Bellamy said that this item has been requested to be continued to the June 13, 2006, meeting in order to receive additional information. Therefore, Councilman Davis moved to continue this matter to June 13, 2006. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 vote, with Councilman Freeborn voting "no."

VII. OTHER BUSINESS:

Councilman Mumpower encouraged citizens to attend the City's Memorial Day celebration.

Councilman Freeborn thanked the local Federal Bureau of Investigation for their citizens information session explaining how they operate locally and how they assist citizens.

The following claims were received by the City of Asheville during the period of May 5-18, 2006: Tony May (Sanitation), Charter Communications (Water), Patrick Henry (Police), Erin McQueen (Sanitation), Terry Walz (Water) and Bellsouth (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Biltmore Park Traffic Calming
